Course Title on Transcript	Health Psychology									
Course Title on Calendar	Health Psychology.									
Rationale		The course is an introduction to the field of Health Psych. It is a prereq of Psyc 533 (International Health Psychology). The course is taught in a large lecture format and does not involve making presentations or other advanced and in-depth work that typically characterize 400 level courses. However, it does involve a writing assignment. A change in number to a 300 level will more accurately reflect the course content and what is expected of students. It is restricted to U2 and above because it requires some sophistication and general background.								
Responsible Instructor		Baerbel Knaeuper								
Course Description	A survey of major issues in the developing field of	A survey of major issues in health psychology:								

	health psychology: historical perspective; health effects of stress; pain mechanisms and management; prevention and management of chronic diseases, hypertension, coronary heart disease, cancer, and immunological disorders. Behaviour change strategies for smoking, overeating, physical inactivity, and sexual risk behaviour.	historical perspective; health effects of stress and stress management; pain mechanisms and management; prevention and management of chronic diseases, hypertension, coronary heart disease, cancer, and immunological disorders. Behaviour change strategies for smoking, weight regulation, physical inactivity, and sexual risk behaviour.
