6.0 Revised Program Description (Maximum 150 words)

The Computer Science Minor may be taken in conjunction with any program in the Faculties of Science and Engineering (with the exception of the other programs in Computer Science). Student must obtain approval from the adviser of their main program. Students are strongly encouraged to talk to an adviser of the School before choosing the complementary courses. Approval must be given by the School of Computer Science for the particular selection of courses to be credited towards the Computer Science Minor. This should be done before registering for the final term of studies. All courses must be passed with a grade of C or better.

Students may receive credit towards their Computer Science Minor by taking certain approved courses outside the School of Computer Science. These courses must have a high computer science content. A student will not be permitted to receive more than six credits from such courses. These courses must be approved by the School of Computer Science in advance. If a student's Major program requires Computer Science courses, up to six credits of Computer Science courses may be used to fulfill both Major and Minor requirements.
