

Canadian Indigenous Student Health Comparison Report 2016

Data from the 2016 National College Health Assessment

This report includes:

- *Overview*
- *Respondent Characteristics*
- *Frequencies*
- *Significance and effect size between Indigenous and non-Indigenous students*

Prepared by Xin Wei Yan, Survey Analyst, Under the supervision of Dr. Lina Di Genova, Student Services, McGill University.
This report is part of the Indigenous Student Health Promotion Research Project with Paige Isaac, Dr. Pierre-Paul Tellier and Allan Vicaire

December 2017

- The American College Health Assessment- National College Health Assessment II (ACHA-NCHA II) is a national research survey organized by the American College Health Assessment (ACHA) to assist college health service providers, health educators, counselors, and administrators in collecting data about their students' health habits, behaviors, and perceptions on the most prevalent health topics.
 - The ACHA-NCHA provides the largest known comprehensive data set on the health of college students, providing the college health and higher education fields with a vast spectrum of information on student health.

- In the Spring of 2016, 41 Canadian universities participated in the ACHA-NCHA II
 - All participating institutions administered the online version of the ACHA-NCHA II. McGill administered the survey in both English and French.
 - The average Canadian response rate was 20%

Demographics and Student Characteristics

Findings:

- a) General Demographics
- b) Health and Safety
- c) Alcohol, Tobacco, and Drugs
- d) Sex Behaviour and Contraception
- e) Weight, Nutrition, and Exercise
- f) Mental Health
- g) Physical Health
- h) Academic Performance Impediment

Interpreting the Findings:

- Notes on use of data: Missing values have been excluded from analysis. Students responding "not applicable" were excluded from several analyses, which are specifically noted throughout this document. All response categories were included, including "don't know" or "0" unless otherwise noted.
 Throughout this report, the Indigenous results are presented on the left and the other students comparison on the right. The distribution of findings are presented by gender.

Question	Item	Indigenous						Non-Indigenous						Male		Female		Total	
		Male		Female		Total		Male		Female		Total		P	ES	P	ES	P	ES
		n	%	n	%	n	%	n	%	n	%	n	%						
Body Mass Index Classifications	Underweight	8	3%	37	5%	47	4%	539	5%	1838	9%	2392	8%	.000 ***	.097	.000 ***	.089	.000 ***	.089
	Desired weight	116	44%	431	53%	550	50%	5898	59%	14281	66%	20287	64%						
	Overweight	77	29%	185	23%	263	24%	2604	26%	3659	17%	6305	20%						
	Class I obesity	40	15%	96	12%	139	13%	659	7%	1197	6%	1876	6%						
	Class II obesity	13	5%	42	5%	55	5%	191	2%	404	2%	602	2%						
	Class III obesity	12	5%	27	3%	41	4%	73	1%	235	1%	309	1%						

Indicates the overall percentage per option

Indicates the significance level

Indicates the percentage of indigenous males and females who selected the option.

Indicates the percentage of non-Indigenous males and females who selected the option.

Indicates the effect size

*Statistical comparisons: Items with mean differences that are larger than would be expected by chance are noted with asterisks referring to three significance levels (*p < .05, **p < .01, ***p < .001). Significance levels indicate the probability that an observed difference is due to chance. Statistical significance does not guarantee the result is substantive or important. Large sample sizes tend to generate more statistically significant results even though the magnitude of mean differences may be inconsequential. Unless otherwise noted, statistical comparisons are Pearson Chi-Square

**Effect size: Effect size indicates practical significance. An effect size of .1 is often considered small, .3 moderate, and .5 large. Effect sizes for Chi-Square tests use Cramér's V. Cramér's V is computed by taking the square root of the chi-squared statistic divided by the sample size and the minimum dimension minus 1 See: Cohen, J. (1988). Statistical power analysis for the behavioral sciences (2nd edition). New York: Psychology Press.
