

Introduction

The Student Demographic Survey was administered by McGill University from mid-October through December 2009. Invitations to participate were sent to 9,000 randomly selected students. Only students registered in degree, certificate or diploma seeking programs were eligible for the survey. The response rate was 23% (n=2,054).

The data have been weighted to obtain better representation of gender, level of study (Bachelor's or undergraduate certificates or diplomas; Master's or graduate certificates or diplomas; or Doctoral) and origin (Québec, Canada, USA or International in answer to the question "Where did you last study before coming to McGill?"). Differences between the data presented here and those presented in preliminary tables are due to adjustments in the weightings.

Throughout, the percentages shown refer to respondents only. Non-responses are not shown.
