Course Title on Transcript	Systemic Human Anatomy									
Course Title on Calendar	Systemic Human Anatomy.									
Rationale		In the past, tutorials were offered unofficially, however they have been proven to be very beneficial to the class. Thus, in an effort to plan and give students advanced notice has to when the tutorials are offered, we propose including these in the calendar and the timetable. It is an integral part of the course which is used to solidify the material taught in the lecture and the lab.								
Responsible Instructor										
Course Description	Introduction to the gross anatomy of the various organ systems of head, neck and trunk regions of the human body. Practical tutorials include studies of prepared specimens, use of the anatomical museum and audio-visual materials. This course is limited in size. Selection of students (other than									

	those requiring the course as part of their program) will be made after the first lecture. (Admission is guaranteed for all students enrolled in programs in the Department of Anatomy and Cell Biology for which ANAT 214 is a required course.)	
Teaching Dept.	0212 : Anatomy and Cell Biology	
Administering Faculty/Unit	SC : Faculty of Science	
Prerequisites	Prerequisites: BIOL 112 (or CEGEP equivalent), PHGY 209 and PHGY 210
