Support the Creation of the Psychiatry 75th Anniversary Fellowship!

"Latest news flash: We have just reached 10% of our $100,000 goal!"

In commemoration of the department’s 75th anniversary, we will be creating the Psychiatry 75th Anniversary Fellowship. This fellowship will maintain and enhance the department’s legacy of providing exceptional training to the next generation of clinicians and researchers. This cross-hospital fellowship, rotating among the three McGill sites and research centers, will support trainees in the pursuit of excellence related to brain and mental health clinical care, research, education and innovation.

We will be announcing the total amount raised by our community during the 75th anniversary celebrations on November 29, 2018. You can make your contribution in numerous ways and all donations are tax deductible in Canada, the United States, and in other select countries. Please click here to donate now!

From the Residency Program Office: Weekly Information Capsule

Did You Know that you cannot give a resident a borderline or unsatisfactory mark on any competency on their ITER or as their mid-term or final evaluation? As per McGill evaluations and promotions guidelines you must discuss significant weaknesses with residents once observed and offer residents coaching to help them improve!

Upcoming Events

**Ongoing registration**
Department of Psychiatry’s 75th anniversary pre-registration
