Rationale		BIOL 215 was first given in the Fall of 2004. It was created as a prerequisite to BIOL 304 and 308. Since most of the students who may have taken BIOL 304 and 308 without this prerequisite should have graduated, it is no longer necessary to list them as a restriction.				
Responsible Instructor						
Course Description	An introduction to the fundamental processes of ecology and evolution that bear on the nature and diversity of organisms and the processes that govern their assembly into ecological communities and their roles in ecosystem function.
