POSTDOCTORAL RESEARCHER

Position Title: Postdoctoral Researcher

Hiring Unit: Department of Pharmacology and Therapeutics
Faculty of Medicine

Name of Immediate Supervisor: Co-supervised by: Barbara Hales, Steve Maguire, and Jaye Ellis

Location of Work: McIntyre Medical Sciences Building

Work Schedule: 35 hours/week

Working Hours: Working Hours: 9 a.m. – 5 p.m. (work hours negotiable)

Planned Start Date & End Date: Start Date: April 2019 or as soon as possible. One year agreement which may be renewed contingent upon available funds, mutual agreement and eligibility for postdoctoral registration.

Salary Range: Starting at CAD $42,000

Posting Period: October 12, 2018 – December 15, 2018

PRIMARY DUTIES

Professor Barbara Hales, Department of Pharmacology and Therapeutics, Faculty of Medicine, McGill University, is currently seeking a talented Postdoctoral Fellow to join an exciting research team investigating the exposure and effects of exposure to three families of chemicals with activity as endocrine disruptors on human health (EDCs) – bisphenols, phthalates, and flame retardants. The project is multidisciplinary, spanning toxicology/reproductive health, epidemiology, law and business. It aims to produce both health and social science knowledge relevant to understanding ‘regrettable’ and ‘informed’ substitution of EDCs. Ideally, candidates will have a strong interest (and perhaps some experience) in working across disciplinary boundaries and work closely with policy makers.

QUALIFICATIONS

Qualified candidates should be self-driven and highly motivated individuals with an established track record of success. Applicants must have completed a Ph.D. in a relevant discipline (see above) within the last two years. They should also have experience, or a demonstrated interest, in chemicals management policy and/or the communication of scientific insights to actors in government, civil society organisations, and/or members of the public. In addition, they should have primary publications in highly-ranked English language scientific journals, fluency in written and spoken English, the ability to work cooperatively with members of the lab, and strong organizational skills. The salary for this position will be commensurate with experience. Canadian citizens and permanent residents will be given priority.

HOW TO APPLY

For prompt consideration, please email the following items to Ms. Elise Boivin-Ford (elise.boivin-ford@mcgill.ca):

- Cover letter (including a statement of research interests and prior experience in related research)
- CV with bibliography
- PDF of recent publications or manuscripts ready for submission
- Contact information for 3 references

McGill University is committed to equity in employment and diversity. It welcomes applications from indigenous peoples, visible minorities, ethnic minorities, persons with disabilities, women, persons of minority sexual orientations and gender identities, and others who may contribute to further diversification.
