

Physical Therapy QY: Prerequisite Course Form

Name:		Email:	
-------	--	--------	--

Instructions:

- For each subject area, please indicate ALL of the courses that you have successfully completed, or are currently taking, that you believe fulfill the Human Anatomy and Human/Mammalian Physiology prerequisites for application to the Qualifying Year for the MScA-PT.
- Only courses taken at the university level (undergraduate or graduate), at an accredited and recognized university institution, will be accepted. College or CEGEP level courses are not accepted unless they are transferrable for university credit.
- A list of accepted courses is not currently available, nor is equivalency auditing provided by SPOT prior to the submission of an application (we will not determine if we accept the course until we start file review). Individual courses will be evaluated based on their content, once the application has been submitted.
- In order for a course to be evaluated, you must include a link to the course description, course outline, or syllabus. If this is not available online, please merge the course outline/description/syllabus with this form.
- If you are providing the course outline/description/syllabus with this form, please then indicate in the comments that you have included this document with this form.
- Some universities offer joint anatomy-physiology courses. In this case, half of the total credit value for the course may be put toward the prerequisite for Anatomy, and half toward the prerequisite for Physiology. Please list the total credit value for the course (do not write three anatomy, three physiology).

Human Anatomy

To be considered acceptable, the primary focus of the course must be Human Anatomy of the:

- The musculoskeletal system
- The central and peripheral nervous systems
- The cardiovascular and respiratory systems

Course Listing:

List all Human Anatomy eligible courses taken:

Course Number	Course title	University Name	Mark	Credit Value	Semester/Year

Link to Course Description (if available):

Course Number	Link to Course Description

Human Physiology

To be considered acceptable, the primary focus of the course must be Human/Mammalian physiology of the:

- The musculoskeletal system
- The central and peripheral nervous systems
- The cardiovascular and respiratory systems

Course Listing:

List all Human Physiology eligible courses taken:

Course Number	Course title	University Name	Mark	Credit Value	Semester/Year

Link to Course Description (if available):
