

POTH 612 APPLIED CLINICAL RESEARCH METHODS**Credits:** 4**Pre-requisite:** **(Recommended)** An introductory course in research methods and a course in intermediate level statistics or equivalent.**Lecturers:** Jill Boruff, Noémi Dahan-Oliel, Heather Lambert, Nancy Mayo, Barbara Mazer, Anita Menon, Anik Nolet, Sneha Shankar, Judith Soicher**Course Overview:** An intermediate-level research methods course to promote scholarly clinical practice, and to assist students in the design and implementation of their professional Master's project. This course will be delivered remotely.**Expanded Course Description:** This course consists of pre-recorded lectures, review sessions and workshops targeting different aspects of research design and methods. Sessions cover foundational principles of research design, writing a research proposal, formulating research objectives, aligning the background and methods with the objectives, selecting the sample, data collection and measurement, and data analysis. In collaboration with their project supervisor, students will be self-assigned to lectures on specific types of research design (quantitative, qualitative, knowledge translation, or systematic/scoping reviews) and data analysis (quantitative or qualitative), according to the knowledge and skills required for their project.**Course Structure:** The course is divided into four parts, as described below. Each week, there will be two 1.5 hour sessions (fixed/synchronous/live), in which instructors will review and answer questions about the recorded lecture materials. There will also be a 3-hour workshop period (fixed/synchronous/live). The workshop period will be used to cover specific topics, or for you to work on your research project or course assignments, with course instructors available to answer questions. Zoom break-out rooms will be used for small group meetings and activities.

Part 1: Getting Started - The first 6 weeks of the course will consist primarily of recorded lectures, review sessions with instructors, and workshops. These activities will allow students to acquire the foundational knowledge and skills to begin planning their project and writing their research proposal. **Student groups must meet with their Master's Project supervisor before the fourth week of classes, in order to start planning the research project.**

Note: There are no classes in POTH 612 during week 7 (Oct 11-15)

Part 2: Developing the Project - During weeks 8-10, each student will attend a series of six 1.5-hour sessions within one of four research design streams (quantitative, qualitative, knowledge translation,

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

scoping and systematic reviews). Each student self-assigns to one design stream in consultation with their Master's project supervisor. There will also be time allotted to work on the research project in consultation with instructors, during project workshop.

Part 3: Selecting a Data Analysis Strategy – During weeks 11-12, each student will attend four 1.5-hour sessions within one of two analysis streams (quantitative or qualitative). Each student self-assigns to one analysis stream in consultation with their Master's project supervisor. Another project workshop will take place to work on the research proposal in consultation with instructors.

Part 4: Finalizing the Research Proposal – During the remainder of the course, students will meet with their research group, supervisor, and course instructors, as needed, to complete the written research proposal.

Message from POTH 612 Instructors regarding Remote Delivery: All instructors recognize the challenges that students may be experiencing due to the pandemic and the remote learning context. As a group, we are committed to fostering a supportive and inclusive learning environment, and we have refined the course content and delivery methods with that goal in mind. If you encounter difficulties with any aspect of this course, please do not hesitate to contact us so we can work together to address the situation. We also encourage you to take advantage of the many teaching and learning resources available to McGill students through [Teaching and Learning Services](#).

Expectations for Student Participation: It is expected that students participate, to the best of their ability, in large- and small-group class activities. This can be done through either audio or chat functions in Zoom. In advance of the live review sessions, it is expected that you carefully listen to assigned recordings. It is also expected that you contribute to the review sessions. Your participation will greatly enhance the value of the review sessions and your overall learning.

Session Recordings: Please read the [Guidelines on Remote Teaching and Learning](#). You will be notified through a 'pop-up' box in Zoom if a lecture or portion of a class is being recorded. By remaining in sessions that are recorded, you agree to the recording, and you understand that your image, voice, and name may be disclosed to classmates. You also agree that recordings will be made available in myCourses to students registered in the course.

If you are not comfortable being in a class that is recorded, you may decide to not take part by logging off Zoom. Instructors will make class video recordings available in myCourses so that students who log off will be able to later watch the recording.

Learning Outcomes: This course will cover essential OT/PT competencies and milestones related to the roles/domains of scholarship, communication and collaboration. Upon completion of this course, the student will be able to:

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

Learning Outcomes	OT Role*	PT Domain** (milestones)
Part I – Getting Started		
Describe the overall phases and steps in the research process.	Scholarly Practitioner	Scholarship (6.2.5)
Understand the elements of a research proposal and how to customize the proposal for a specific research project.	Scholarly Practitioner	Scholarship (6.2.5)
Understand the purpose, components, and formulation of research objectives to answer clinical or research questions that will contribute to evidence-based practice.	Scholarly Practitioner	Scholarship (6.2.2)
Carry out a comprehensive literature review on a topic pertaining to rehabilitation research or practice, using recognized databases and other credible resources.	Scholarly Practitioner, Communicator	Scholarship (6.2.3) Communication (2.4.2)
Appraise text by applying principles of scientific writing.	Communicator	Communication (2.2.1)
Describe the features of different quantitative study designs.	Scholarly Practitioner	Scholarship (6.2.5)
Understand the concepts related to maximizing the quality and validity of quantitative studies.	Scholarly Practitioner	Scholarship (6.2.5)
Understand the principles and types of measurement instruments, and their selection and implementation for clinical or research purposes.	Scholarly Practitioner	Scholarship (6.2.5)
Appraise qualitative research according to established principles of methodological rigour, trustworthiness and ethics.	Scholarly Practitioner	Scholarship (6.2.5)
Understand the role of knowledge translation for informed decision-making, clinical practice, and research in rehabilitation.	Scholarly Practitioner	Scholarship (6.1.1, 6.2.6)

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

Learning Outcomes	OT Role*	PT Domain** (milestones)
Part I – Getting Started (continued)		
Understand the importance of systematic and scoping reviews to clinical practice.	Scholarly Practitioner	Scholarship (6.1.1)
Identify the key elements of systematic and scoping reviews.	Scholarly Practitioner	Scholarship (6.1.1)
Understand ethical principles and procedures related to clinical research, and describe the ethical considerations specific to the Master’s Project.	Scholarly Practitioner	Scholarship (6.2.1)
Overall learning outcomes are listed below for Parts 2 and 3. Each instructor will provide additional objectives customized to their topics.		
Part 2 – Developing the Project (Quantitative, Qualitative, Knowledge Translation, or Systematic/Scoping Reviews)		
Integrate the theoretical principles, practical considerations, and potential biases of specific research methodologies into the development of the Master’s research project.	Scholarly Practitioner	Scholarship (6.2.2, 6.2.3, 6.2.4, 6.2.5)
Formulate clear and operational research objectives for the Master’s Project.	Scholarly Practitioner	Scholarship (6.2.2)
Write a comprehensive background that integrates findings from the literature review and that includes the rationale for the study.	Scholarly Practitioner Communicator	Communication (2.2.1, 2.3.1, 2.3.3)
Describe the study sample and recruitment procedures. or Describe information sources and how these sources will be selected or critically evaluated (e.g. articles in systematic/scoping reviews).	Scholarly Practitioner	Scholarship (6.2.5)
Select or develop instruments to measure, record or extract data.	Scholarly Practitioner	Scholarship (6.2.5)
Describe procedures for data collection and management.	Scholarly Practitioner	Scholarship (6.2.5)

McGill University is situated on the traditional territory of the Kanien’kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien’kehà:ka as the traditional custodian of the lands and waters on which we meet today.

Learning Outcomes	OT Role*	PT Domain** (milestones)
Part 3 – Selecting a Data Analysis Strategy (Quantitative or Qualitative)		
Select and describe methods of quantitative or qualitative data analysis, using the appropriate descriptive, inferential or interpretative methods based on the research question and type of data.	Scholarly Practitioner	Scholarship (6.2.5)
Part 4 – Finalizing the Research Proposal		
Write a formal research proposal for the Master’s Project, suitable for submission to a Research Ethics Board.	Scholarly Practitioner, Communicator	Scholarship (6.2.5) Communication (2.2.1, 2.3.1, 2.3.2, 2.3.3)
Prepare written documentation reflective of growing competence in both professional and scientific communication.	Communicator	Communication (2.2.1, 2.3.1, 2.3.2, 2.3.3)
Use relevant information technologies, (e.g. databases and electronic journal databases), to create citations and a bibliography.	Communicator	Communication (2.4.2)
Work collaboratively in research teams, including other students and a faculty supervisor. Teams may also include a clinical supervisor, research assistant, or PhD student.	Collaborator	Collaboration (3.3.3, 3.3.4)

*Refer to the *Profile of Occupational Therapy of Practice in Canada* for a full description of each professional role (<https://www.caot.ca/document/3653/2012otprofile.pdf>)

**Refer to the *2017 Competency Profile for Physiotherapists in Canada* for full description of each numbered milestone (https://physiotherapy.ca/sites/default/files/competency_profile_final_en.pdf)

Course Content: Detailed content and specific learning objectives will be distributed at the beginning of each part of the course, where applicable. A brief synopsis of the course content is presented below.

PART 1: Getting Started – Research Plan, Proposal and Principles

Overview of the course content and schedule; overview of the Master’s research project; development of the research proposal; literature search workshop; scientific writing workshop; overview of quantitative, measurement, qualitative, systematic review, knowledge translation, and ethics. *This material will be evaluated by an assignment (submitted by Master’s project group) and a midterm examination (individual).*

McGill University is situated on the traditional territory of the Kanien’kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien’kehà:ka as the traditional custodian of the lands and waters on which we meet today.

PART 2: Developing the Project Objectives, Design and Methods

This part of the course covers the following topics, which are customized according to the self-assigned research design stream (quantitative, qualitative, knowledge translation, or systematic/scoping reviews):

- Formulating the Research Objectives
- Study Design
- Selecting the Sample
- Data Collection and Measurement

PART 3: Selecting a Data Analysis Strategy

This part of the course covers topics in data analysis, which are customized according to the self-assigned analysis stream (quantitative or qualitative).

Parts 2 and 3 of the course will be evaluated by an assignment consisting of a draft version of the research proposal (submitted by Master's project group).

PART 4: Finalizing the Proposal:

All students will apply the knowledge and skills learned in the course to finalize the research proposal for their Master's project.

This portion of the course will be evaluated by a written research proposal, in a format suitable for submission to a research ethics board (submitted by Master's project group).

Required Course Materials: The Evidence-Based Practitioner (eBook 2016) by Catana Brown, available at <http://mcgill.worldcat.org/oclc/972291423> from the "View eBook" link.

Each instructor will also provide students with a reading list of articles and/or chapters specific to lecture topics. Readings from the following textbooks may also be assigned:

- Butler-Kisber, L. (2010). Qualitative Inquiry: Thematic, Narrative and Arts- Informed Perspectives, Sage Publications Ltd.
- Portney, L.G. & Watkins, M.P. (2008). Foundations of Clinical Research: Applications to Practice. Pearson Prentice Hall. Also available as an e-book.

Copyright of course materials: Instructor generated course materials (e.g., powerpoint slides, recordings, handouts, notes, summaries, exam questions, etc.) are protected by law and may not be copied or distributed in any form or in any medium without explicit permission of the instructor. Note that infringements of copyright can be subject to follow up by the University under the Code of Student Conduct and Disciplinary Procedures.

Use of Polling: Polling will be used in this course to enhance engagement and increase interaction among students and instructors. During a class with polling questions, you will respond to questions from the instructor from a personal device (smartphone, tablet, or laptop). Students should come to the class session with their devices charged and [connected to the Internet](#). Polling is available through www.mcgill.ca/polling. You are expected to follow the instructions below:

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

- To participate in Polling sessions, you **MUST** first register for an account by clicking on **Register Your Account** at www.mcgill.ca/polling and logging in with your McGill username and password. Follow the prompts to agree to the terms of use and create your account. For more information, please visit the **Getting Started for Students** section at www.mcgill.ca/polling.
- For any technical problems with polling, please contact McGill IT Services: <https://www.mcgill.ca/it/explore-services>.
- If you do not have a phone, tablet, or laptop to use to respond to polling questions, please contact the instructor immediately in order for appropriate arrangements to be made.
- To maintain a safe and respectful classroom environment, please ensure that any polling responses you submit are appropriate and relevant to the question asked. Please note that unless the poll is labelled as anonymous, your responses are identifiable to the instructor. Please see the [Code of Student Conduct and Disciplinary Procedures](#).

Student Evaluation and Mark Distribution: Evaluation of learning will be ongoing throughout the term and will include both formative and summative evaluations.

	Assignment/Evaluation	Value	Due Date
Part I – Getting Started	Midterm exam	25%	October 6-8
	Assignment 1	15%	October 13
Part 2 – Developing the Project and Part 3 – Selecting a Data Analysis Strategy	Mid-point course and self evaluation	5%	October 19-25
	Assignment 2	15%	November 19
Part 4 – Finalizing the Proposal	Research Proposal	40%	December 6

The individual evaluation components are a midterm examination at the end of Part I of the course, and a mid-point course and self-evaluation during Part 2. Assignments will be completed in the Master's project groups. The group assignments include an initial plan of the research objectives, background, and output (assignment 1), a draft version of the proposal (assignment 2), and the final written research proposal. Guidelines for the midterm exam, assignments, and research proposal will be provided.

This course falls under the regulations for individual and group evaluations. In any course which comprises both individual and group evaluation components, each student must achieve a passing grade of B- (65%) in each component, as well as in the overall course, in order to receive a passing grade for the course. If the overall course mark is a failure, the student may be permitted to write a supplemental exam in this course or retake the course.

If the overall course mark is a pass but one component is a failure, the course mark is withheld from the record. The student must undertake remedial work in that failed component and successfully pass an evaluation of that additional work. If the additional work is successfully passed, the original final course mark is then recorded. For further details, please refer to the Master's Student Information Rules and Regulations document at <https://www.mcgill.ca/spot/programs/pt/professional-masters>.

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

Plagiarism/Academic Integrity: McGill University and the Faculty of Medicine and Health Sciences value academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the [McGill University Code of Student Conduct and Disciplinary Procedures](#) and the [Faculty of Medicine and Health Sciences Code of Conduct](#)

L'université McGill et Faculté de Médecine et des Sciences de la Santé attachent une haute importance à l'honnêteté académique. Ils incombent par conséquent à tous les étudiants de comprendre ce que l'on entend par tricherie, plagiat et autres infractions académiques, ainsi que les conséquences que peuvent avoir de telles actions, selon le [Université de McGill Code de conduite de l'étudiant et des procédures disciplinaires](#) et [Faculté de médecine et des sciences de la santé](#).

Additional policies governing academic issues which affect students can be found in the Academic Rights and Responsibilities. <https://www.mcgill.ca/students/srr/academicrights>

Language of Submission: In accord with McGill University's Charter of Students' Rights, students in this course have the right to submit in English or in French any written work that is to be graded. Conformément à la Charte des droits de l'étudiant de l'Université McGill, chaque étudiant a le droit de soumettre en français ou en anglais tout travail écrit devant être noté (sauf dans le cas des cours dont l'un des objets est la maîtrise d'une langue).

Dress Code: Students are expected to demonstrate professional behaviour and wear appropriate attire at all times.

Technology in Class: Your respectful attention is expected during class sessions, therefore it is understood that you will not be using your laptop or cell phone for social purposes during this time (e.g. email, msn, sms, social media). Your cell phone should be on silent during class time and phone calls should only take place during the break or after class.

Inclusive environment: The instructors of this course endeavor to provide an inclusive learning environment. However, if you experience barriers to learning in this course, do not hesitate to discuss them with the instructor in question and the [Office for Students with Disabilities](#), 514-398-6009.

In the event of extraordinary circumstances beyond the University's control, the content, mode of delivery, and/or evaluation scheme in this course is subject to change.

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.
