

OCC1 618 APPLIED OT PSYCHOSOCIAL THEORY

Credits	5
Course Coordinator	Keven Lee, PhD. keven.lee@mcgill.ca
Course Lecturers	Suzanne Rouleau, MSc suzanne.rouleau@mcgill.ca Marc-André Clement, MSc. marc-andre.clement@mcgill.ca Laurence Roy, PhD. laurence.roy@mcgill.ca
Teaching Assistant	Laura Fregeau, MSc. laura.fregeau@mail.mcgill.ca
Office Hours	By appointment with your seminar leader and course lecturers
Prerequisites	OCC1 551

Course Description: This course covers the integration of narrative and procedural reasoning to promote growth through occupation, and to apply psychosocial theories in occupational therapy (OT) for persons and groups facing psychosocial challenges in clinical and community settings.

Expanded Course Description: This graduate course moves the learner beyond skills-based practice following their summer fieldwork. Drawing on empirical and theoretical knowledge, learners will develop professional reasoning for individual and group approaches in psychosocial OT focused on mental health across practice domains. The course focuses on the integration of a Professional Reasoning Matrix that centres narrative reasoning to interpret what matters to individuals and groups to envision occupation-based global goals for activity-based groups that draw upon the narratives of those participating in those groups to envision occupation-based global goals and design groups based on the narratives of persons who would be participants in those groups. Learners will then apply

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

procedural reasoning to identify the evidence for and application of a Frame of Reference (FoR) or Model of Practice (MoP) for the identified psychosocial issues of concern to i) form objectives (short term), and ii) grade activities to meet those objectives.

Learners will be asked to integrate narrative and procedural reasoning in the design of proposed activities and settings (including physical and social environments) to foster the emergence of significant experiences. Throughout the semester, learners will use the professional reasoning matrix to reflect on and practice the reasoning processes used during evaluation, grading activities, leading groups, analyzing group process and content, and using mental health policy to advocate for occupation-based groups. The theoretical constructs and concepts learned during lectures will also be applied to care scenarios with individuals, which were developed from empirical research about the experiences of persons who have received mental health services.

Course Structure

Lectures

This course consists of biweekly lectures (2 hours/lecture) including group discussions where students apply the content seen in lectures to care scenarios.

Professional reasoning seminars and hands-on-workshops

The class will be separated into groups of ten to fourteen students for the professional reasoning seminars / hands-on-workshops. You will be assigned to either a Tuesday or Thursday group.

Course Content

Module I: Professional reasoning for psychosocial occupational therapy

- *Professional Reasoning Matrix*: Integrating narrative with procedural reasoning during evaluation of human development
- *Therapeutic Emplotment*: Envisioning occupation-based group goals and activities to foster growth through occupation
- *Activities as Embodied Metaphors*: Planning occupation-based interventions to facilitate the creation of significant experiences
- *Scenes*: Designing symbolic environmental elements to foster possible selves-through-doing
- *Group Dynamics*: Professional reasoning in group therapies

Module II: Frames of reference (FoR) in psychosocial occupational therapy

- Object relations

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

- Ayres Sensory Integration
- Behavioural
- Cognitive Behavioural Therapies

Module III: Models of practice in psychosocial occupational therapy

- Psychosocial Rehabilitation
- Resilience and Trauma-informed approaches

Learning Outcomes

Expert in Enabling Occupation

1. Integrate narrative and procedural reasoning to assess the occupational performance of clients with psychosocial dysfunction using a professional reasoning matrix on human development
2. Apply narrative reasoning constructs to identify occupation-based global goals and activities for groups
3. Engage clients in occupation-based group activities and facilitate the creation of significant experiences
4. Adapt and grade activities using psychosocial theories

Communicator and Collaborator

1. Identify what really matters (values) for clients as the basis for the therapeutic relationship
2. Articulate the procedural and narrative reasoning underlying occupation-based global goals and group protocols, including choice of activities
3. Advocate for occupation-based protocols and activities by articulating its links with occupational therapy, Canadian mental health policy and client values

Scholarly Practitioner and Change Agent

1. Use professional reasoning to advocate for occupational therapy specific approaches to groups
2. Identify different ways of knowing and reasoning used in clinical practice and the utility of each to obtain effective outcomes
3. Develop an evidence-informed group protocol for a particular group of clients experiencing psychosocial dysfunction

Professional

1. Adapt to changing conditions required for working in a variety of settings
2. Anticipate and plan to submit assignments with rolling due dates across the semester

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

Course Materials

Assignments and Evaluations

Assignments will be conducted in self-selected student pairs, alongside individual exams. Please see the [Guide to Designing Occupation-Based Groups](#) for details

Assignment	Form of Evaluation	Weight	Due Date
Assignment 1	Mandatory preparation and meeting with assigned seminar facilitator	10 % (pair)	Any time prior to October 13 ^h
Assignment 2	Group Session Analysis	20% (pair)	Due two weeks after co-leading your group session (5pm)
Assignment 3	Group Protocol Design	20% (pair)	Dec 14 th (7 pm)
Midterm Exam		20 % (Individual)	October 17th
Final Exam		30% (Individual)	TBA during exam period
Total point distribution:		50 % Pair 50 % Individual

Skills Building Attendance Mark

Attendance is mandatory and will be monitored at all *Hands-on-Workshops* and *Professional Reasoning Seminars*. Students will not be able to miss more than 10% (< 1 per term) of the HOWs or 10% (< 1 per term) of the PRSs without a written excuse. If they do, 10% of the total course mark will be removed. Given that student participation is an integral part of the learning process during seminars, students are encouraged to attend every session. If attendance at a session is not possible, the student must communicate their absence with both the seminar instructor and the pair facilitating the session.

Diversity Statement: The Occupational Therapy Program recognizes our responsibility to foster a learning environment where students and instructors can engage in dialogue and exchange ideas while feeling welcomed and respected in view of their identity or beliefs. The Program intends that the instructional design of all courses minimize any barriers to participation particularly barriers based on age, biological sex, disability, gender identity or expression, Indigenous ancestry, linguistic and cultural background, race/ethnicity, religion, sexual orientation, and any other aspect integral to one's personhood. ***We therefore recognize our responsibility, both individual and collective, to strive to establish and maintain a respectful environment that is free from discrimination for and from both learners and teachers.***

Right to submit in English or French written work that is to be graded: In accord with McGill University's [Charter of Student Rights](#), students in this course have the right to submit in English or in French written work that is to be graded. This does not apply to courses in which acquiring proficiency in a language is one of the objectives.

Conformément à [la Charte des droits de l'étudiant](#) de l'Université McGill, chaque étudiant a le droit de soumettre en français ou en anglais tout travail écrit devant être noté, sauf dans le cas des cours dont l'un des objets est la maîtrise d'une langue.

Accessible Learning Environment: If you experience barriers to learning or require accommodations, please contact the instructor to arrange a time to discuss your rights and needs. You do not need to disclose the details of a health condition. It is recommended that you register with the [Student Accessibility and Achievement](#) at 514-398-6009 if you do have ongoing arrangements.

Special Requirements for Course Completion and Program Continuation: Minimum grade of 65% is considered a pass. In any course which comprises both individual and group evaluation components, each student must achieve a passing grade

McGill University is situated on the traditional territory of the Kanien'kehà:ka, a place which has long served as a site of meeting and exchange amongst nations. We recognize and respect the Kanien'kehà:ka as the traditional custodian of the lands and waters on which we meet today.

in each of these components as well as in the overall course in order to receive a passing grade for the course. Please refer to the appropriate sections in both undergraduate and graduate calendars on university regulations regarding final and supplemental examinations.

Consequences of not completing assignments as requested: Assignments and exams must be submitted within the set timelines. A penalty of 5% will be attributed for each day of delay (including weekends, up to a maximum of 20%). Exceptional circumstances must be discussed with the instructors *prior* to the due date, or late submission will be penalized.

Plagiarism/Academic Integrity: McGill University and the Faculty of Medicine and Health Sciences value academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the [McGill University Code of Student Conduct and Disciplinary Procedures](#) and the [Faculty of Medicine and Health Sciences Code of Conduct](#)

L'université McGill et Faculté de Médecine et des Sciences de la Santé attachent une haute importance à l'honnêteté académique. Ils incombent par conséquent à tous les étudiants de comprendre ce que l'on entend par tricherie, plagiat et autres infractions académiques, ainsi que les conséquences que peuvent avoir de telles actions, selon le [Université de McGill Code de conduite de l'étudiant et des procédures disciplinaires](#) et [Faculté de médecine et des sciences de la santé](#)

Dress Code: [Reflexivity with respect to dressing](#) is encouraged throughout the course of the semester to be in line with the therapeutic approaches and settings that are planned, while honoring your cultural identity and gender expression.

Attendance: This is a course that is highly student-self-directed. Attendance in lectures is expected of all students, since students will participate in learning activities in all classes. In addition, the material shared by the guest lecturers involves personal experience and may not be available as lecture postings.

Copyright of course materials: Permission of the instructor is required before any lecture may be taped. Instructor generated course materials (e.g., handouts, notes, summaries, exam questions, etc.) are [protected by law](#) and may not be copied or distributed in any form or in any medium without explicit permission of the instructor. Note that infringements of copyright can be subject to follow up by the University under the Code of Student Conduct and Disciplinary Procedures

In the event of extraordinary circumstances beyond the University's control, the content and/or evaluation scheme in this course is subject to change.
