8.0 Rationale

The BSc Faculty Program in Psychology has outlived whatever usefulness it may have had. Although other Faculty Programs in Science may be useful for pre-med, the only use anyone can remember for this program was to allow students who could not pass statistics to still obtain a BSc in Psychology. This concern no longer applies, if it ever did, because Science students typically come to McGill with several Calculus courses, all of which would be mathematically more challenging than an introduction to statistics. Consequently, only a handful of students enroll in this program. Those who do enroll usually switch to a Major program when they figure out that the main purpose of the Faculty program is to avoid statistics. The BA Faculty Program in Psychology was abolished years ago.
