

Occupational Therapy QY: Background Courses Form

Name:		Email:	
-------	--	--------	--

Instructions:

- For each subject area, please indicate the courses that you have successfully completed or are currently taking. Background courses must be completed prior to the start of the QY.
- Note that you will be only given up to one point per category. Three places are included in each category. In the event that we do not consider your first course acceptable, we will consider the second course listed, etc.
- Only courses taken at the university level (undergraduate or graduate), at an accredited and recognized university institution, will be accepted. College or CEGEP level courses are not accepted unless they are transferrable for university credit.
- An equivalency bank and course equivalency auditing are not available. General (introductory) courses are usually preferred.
- In order for a course to be evaluated, you must include a link to the course description, course outline, or syllabus. If this is not available online, please merge the course outline/description/syllabus with the unofficial transcript you have provided for that institution.
- If you are providing the course outline/description/syllabus with the unofficial transcript, please then indicate in the comments box that you have included this document with your unofficial transcript. If you have more than one transcript, please attach the course outline/description/syllabus to the transcript of the institution where it was taught. You can also leave additional comments here if needed to provide further clarity on the background course.
- Please upload the completed document to your Slate application.

Human Anatomy: Human anatomy covering the gross anatomy and fundamental organization of the human musculoskeletal system, visceral organs and associated systems.

Course Listing:

List all Human Anatomy eligible courses taken:

Course Number	Course title	University Name	Mark	Credit Value	Semester/Year

Link to Course Description (if available):

Course Number	Link to Course Description
