

OCC1 618 APPLIED OT PSYCHOSOCIAL THEORY

Credits: 5

Course Coordinators Melissa Park melissa.park@mcgill.ca
Hiba Zafran hiba.zafran@mcgill.ca

Course Instructors: Suzanne Rouleau suzanne.rouleau@mcgill.ca
Sandra Everitt sandra.everitt@mcgill.ca
Raphael Lencucha Raphael.lencucha@mcgill.ca
Zachary Boychuck zachary.boychuck@mcgill.ca

Office Hours: By appointment.

Prerequisites: OCC1 551 is a prerequisite for this course. Specifically, this course builds on basic knowledge of common psychiatric diagnosis, subjective & objective assessments, narrative & procedural reasoning in goal setting and intervention for individuals, narrative interviewing, and therapeutic use of self.

Course Description: This course is designed to prepare students for a variety of treatment models (illness, wellness, and capacity) they will encounter in mental health settings in both the clinic and community, and to be able to justify their intervention choices. Strategic action plans for recovery-oriented care in Canada will require a both-and use of values and evidence-based medicine. Values-based practice highlights the interplay of values (professional, our own, our patients, and the institutional context) that impacts on our clinical decision. In order to support values-based practice, we will draw from social science theory to illustrate how we integrate “what matters” to particular patients with best evidence (both quantitative and qualitative) in our clinical reasoning process. Using a matrix on clinical reasoning and activity analysis, developed for this course, students will design a group protocol for psychosocial dysfunction and co-lead one session. The design process will require students to synthesize social science theory, conceptual models of occupational therapy practice, frames of reference or models of practice related to psychosocial dysfunction, as well as therapeutic use of self. Student learning will be evaluated with 2 formative clinical reasoning workshops (CRWs), an assignment that includes their design of a treatment protocol and reflections on their leadership of a group session, and a comprehensive case-based exam.

Course Structure: (Content and Instructional Method) This course consists of 4 hours of lecture/week (14 weeks) with 20 hours of seminars (8 weeks). The lecture content is organized into Modules I-IV that have been developed to help students create and justify a protocol for an occupation-based group intervention for psychosocial dysfunction and/or wellness. The instructional methods will be lecture with a focus on practice applying psychosocial theory, discussion around 3 in-class CRWs, and feedback during seminars in which students will co-lead one group session from their treatment protocols. We will emphasize discussion (in class, D2L) and self-directed learning activities in order to foster students' active reflection and ability to articulate the rationale for occupation-based interventions.

- I. Core constructs of clinical reasoning for psychosocial occupational therapy
 - a. Values-based practice
 - b. Paradigms of human development
 - c. Evaluation & goal setting integrating both-and procedural and narrative reasoning
 - d. Narrative strategies for the design and implementation of occupation-based interventions
- II. Individual-based theories and frames of reference (FOR)
 - a. Cognitive & Dialectical Behavioral Therapy
 - b. Psychodynamic (Object relations)
 - c. Sensory Motor
 - d. Behavioral
- III. Models of practice
 - a. Resilience
 - b. Psychosocial Rehabilitation (PSR)
- IV. Eclectic practice

Copyright of course materials: Instructor generated course materials (e.g., handouts, notes, summaries, exam questions, etc.) are protected by law and may not be copied or distributed in any form or in any medium without explicit permission of the instructor. Note that infringements of copyright can be subject to follow up by the University under the Code of Student Conduct and Disciplinary Procedures.

Learning outcomes: By the end of this course, students will acquire knowledge and skills necessary to:

- (1) Assess the occupational performance of clients with particular psychosocial dysfunction;
- (2) Provide rationale for their treatment plans, drawing from best evidence (quantitative/qualitative) and emergent recovery-oriented policy; and
- (3) Articulate the procedural and narrative reasoning underlying their:
 - a) Evaluation
 - b) Choice in a particular frames of reference or treatment models;
 - c) Goal-setting & occupation-based group protocol; and
 - d) Design and co-leadership of a group session

** Learning objectives and outcomes for the Group Protocol will be posted.

Assignments and Evaluations: This course falls under the regulations concerning theoretical and practical evaluation as well as individual and group evaluation. Please refer to the section on marks in the Rules and Regulations for Student Evaluation and Promotion of the Occupational Therapy Course Guides. Student evaluation will include both formative and summative evaluations, with a focus on their clinical reasoning.

<i>Assignment</i>	<i>Type of evaluation</i>	<i>Weight</i>
Formative CRW 1	Case Study & Presentation	5% (group)
Formative CRW 2	Case Management	5% (group)
Group Intervention	Group Protocol	Protocol 25%
	Analysis of Group	Analysis 25% (pair)
Final Exam	Multiple Choice, Short answer, essay on course content and case studies	40% (individual)

Skills Building Attendance Mark: Attendance is mandatory and will be monitored at *all seminars* as well as classes with *guest lecturers* (GL) and CRW's. Students will not be able to miss more than 10% (< 1 per term) of the seminars or 10% (< 1 per term) of the clinical reasoning workshops without a written excuse. If they do, 10% of the total course mark will be removed.

Consequences of not completing assignments as requested: All assignments must be submitted at the *beginning of the identified lecture through D2L assignments section*. Late submissions will be penalized by the loss of 5 % per day, including weekends.

Special Requirements for Course Completion and Program Continuation: In order to pass the course, a grade of at least B- (65%) must be obtained of the individual, group, and total mark. Please refer to the appropriate sections in both undergraduate and graduate calendars on University regulations regarding final and supplemental examinations.

Plagiarism/Academic Integrity: McGill University values academic integrity. Therefore, all students must understand the meaning and consequences of cheating, plagiarism and other academic offences under the Code of Student Conduct and Disciplinary Procedures (see www.mcgill.ca/students/srr/honest/ for more information.)

L'université McGill attache une haute importance à l'honnêteté académique. Il incombe par conséquent à tous les étudiants de comprendre

ce que l'on entend par tricherie, plagiat et autres infractions académiques, ainsi que les conséquences que peuvent avoir de telles actions, selon le Code de conduite de l'étudiant et des procédures disciplinaires (pour de plus amples renseignements, veuillez consulter le site www.mcgill.ca/students/srr/honest/).

Right to submit in English or French written work that is to be graded: In accord with McGill University's Charter of Students' Rights, students in this course have the right to submit in English or in French any written work that is to be graded.

Conformément à la Charte des droits de l'étudiant de l'Université McGill, chaque étudiant a le droit de soumettre en français ou en anglais tout travail écrit devant être noté (sauf dans le cas des cours dont l'un des objets est la maîtrise d'une langue).

Dress Code: Professionalism with respect to dressing is encouraged throughout the course of the semester. It is each student's responsibility to have appropriate attire during all class assignments and learning activities. When working with simulated patients student must be dressed professionally.

Disability: If you have a disability please contact the instructor to arrange a time to discuss your situation. It would be helpful if you contact the Office for Students with Disabilities at 514-398-6009 before you do this.

Professional Conduct: Professionalism and accountability are expected throughout the course of the semester. This includes the on-going respectful nature of teacher-student as well as student-student interactions.

Technology in Class: Your respectful attentive presence is expected, therefore while you are permitted to use your laptop in class, it is understood that you will not be using your laptop or cell-phone for social purposes during class time (e.g. email, msn, sms). Your cell phone should be on silence during class time and phone calls should only take place during the break or after class.

In the event of extraordinary circumstances beyond the University's control, the content and/or evaluation scheme in this course is subject to change.
