

LUCYNA M. LACH

Curriculum Vitae

Dr. Lach's program of research has two main streams, the first focusses on documenting social determinants of living a life of quality among children, youth and young adults with neurodisabilities and their families, and the second focuses on the co-construction of systems of care that promote navigation of and access to supports and services needed by these individuals and their families. Dr. Lach's projects addressing social determinants have documented caregiver health, parenting, income trajectories, educational outcomes, and utilization of health services by children and their primary caregivers. Funded by Kids Brain Health Network (KBHN) and using administrative and clinical databases, this work has revealed the heightened challenges faced by this population in the Canadian context. Dr. Lach is also collaborating with Dr. David Nicholas (University of Calgary) to increase capacity across and within government and non-government organizations to create transparent and more efficient pathways of care. Organizations that families must navigate access to have come together in Vancouver, Edmonton, Watson Lake (Yukon), and Montreal, to collaborate and innovate through program development and training. In addition, Dr. Lach is part of CHILDBRIGHT, and is co-leading (along with Dr. Patrick McGrath) a randomized control trial entitled Parents Empowering Neurodiverse Kids. This project is evaluating a web-based parenting program that combines group coaching and educational modules, with parent-to-parent support for parents whose children have brain-based development disorders such as Autism Spectrum Disorder or Intellectual Disability AND a mental health problem. Dr. Lach is also a peer-reviewer for numerous journals and funding bodies.

As Associate Dean in the Faculty of Arts (2012-2021), Dr. Lach oversaw the Student Affairs portfolio where she led a number of initiatives to improve support that students receive from their point of entry until graduation. In this role, she provided academic leadership and contributed to various university-wide committees addressing student success and well-being. In the community, Dr. Lach is a board member on the CIUSSS Centre-Ouest Board of Directors, the Board of Governors at Centre Miriam, and the Board of Directors of Dans La Rue. Through her research and community engagement, she is committed to improving the lives of neurodivergent children, youth, and young adults and their families.
