Rationale	<p>Our department currently offers two accelerated Calculus sequences: MATH 150/152 for engineering students, which covers the material of MATH 140/141/262 in two semesters, and MATH 150/151 for non-engineering students, which covers the material of MATH 140/141/222 in two semesters. After a recent revision of MATH 262 this course has become equivalent to MATH 222. MATH 150/151 is therefore suitable for both engineering and non-engineering students and there is no need for MATH 152 anymore.</p>				
Course Description	Integration, methods and applications, Laplace and wave equations, implicit functions, infinite sequences and series, power series and applications to ODE, arc length and curvature, tangent, normal and conormal and applications.
