Section I – Description of Unit

The School of Information Studies (SIS) focuses on the identification, acquisition, organization, retrieval and dissemination of information to meet people’s needs in diversified information, knowledge and learning environments. It currently offers four graduate programs: Master of Library and Information Studies (MLIS), Graduate Certificate and Graduate Diploma in Library and Information Studies, and Ph.D. The MLIS is a 48-credit course-based program designed to train information professionals and has been continuously accredited every seven years by the American Library Association since 1927. SIS offers one of seven accredited MLIS programs in Canada. The main goal of the MLIS program offered at McGill University is to provide the intellectual foundation for careers in archival studies, knowledge management and librarianship.

SIS has comprised ten faculty members since November 2010 as one professor was hired at that time, an Administrative Assistant, a Student Affairs Coordinator, a Graduate Secretary, and an Information Technology Resources Coordinator (a casual position created after the departure of our Professional Associate). The research projects conducted by SIS professors and funded by various grant agencies fall under four clusters: study of information seeking behaviour of various groups; information resources in context; knowledge management and representation; and human computer interaction.

Since the last annual report (2008-2009), a new Ph.D. program was implemented in Fall 2009, the School moved into a new building during Summer 2009 (at 3661 Peel) and the MLIS program was re-accredited in January 2010 as planned in the previous strategic plan. The goals and objectives for 2009-2010 and 2010-2011 included the hiring of three new faculty members, increased dissemination of our research results and the initiation of a review of the MLIS curriculum to better address the challenges of the information society and the shifting expectations of the employers of our graduates.

Section II. Past year’s activities (2009-2010)

Highlights:

New Research Grants and Awards

Professors Jamshid Beheshti and Andrew Large, with SIS Affiliate Member Charles Cole, have received a three-year Social Sciences and Humanities Research Council award in the amount of $139,953 to study “Virtual environments as an intervention agent in the information-seeking process of elementary school students.”

The goal of the research is to use virtual environments to assist students in their information-seeking process when completing assigned school tasks. The researchers will
use Kuhlthau’s Information Searching Process (ISP) model as a framework for this study. ISP is a user-centred model, incorporating three realms of experience: cognitive (thoughts), affective (feelings), and physical (information searching activities). The model consists of six stages through which students progress in their information-seeking activities. At each stage, the students’ realms of experience change, with uncertainty playing a crucial role in the state of these changes. Through intervention, however, the uncertainties may be reduced and directed towards a more creative and innovative thought. VE interventions may also reduce anxieties, frustration, and confusion, feelings that are experienced during the third stage of ISP.

Assistant Professor Elaine Ménard has received a three-year grant from Le Fonds Québécois de la Recherche sur la Société et la Culture (FQRSC- Établissements de nouveaux professeurs-chercheurs 2010-2013) in the amount of $38,426 for her project entitled "Development of a taxonomy for the indexing of digital ordinary images in a multilingual retrieval context."

The objective of the project is to index digital images to enhance their retrieval in a monolingual and multilingual context. The results of this research and the use of the bilingual taxonomy will be a stepping stone, especially for the design of browsing interfaces for large image collections and the conception of other taxonomies, classificatory tools, thesauri and other similar indexing tools for all image types and multimedia documents. The new taxonomy is intended to be a powerful tool for use by cataloguers or indexers who are describing works of art, architecture, material culture, archival materials, visual surrogates or bibliographic materials by providing helpful information for searchers. It will also act as a search assistant to enhance end-user access to online visual resources. Moreover, since images are an integral part of online catalogues, the future taxonomy will also present an interesting improvement for commercial providers who give their users the opportunity to see images of their products.

Professor Catherine Guastavino is a co-investigator on a new NSERC Collaborative Research and Development (CRD) Grant – Project entitled “Physical characterization and perception of vibration transmission of road bike components” in collaboration with Professor Yves Champoux of l’Université de Sherbrooke (PI) with Vroomen White Design Inc. This $335,692 grant is for three years. Professor Guastavino’s contribution will be to investigate how the notion of dynamic comfort is conveyed in various information sources (specialized journals, manufacturers' websites, online forums, interviews) in different communities of practice, contrasting linguistic (French and English) and cultural (North America vs. Europe, different levels or expertise) factors; to validate, from the perspective of the user, a simulator to reproduce in laboratory settings the complex sensations one has when riding a bike; to develop new methodological tools to investigate dynamic comfort when riding a bike on virtually recreated roads (on the simulator) and real roads; to investigate the effects of vibrations on comfort and well-being using qualitative and quantitative methods and to define dynamic comfort metrics.
Professor Guastavino is also one of five co-investigators on an interdisciplinary collaboration with Dutch, French, Belgian and German researchers. This four-year, $2,400,000 (€1,500,000) grant from the Innovation Centre for Advanced Sensors and Sensor Systems, entitled “Human-Centered Soundscape Research,” is directed by Professor T. Andringa of the University of Groningen. The project aims at identifying and modelling cognitive processes for auditory information processing in complex sonic environments, with an emphasis on public outdoor spaces in large cities. Topics include categorization of sound sources, automated sound recognition, sound indexing, documenting and archiving sonic environments, effects of environmental sound exposure on well-being, design of cognitive sensor systems for acoustic monitoring, and sound quality evaluation and descriptors. This grant will provide funding ($200,000) for a doctoral student (three years) and for one post-doctoral fellow (one year) under the supervision of Dr. Guastavino. The institutions involved are INCAs and University of Groningen (Netherlands), CNRS and Université Paris 6 (France), Ghent University (Belgium), and Technical University of Berlin (Germany).

New Award
Each year the Quebec Library Association presents an award to a librarian for outstanding library service. This award recognizes an individual who has enriched librarianship in Quebec and has made a lasting contribution to the profession. Professor Peter McNally was the 2010 recipient of the Anne Galler Award presented by l’Association des Bibliothécaires du Québec / Quebec Library Association.

New Appointment
Dr. Carolyn Hank, a PhD graduate from the University of North Carolina at Chapel Hill, has been appointed Assistant Professor at the School in January 2011. Prior to entering the doctoral program, she worked at OCLC Research in Dublin, Ohio. She holds a Bachelor’s degree in Psychology from Antioch College and a Master’s in Library and Information Science from Kent State University. She is a 2010 recipient of the Eugene Garfield Doctoral Dissertation Fellowship from Beta Phi Mu for her doctoral dissertation, “Scholars and their blogs: Characteristics, preferences and perceptions impacting digital preservation.” In her research and teaching, she brings expertise in digital curation, scholarly communication and digital publishing. Her recent research activities have been on blogging and preservation, as well as digital curation curriculum development. She has presented her research at conferences in the U.S., Canada and Europe. To highlight a few of her recent contributions, she was program chair of DigCCurr2009: Digital Curation Practice, Promise, and Prospects, and co-editor of the conference Proceedings.

New Student Fellowships and Awards
Rhiannon Gainor, an incoming Fall 2010 PhD student supervised by Professor France Bouthillier, was awarded a J.W. McConnell Memorial Fellowship through the Faculty of Education. These awards were established by the J.W. McConnell Foundation to support graduate studies and research at McGill, and so to strengthen, in quality and in numbers,
the academic staff of Canadian universities and schools.

David Tang, PhD candidate, was awarded a three-year FQRSC grant. David’s research concerns the use of health professionals’ feedback in improving online health information resources. In collaboration with the Canadian Pharmacists’ Association, he is performing content analysis on clinicians’ feedback comments, developing a system to facilitate the use of comments, and exploring the organizational factors (e.g., needs, resources) related to implementing the system. His work is co-supervised by Dr. France Bouthillier and Dr. Pierre Pluye, Associate Professor, Department of Family Medicine.

Yusuke Fitzgibbons, a PhD candidate under the supervision of Professor Joan Bartlett, was awarded the 2010-2011 Tim Casgrain Fellowship by the Faculty of Education. This fellowship is competitively awarded on the basis of academic merit to an outstanding graduate student in the Faculty of Education whose area of study focuses on efforts to improve literacy in Canada, with a preference for new areas of literacy such as economic, financial, technological and cultural literacy.

**Student Chapters Activities**

Student chapters remained very active again this year in organizing a number of events which were very successful in attracting attendees from McGill and from the professional community.

The ACA Colloquium took place in March 2010 with the theme of “Archives of the Future: Exploring Current Trends and Issues Facing the Archival Community.” Plenary Speaker Sean Berrigan, Senior Advisor to the Librarian and Archivist of Canada, addressed the topic with a talk on “Paradigms Found: Memory Institutions Meet the 21st Century.” MLIS students made presentation on varied topics as: “Archives, Museums, and Christian Boltanski's Fragmented Interpretations of the Past”, “Best Practices in Preservation and Digitization of 78 rpm Discs and Cylinder Recordings”, “New Approaches to Teaching and Outreach in Academic Archives and Special Collections”, and “War Archives and Collective Memory: the of the Next Generation of Archivists” (F. A panel with Shannon Hodge, Archivist, Jewish Publish Library Archives, Iain Blair, Archivist, Gay Archives of Quebec and Jackie Hayami-Stevens, Japanese-Canadian Cultural Centre, discussed “Visual Literacy and the Photographic Record”.

The 3rd annual Web 2. You Conference was held in February 2010. Michael Porter and Jenica Rogers were both keynote speakers. Michael Porter is the Communications Manager at WebJunction.org in Seattle, Washington, and has also worked at OCLC Western, ON, the Bill & Melinda Gates Foundation U.S. Library Program and the Allen County Public Library, Fort Wayne, IN. Jenica Rogers is Director of Libraries at the State University of New York at Potsdam. In addition, speakers such as Graham Lavender, Liaison Librarian, Howard Ross Library of Management, McGill Libraries, Michael Lenczner, a Montreal-based entrepreneur and consultant who works on public-interest technology projects, Patrick Lozeau, currently working with inLibro, a Montreal-
based support company for open source software in libraries, and Michele Ann Jenkins, consultant, made the day a lively one for all attendees.

For the first time, the School’s Career Fair was organized in tandem with the students at our sister school at l’Université de Montréal, l’École de bibliothéconomie et des sciences de l’information (EBSI). Over 40 diverse employers met with more than 200 students at la Grande Bibliothèque (Bibliothèque et Archives nationales du Québec).

Adam Baron, MLIS II, was selected as the SIS student representative to the Canadian Library Association (CLA) conference in Edmonton at the beginning of June. The conference gives the selected student an opportunity to network with information professionals and to hear about exciting initiatives from across the country. In his role as “Student to CLA”, Adam worked closely with students from the other Canadian library schools, local volunteers and the association. This unique experience provided additional insights that will be useful for Adam as 2010-2011 President of the CLA McGill.

**International involvement**

The McGill-SIS chapter of Librarians Without Borders was very active in 2009-2010. Highlights from the year included a talk on the CODE foundation initiatives in Ethiopia, and another on the Lubuto Library Project in Zambia ([http://www.lubuto.org](http://www.lubuto.org)). However, the primary project for the year was a partnership with the Miguel Angel Asturias Academy, a non-profit school in Xela, in Guatemala, to shape a vision and create an action plan for their library, which was under construction. This was a project of firsts: not only was this the first group of library students from McGill to embark on an international service trip of this kind, they were also Asturias Academy’s first visitors from Canada. The group of eleven students wrote a handbook of guidelines and best practices that would cater to the needs of the school. These included recommendations for a library mandate, collection development policy, cataloguing practices, circulation operations, floor plans, shelving and programming.

Professor Eun Park spent time in Korea for the InterPARES (International Research on Permanent Authentic Records in Electronic Systems) Project as she played a significant role in the Korean Team in identifying the requirements for migration strategies for long-term digital preservation at the National Archives in Korea. She also co-hosted an international symposium at Durban, South Africa, entitled Digital Futures Symposium: Participatory Archives in the age of AIDS. Researchers from Canada, Australia, United Kingdom and South Africa participated to create an international network.

Professor Bouthillier was involved in organizing a colloquium within the 23rd Entretiens Jacques-Cartier in Lyon, France, which was held on November 23-24 2010, in collaboration with the École nationale supérieure des sciences de l’information et des bibliothèques. Professors Bouthillier and Ménard each presented a paper on the evolution and future of libraries and information science.
**Collaborative activities**

The annual conference of the Canadian Association for Information Science, held in Montreal at Concordia University in 2010, was co-chaired by Professors Elaine Ménard from SIS, McGill, Sabine Mas, from the École de bibliothéconomie et des sciences de l’information, Université de Montréal, and Valerie Nesset from the University at Buffalo, State University of New York.

**Teaching and Learning**

The number of applications remained high with 255 applications received for admission in the MLIS program in Fall 2010. In comparison, 119 applications were received in 2005-2006. The number of applications for the new doctoral program also remained high with 20 applications as compared to 11 in 2005-2006.

**Graduate Students**

Tables 1 and 2 show the headcount and WSUs for all the programs offered at SIS. The figures in these tables indicate that the total enrolment and the WSUs have increased significantly since 2000.

**Ph.D. Program, Graduate Diploma and Certificate Programs**

The Ph.D. Program, introduced in 2009, continues to attract applicants. With the new cohort of five students, there are currently 30 doctoral students in the PhD in Information Studies.

**Student Funding**

The results of the SIS survey among its master’s and doctoral students are presented in Table 3. They reveal that our students received almost $600,000 which represents a slight decrease in comparison to the funding received the previous year ($687,124) due to fewer foreign scholarships. It is, however, a significant amount given the number of students enrolled at the SIS, and reveals steady sources of funding for our students.

Research

In 2009-2010, six SIS professors submitted 11 research grant proposals to various funding agencies, individually or collaboratively. Five proposals were approved and funded (1 individual grant and 4 collaborative grants), and two proposals are still under review. Again this year, this represents a very good success rate and an increased involvement of SIS professors in various research teams. New and current grants are provided by SSHRC, FQRSC, NSERC, and Microsoft. The productivity of SIS professors remains high both in terms of publications and presentation at conferences. Publications issued in 2009-2010 include one book, 8 book chapters, 22 refereed journal articles, 30 refereed conference proceedings, and 4 posters. SIS professors were active in 37 conference presentations in North America, Europe and Asia, and were solicited to give 13 talks locally and internationally.

Academic Staff

Prof. Beheshti was appointed Acting Executive Director of Infrastructure from September 2010 until December 2010. Prof. Large was appointed Associate Dean Research and Graduate Students in June 2009 until August 2010. Professor McNally and Park were on sabbatical leave in 2009-2010, and Professor Beheshti was on sabbatical leave for six months from January to June 2010. Professor Guastavino was on maternity leave from September 2009 to August 2010.

Involvement in the community

Faculty members remained very active in both academic and professional communities, attending meetings, chairing committees, and acting as external reviewers and members of boards of directors of various organizations. Professor Dalkir was involved as President of the Special Libraries Association Eastern Chapter. Professor Large was the Chair of the Conference Program Committee of the American Society for Information Science and Technology in 2010. Prof. Bouthillier is still President of the Canadian Council for Information Studies. Apart from the School committees, faculty members were involved in many University committees including more than 20 committees in the Faculty of Education and other Faculties, and more than 15 committees in the University at large. Faculty members of SIS also acted as pro-deans for more than 10 doctoral oral examinations. SIS professors are equally involved in the community outside of McGill including many editorial boards of academic journals, referees for academic conferences and advisory boards and boards of directors of regional and national organizations and professional associations as listed in Appendix 1.

Appendix I: Honours, Awards and Prizes

Bartlett, Joan
Member, McGill Centre for Bioinformatics (ongoing)
Reviewer, Education for Information (ongoing)
Reviewer, American Society for Information Science and Technology Annual Conference (ongoing)
Reviewer, The Canadian Journal of Information and Library Science (ongoing)
Reviewer and Program Committee, Information Interaction in Context Conference (ongoing)
Reviewer, The Canadian Journal of Library and Information and Library Practice and Research (ongoing)
Reviewer, International Journal of Information Management (ongoing)
Reviewer, European Conference on Digital Libraries (new)
Reviewer, Hypertext Conference (new)
Reviewer, Canadian Association for Information Science Annual Conference (ongoing)
Past-president, Canadian Association for Information Science (new)
Director, Quebec Library Association (new)
University Liaison, SLA-Eastern Chapter (new)
Member, UNESCO, Implementation of Information Literacy Indicators (new)
Member, Pointe-Claire Public Library, Advisory Board (new)
Beheshti, Jamshid
Member, Editorial Board, *Library and Information Science Research* (ongoing)
Reviewer, *The Canadian Journal of Information and Library Science* (ongoing)
Member, Program Committee 2007, Canadian Association for Information Science (ongoing)
Reviewer, *Journal of the American Society for Information Science* (ongoing)
Reviewer, *Design Principle & Practice: An International Journal* (new)
Reviewer, American Society for Information Science and Technology Annual Conference (ongoing)
Reviewer, European Science Foundation (ongoing)
Member, International Conference on Asian Digital Libraries Program Committee (ongoing)
Scientific Expert, Research Branch, Ministry of Research and Innovation, Government of Ontario (new)

Bouthillier, France
Director at-large, Board, American Society for Information Science and Technology (new)
Chair, Research Grant Award Committee, ALISE (new)
Member, Editorial Board, *Revue électronique suisse des sciences de l’information* (ongoing)
Member, Advisory Committee, John Abbott College, Information and Library Technologies Program (ongoing)
Reviewer, Social Sciences and Humanities Research Council of Canada (ongoing)
Reviewer, *European Journal of Marketing* (ongoing)
Reviewer, *The Canadian Journal of Information and Library Science* (ongoing)
Reviewer, *Journal of Information Science* (ongoing)
Reviewer, *Journal of the American Society for Information Science* (ongoing)
Reviewer, American Society for Information Science and Technology Annual Conference (ongoing)
Member, Program Committee, Canadian Association for Information Science (ongoing)
President, Canadian Council for Information Science (ongoing)
Scientific Research Chair, Colloquium Bibliothèques et Sciences de l’information, 23ième Entretiens Jacques-Cartier 2010 (new)

Dalkir, Kim
Reviewer, *European Journal of Information Systems* (ongoing)
Reviewer, *Education for Information* (ongoing)
Reviewer, *Connections* (ongoing)
Reviewer, *Journal of Knowledge, Culture and Change Management* (ongoing)
Reviewer, *McGill Journal of Education* (ongoing)
Reviewer, *E-Service Journal* (ongoing)
Member, Advisory Board, CAPLA (Canadian Association for Prior Learning Assessment)
Secretary, Board, Canadian Association for Information Science (ongoing)
External expert, Management Committee, SSHRC (ongoing)
Member, ALISE Teaching Excellence Award Committee (ongoing)
Conference Chair, International Conference on Intellectual Capital, Knowledge Management and Organizational Learning 2010 (new)
Past President-Elect, SLA Eastern Chapter (new)
Panel Chair and Reviewer, Intellectual Capital and Knowledge Management Conference 2010-2012 (new)
Member, Program Committee, Joint Conference on Digital Libraries 2011 (new)
Member, Program Committee, Congrès des milieux documentaires 2011 (new)

**Guastavino, Catherine**
Research axis 4 co-leader, Centre for Interdisciplinary Research for Music, Media and Technology, McGill University (ongoing)
Member, Editorial Board, *Open Acoustics Journal* (ongoing)
Member, Editorial Board, *Canadian Journal of Information and Library Science* (ongoing)
Member, Editorial Board, *Les cahiers du numérique* (ongoing)
Reviewer, *Journal of the Acoustical Society of America* (ongoing)
Reviewer, *Interacting with Computers* (ongoing)
Reviewer, *Acta Acustica united with Acustica* (ongoing)
Reviewer, *Education for Information* (ongoing)
Co-Chair, Canadian Association for Information Science Annual Conference (ongoing)
Reviewer, *Lecture Notes in Computer Science* (ongoing)
Reviewer, *Journal of the American Society for Information Science and Technology* (new)
Reviewer, CIM (Conference on Interdisciplinary Musicology) (ongoing)
Reviewer, American Society for Information Science and Technology Conference (ongoing)
Grant reviewer, National Science Foundation (new)

**Large, Andrew**
Chair, CN-Pratt-Grinstead Chair in Information Studies (ongoing)
