

# MEMORANDUM

**TO:** Academic Committee  
Faculty of Science

**FROM:** Laurie Hendren  
Associate Dean (Academic)  
Faculty of Science

**DATE:** September 18, 2007

**SUBJECT:** Renaming of Internship Option (IYES to IYS)

Students in any B.Sc. program in the Faculty of Science are currently able to take the IYES (Internship Year in Engineering and Science) Option as part of their studies. Recently this option has been separated into Engineering and Science components, with each component being administered by its respective faculty. It is therefore proposed that for all B.Sc. programs, the IYES (Internship Year in Engineering and Science) Option be renamed to the IYS (Internship Year in Science) Option, effective January 2008.

In addition, two new courses (FSCI 200, Industrial Practicum I, FSCI 300, Industrial Practicum 2) will be introduced. All students who complete both courses will have the Internship Option added to their transcript.
