Course overview: This interdisciplinary course introduces physical and occupational therapy students to the fundamental principles of professionalism within a healthcare context. Physical therapy students will be introduced to the profession of physical therapy and its various domains of practice. Students will learn the basic skills necessary for professional communication and interactions within professional healthcare settings. Students will have the opportunity to practice these skills through several hands-on community and on-campus practical activities. The use of reflection as a tool for self-appraisal and critical thinking will be emphasized in this course. Additional concepts covered in this course will include; using evidence to support professional reasoning, promoting cultural safety within a healthcare environment, ethics and ethical considerations in professional practice, professional interactions within an interdisciplinary healthcare team, managing conflict and challenging situations within a professional setting, professional advocacy, and the use of professional touch and massage in rehabilitation.

Learning Objectives: With attendance, active participation in classes and labs, and self-directed learning activities, students will develop the following core competencies as they relate to the roles for physiotherapists¹:

Expert

- Conduct a collaborative interview to obtain relevant information about client's health, functional abilities, participation, personal and environmental factors.
- Begin to identify the client's personal and environmental factors affecting his/her functional abilities, physical performance, and participation.

¹ Essential Competency Profile for Physiotherapists in Canada, October 2009.

Communicator

- Employ effective and appropriate verbal and nonverbal communication with clients, peers and educators.
- Listen effectively and demonstrate an awareness of self behaviours and the responses of others and adapt communication appropriately.

Collaborator

- Establish and maintain interprofessional relationships, which foster effective collaborations.
- Demonstrate an understanding of and respects the differing perspectives during collaborative activities.

Advocate/Change agent

- Begin to recognize the health needs and concerns of individual clients, populations, and communities and how they relate to physical therapy.

Scholarly practitioner

- Apply principles of self-directed learning through the use of self-evaluation and feedback from classmates, lecturers, professors and clients to reflect upon actions and decisions to continuously improve knowledge and skills.

Professional

- Begin to recognize and identify the roles that physical therapists play in primary health care

Instructional method: On several occasions, classes will be combined inter-professionally with the occupational therapy students.

In this course, instructors will utilize mixed teaching methods including lectures, seminars, group-assignments, and practical activities and assessments. This course is offered in the fall term of the U1 year.

As the instructors of this course we endeavor to provide an inclusive learning environment. However, if you experience barriers to learning in this course, do not hesitate to discuss them with us and/or the Office for Students with Disabilities, 514-398-6009.

Required course materials: No textbook is required for this course. A list of required and suggested readings, handouts, and lecture notes will be posted on *MyCourses*.

Course content:

Topics
<ul style="list-style-type: none">• Physiotherapy “Then” and “Now” and Future directions• Professional Organizations• Professional Roles & Competencies• Scope of practice, ethics• APA format (<i>librarian</i>)• Introduction to professionalism and professional practice• Professional identity development• Bio-psycho-social model/Client-Centered Practice• Communication Skills• Reflective Practice• Teaching and Learning for Patient Education• Interviewing skills• Health Promotion• Summit School• Treating Burn Survivors – Villa Medica• Research in PT• PT clinicien panel• Mental health in Rehabilitation• The role of rehabilitation in Global Health• Clinical site visits• Simulation centre exercises: 1) Communication and Patient Education Skills, 2) Communication and Interviewing skills

Copyright of course materials: Instructor generated course materials (e.g., handouts, notes, PowerPoint presentations, student assignments, etc.) are protected by law and may not be copied or distributed in any form or in any medium without explicit permission of the instructors. Note that infringements of copyright can be subject to follow up by the University under the Code of Student Conduct and Disciplinary Procedures.

Evaluations:

- All assessments will be graded by the course instructors, and/or teaching assistant(s).
- Students have a right to an impartial and competent re-read of any written assessment and, where warranted, a revision of the grade received, by a third party, if requested within a reasonable time after the notification of a mark.
Please note that this revision may result in an increase or decrease of the grade.

- The following is a link to McGill's student assessment policy:
https://www.mcgill.ca/secretariat/files/secretariat/2016-04_student_assessment_policy.pdf

Assessments		Description	%
Assessment 1	Group	Reading Assessment	15%
Assessment 2	Group	Case Study: Client-Centred Approach	15%
Assessment 3	Individual	Practical Assessment Communication Skills	20%
Assessment 4	Individual	Final Exam	50%

Special requirements for course completion and program continuation: In order to pass the course, a grade of at least C+ (60%) must be obtained as a total course mark. In order to pass the course, students must also pass the individual components of the course with a grade of at least a C+ (60%). Please refer to the appropriate sections in the undergraduate calendar on University regulations regarding final and supplemental examinations. This course falls under the regulation concerning individual and group evaluation. Please refer to the section on marks in the Rules and Regulations for Student Evaluation and Promotion of the Occupational Therapy Course Guides.

Plagiarism/academic integrity: McGill University values academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism, and other academic offences under the [Code of Student Conduct and Disciplinary Procedures](#).

Language of submission: In accord with McGill University's Charter of Students' Rights, students in this course have the right to submit in English or in French any written work that is to be graded.

Skills building attendance mark: Attendance to site visits and simulation centre labs is mandatory. Students may not miss more than 15 % (i.e. cannot miss any) of these activities without valid documented reasons (illness, family tragedy, sports). If they do, 10% of the total course mark will be removed.

Consequences of unprofessional behaviours: Students who are flagged for unprofessional behaviour during off-site visits will be required to submit remedial

work. Continued unprofessional behaviours may result in failure of the course and/or academic disciplinary actions.

Consequences of not completing assignments as requested: Late submissions will be penalized 5% per day, including weekends. It is the student's responsibility to verify that all electronic submissions to MyCourses were successfully uploaded. Technical issues will not be accepted as a reason for late submission. As such, early submission of assignments is recommended.

Dress code: Professionalism with respect to dressing is encouraged throughout the course of the semester. *During site visits and SIM Center activities, students must be dressed professionally and wear their nametags.*

Disability: If you have a disability, please contact the instructors to arrange a time to discuss your situation. *Students must contact the Office for Students with Disabilities at (514) 398-6009, and register with the office, before scheduling a meeting with the instructors.*

Technology in class: Your respectful and attentive presence is expected. While you are permitted to use your laptop in class, it is understood that you will not be using your laptop or mobile device for social purposes during class time (e.g. email, facebook, texting, browsing, etc.). Your mobile devices must be on silence during class time.

Course evaluations: End-of-term course evaluations are one of the ways that McGill works towards maintaining and improving the quality of courses and the student's learning experience. You will be notified by e-mail when the evaluations are available on *Minerva/Mercury*, the online course evaluation system. Students are strongly encouraged to complete the end-of-term course evaluations. Please note that a minimum number of responses must be received for results to be available to students.

In the event of extraordinary circumstances beyond the University's control, the content and/or evaluation scheme in this course is subject to change.
