20. Rationale

To give Cognitive Science students a chance to become involved in original research under the supervision of McGill Faculty members in Cognitive Science. The proposal is consistent with the Boyer report on the importance of discovery-oriented undergraduate education. There are two courses, one offered in Fall, the other in Winter. Students may take both courses, each for a different project. Research courses in the participating Departments are often reserved for students enrolled in a Department's programs. Consequently, Cognitive Science students need their own research courses. The credit weighting is based on extensive experience with research courses in the Dept. of Psychology.

Continued from Page 2, BOX 19, Supplementary Information

The student must find a Faculty research advisor in the Departments of Linguistics, Philosophy, Physiology, or Psychology, or the School of Computer Science. A research proposal worked out with the research advisor requires approval of the Coordinator of the Cognitive Science Program. The research will be reported in a scholarly paper to be evaluated by the research advisor and a second reader appointed by the Coordinator of the Cognitive Science Program. Please see regulations concerning Project Courses. COGS 401 is not a prerequisite to COGS 402. Thus the two courses can be done in either order, or either of the courses can be done if a student is to take only one of them.
