AAAA 100
Credit Weight: 0
Transcript Title: Academic Integrity Tutorial
Calendar Title:
Administering Faculty: No College Designated
Teaching Department: Student Services
Status (catalog level): Active
ACCT 351
Credit Weight: 3
Transcript Title: Intermediate Financial Acct 1
Calendar Title: Intermediate Financial Accounting 1.
Description:
An examination of the theoretical foundation for financial reporting and revenue recognition. The tools of accounting, including a review of the accounting process and compound interest concepts. Asset recognition, measurement and disclosure. Partnership accounting.
Notes:
Prerequisite: MGCR 211
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

ACCT 352
Credit Weight: 3
Transcript Title: Intermediate Financial Acct 2
Description:
A continuation of Intermediate Financial Accounting 1. An examination of liability recognition, measurement and disclosure, including leases, pension costs and corporate income tax. Shareholders' equity, dilutive securities and earnings per share. The statement of changes in financial position, basic financial statement analysis and full disclosure in financial reporting.
Notes:
Prerequisites: ACCT 351 and MGCR 341
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

ACCT 354
Credit Weight: 3
Transcript Title: Financial Statement Analysis
Calendar Title: Financial Statement Analysis.
Description:
Interpretative nature of the conceptual framework underlying a multitude of financial reporting standards, including the impact of alternative accounting methods, management biases and stakeholder interests in the analysis and valuation of the firm.
Notes:
Prerequisites: MGCR 211 and MGCR 341
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

ACCT 361
Credit Weight: 3
Transcript Title: Management Accounting
Calendar Title: Management Accounting.
Description:
The role of management accounting information to support internal management decisions and to provide performance incentives.
Notes:
Prerequisite: MGCR 211
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

**ACCT 362**
Credit Weight: 3
Transcript Title: Cost Accounting
Calendar Title: Cost Accounting.
Description:
An examination of a number of recurring issues in the area of decision-making and control, including cost allocation, alternative costing systems, and innovations in costing and performance measurement.
Notes:
Prerequisites: ACCT 361
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

**ACCT 385**
Credit Weight: 3
Transcript Title: Principles of Taxation
Calendar Title: Principles of Taxation.
Description:
An introduction to the concepts underlying the Canadian tax system and how they are applied in relation to the taxation of individuals and businesses.
Notes:
Prerequisite: MGCR 211
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

**ACCT 401**
Credit Weight: 3
Transcript Title: Sustainability & Environ Acct
Calendar Title: Sustainability and Environmental Accounting.
Description:
Developing measures of corporate environmental performance, assessing their reliability and reporting to external stakeholders. Using sustainability metrics in strategic and operational business decisions. Implementing and utilizing Environmental management systems and standards. Managing corporate environmental risks and accounting for environmental costs. Environmental auditing.
Notes:
Prerequisite: MGCR 211
Open only to U2 and U3 students.
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

**ACCT 434**
Credit Weight: 3
Transcript Title: Topics in Accounting 1
Calendar Title: Topics in Accounting 1.
Description:
Topics will be selected from current issues in the Accounting Area.
Notes:
Prerequisite: MGCR 211
Restriction: Open to U2 and U3 students.
Administering Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

ACCT 451
Credit Weight: 3
Transcript Title: Data Analytics: Capital Market
Calendar Title: Data Analytics in Capital Market.
Description:
Exploration of how financial and non-financial metrics can be linked to business performance through experiential learning, with a focus on financial statement analysis, earnings and return predictability, textural analysis, earnings management and fraud detection. Introduction to SAS software and financial accounting databases such as CRSP, Compustat, and I/B/E/S, and alternative data sources such as SEC Edgar that enables work across different database to make better financial statement analysis and decisions.
Notes:
Prerequisites: MGCR 211, MGCR 341
Restrictions: Open to U2 and U3 students

ACCT 452
Credit Weight: 3
Transcript Title: Financial Reporting Valuation
Calendar Title: Financial Reporting Valuation.
Description:
Models to determine firm value from accounting information and a broader perspective on key sources of information, key value drivers, in a setting where evaluating firm value is the ultimate purpose.
Notes:
Prerequisite: ACCT 354.

ACCT 453
Credit Weight: 3
Transcript Title: Advanced Financial Accounting
Calendar Title: Advanced Financial Accounting.
Description:
Reporting relevant financial information subsequent to long term intercorporate investments. The preparation of consolidated financial statements with emphasis on their economic substance rather than legal form.
Notes:
Prerequisite: ACCT 352

ACCT 455
Credit Weight: 3
Transcript Title: Dev of Accounting Thought
Calendar Title: Development of Accounting Thought.
Description:
The conceptual underpinning of accounting thought, including its historical development and the modifications that have occurred over time. A review of accounting literature and its relevance to practice.

Notes:
Prerequisite: ACCT 352
Administrating Faculty: Desautels Faculty Management
Teaching Department: Management
Status (catalog level): Active

ACCT 463
Credit Weight: 3
Transcript Title: Management Control
Calendar Title: Management Control.
Description: The theoretical frameworks for the examination and evaluation of management accounting and control systems. The technical aspects of accounting along with behavioural issues of management control.

Notes:
Prerequisites: ACCT 361
Administrating Faculty: Desautels Faculty Management

Notes: Corequisite(s): AEBI 421, AEBI 423 and AEBI 425
Restriction(s): Restricted to students that are participating in the Barbados Interdisciplinary Tropical Studies Field Semester

**Since this course is being taught abroad, the Victoria Day statutory holiday will not be taken into consideration. Therefore, students are expected to attend their lecture on Monday, May 18, 2020.

**Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the second lecture day and withdrawal is the fifth lecture day.

Project course AEBI 427 runs concurrently with the other courses (AEBI 421, AEBI 423 & AEBI 425) and the Mondays of each week are dedicated to AEBI 427.

Transcript Title: Agro-Ecosystems Field Course
Calendar Title: Agro-Ecosystems Field Course.
Description: Through case studies and field trips, students will examine the problems and constraints within the Canadian agro-ecosystem, including the interrelationships among food production, the environment, agricultural policy and social issues. Research in this field of study will also be introduced.
Notes: This course carries an additional charge to cover the cost of transportation (bus rental) for local field trips to agricultural enterprises. The fee is refundable
only during the withdrawal with full refund period

**Transcript Title:** Sustainable Agr&Food Security

**Calendar Title:** Sustainable Agriculture and Food Security.

**Description:**
Travel and exposure to a foreign agricultural sector where sustainable agricultural practices (e.g., organic farm production, ecological management of pests and weeds, crop rotation, water conservation, etc.), regulations, and policies are examined within the context of land use, local economies, and food security issues.

**Notes:**
Prerequisite: AGEC 200 or equivalent or permission of instructor
Lectures and visits will be jointly delivered by local experts and McGill Staff.
Lectures (25%) and field visits (75%). Final year students should note that graduation may be delayed.
This course has a fee of $1,720.00, a small portion of which is tax receiptable on the T2202A; it includes internal travel (by coach), accommodation, most of the meals for the duration of the course, as well as instructor costs.
**Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the third lecture day and withdrawal is the sixth lecture day.**

**The instructor’s approval is required.**

Credit Weight: 3
Transcript Title: Cellular Trafficking
Calendar Title: Cellular Trafficking.
Description:
This course explores the fundamental mechanisms that govern the organizations of intracellular membranes, how vesicle generation is signaled, how the membranes curve and bud, and how vesicles know where to go and fuse. In addition to intracellular vesicles, the principles of mitochondrial dynamics and process of cellular autophagy are examined. Also, there is a focus on "Applied Cell Biology", with respect to how the exquisite regulation of cellular transport plays a central role in complex biological systems. A series of modules will take students through the mechanisms of cellular polarity, neurotransmission, metabolic cell biology, pathogen invasion, and more. The emphasis is on the morphological aspects of the processes, and on the major techniques that led to discovery.
Notes:
Fall

**ANAT 542**  
**Credit Weight:** 3  
**Transcript Title:** TEM of Biological Samples  
**Calendar Title:** Transmission Electron Microscopy of Biological Samples.  
**Description:**  
Overview of theory, principles and practical applications of conventional and cryo-transmission electron microscopy relevant to biological samples. Major topics to be covered include: sample preparation and imaging, image analysis, three-dimensional reconstruction (including single-particle analysis an
Notes:
Prerequisite(s): Permission of instructor
2 hours lectures, 3 hours laboratory

ANAT 565
Credit Weight: 3
Transcript Title: Diseases-Membrane Trafficking
Calendar Title: Diseases-Membrane Trafficking.
Description:
This course will examine how research into diseases has played a key role in unraveling the intricate molecular mechanisms controlling membrane trafficking in mammalian cells. Membrane trafficking disorders fall into two groups those arising from a) membrane-associated or b) cytoskeletal defect. Topics include a) mechanisms of endosomal maturation, lysosomal storage disorders and rab protein-mediated vesicular trafficking and b) rho GTPase and cytoskeletal binding protein mediated trafficking associated with neurological diseases and cancer.

Credit Weight: 3
Transcript Title: MSc Seminar Examination
Calendar Title: MSc Seminar Examination.
Description:
The term before the student graduates, the student is to present a 30 minute seminar on their thesis work in a public seminar open to all members of the Department of Anatomy & Cell Biology, followed by a question period lasting 15 to 20 minutes. All faculty, cross-appointed academic staff, post docs and students are expected to attend the seminar.
Notes:
Restriction: Masters in Cell Biology students

ANAT 690D1
Credit Weight: 3
Transcript Title: Cell and Developmental Biology
Calendar Title: Cell and Developmental Biology.
Description:
Current developments in molecular cell biology and developmental biology will be presented by course coordinators and staff from primary papers in the scientific literature. These will be researched and critiqued by students through oral and written presentations. Two term papers are required for students taking the course.
Notes:
Students must register for both ANAT 690D1 and ANAT 690D2
No credit will be given for this course unless both ANAT 690D1 and ANAT 690D2 are successfully completed in consecutive terms

Transcript Title: Archaeology of South Asia
Calendar Title: Archaeology of South Asia.
Description:
This course explores the archaeology of South Asia from prehistoric through early historic times focusing on the region covered by India, Pakistan, Bangladesh, Nepal and Sri Lanka. We will investigate the shifting materiality of social landscapes, political, ritual and ecological practices. The course interrogates a number of anthropological themes including human evolution, social organization,
food production, craft production, trade and exchange, the transition(s) to urbanism, the development of socio-political inequalities and institutions, regional and supra-regional polities and religious traditions. We will address some of the historiographical and epistemological problems with using archaeological data to produce narratives of South Asia’s past.

Notes:
Prerequisite(s): ANTH 201 or ANTH 210.

Transcript Title: Anth of Forced Migrat&Displ
Calendar Title: Anthropology of Forced Migration and Displacement.
Description:
How does anthropology study those defined as exceptions within the political order of citizenship? Refugees, migrants, and asylum seekers challenge this order at its core. We engage anthropologists, political theorists, and legal scholars who explore the political implications of such others, as well as the theoretical and practical implications of the terms themselves. Readings trace the theoretical evolution of the refugee from state threat and abject other in need of containment and care to agent of political change, ranging from studies of citizenship and exclusion, humanitarianism and the biopolitics of refugee management, to experience-near ethnographies of forced migration and exile.

Transcript Title: Immigration and Culture
Calendar Title: Immigration and Culture.
Description:
Immigration is transforming Europe and North America, and is a major demographic and cultural process in Canada. It is also the subject of government policies in Canada and elsewhere, including the increasingly controversial "multiculturalism."
The study of immigration and its cultural dimensions should be covered in our anthropology curriculum, if we are to be up-to-date in our understanding and teaching about globalization and about Canada today.

ANTH 428
Credit Weight: 3
Transcript Title: Saints &Mediation in Latin Am.
Calendar Title: Saints and Mediation in Latin America.
Description:
This course examines religion in Latin America by means of a focus on the cult of the saints, a phenomenon central to religious, cultural and social life across the continent and key to the endurance of the institutional Catholic Church. Material in the course addresses various interpretive frames (e.g., historical, political economic, psychoanalytic, semiotic) in exploring how worship of the saints has marked Latin American society and culture, shaping sensibilities, sociality, nationalism, race, class, gender, and sexuality. The course also enables a comprehensive examination of Catholicism as both 'lived religion' and as shaped by the institutional Catholic Church.
Notes:

Transcript Title: Archaeology of Landscape
Calendar Title: Archaeology of Landscape.
Description:
This course investigates the application of landscape, together with other spatial concepts and a range of spatial analytical techniques in archaeological practice. We will interrogate the application of a range of theoretical approaches (phenomenological, semiotic, socio-evolutionary, socio-historical), and analytical techniques (regional survey, distributional mapping, spatial graphing, remote sensing, GIS) to archaeological investigations of past landscapes with particular attention to epistemological issues that articulate research problems with appropriate scales and strategies for analyzing and interpreting data. We will explore how a range of social practices produced multi-scalar landscapes, and how the active materiality of landscapes recursively created, maintained and contested social relations.
Notes:
Prerequisite(s): ANTH 357 and ANTH 359.
Restriction(s): Open only to students who have earned a minimum of B- in the prerequisite course(s).

Transcript Title: The Archaeology of Politics
Calendar Title: The Archaeology of Politics.
Description:
This course explores how archaeologists investigate past political life using theoretical approaches, archaeological methods and data sets. It examines how modalities of power and political practices articulated and organized social relations at multiple scales and contexts ranging from the institutional (e.g., states, governments, guilds, religious orders) to those of everyday life (e.g., diet, residence, gender). The course interrogates the history of archaeology’s engagement with past politics together with current topical foci such as the politics of ritual, identity, and gender, resistance to authority, production and consumption practices, commensal politics, landscape production, the materiality of politics and the politics of materials.

Transcript Title: S. Asian Archaeol: Age of Text
Calendar Title: South Asian Archaeology in Age of Text.
Description: How archaeologists investigate South Asia’s past during periods in which textual sources are available. It focuses primarily on the Early Historic (300 BCE-500 CE) and Medieval periods (500-1600 CE), examining how the analysis of the archaeological record, epigraphy and other forms of text have been articulated to produce narratives of South Asia’s past. Interrogation and problematization of the sometimes passive and politized roles that archaeology has played in South Asian historiography and exploration of how more comprehensive approaches to studying archaeological and textual data enables a fuller investigation of past social, political, economic, ideological and ritual conditions and practices.

ATOC 100
Credit Weight: 3
Transcript Title: Extr-Weath&Climate-Chg Physics
Calendar Title: Extreme-Weather and Climate-Change Physics.
Description:
This course will provide an overview of extreme weather and climate phenomena, using calculus-based mathematical and physical principles. It will examine the physics and dynamics associated with extreme weather and climate phenomena, including blizzards, heat waves, cold waves, ice storms, tornadoes, and hurricanes. The atmospheric and oceanic observing system will be used to quantify the structure and mechanisms of extreme weather and climate events. The physics of climate change will be interpreted through the natural and anthropogenic changes to Earth's radiation and energy balances. An introduction to climate models (both simple and complex) will illustrate the concepts of forcing, feedbacks, and climate sensitivity, and provide the foundation for understanding future changes in extreme weather.
Notes:
Prerequisite(s): PHYS 101
Corequisite(s): MATH 141
Administering Faculty: Faculty of Science
Teaching Department: Atmospheric & Oceanic Sciences
Status (catalog level): Active

ATOC 181
Credit Weight: 3
Transcript Title: Intro to Atmospheric Science
Calendar Title: Introduction to Atmospheric Science.
Description:
A survey of the Earth's atmosphere, weather and climate system. Topics include the fundamental processes that determine interactions between the atmosphere, ocean and biosphere; anthropogenic effects such as global warming, the ozone hole and acid rain; a perspective on future climate change.
Notes:
Fall and Winter
3 hours lecture
Restriction: Not open to students who have taken ATOC 210, ATOC 214, ENVB 301 or NRSC 201.

Teaching Department: Atmospheric & Oceanic Sciences

Status (catalog level): Active

ATOC 357
Credit Weight: 3
Transcript Title: Atmospheric & Oceanic Sci Lab
Calendar Title: Atmospheric and Oceanic Science Laboratory.

Description:
Students will gain hands-on experience in several fundamental atmospheric and oceanic science topics through practical experimentation. A diverse set of experiments will be conducted, ranging from in situ observations in Montreal, to remote sensing of clouds and radiation, to laboratory chemistry and water-tank experiments. As a background for these experiments, students will receive training on sensor principles and measurement error analysis, as well as the fundamental physical processes of interest in each experiment. They will learn to operate, and physically interpret data from, various sensors for in situ and remote observation of meteorological variables. Their training will also extend to operational weather observations, analysis, and forecasting.

Notes:
Prerequisite(s): ATOC 214 or permission of instructor.

ADMINISTERING FACULTY: Faculty of Science
Teaching Department: Atmospheric & Oceanic Sciences
Status (catalog level): Active

ATOC 373
Credit Weight: 3
Transcript Title: Arctic Climate & Climate Chge
Calendar Title: Arctic Climate and Climate Change.

Description:
Introduction to the principles of Arctic climate and climate change with a special focus on the Canadian Arctic. The primary objectives of the course are to 1) develop an understanding of the present day high latitude climate, including the atmosphere, the ocean and the sea ice, 2) develop an understanding of the role of the polar regions in the global climate and climate change, and 3) introduce students to field methods of polar research including ice coring, sea-ice buoys installation and data analysis, atmospheric measurements (radiative and turbulent heat fluxes), and ocean hydrographic measurements (e.g. CTD, nets).

Notes:
Prerequisite(s): Two courses from the following list: GEOG 203, GEOG 205,GEOG 272, GEOG 372, EVNR 200, EVNR 202, EPSC 203, EPSC 210, EPSC 212, EPSC 220, EPSC 233, ATOC 214, ATOC 215, ATOC 219, SOIL 300.
Corequisites: EPSC 373, GEOG 373, [ATOC 473 or EPSC 473 or GEOG 473]
Note(s): 1. This course is one of a set of four field courses (ATOC 373, EPSC 373, GEOG 373, ATOC/EPSC/GEOG 473) designed to be taken concurrently. It complements programs in natural science disciplines by providing students with specialized field training and research experience focusing on the unique environmental conditions of cold polar systems. 2. Cost includes transportation, room and board, field expenses. Students are charged $12,000 for the four courses combined: ATOC, 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473. 3. Arctic localities: Iqaluit, Resolute Bay, and Central Axel Heiberg Island in the Canadian High Arctic.

Transcript Title: Undergraduate Research Project  
Calendar Title: Undergraduate Research Project.  
Description:  
Independent research project with a final written report.  
Notes:  
Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.  
Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures.

Transcript Title: Indep Study of an Env Problem  
Calendar Title: Independent Study of an Environmental Problem.  
Description:  
A reading or research project, conducted under the guidance of an instructor, on the meteorological processes related to an environmental problem. A written report will be required. Students should consult the departmental undergraduate student adviser for the names of available supervisors.  
Notes:  
Restriction: students taking a joint program in Atmospheric and Environmental Science or with permission of Department.

ATOC 404  
Credit Weight: 3  
Transcript Title: Climate Physics  
Calendar Title: Climate Physics.  
Description:  
This course covers the essentials of climate physics through the lens of one-dimensional, vertical atmospheric models. This includes shortwave and longwave radiative transfer, convection, phase changes, clouds, greenhouse gases, and atmospheric escape. This is an adequate level of detail for understanding Earth's climate, paleoclimate, anthropogenic climate change, or pursuing studies of Solar System planets and extrasolar planets.  
Notes:
ATOC 473
Credit Weight: 6
Transcript Title: Arctic Field Research
Calendar Title: Artic Field Research.
Description:
This course is the independent research component of the McGill Arctic Field Study Semester. It has four distinct parts, a) problem identification and background preparation, b) research design and field data collection, c) lab and data analysis, and d) report preparation and presentation. The research design and field data collection will be part of an extended period of fieldwork based in the Canadian Arctic. The lab and data analysis will begin in the field and finish on campus. Each student will prepare a manuscript style report and make a conference presentation based on their research.
Notes:
Corequisite(s): GEOG 373, EPSC 373 and ATOC 373
Restriction(s): Permission of the instructor. Not open to students who have taken or are taking EPSC 473 or GEOG 473.
Note(s): 1. This course is one of a set of four field courses (ATOC 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473) designed to be taken concurrently. It complements programs in natural science disciplines by providing students with specialized field training and research experience focusing on the unique environmental conditions of cold polar systems. 2. Cost includes transportation, room and board, field expenses. Students are charged $12,000 for the four courses combined: ATOC 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473. 3. Arctic localities: Iqaluit, Resolute Bay, and Central Axel Heiberg Island in the Canadian High Arctic.

Transcript Title: Advances in Chem of Atmosphere
Calendar Title: Advances in Chemistry of Atmosphere.
Description:
Exploration of the field of atmospheric chemistry that is identified as the significant driver of climate change and the cause of millions of premature death every year. Discussion of cutting-edge novel technologies for observing and quantifying pollutants (from ground to satellite) using artificial intelligence, the fate of emerging contaminants (e.g., nano/microplastics, trace metals, persistent organic), and modelling of atmospheric and interfacial processes. Examination of topics like atmospheric gaseous and multiphase components like bioaerosols. Study of photochemical, photophysical, and aerosol nucleation processes that affect air quality, climate change, and ecosystem health.

Notes:
Prerequisites: CHEM 213, CHEM 273, MATH 222, MATH 315 or equivalents, or permission of the instructor.

Transcript Title: Arts & Sci Integrative Topics
Calendar Title: Arts and Science Integrative Topics.
Description: Topics that integrate information from Arts & Science (e.g. biomedical ethics; history of science; scientific reasoning; military conflict and geography; philosophy of mind, etc.) to exemplify the benefits of applying scholarship from diverse areas to a problem.
Notes: Restriction: Open only to students registered in the B.A.& Sc.
Administering Faculty: Interfaculty, B.A. & Sc.
Teaching Department: Science
Status (catalog level): Active

BASC 396
Credit Weight: 3
Transcript Title: Undergraduate Research Project
Calendar Title: Undergraduate Research Project.
Description: Independent research project with a final written report.
Notes: Prerequisite(s): Prerequisites: BASC 201, at least one term of undergraduate studies and a CGPA of at least 3.0; or permission of instructor. Restrictions: Permission required via the Office of Undergraduate Research in Science (OURS). Student cannot be supervised by same instructor for two 396 courses. S/U option not permitted. Only open to students in BA&Sc programs. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. See https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures. For projects that are not integrative, students should consider other research project or independent study courses offered by the Faculties of Arts or Science.

Credit Weight: 3  
Transcript Title: Intro to Biomolecular Eng  
Calendar Title: Introduction to Biomolecular Engineering.
Description: Forward and reverse engineering of biomolecular systems. Principles of biomolecular thermodynamics and kinetics. Structure and function of the main classes of biomolecules including proteins, nucleic acids, and lipids. Biomolecular systems as mechanical, chemical, and electrical systems. Rational design and evolutionary methods for engineering functional proteins, nucleic acids, and gene circuits. Rational design topics include molecular modeling, positive and negative design paradigms, simulation and optimization of equilibrium and kinetic properties, design of catalysts, sensors, motors, and circuits. Evolutionary design topics include evolutionary mechanisms, fitness landscapes, directed evolution of proteins, metabolic pathways, and gene circuits. Systems biology and synthetic biology.
Notes: Prerequisite(s): BIEN 200 or permission of instructor.

Description:
Introduction to the interdisciplinary field of biomedical uses of nanotechnology. Emphasis on emerging nanotechnologies and biomedical applications including nanomaterials, nanoengineering, nanotechnology-based drug delivery systems, nano-based imaging and diagnostic systems, nanotoxicology and immunology, and translating nanomedicine into clinical investigation.
Notes:
Prerequisite(s): BIEN 200, CHEM 212, and BIOL 112, or permission of instructor
(3-0-6)
Administering Faculty: Faculty of Engineering
Teaching Department: Bioengineering
Status (catalog level): Active

BIEN 515
Credit Weight: 3
Transcript Title: Special Topics in Bioeng 2
Calendar Title: Special Topics in Bioengineering 2.
Description:
Introduction to new selected topics in bioengineering.
Notes:
3-2-4
Prerequisite: Permission of instructor
Restrictions: Open to undergraduate (U4 or higher) and graduate students.
Instruction given by regular or visiting staff.

**Administering Faculty:** Faculty of Engineering
**Teaching Department:** Bioengineering
**Status (catalog level):** Active

**BIEN 520**
**Credit Weight:** 3
**Transcript Title:** High Throughput Bio Devices
**Calendar Title:** High Throughput Bioanalytical Devices.
**Description:**
Introduction to the field of high throughput screening (HTS) analytical techniques and devices used for genomics, proteomics and other "omics" approaches, as well as for diagnostics, or for more special cases, e.g., screening for biomaterials. Introduction into the motivation of HTS and its fundamental physico-chemical challenges; techniques used to design, fabricate and operate HTS devices, such as microarrays and new generation DNA screening based on nanotechnology. Specific applications: DNA, protein and diagnostic and cell and tissue arrays.

**Notes:**
Prerequisite: Permission of instructor.
(3-0-6)

**Administering Faculty:** Faculty of Engineering

BINF 301
Credit Weight: 3
Transcript Title: Intro to Bioinformatics
Calendar Title: Introduction to Bioinformatics.
Description:
Introduces analysis of DNA, RNA and protein sequences using computer software. Emphasis on implementation of molecular evolution theory for algorithms to make predictions of sequence function and infer the evolutionary history of sequences. Assessing analysis reliability and methods to improve efficiency of computer algorithms and their implications are discussed.
Notes:
Prerequisite(s): LSCI 202 or LSCI 204, and ANSC 326
Restriction: Not open to students who have taken BTEC 501.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Parasitology
Status (catalog level): Active

BINF 511
Credit Weight: 3
Transcript Title: Bioinformatics for Genomics
Calendar Title: Bioinformatics for Genomics.
Description:
Bioinformatics methods and reasoning in relation to genomics, proteomics and metabolomics strategies with an emphasis on functional genomics data. The course will cover introduction to UNIX, Perl programming, data processing and integration, file parsing, relational database design and implementation, angled towards solutions relevant for genomics.
Notes:
Prerequisite: Understanding of cell and molecular biology (equivalent to a cell or molecular biology course) or permission from instructor.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Plant Science
Status (catalog level): Active

BINF 531
Credit Weight: 3
Transcript Title: Statistical Bioinformatics
Calendar Title: Statistical Bioinformatics.
Description:
Underlying concepts and techniques for the analyses of large-scale data sets, generated from "omics" platforms (e.g., metagenomics, metabolomics, transcriptomics, etc.), as well as different approaches for working with high-dimensional data. Students will gain experience in such software packages as R and Bioconductor for statistical analysis and data visualization.
Notes:
Prerequisites: AEMA 310 or equivalent; LSCI 204, LSCI 211, LSCI 230, or equivalent
Restriction: Open to U3 students and above
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Animal Science
Status (catalog level): Active

BINF 621
Credit Weight: 3
Transcript Title: Bioinformatics: Mol. Biology
Calendar Title: Bioinformatics: Molecular Biology.
Description:
The main problems related to the analysis of biological sequences (sequence comparison, homology, gene annotation, phylogenetic inference, comparative genomics) and the computational approaches (dynamic programming algorithms, Blast heuristics, hidden Markov models, Bayesian statistics).

Notes:
Restriction: Enrolment by students in the Bioinformatics option or by permission from the course coordinators only. Limited to 30 students.

BIOSC 212

Credit Weight: 3
Transcript Title: Molec Mechanisms of Cell Funct
Calendar Title: Molecular Mechanisms of Cell Function.
Description:
An introductory course describing the biochemistry and molecular biology of selected key functions of animal cells, including: gene expression; mitochondrial production of metabolic energy; cellular communication with the extra-cellular environment; and regulation of cell division.
Notes:
Winter
Prerequisite: BIOL 200
Restrictions: A non-terminal course intended to be followed by BIOC 311; BIOC 312 in the U2 year. Not open to students who have taken or are taking BIOL 201 or ANAT 212.
Administering Faculty: Faculty of Science
Teaching Department: Biochemistry
Status (catalog level): Active

BIOSC 220

Credit Weight: 3
Transcript Title: Lab Meth in Biochem&Mol Biol 1
Calendar Title: Laboratory Methods in Biochemistry and Molecular Biology 1.
Description:
Introduction to key methodologies for the isolation, detection and characterization of proteins, lipids, nucleic acids and subcellular fractions, including spectrophotometry, assays of enzymatic activities and chromatographic and electrophoretic methods. Analysis of biochemical data.
Notes:
Prerequisite(s): BIOL 200
Corequisite(s): BIOC 212 and CHEM222
Restriction(s): Not open to students who have taken or are taking BIOL 301. Open to students in Biochemistry programs, others with permission of the instructor.
Administering Faculty: Faculty of Science
Teaching Department: Biochemistry
Status (catalog level): Active

BIOSC 311

Credit Weight: 3
Transcript Title: Metabolic Biochemistry
Calendar Title: Metabolic Biochemistry.
Description:
The generation of metabolic energy in higher organisms with an emphasis on its regulation at the molecular, cellular and organ level. Chemical concepts and mechanisms of enzymatic catalysis are also emphasized. Included: selected topics in carbohydrate, lipid and nitrogen metabolism; complex lipids and biological membranes; hormonal signal transduction.
Notes:
Fall
Prerequisites: BIOL 200, BIOL 201 or BIOC 212, CHEM 222 or CHEM 234
Administering Faculty: Faculty of Science
Teaching Department: Biochemistry

Credit Weight: 3
Transcript Title: Biochemistry of Macromolecules
Calendar Title: Biochemistry of Macromolecules.
Description:
Gene expression from the start of transcription to the synthesis of proteins, their modifications and degradation. Topics covered: purine and pyrimidine metabolism; transcription and its regulation; mRNA processing; translation; targeting of proteins to specific cellular sites; protein glycosylation; protein phosphorylation; protein turn-over; programmed cell death (apoptosis).
Notes:
Winter
Prerequisites: BIOC 311, BIOL 200, BIOL 201 or BIOC 212
Administering Faculty: Faculty of Science
Teaching Department: Biochemistry
Status (catalog level): Active

BIOC 320
Credit Weight: 3
Transcript Title: Lab Meth in Biochem&Mol Biol 2
Calendar Title: Laboratory Methods in Biochemistry and Molecular Biology 2.
Description:
Modern molecular-biological methods for isolation and characterization of nucleic acids and for analysis of RNA and protein expression, including: plasmid expression, isolation, restriction and ligation; electrophoretic methods and Western blotting; PCR and qPCR applications; immunofluorescence microscopy and basic bioinformatics approaches.
Notes:
Prerequisite(s): BIOC 220
Restriction(s): Not open to students who have taken or are taking BIOL 301. Open to students in Biochemistry programs; others with permission of the instructor.
Administering Faculty: Faculty of Science
Teaching Department: Biochemistry
Status (catalog level): Active

BIOC 396
Credit Weight: 3
Transcript Title: Undergraduate Research Project
Calendar Title: Undergraduate Research Project.
Description:
Independent research project with a final written report.
Notes:
Fall/Winter
Prerequisites: MIMM 212 or BIOC 220 or BIOL 301 or an equivalent laboratory course in molecular and cell-biological methods, at least one term of undergraduate studies, and a CGPA of at least 3.0; or permission of instructor. A project proposal form must be completed by the student and instructor and approved by the course coordinator or his/her delegate before the start of the term. Instructors will list project-specific prerequisites with the project description.
Restrictions: Departmental permission required. Student cannot be supervised by same instructor for two 396 Science courses. S/U option not permitted. Open to students in programs offered by the Faculty of Science only. Note that enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See
https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures.

Status (catalog level): Active

BIOL 216
Credit Weight: 3
Transcript Title: Biology of Behaviour
Calendar Title: Biology of Behaviour.
Description:
Introduction to the study of animal behaviour at the population, organismal, cellular, and molecular levels. Historical and contemporary methods and experiments will be presented and discussed to provide an overall appreciation of the biology of behaviour, with a focus on the application of multiple levels of analysis to biological phenomena and the formulation of hypotheses about evolution, development, function, and mechanisms of behavioural traits. Topics will range from how animals communicate with one another to the cellular mechanisms that allow information to be processed by nervous systems.

Notes:
Prerequisites: BIOL 111 and BIOL 112 or equivalents

Administrating Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 219
Credit Weight: 4
Transcript Title: Intro to Phys Mol & Cell Biol
Calendar Title: Introduction to Physical Molecular and Cell Biology.
Description:
An introduction to molecular and cell biology from a physical perspective. Techniques and methodologies, both experimental and computational, are included in the presentation of each thematic module.
Notes:
Prerequisite(s): BIOL 112; CHEM 110 and CHEM 120; MATH 140, MATH 141 and MATH 133; PHYS 131 and PHYS 142; or the equivalents of these courses.
Corequisite(s): MATH 222 or equivalent
Restriction(s): Not open to students who have taken or are taking ANAT 212, BIOC 212, BIOL 200, and BIOL 201, or BIEN 219. Only open to students in Bioengineering, Computer Science-Biology, Biology-Mathematics, Biology-Quantitative Biology, Chemistry-Biophysical Chemistry, and Physics-Biological Physics Options.
This course is meant to prepare students for related 300-level courses in Biology, Chemistry, Engineering and Physics.

Administrating Faculty: Faculty of Science

BIOL 300
Credit Weight: 3
Transcript Title: Molecular Biology of the Gene
Calendar Title: Molecular Biology of the Gene.
Description:
A survey of current knowledge and approaches in the area of regulation of gene expression, post-transcriptional control of gene expression, and signal transduction.
Notes:
Fall
3 hours lecture
Prerequisites: BIOL 219 or BIOL 200 plus either BIOL 201 or ANAT 212/BIOC 212
Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 301
Credit Weight: 4
Transcript Title: Cell and Molecular Laboratory
Calendar Title: Cell and Molecular Laboratory.
Description:
An introduction to biology research and communication with a focus on cell and molecular biology. Through conducting a series of project-based experiments and writing a final report, molecular and synthetic biology techniques such as gene cloning, manipulation, protein isolation and characterization and how research is conducted, analyzed and communicated will be addressed. In addition, an introduction to bioinformatics methods and their role in analysis will be provided.
Notes:
Fall or Winter
1 hour lecture and one 6-hour laboratory
Prerequisites: BIOL 200, BIOL 201 (or ANAT 212/BIOC 212); or BIOL 219
Restrictions: Not open to students who have taken or are taking BIOC 300, or BIOC 220 and BIOC 320. Requires departmental approval.
For approval email maxime.leroux@mcgill.ca. Specify your ID number as well as the term and two lab day preferences.
Administering Faculty: Faculty of Science

Status (catalog level): Active

BIOL 302
Credit Weight: 3
Transcript Title: Fundamentals of Genetics & Genomics
Calendar Title: Fundamentals of Genetics and Genomics.
Description:
Trait variation within and across populations and species and how this reflects variation within genomes. Case studies and problem-solving approaches will be used to illustrate the tools of genomics, molecular genetics and classical genetics, and how they are employed to understand the mechanisms of phenotypic variation. Topics will include evolutionary, developmental and human genetics. Application of multiple levels of genetic analysis, formulation, and testing of hypotheses on critical topics ranging from evolution to developmental biology to human genetics.
Notes:
Prerequisites: BIOL 200 or BIOL 219; BIOL 215, or permission of instructor.
Restrictions: Not open to students who have taken or are taking BIOL202.

Credit Weight: 3
Transcript Title: Biodiversity and Ecosystems
Calendar Title: Biodiversity and Ecosystems.
Description:
Ecological bases of the natural causes and consequences of current global environmental changes, including how biodiversity and ecosystem processes are defined and measured, how they vary in space and time, how they are affected by physical and biological factors, and how they affect each other and human societies.
Notes:
Winter
3 hours lecture
one-day field trip to Mont St-Hilaire
Prerequisite: BIOL 215; or ENVR 200 and ENVR 202; MATH 112 or equivalent; or permission of the instructor
Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 311
Credit Weight: 3
Transcript Title: Adv Methods: Organismal Biology
Calendar Title: Advanced Methods in Organismal Biology.
Description:
Application of methods and techniques used by organismal biologists, paired with the design of sampling programs to test hypotheses using observational or experimental data, and the analysis of data. Topics include DNA barcoding/metabarcoding and experimental evolution.
Notes:
Prerequisites: BIOL 200 or BIOL 219; BIOL 206, COMP 204, and BIOL 202 or BIOL 302.
Restrictions: Not open to students who have taken BIOL 206 prior to Fall 2020
Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 313
Credit Weight: 3
Transcript Title: Eukaryotic Cell Biology
**Calendar Title:** Eukaryotic Cell Biology.

**Description:**
In-depth examination of the structure and function of eukaryotic cells, with an emphasis on experimental design and interpretation. Examination of the molecular mechanisms of various cellular processes, including protein homeostasis, intracellular transport, cytoskeletal dynamics, multicellular organization and cell proliferation.

**Notes:**
Winter
3 hours lecture and 1 hour optional tutorial
Prerequisites: BIOL 202 or BIOL 302; BIOL 219 or BIOL 200 plus either BIOL 201 or ANAT 212/BIOC 212

**Credit Weight:** 3

**Transcript Title:** Introduction to Biophysics

**Calendar Title:** Introduction to Biophysics.
Emerging physical approaches and quantitative measurement techniques are providing new insights into longstanding biological questions. This course will present underlying physical theory, quantitative measurement techniques, and significant findings in molecular and cellular biophysics. Principles covered include Brownian motion, low Reynolds-number environments, forces relevant to cells and molecules, chemical potentials, and free energies. These principles are applied to enzymes as molecular machines, membranes, DNA, and RNA.

Notes:
Winter. Students with training in physics and biology will be well-suited to the course.

Prerequisites: BIOL 200 or BIOL 219; MATH 222; PHYS 230 and (PHYS 232 or PHYS 253), or permission of the instructor.
Restriction: Not open to students who have taken or are taking PHYS 319

Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

Calendar Title: Evolution of Brain and Behaviour.
Description:
Functional and comparative approach to neuroanatomy, examining how species changes in brain organization contribute to evolutionary changes in behaviour.
Notes:
Winter
2 hours of lecture and 1 hour of conference (mandatory)
Prerequisite: NSCI 201 or BIOL 306

Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 324
Credit Weight: 3
Transcript Title: Ecological Genetics
Calendar Title: Ecological Genetics.
Description:
Presents evolutionary genetics within an ecological context. Covers theoretical and applied topics together with relevant data from natural populations of plant and animals.
Symbols: ALTY - Taught in alternate years
Notes:
Fall
Prerequisite: BIOL 202 or BIOL 302
Two lectures per week; one required computer lab or conference per week

Administering Faculty: Faculty of Science
Teaching Department: Biology
Status (catalog level): Active

BIOL 331
Credit Weight: 3
Transcript Title: Ecology/Behaviour Field Course
Calendar Title: Ecology/Behaviour Field Course.
Description:
Methods of sampling natural populations. Testing hypotheses in nature.
Notes:
Prerequisites: BIOL 206 and BIOL 215, or equivalents, or permission of the instructor.
Note: This course has an additional fee. The Department of Biology subsidizes a portion of the cost for this activity.
The field portion of this course is given at the University’s Gault Nature Reserve in Mont St. Hilare over a two-week period in the summer term. In the summer, students prepare a report based on projects carried out during this field portion. There is an additional fee of $668.32 that covers room and board and handouts. This fee could be refundable if the department approves it.

Status (catalog level): Active

BIOL 334D1
Credit Weight: 1.5
Transcript Title: Applied Tropical Ecology
Calendar Title: Applied Tropical Ecology.
Description:
Relevant to agriculture, forestry, fisheries and conservation of natural resources. Field component taught at the University's Bellairs Research Institute in Barbados, for two weeks in early May. The course is organized in a series of small-group field projects of 2-3 days each. Interested students should check the course website, attend the full information session and fill out an application form.

Notes:
Winter, Summer
Prerequisites: BIOL 206; and BIOL 215 or both ENVR 200 and ENVR 202; and permission of the instructor.
Students must register for both BIOL 334D1 and BIOL 334D2.
No credit will be given for this course unless both BIOL 334D1 and BIOL 334D2 are successfully completed in consecutive terms
BIOL 334D1 and BIOL 334D2 together are equivalent to BIOL 334

Administering Faculty: Faculty of Science

BIOL 335
Credit Weight: 3
Transcript Title: Marine Mammals
Calendar Title: Marine Mammals.
Description:
Biology of marine mammals with special emphasis on seals and whales of the Bay of Fundy. Taught at the Huntsman Marine Science Centre, St. Andrews, N.B., for two weeks in August. The course combines lectures, laboratory exercises, field trips, and individual projects.
Notes:
Prerequisite: BIOL 205
This course is offered in the summer.
Apply first to Huntsman, then contact susan.gabe@mcgill.ca.
The fee for this field course is $1804, to cover fees related to the use of facilities for teaching and lab spaces in the Huntsman Marine Center (lodging, meals, facility rental spaces, transportation and tour fees).

Calendar Title: Undergraduate Research Project.
Description: Independent research project with a final written report.
Notes: Fall, Winter or Summer
Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.
Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures. A completed application form should be brought to Nancy Nelson in Room N7/9B, Stewart Biology Building.

Transcript Title: Cognitive Ecology
Calendar Title: Cognitive Ecology.
Description:
Cognition refers to the processes of acquiring, retaining, and using information. In the wild, an organism relies on a wide variety of information to interact with its environment and these interactions affect its survival and reproduction. Focus on the ecology and evolution of cognition and its underlying neural mechanisms. Examines links between cognition, behaviour in the wild, and the brain. Builds upon the principles of behavioural ecology and behavioural neuroscience.

BIOS 601  
**Credit Weight:** 4  
**Transcript Title:** Epi: Intro & Statistical Models  
**Calendar Title:** Epidemiology: Introduction and Statistical Models.  
**Description:**  
Examples of applications of statistics and probability in epidemiologic research. Source of epidemiologic data (surveys, experimental and non-experimental studies). Elementary data analysis for single and comparative epidemiologic parameters.  
**Notes:**  
Prerequisites: Permission of instructor. Undergraduate course in mathematical statistics at level of MATH 324.  
**Administering Faculty:** Graduate Studies  
**Teaching Department:** Epidemiology and Biostatistics  
**Status (catalog level):** Active

BIOS 602  
**Credit Weight:** 4  
**Transcript Title:** Epidemiology: Regression Models  
**Calendar Title:** Epidemiology: Regression Models.  
**Description:**  
Multivariable regression models for proportions, rates and their differences/ ratios; Conditional logic regression; Proportional hazards and other parametric/semi-parametric models; unmatched, nested, and self-matched case-control studies; links to Cox's method; Rate ratio estimation when "time-dependent" membership in contrasted categories.  
**Notes:**  
Prerequisites: Permission of instructor. MATH 556 and BIOS 601, or their equivalents.  
**Administering Faculty:** Graduate Studies  
**Teaching Department:** Epidemiology and Biostatistics  
**Status (catalog level):** Active

Transcript Title: Biostatistics Internship
Calendar Title: Biostatistics Internship.
Description: The internship will provide the opportunity to integrate classroom learning and practice in an applied statistics environment. The student contributes to an organization's mandate and to addressing a data analysis or statistics research while developing skills as a biostatistics professional and/or researcher.
Notes: This course is aimed at students registered in the M.Sc. in Biostatistics and the M.Sc. in Mathematics & Statistics who are specializing in statistics.
Restriction(s): By permission of the department.

BIOS 637
Credit Weight: 4
Transcript Title: AdvModel:Surv&OtherMultivData
Calendar Title: Advanced Modeling: Survival and Other Multivariable Data.
Description: Advanced applied biostatistics course dealing with flexible modeling of non-linear effects of continuous covariates in multivariable analyses, and survival data, including e.g. time-varying covariates and time-dependent or cumulative effects. Focus on the concepts, limitations and advantages of specific methods, and interpretation of their results. In addition to 3 hours of weekly lectures, shared with epidemiology students, an additional hour/week focuses on statistical inference and complex simulation methods. Students get hands-on experience in designing and implementing simulations for survival analyses, through individual term projects.
Notes: Restriction(s): Graduate students in Biostatistics or Math/Stat programs, or permission of the instructor. Students are expected to have a good understanding of multivariable regression and basic knowledge of survival analysis.

Transcript Title: Seminars in Biomedical Engineering
Calendar Title: Seminars in Biomedical Engineering.
Description:
This course requires students to regularly attend the departmental seminar series and to present a seminar related to their research.
Notes:
Students must register for both BMDE 600D1 and BMDE 600D2. No credit will be given for this course unless both BMDE 600D1 and BMDE 600D2 are successfully completed in consecutive terms.
Students must register for BMDE 600D1 before BMDE 600D2.
Restriction(s): This course is open only to students registered in the second term or later of the M.Eng. in Biomedical Engineering (Thesis) and M.Eng. in Biomedical Engineering; (Thesis) Bioinformatics programs.
Not open to students who have taken BMDE 500D1/D2.

Status (catalog level): Active

BMDE 651
Credit Weight: 3
Transcript Title: Orthopaedic Engineering
Calendar Title: Orthopaedic Engineering.
Description:
Science and technology related to implants used for various orthopaedic reconstructive procedures, with emphasis on artificial hip and knee joint prostheses.

Notes:
Restriction: Permission of the instructor.
Administering Faculty: Graduate Studies
Teaching Department: Biomedical Engineering
Status (catalog level): Active

BMDE 652
Credit Weight: 3
Transcript Title: Bioinformatics: Proteomics
Calendar Title: Bioinformatics: Proteomics.
Description:
Overview of high-throughput proteomic technologies commonly employed to study the localization and function of all proteins in an organism, and the bioinformatic approaches to analyze raw data and deposit them in proteome databases.

Notes:
Prerequisite: Enrolment in Bioinformatics option program or permission by coordinators.
Note: The course is inter-disciplinary and is targeted to students with different scientific backgrounds. A substantial portion of marks will be given based on
practical assignments.

**BMDE 653**  
**Credit Weight:** 3  
**Transcript Title:** Patents in Biomedical Eng.  
**Calendar Title:** Patents in Biomedical Engineering  
**Description:**  
This is a practical course on patents with emphasis on biomedical engineering applications. The course offers an overview of intellectual property, patents, and the patenting process. The course also provides insights into the strategies relating to commercialization and exploiting of patents, as well as enforcing patents. This course is designed to help biomedical engineers who will encounter patents in their work and needs to understand the nature and the scope of the patent system, how patents are obtained, and how to commercially exploit a patent.

**Credit Weight:** 3  
**Transcript Title:** Biomed Reg Affairs-Med Devices  
**Calendar Title:** Biomedical Regulatory Affairs – Medical Devices  
**Description:**  
Regulatory strategies and quality management systems are critical for medical device development. This course provides an overview of regulatory requirements, and familiarize students with the important ISO and IEC standards pertaining to medical device development. This course will provide biomedical engineers with an understanding of the regulatory and quality requirements to translate a medical device idea into a commercial product, and will draw upon the expertise of invited speakers currently working in the medical devices industry.

**Administering Faculty:** Graduate Studies  
**Teaching Department:** Biomedical Engineering  
**Status (catalog level):** Active

**BMDE 655**  
**Credit Weight:** 3  
**Transcript Title:** Biomed Clin Trials-Med Devices  
**Calendar Title:** Biomedical Clinical Trials – Medical Devices  
**Description:**  
This course will train biomedical engineers to understand the clinical and business aspects of transferring a medical device idea into a commercial product. This course provides an overview of the preclinical and clinical testing of medical devices, clinical trials, reimbursement systems, market analysis, sales models, and business models, as pertaining to medical devices. This course will also cover the design of randomized trials, including statistical principles, hypothesis postulating, bias minimization, and randomization methods.

**Administering Faculty:** Graduate Studies

**Status (catalog level):** Active

**BMDE 656**  
**Credit Weight:** 3  
**Transcript Title:** Medical Device Dvlpmnt Process  
**Calendar Title:** Medical Device Development Process.
Description:
Development of medical devices from concept to usage in humans. Overview of technical and regulatory processes to ensure safety and efficacy from the perspective of patients and users. Discussion of an existing medical device, reviewing all steps of the design process and the required documentation for regulatory submission.

Administering Faculty: Graduate Studies
Teaching Department: Biomedical Engineering
Status (catalog level): Active

BMDE 657D1
Credit Weight: 9
Calendar Title: Biomedical Engineering Industry Internship.
Description:
This course covers various aspects of translational biomedical engineering at an organization in the biomedical engineering industry (including private, public and non-governmental organizations), which includes applying engineering principles to design, develop, implement, or test biomedical engineering solutions as well as assume active roles in translational projects of biomedical engineering solutions at host organizations.

Notes:
Restrictions: This course is restricted to graduate students registered in the M.Sc.(A.) in Translational Biomedical Engineering; Non-Thesis.

Administering Faculty: Graduate Studies

Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 210
Credit Weight: 3
Transcript Title: Mechanical Analysis and Design
Calendar Title: Mechanical Analysis and Design.
Description:
Non-concurrent force systems; analysis of simple trusses and multforce frames; friction, shearing forces and bending moments in beams and frames; centres of gravity.
Notes:
  3 lectures and 2 hours lab or problems per week.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 214
Credit Weight: 3
Transcript Title: Geomatics
Calendar Title: Geomatics.
Description:
The communicative skills of surveying. The fundamentals of surveying through the application of reasoning, tools, techniques, and instruments. Practices in use of basic surveying equipment including steel tape, level, and theodolite. The use and operation of Total Stations. The procedures and methods for the measurement of distances, elevations, angles and positions. Basic surveying calculations, including traverse adjustments.
Notes:
Two lectures and one 3-hour lab per week.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 216
Credit Weight: 3
Transcript Title: Bioresource Eng. Materials
Calendar Title: Bioresource Engineering Materials.
Description:
Introduction to the composition and mechanical constitution of materials used in bioresource engineering, including metals, plastics, concrete, wood, composite, plant and food materials. Crystal structure, alloys, phase diagrams, stresses and strains, elasticity, plasticity, yield, fracture, ductility, heat treatments, cold work, corrosion, composite materials, concrete chemistry, polymers.
Notes:
2 lectures and one 2-hour lab
Restrictions: Open to students enrolled in a Bioresource Engineering program or permission of the instructor.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active
BREE 217
Credit Weight: 3
Transcript Title: Hydrology and Water Resources
Calendar Title: Hydrology and Water Resources.
Notes: Three lectures, one 2-hour lab per week.
This course carries an additional course charge for field trips.
This course carries an additional course charge of $19.43 to cover transportation costs for two field trips, which may include a visit to a national weather station and a trip to gain hands-on experience on monitoring water flow in streams.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 252
Credit Weight: 3
Transcript Title: Computing for Engineers
Calendar Title: Computing for Engineers.
Description: A disciplined general approach to the solution of engineering problems, and the implementation of these solutions using structured programming methods in a current computational environment.
Notes: 3 lectures and one 2-hour lab per week
Note that a B+ must be obtained in this course in order to be permitted to register in BREE 504
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 301
Credit Weight: 3
Transcript Title: Biothermodynamics
Calendar Title: Biothermodynamics.
Description: Classical thermodynamic analysis of pure and simple compressible systems. The course covers the first and second laws of thermodynamics. It deals with basic concepts of thermodynamics and thermochemistry in biological systems.
Notes: 3 lectures and one 2-hour lab
Restriction: Open to students in Bioresource Engineering and Bionegineering programs and permission of the instructor.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 305
Credit Weight: 3
Transcript Title: Fluid Mechanics
Calendar Title: Fluid Mechanics.
Description: Properties of fluids; fluid statics; principles of flow of incompressible and compressible fluids; dimensional analysis boundary layers; conduit and open channel systems; simple applications to turbo machinery.
Notes: Prerequisites: BREE 210, AEMA 202
Three lectures and one 2-hour lab or problems per week. This course carries an additional course charge for field trips. This course carries an additional charge of $37.68 to cover the cost of transportation (bus rental) for local field trips. The fee is refundable only during the withdrawal with full refund period.
Administrating Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

Status (catalog level): Active

BREE 319
Credit Weight: 3
Transcript Title: Engineering Mathematics
Calendar Title: Engineering Mathematics.
Description:
Advanced topics in engineering mathematics, including systems of ordinary
differential equations, stability analysis, special functions, orthogonal
functions and Fourier series, boundary value problems in various coordinate
systems, and integral transforms. The use of computer-based mathematical tools is
an integral part of the course.

Notes:
3 hours of lecture and 1 hour of conference per week
Prerequisite: AEMA 305 and BREE 252, or equivalents.
Restriction: Not open to students who have taken ABEN 319.

Administrating Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 322
Credit Weight: 3
Transcript Title: Organic Waste Management
Calendar Title: Organic Waste Management.
Description:
An introduction to engineering aspects of handling, storage and treatment of all
biological and food industry wastes. Design criteria will be elaborated and
related to characteristics of wastes. Physical, chemical and biological treatment
systems.
Notes:
2 lectures and one 2-hour lab
Restriction: Not open to students who have taken ABEN 322.
A fee of $24.34 is charged to support a field trip to local waste management
facilities for guided tour and information-gathering for a course assignment as
well as some laboratory supplies for hands-on composting and/or anaerobic
digestion lab.

Administrating Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

Credit Weight: 3
Transcript Title: Machinery Systems Engineering
Calendar Title: Machinery Systems Engineering.
Description:
Study and analysis of machines for tillage, harvesting, crop processing and handling. Field tests, load studies, design requirements; design of machines and components for agricultural applications.
Notes:
Three lectures and one 3-hour lab per week
Prerequisite: BREE 341
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 415
Credit Weight: 3
Transcript Title: Design of Mach.&Struct.Elems
Calendar Title: Design of Machines and Structural Elements.
Description:
Design of shafts, bearings, gears, fasteners, and frames. Material selection and introduction to advanced materials for machine and structural design applications. Stress, strain, and deflection analysis for standard machine and structural elements. Predicting mechanical failure caused by static and variable (fatigue) loads using proper design criteria. Applying fundamental concepts for the analysis and design of machine elements (shafts, gears, and bearings). Integrating the design of individual machine elements into larger systems and applying numerical modeling (finite element method), engineering drawing, and 3D printing for validation and rapid prototyping of designed machine and structural elements.
Notes:
Prerequisite: BREE 210, BREE 216, and BREE 341
Restriction: Not open to students who have taken BREE 315.
3 hours of lecture and 2 hours of problems per week
A course fee of $20.60 is to pay for supplies used in fused-deposition modeling (FDM) and Stereolithography (SLA) for 3D printing of structural and machine elements. The fee is associated with the printing materials and accessories used in lab sessions.

**Teaching Department:** Bioresource Engineering  
**Status (catalog level):** Active

**BREE 509**  
**Credit Weight:** 3  
**Transcript Title:** Hydrologic Systems & Modelling  
**Calendar Title:** Hydrologic Systems and Modelling.  
**Description:**  
Hydrologic cycle in the nature and how to quantitatively describe those processes using models. The fundamentals of hydrology including basic concepts, precipitation, snow and snowmelt, evapotranspiration, subsurface flow, infiltration and soil water movement, and runoff and streamflow. Equivalent attention to theories and hands-on practices on model application. How to set up and execute weather data driven physical based models, both at a point-scale and a watershed scale, to predict snowmelt, evapotranspiration, infiltration, soil water redistribution, subsurface drainage, runoff, and stream flow in hydrologic systems.  
**Notes:**  
3 hour lectures  
Prerequisite: BREE 217 or equivalent.

**Administering Faculty:** Faculty of Agric Environ Sci  
**Teaching Department:** Bioresource Engineering
**BREE 510**

**Credit Weight:** 3  
**Transcript Title:** Watershed Systems Management  
**Calendar Title:** Watershed Systems Management.  
**Description:** A holistic examination of methods in watershed management with a focus on integrated water resources management (IWRM). Topics include: integration, participatory management, water resources assessment, modeling, planning, adaptive management, transboundary management, and transition management.  
**Notes:**  
(3-2-4)  
Restrictions: U3 students or above.  
Note: Case studies and a project.  
**Administering Faculty:** Faculty of Agric Environ Sci  
**Teaching Department:** Bioresource Engineering  
**Status (catalog level):** Active

**BREE 512**

**Credit Weight:** 3  
**Transcript Title:** Soil Cutting and Tillage  
**Calendar Title:** Soil Cutting and Tillage.  
**Description:** Soil mechanics applied to cutting, tillage and drain installation tools. Soil cutting forces for two and three dimensional implements. Soil loosening, inversion, sorting and manipulation. Selection of traction machines to match soil cutting and tillage requirements. Depth and grade control systems. Analysis of drainage machines, wheel trenchers, chain trenchers and trenchless plows.  
**Notes:**  
2 lectures and one 2-hour lab  
Prerequisite (Undergraduate): BREE 341 (formerly ABEN 341)  
Restriction: Not open to students who have taken ABEN 512.  
**Administering Faculty:** Faculty of Agric Environ Sci  
**Teaching Department:** Bioresource Engineering  
**Status (catalog level):** Active

**BREE 515**

**Credit Weight:** 3  
**Transcript Title:** Soil Hydrologic Modelling  
**Calendar Title:** Soil Hydrologic Modelling.  
**Description:** A review of computer simulation models for designing subsurface drainage systems. Use of CAD systems for designing and drafting drainage plans.  
**Notes:**  
Three lectures and one 3-hour lab per week.  
**Administering Faculty:** Faculty of Agric Environ Sci  
**Teaching Department:** Bioresource Engineering  
**Status (catalog level):** Active

**BREE 518**

**Credit Weight:** 3  
**Transcript Title:** Ecological Engineering  
**Calendar Title:** Ecological Engineering.  
**Description:** Concepts and practice of ecological engineering: the planned creation or
management of a community of organisms, their nonliving surroundings, and technological components to provide services. Survey of applications such as constructed wetlands, aquatic production systems, green infrastructure for urban storm water management, environmental restoration. Taught cooperatively with a parallel course at University of Nebraska-Lincoln. Online collaboration with an interdisciplinary, international team is an important component of the course.

Notes:
One 3-hour lecture per week.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

BREE 519
Credit Weight: 3
Transcript Title: Advanced Food Engineering
Calendar Title: Advanced Food Engineering.
Description: Advanced topics in food engineering. Concepts of mathematical modelling and research methodologies in food engineering. Topics include heat and mass transfer in food systems, packaging and distribution of food products, thermal and non-thermal processing, rheology and kinetics of food transformations.
Notes: Three lectures and one 2-hour lab per week.
Prerequisites: BREE 325, or permission of instructor.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Bioresource Engineering
Status (catalog level): Active

Transcript Title: Post-Harvest Storage  
Calendar Title: Post-Harvest Storage.  
Description: Active, semi-passive and passive storage systems; environmental control systems; post-harvest physiology and pathogenicity; quality assessment and control methodology; economic aspects of long-term storage.  
Symbols: ALTY - Taught in alternate years  
Notes:  
This course carries an additional course charge for field trips.  
Restriction: Open to U3 students or above.  
This course carries an additional charge of $49.87 to cover the cost of transportation (bus rental) for local field trips. The fee is refundable only during the withdrawal with full refund period.  

BREE 533  
Credit Weight: 3  
Transcript Title: Water Quality Management  
Calendar Title: Water Quality Management.  
Description: The water phases of terrestrial ecological systems and the processes that link them. Physical, chemical, and biological properties of water, and water quality standards. The fate and transport of pollutants in rivers and streams, lakes, and wetlands. Methods to quantify soil carbon and nitrogen cycle to predict nutrient leaching. Impacts of human activities (e.g., agricultural drainage) on water quality and measures to improve drainage water quality. Assess the effectiveness of proposed engineering measures or management practices in improving or maintaining water quality of a real site/water body using numerical methods or a computer modelling approach.  
Notes:
Restriction: Not open to students who have taken BREE 625 (formerly ABEN 625).

Management of water quality for sustainability. Cause of soil degradation, surface and groundwater contamination by agricultural chemicals and toxic pollutants. Screening and mechanistic models. Human health and safety concerns. Water table management. Soil and water conservation techniques will be examined with an emphasis on methods of prediction and best management practices.

This course carries an additional charge of $37.68 to cover the cost of transportation with respect to a field trip. The fee is refundable only during the withdrawal with full refund period.

Transcript Title: Financial Modeling
Calendar Title: Financial Modeling.
Description:
Financial modeling involves the building of an abstract representation (a model) of a real-world financial situation. This mathematical model is designed to represent a simplified version of the performance of a financial asset or portfolio of a business, project, or other investment. Students will be introduced to, and are expected to generate and refine, financial modeling in mergers and acquisitions, portfolio management, corporate treasury, and risk management contexts in which derivative products will be used or in situations where analysis and decision making would be enhanced by modeling.

Calendar Title: Introduction to Portfolio and Risk Management.
Description:
This course introduces the portfolio planning and construction process, including the development of an investment policy statement (IPS). A discussion of risk management, including the various types and measures of risk, follows, and a risk
management framework is provided. Derivatives have become increasingly important for managing financial risk, exploiting investment opportunities, and creating synthetic asset class exposure, so this course provides students with a working knowledge of derivatives analysis. Finally, the course provides an introduction to Alternative Investments, which are used in portfolios for further diversification benefits and higher returns.

Transcript Title: Invest Decs & Eff of Behav Fin
Calendar Title: Investment Decisions and Effect of Behavioural Finance.
Description:
The standard economic paradigm¿rational agents in an efficient market¿does not adequately describe behaviour in financial markets. In this course, students will survey the evidence and use psychological criteria to guide alternative theories of financial markets. The standard argument that smart, profit-seeking agents can correct any distortions caused by irrational investors is reviewed. Furthermore, the preferences and trading decisions of individual investors in the age of artificial intelligence and robot advisors are examined, and the assertion that systematic biases can aggregate into observed market inefficiencies debated. The second half of the course extends the analysis to corporate decision-making.

Calendar Title: Linguistics for Translation / La linguistique et la traduction.
Description:
This course is designed to give the student an overview of the scientific study of language and the manner in which it can be applied to translation. Students will apply their theoretical knowledge in a series of practical exercises on the various topics. The course consists of three major parts: a) A presentation of the basic concepts of linguistics. b) A study of the mechanics of language with a particular emphasis on morphology and syntax and the use of the writing code. Application of the concepts of deep structure and surface structure to help in the decoding and encoding of texts in two different languages. c) A study of the theories of socio- and psycholinguistics as applied to translation. / Ce cours vise à donner à l'étudiant une vue d'ensemble de l'étude scientifique du langage et de ses modalités d'application à la traduction. Des exercices pratiques portant sur divers sujets permettent à l'étudiant de mettre en pratique ses connaissances théoriques. Le cours comprend trois grands volets : a) Une présentation des notions de base de la linguistique; b) Étude des mécanismes du langage et particulièrement de la morphologie, de la syntaxe et du code écrit. Application des notions de structure profonde et de structure superficielle pour faciliter le décodage et le codage de textes dans deux langues; c) Une étude des théories de la socio- et de la psycholinguistique appliquées à la traduction.

Calendar Title: English Vocabulary in Context.

Description:
Focuses on English communication through the study of vocabulary and its function in discourse. Broadens the field and mode of oral/written communication by developing "lexical competence". Identifies the nature and role of words, phrasal verbs and idioms through the study of semantics and intense practice of vocabulary in context./ Ce cours se concentre sur la communication par le truchement de l'étude du vocabulaire et de ses fonctions dans le discours. Il cherche à développer une véritable « compétence lexicale » tant à l'oral qu'à l'écrit. L'enrichissement du vocabulaire se fera par l'identification de la nature et du rôle des mots, des locutions ou des expressions figées, par l'étude des champs sémantiques et par une pratique intensive favorisant le réemploi en contexte.

Transcript Title: French Vocabulary in Context
Calendar Title: French Vocabulary in Context.
Description: Focuses on French communication through the study of vocabulary and its function in discourse. Broadens the field and mode of oral/written communication by developing "lexical competence". Identifies the nature and role of words, phrases and idioms through the study of semantics and intense practice of vocabulary in context./ Ce cours se concentre sur la communication par le truchement de l'étude du vocabulaire et de ses fonctions dans le discours. Il cherche à développer une véritable « compétence lexicale » tant à l'oral qu'à l'écrit. L'enrichissement du vocabulaire se fera par l'identification de la nature et du rôle des mots, des locutions ou des expressions figées, par l'étude des champs sémantiques et par une pratique intensive favorisant le réemploi en contexte.

Transcript Title: Project Management
Calendar Title: Project Management.
Description:
This course addresses the fundamental principles of project management, and the tools and techniques at our disposal to help achieve our goals. These principles, largely developed and tested on engineering projects, are being successfully applied to projects of all sizes and types within the business world. Topics covered include: project definition and start up; planning, scheduling and estimating; approval process, including testing for alternatives; project information and control systems; resource selection and allocation, implementation; post-project evaluation; project management as a career; skills and knowledge required by professionals, including decision-making and resource allocation appropriate to project phases; integration with other disciplines, including accounting and finance. Students will have the opportunity to apply the principles they learn through lab sessions using the latest computerized project management tools.
Notes:
26 lectures of 3 hours
$1582.01

Transcript Title: Spec Fre for Acad/Pro Purposes
Calendar Title: Specialized French for Academic/Professional Purposes.
Description: Course will develop linguistic, communicative, discursive and socio-cultural
competencies at an intermediate level. Classes provide instruction in listening, speaking, reading, writing and pronunciation. Learners practice various techniques necessary for effective oral/written communication in academic/professional contexts. The course also aims at increasing students' awareness of Quebec academic/professional contexts.

Notes:
Prerequisite: Entrance Placement Test, or Permission of the Director
Only available for group enrolment (as part of customized training)

Transcript Title: Process Control
Calendar Title: Process Control.
Description: Needs for process control; simple transient models and responses, first and higher-order systems, empirical determination of models, transfer functions and Laplace domain analysis, control loop hardware and associated realistic models; process and instrumentation diagrams; control philosophy; safety; open and closed loop responses; feedback control; stability analysis; controller tuning; feedforward, cascade and ratio control; control of batch and start-up processes.
Notes: (3-1-5)
Prerequisite: CHEE 291
Corequisite(s): CHEE 423, CHEE 453

Administering Faculty: Faculty of Engineering
Teaching Department: Chemical Engineering
Status (catalog level): Active
CHEE 456
Credit Weight: 9
Transcript Title: Design Project
Calendar Title: Design Project.
Description:
Chemical engineering process and plant design. Preliminary engineering design, feasibility analysis considering important decision factors such as economics, environmental impact, hazards and safety, site selection, sustainability and social acceptability. Professional skills such as: effective communication in a technical setting, ethics in engineering design, and effective teamwork.
Notes:
(2.5-1-10)
Corequisites: CHEE 453, FACC 300
Restriction: Not open to students who have taken CHEE 457.
Administrating Faculty: Faculty of Engineering
Teaching Department: Chemical Engineering
Status (catalog level): Active

Credit Weight: 5
Transcript Title: Design Project 2
Calendar Title: Design Project 2.
Description:
Introduction to a process design and economic evaluation of projects, including environmental and safety aspects, for a major industrial operation. The following topics are also covered: plant site selection and social acceptability, plant ergonomics, ethics in engineering design, process safety, loss prevention and risk mitigation, green process design. Students work in small groups under an experienced plant design supervisor.

Notes:
(2-2-11)
Corequisite: FACC 300
Prerequisite: CHEE 456.
Restriction: Must be taken in the semester following CHEE 456.

CHEE 510
Credit Weight: 3
Transcript Title: Advanced Separation Processes
Calendar Title: Advanced Separation Processes.
Description:
Introduction to thermodynamics of ideal multicomponent vapour-liquid equilibrium concepts; distillation of multicomponent mixtures; numerical solution of the MESH
equations (mass balances, equilibrium expression, components, summations and enthalpy balances) for distillation columns operating under realistic conditions; introduction to non-ideal thermodynamics; gas absorption; simulation using commercial process simulation software.

Notes:
(3-0-6)
Prerequisite(s): CHEE 351
Restriction: Restricted to Chemical Engineering students

CHEE 511
Credit Weight: 3
Transcript Title: Catal for Sust Fuels & Chemicals
Calendar Title: Catalysis for Sustainable Fuels and Chemicals.

Description:

Notes:
(3-0-6)
Prerequisites: CHEE 204 and CHEE 310 or permission of instructor.
Course open to U3 Chemical Engineering undergraduate students and graduate students in Chemical Engineering.

CHEE 512
Credit Weight: 3
Transcript Title: Stem Cell Bioprocess Eng.
Calendar Title: Stem Cell Bioprocess Engineering.

Description:
Introduction to stem cell biology. Cell growth models applicable to stem cells and their progeny. Upstream processing (cell culture systems, bioreactors), downstream processing (cell separation, purification) and quality management (current good manufacturing practice, regulations) applied to therapeutic cells.

Notes:
(3-0-6)
Prerequisite(s): MATH 262 and CHEE 370 or BIOL 200, or Permission of Instructor.
Restriction: Open to undergraduate and graduate students registered in Chemical Engineering, as well as graduate students registered in the McGill Graduate Certificate in Regenerative Medicine program or in the M.Eng. in Biological and Biomedical Engineering program.

CHEE 515
Credit Weight: 3
Transcript Title: IntrfceDesign:BiomimeticApprch
Calendar Title: Interface Design: Biomimetic Approach.

Description:
Investigation of the factors that cause biological surfaces to have superb functionalities; chemical and physical concepts responsible for the respective
interfacial phenomena, such as surface tension, thermodynamics, kinetics, 
electrical double layers, surface wetting, adhesion and structural coloration;
comparison of nature's solutions to engineering problems with synthetic
approaches.

Notes:
(3-0-6)
Prerequisites: (CHEE 310 and CHEE 380) or (CHEM 233 and MIME 261 and MIME 317) or
permission of instructor

CHEE 521
Credit Weight: 3
Transcript Title: Nanomat & the Aquatic Environ
Calendar Title: Nanomaterials and the Aquatic Environment.
Description:
Environmental impacts and applications of nanomaterials. Topics: physicochemical
characterization of nanoparticles in aquatic media, colloid chemistry for
understanding nanoparticle aggregation and mobility in the environment, mechanisms
of reactive oxygen species (ROS) production by nanomaterials, nanomaterials for
environmental remediation and water treatment, methodologies for assessing
nanoparticle toxicity, novel research developments.

Notes:
3-0-6
Offered each year, one year by the Department of Chemical Engineering and one
year by the Department of Civil Engineering
Prerequisite(s): CHEE 315 or CIVE 225 or MIME 356 or equivalent; and CHEE 310 or
CIVE 430 or CHEM 233 or equivalent; or permission of instructor.
Restriction(s): Not open to students who have taken CIVE 521.

Status (catalog level): Active

CHEE 561
Credit Weight: 3
Transcript Title: Intro to Soft Tissue Biophys
Calendar Title: Introduction to Soft Tissue Biophysics.
Description:
Soft tissue structure and function: tissue, cell, and molecular scales.
Interstitial solute transport, modeling effective transport properties
(diffusivity, partitioning). Poroelastic mechanics, modeling of mechanical
properties (modulus, permeability). The electrical double layer, electrostatic
component of modulus, modeling electrokinetic phenomena (streaming potential,
electroosmosis). Applications: biomechanics, mechanobiology, tissue engineering,
functional assessment, biomedical entrepreneurship.

Notes:
(3-1-5)
Prerequisite: CHEE 315 or permission of the instructor

Administering Faculty: Faculty of Engineering

Status (catalog level): Active

CHEE 582
Credit Weight: 3
Transcript Title: Polymer Science & Engineering
Calendar Title: Polymer Science and Engineering.
Description:
Application of engineering fundamentals to the preparation and processing of
polymers emphasizing the relationship between polymer structure and properties.
Topics include: polymer synthesis techniques, characterization of molecular
weight, crystallinity, glass transition, phase behaviour, mechanical properties, visco-elasticity, rheology, and polymer processing for use in blends and composite materials.

Notes:
(3-0-6)
Prerequisite: CHEE 314 or equivalent.
Restriction: Not open to students who have taken CHEE 481.

Administering Faculty: Faculty of Engineering
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 584
Credit Weight: 3
Transcript Title: Polymer Processing
Calendar Title: Polymer Processing.
Description:
Survey of polymer processing operations with emphasis on the application of polymer rheology and transport phenomena to predict performance, including polymer rheology and constitutive equations, mixing, extrusion, injection molding, coating flows, fiber spinning, film blowing, blow molding, compression molding, thermofoming and composites processing.
Notes:
(3-0-6)
Corequisite: CHEE 315 or MIME 356 or equivalent.
Restriction: Not open to students who have taken CHEE 684.

Calendar Title: Thermodynamics.
Description: Theory and application of phase and chemical equilibria in multicomponent systems.
Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 631
Credit Weight: 4
Transcript Title: Foundations of Fluid Mechanics
Calendar Title: Foundations of Fluid Mechanics.
Description: Rigorous derivation of equations of motion; creeping flow inviscid flow; boundary layer theory; hydrodynamic stability; turbulent flow, separated flows, drag on submerged bodies.
Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 641
Credit Weight: 4
Transcript Title: Chemical Reaction Engineering
Calendar Title: Chemical Reaction Engineering.
Description:
Interpretation of chemical reaction data, especially for heterogeneous systems. Residence time, complete segregation, maximum mixedness, other advanced concepts. Reactor design.
Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 651
Credit Weight: 4
Transcript Title: Adv Biochemical Engineering
Calendar Title: Advanced Biochemical Engineering.
Description:
The use of chemical engineering and biological principles in the study, design, use and creation of biologically-based processes and products. Topics: biochemical thermodynamics, protein engineering, manipulation of gene expression, transport phenomena and bioreactor design.
Notes:
Restriction: Restricted to graduate students
Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 662
Credit Weight: 4
Transcript Title: Computational Methods
Calendar Title: Computational Methods.
Description:
Methods of weighted residuals; solution to non-linear algebraic equations; stability in nonlinear equations; bifurcations; mesh refinement strategies; convection dominated transport; hyperbolic equations, particle simulation methods.
Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

CHEE 672
Credit Weight: 4
Transcript Title: Process Dynamics and Control
Calendar Title: Process Dynamics and Control.
Description:
Process representation and identification and simulation; sensor stability; sensitivity of feedback control systems; feedward control; discrete representation of continuous systems; controller tuning; adaptive control.
Notes:

Credit Weight: 2
Transcript Title: Research Skills and Ethics
Calendar Title: Research Skills and Ethics.
Description:
The course provides a foundation in three areas: (i) integrity and ethical conduct, (ii) knowledge dissemination and translation, and (iii) research management. Ethical considerations in situations involving conflict of interest, authorship, and intellectual property attributions are discussed. Students will gain experience in identifying and selecting key information for different situations. Best practices in data reporting, maintenance of research notebooks and legal aspects of data ownership and rights are discussed.

Notes:
Restriction(s): Restricted to graduate students registered in the Department of Chemical Engineering.

Administering Faculty: Graduate Studies
Teaching Department: Chemical Engineering
Status (catalog level): Active

Calendar Title: General Chemistry Laboratory 1.
Description:
Illustrative experiments. Laboratory section of CHEM 110. New students will be issued lab sections in OM 1 on the first day of classes.
Notes:
Fall
Open only to entering students who have the lecture equivalent of CHEM 110
Each lab section is limited enrolment
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 120
Credit Weight: 4
Transcript Title: General Chemistry 2
Calendar Title: General Chemistry 2.
Description:
A study of the fundamental principles of physical chemistry.
Notes:
Winter
Prerequisites/corequisites: College level mathematics and physics, or permission of instructor: CHEM 110 is not a prerequisite
Each lab section is limited enrolment
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 122
Credit Weight: 1
Transcript Title: General Chemistry Laboratory 2
Calendar Title: General Chemistry Laboratory 2.
Description:
Illustrative experiments. Laboratory section of CHEM 120.
Notes:
Winter
Open only to entering students who have the lecture equivalent of CHEM 120
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 180
Credit Weight: 3
Transcript Title: World of Chem: Environment
Calendar Title: World of Chemistry: Environment.
Description: Risks, water, air pollution, sick-building syndrome, the chemistry of the car, energy (fossil fuel, nuclear), nano and biotechnology, smells, garbage and human waste, dental chemistry and green chemistry.
Notes: Winter
No prerequisites
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 181
Credit Weight: 3
Transcript Title: World of Chem: Food
Calendar Title: World of Chemistry: Food.
Description: A series of lectures on the historical, practical, and simple chemical aspects of: food, food additives; vitamins; minerals, diet and cancer; dieting; food-borne illnesses, health food and cooking.
Notes: Winter
3 lecture hours/week
Restriction: Not open to students who have taken CHEM 150.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 182
Credit Weight: 3
Transcript Title: World of Chem: Technology
Calendar Title: World of Chemistry: Technology.
Description: Aspects of chemical technology including publishing of scientific articles, rocketry, space travel, materials (metals, plastics art), household products, forensic science, money, combustion science, computers and cosmetics.
Notes: Fall
3 lecture hours/week
Restriction: Not open to students who have taken CHEM 160.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 183
Credit Weight: 3
Transcript Title: World of Chem: Drugs
Calendar Title: World of Chemistry: Drugs.
Description: Drug history and marketing, over the counter drugs (e.g. aspirin, cough and cold remedies, allergy preparations), street and heart drugs, mental illness, hormones,
brain chemistry and diabetes.

**Notes:**
Fall
3 lecture hours/week

**Administering Faculty:** Faculty of Science

**Teaching Department:** Chemistry

**Status (catalog level):** Active

---

**CHEM 203**

**Credit Weight:** 3

**Transcript Title:** Survey of Physical Chemistry

**Calendar Title:** Survey of Physical Chemistry.

**Description:**
The fundamentals of thermodynamics and chemical kinetics with applications to biomolecular systems. Thermodynamic and kinetic control of biological processes.

**Notes:**
Fall

**Prerequisites:** CHEM 110 and CHEM 120 or equivalent.

**Restrictions:** Intended for students in biological science programs requiring only one course in physical chemistry. Not open to students who have taken or are taking CHEM 204 or CHEM 213 or CHEM 223 and CHEM 243.

**Administering Faculty:** Faculty of Science

**Teaching Department:** Chemistry

**Status (catalog level):** Active

---

**CHEM 204**

**Credit Weight:** 3

**Transcript Title:** Physical Chem/Biological Scis1

**Calendar Title:** Physical Chemistry/Biological Sciences 1.

**Description:**
Similar to CHEM 223/CHEM 243. Emphasis on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.

**Notes:**
Fall, Winter

**Prerequisites:** CHEM 110 and CHEM 120 or equivalent and one full course in calculus

**Restriction:** Not open to students who have taken or are taking CHEM 203 or CHEM 213.

**Administering Faculty:** Faculty of Science

**Teaching Department:** Chemistry

**Status (catalog level):** Active

---

**CHEM 211**

**Credit Weight:** 3

**Transcript Title:** Organic Chemistry 1 Lectures

**Calendar Title:** Organic Chemistry 1 Lectures.

**Description:**
A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis, and stereochemistry.

**Notes:**
Fall, Winter, Summer

**Prerequisite:** CHEM 110 or equivalent.

**Corequisite:** CHEM 120 or equivalent.

**Restrictions:** Not open to students who are taking or have taken CHEM 212 or equivalent. Permission of the Department of Chemistry is required.

**Note:** Some CEGEP programs provide equivalency for this course. For more
CHEM 212
Credit Weight: 4
Transcript Title: Intro Organic Chemistry 1
Calendar Title: Introductory Organic Chemistry 1.
Description:
A survey of reactions of aliphatic and aromatic compounds including modern concepts of bonding, mechanisms, conformational analysis, and stereochemistry.
Notes:
Fall, Winter, Summer
Prerequisite: CHEM 110 or equivalent.
Corequisite: CHEM 120 or equivalent.
Restriction: Not open to students who are taking or have taken CHEM 211 or equivalent
Each lab section is limited enrolment
Note: Some CEGEP programs provide equivalency for this course. For more information, please see the Department of Chemistry's Web page (http://www.chemistry.mcgill.ca/advising/outside/equivalent.htm).

CHEM 213
Credit Weight: 3
Transcript Title: Introductory Physical Chemistry 1: Thermodynamics.
Description:
Thermodynamics. Topics include gas laws, kinetic theory of collisions, heat capacity, enthalpy, thermochemistry, bond energies, the entropy and free energy functions, absolute entropies, Maxwell relations and chemical and thermodynamic equilibrium states, phase rule and phase diagrams, ideal solutions, colligative properties, solubility, electrochemistry, Debye-Hückel Theory.
Notes:
Corequisite(s): MATH 222
Prerequisites: CHEM 110, CHEM 120 or equivalent, PHYS 102 or PHYS 142, or permission of the instructor.
Restriction(s): Not open to students who have taken or are taking CHEM 204.

CHEM 214
Credit Weight: 3
Transcript Title: Physical Chemistry/Biological Sciences 2.
Description:
Emphasis is placed on the use of biological examples to illustrate the principles of physical chemistry. The relevance of physical chemistry to biology is stressed.
Notes:
Winter
Prerequisites: CHEM 204 or CHEM 223/CHEM 243.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 219
Credit Weight: 3
Transcript Title: Intro to Atmospheric Chemistry
Calendar Title: Introduction to Atmospheric Chemistry.
Description: An introduction to the basic topics in atmospheric chemistry. The fundamentals of the chemical composition of the atmosphere and its chemical reactions. Selected topics such as; a smog chamber, acid rain, and the ozone hole, will be examined.
Symbols: ALTY - Taught in alternate years
Notes: Winter
Prerequisites: CHEM 110 and CHEM 120, and one of MATH 139 or MATH 140 or MATH 150, or a CEGEP DEC in Science, or permission of instructor.
Restriction: Not open to students who have taken ATOC 219, CHEM 419, or ATOC 419
Offered in even years. Students should register in ATOC 219 in odd years
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 222
Credit Weight: 4
Transcript Title: Intro Organic Chemistry 2
Calendar Title: Introductory Organic Chemistry 2.
Description: Modern spectroscopic techniques for structure determination. The chemistry of alcohols, ethers, carbonyl compounds, and amines, with special attention to mechanistic aspects. Special topics.
Notes: Fall, Winter
Prerequisite: CHEM 212 or equivalent.
Restriction: Not open to students who have taken an equivalent Organic 2 at CEGEP (see McGill University Basic Math and Sciences Equivalence Table at www.mcgill.ca/mathscitable) or who have or are taking CHEM 234.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 224
Credit Weight: 1
Transcript Title: Organic Chemistry Laboratory 1
Calendar Title: Organic Chemistry Laboratory 1.
Description: Illustrative experiments in organic chemistry. Laboratory section of CHEM 212.
Notes: Fall, Winter, Summer
Open only to students who have the lecture equivalent of CHEM 212
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 232
Credit Weight: 4
Transcript Title: Organic Chemistry Principles
Calendar Title: Organic Chemistry Principles.
Description: A consideration of basic principals of the atom including body imaging techniques followed by a general summary of organic chemistry, its application to biological processes and everyday life, including principles of bonding, structure and stereochemistry. Some physical chemistry will be given as it relates to the properties of air and breathing.
Notes:
Fall
Restriction: Only open to students in the BN Program
Restriction: Not open to students in the B.Sc. Program
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 233
Credit Weight: 3
Transcript Title: Topics in Physical Chemistry
Calendar Title: Topics in Physical Chemistry.
Description: Introduction to chemical kinetics, surface and colloid chemistry and electrochemistry. The topics to be discussed will be of particular interest to students in chemical engineering.
Notes:
Winter
Restriction: For Engineers only.
Administering Faculty: Faculty of Engineering
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 234
Credit Weight: 3
Transcript Title: Topics in Organic Chemistry
Calendar Title: Topics in Organic Chemistry.
Description: Modern spectroscopic techniques for structure determination. The chemistry of alcohols, ethers, carbonyl compounds, and amines, with special attention to mechanistic aspects. Special topics.
Notes:
Fall, Winter, Summer
Prerequisite: CHEM 212 or equivalent
Restriction: For Chemical Engineers only or permission of department.
Administering Faculty: Faculty of Engineering
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 244
Credit Weight: 1
Transcript Title: Organic Chemistry Lab 2
Calendar Title: Organic Chemistry Laboratory 2.
Description: Laboratory section of CHEM 222.
Notes:
Fall, Winter
Prerequisite: CHEM 234 or equivalent
Open only to students who have the lecture equivalent of CHEM 222.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 253
Credit Weight: 1
Transcript Title: Intrdctry Physcl Chemistry Lab
Calendar Title: Introductory Physical Chemistry Laboratory.
Description:
Illustrative experiments in physical chemistry.
Notes:
Prerequisite: CHEM 110, CHEM 120 or equivalent.
Corequisite: CHEM 204 or permission of instructor.
Restriction: Only open to B.A. & Sc.; Major Concentration in Chemistry students.
Not open to students who have taken or are taking CHEM 273.

CHEM 267
Credit Weight: 3
Transcript Title: Introductory Chemical Analysis
Calendar Title: Introductory Chemical Analysis.
Description:
Qualitative and quantitative analysis. A survey of methods of analysis including
theory and practice of semimicro qualitative analysis and representative
gravimetric, volumetric and instrumental methods. The laboratory component
includes introductory experiments in analytical chemistry emphasizing classical
and instrumental methods of quantitative analysis.
Notes:
Prerequisite(s): CHEM 110 and CHEM 120, or equivalent
Restriction(s): Not open to students who have taken CHEM 287 or CHEM 297

CHEM 273
Credit Weight: 3
Transcript Title: IntroPhysclChem2:Kinetics&Meth
Calendar Title: Introductory Physical Chemistry 2: Kinetics and Methods.
Description:
Kinetics: Transition State Theory, complex reactions, free-radical reactions,
chain reactions, catalysis, reactions at surfaces, ionic effects of reactions in
solution, photochemistry. Methods: physical chemistry laboratory, differential
equations and linear algebra applied to physical chemistry, computation methods
for data analysis and modeling
Notes:
Prerequisites: CHEM 213 and MATH 222
Restrictions: Not open to students who have taken or are taking CHEM 253.

CHEM 281
Credit Weight: 3
Transcript Title: Inorganic Chemistry 1
Calendar Title: Inorganic Chemistry 1.
Description:
Basic concepts of electronic structure and molecular bonding will be developed and applied to the understanding of common materials. Acid-base chemistry. Survey of the chemistry of the main group elements. Introduction to coordination and organometallic chemistry.
Notes:
Winter
Prerequisites: CHEM 110 and CHEM 120 or equivalent.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 287
Credit Weight: 2
Transcript Title: Intro Analytical Chemistry
Calendar Title: Introductory Analytical Chemistry.
Description:
Qualitative and quantitative analysis. A survey of methods of analysis including theory and practice of semimicro qualitative analysis and representative gravimetric, volumetric and instrumental methods.
Notes:
Fall
Prerequisites: CHEM 110 and CHEM 120, or CHEM 115, or equivalent. Corequisite: Students in CHEM 287 are required to take the laboratory, CHEM 297, either simultaneously with CHEM 287 or in the term following CHEM 287. Restrictions: Not open to students who have taken CHEM 257D1/D2 or CHEM 277D1/D2.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 297
Credit Weight: 1
Transcript Title: Intro Analytical Chem. Lab.
Calendar Title: Introductory Analytical Chemistry Laboratory.
Description:
Introductory experiments in analytical chemistry emphasizing classical and instrumental methods of quantitative analysis.
Notes:
Fall, Winter
Prerequisites: CHEM 110 and CHEM 120, or CHEM 115, or equivalent. Pre- or Co-requisite: CHEM 287. Restriction: Not open to students who have taken CHEM 257D1/D2 or CHEM 277D1/D2.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 302
Credit Weight: 3
Transcript Title: Intrdctry Organic Chemistry 3
Calendar Title: Introductory Organic Chemistry 3.
Description:
Topics covered may include the following: Aromatic compounds, heterocyclic chemistry, sulfur and phosphorus chemistry, organosulfur and organophosphorus compounds, and biomolecules such as lipids, carbohydrates, amino acids, polypeptides, DNA and RNA.
Notes:
Fall, Winter
Prerequisites: CHEM 222, or permission of the instructor.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 332
Credit Weight: 3
Transcript Title: Biological Chemistry
Calendar Title: Biological Chemistry.
Description:
An introduction to biological chemistry. Topics will include chemistry and structure of proteins, nucleic acids, and lipids; protein and nucleic acid biosynthesis; enzyme kinetics and mechanisms; membranes and membrane transport; bioenergetics; redox reactions in biological chemistry; gene expression; cloning, RNA and antibody technologies; genomics and proteomics.

Notes:
Prerequisite(s): CHEM 222 and CHEM 273.
Corequisite(s): CHEM 302
Restriction(s): Restricted to Chemistry Majors/Honours only except by permission of instructor.
Restriction(s): Not open to students who are taking or have taken BIOL 200 or BIOL 201.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 334
Credit Weight: 3
Transcript Title: Advanced Materials
Calendar Title: Advanced Materials.
Description:
Survey of the physical and chemical structure-function relationships defining advanced materials, including an introduction to basic materials science and characterization. Topics include supramolecular polymers, self-healing materials, advanced surfaces and adhesives, bio-inspired materials, shape memory materials, sensors and actuators, and photonic materials.

Notes:
Fall
Prerequisites: CHEM 110/CHEM 120 and PHYS 101/PHYS 102 or PHYS 131/PHYS 142, or CEGEP Physics and Chemistry, or equivalent. Prerequisite or Corequisite: one of CHEM 203, CHEM 204, CHEM 213 and CHEM 273, or equivalent; or one of PHYS 230 and PHYS 232, or equivalent; or permission of the instructor.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 345
Credit Weight: 3
Transcript Title: Intro to Quantum Chemistry
Calendar Title: Introduction to Quantum Chemistry.
Description:
An introduction to quantum chemistry covering the historical development, wave theory, methods of quantum mechanics, and applications of quantum chemistry.
Notes:
Fall
Prerequisites: CHEM 213 and CHEM 273, and PHYS 142, or permission of instructor.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 355
Credit Weight: 3
Transcript Title: Applications of Quantum Chem.
Calendar Title: Applications of Quantum Chemistry.
Description: A survey of the principles of electronic, vibrational and rotational spectroscopy. Magnetic resonance and computational methods.
Notes:
Winter
Prerequisite: CHEM 345, PHYS 242, or permission of instructor
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 362
Credit Weight: 2
Transcript Title: Advanced Organic Chem Lab
Calendar Title: Advanced Organic Chemistry Laboratory.
Description: An advanced laboratory with experiments related to the theoretical principles and synthetic methods of modern organic chemistry.
Notes:
Fall, Winter
Prerequisite or corequisite: CHEM 302. Not open to Honours or Majors in Chemistry
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 365
Credit Weight: 2
Transcript Title: Statistical Thermodynamics
Calendar Title: Statistical Thermodynamics.
Description: Molecular basis of thermodynamics with applications to ideal gases and simple solids. Topics to be covered will include: calculation of thermodynamic functions, chemical equilibrium constants, Einstein and Debye models of solids, absolute reaction rate theory, Debye-Hückel theory of strong electrolytes.
Notes:
Winter
Prerequisite: CHEM 345
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 367
Credit Weight: 3
Transcript Title: Instrumental Analysis 1
Calendar Title: Instrumental Analysis 1.
Description: An introduction to modern instrumental analysis emphasizing chromatography, atomic
spectroscopy and computational data analysis. Analytical methods to be examined in detail include gas-liquid and high performance liquid chromatography, LC mass spectrometry, and common methods of atomic determinations using flames/furnaces/plasma sources.

Notes:
Fall
Prerequisite(s): CHEM 267.
Each lab section is limited enrolment
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 377
Credit Weight: 3
Transcript Title: Instrumental Analysis 2
Calendar Title: Instrumental Analysis 2.
Description:
Spectroscopic methods of analysis will be studied with respect to fundamentals, operational aspects and instrument design. Topics will range from UV-visible to x-ray spectrometry. Methodologies will be evaluated with respect to their application in spectrometric systems. Laboratory automation will be studied and applied in the laboratory.
Notes:
Winter
Prerequisite: CHEM 367
Each lab section is limited enrolment
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 381
Credit Weight: 3
Transcript Title: Inorganic Chemistry 2
Calendar Title: Inorganic Chemistry 2.
Description:
Introduction to transition metal chemistry, coordination numbers and geometry, and nomenclature will be followed by a discussion of crystal field theory and its applications to problems in spectroscopy, magnetochemistry, thermodynamics and kinetics. Several aspects related to applications of organometallic compounds in catalysis and bioinorganic systems will be discussed.
Notes:
Fall
Prerequisite: CHEM 281.
Restriction: For Honours and Major Chemistry students
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 392
Credit Weight: 3
Transcript Title: Experimental Chemistry 1
Calendar Title: Experimental Chemistry 1.
Description:
Experiments related to the theoretical principles, synthetic techniques and instrumental methods used in modern experimental chemistry, including aspects of green chemistry and nanochemistry.
Notes:
Prerequisite/corequisites: CHEM 381 and CHEM 302. Advanced laboratory for Chemistry Honours and Majors students.

Restriction: Not open to students who have taken CHEM 362.

2 hours Drop-in lab
4 hours laboratory

**Administering Faculty:** Faculty of Science

---

**CHEM 396**

**Credit Weight:** 3

**Transcript Title:** Undergraduate Research Project

**Calendar Title:** Undergraduate Research Project.

**Description:**
Independent research project with a final written report.

Notes:
Fall, Winter

Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only. This course must be taken as an elective, and cannot be used to fulfill program requirements.

Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures.

**Although this is a research course from May 3rd until August 31st, it does not follow the standard add/drop and withdrawal deadlines. Therefore, add/drop is July 6th and withdrawal is August 3rd.

Administering Faculty: Faculty of Science

CHEM 502
Credit Weight: 3
Transcript Title: Advanced Bio-Organic Chemistry
Calendar Title: Advanced Bio-Organic Chemistry.
Description:
This course will cover biologically relevant molecules, particularly nucleic
acids, proteins, and their building blocks. In each case, synthesis and biological functions will be discussed. The topics include synthesis of oligonucleotides and peptides; chemistry of phosphates; enzyme structure and function; coenzymes, and enzyme catalysis; polyketides; antiviral and anticancer agents.

Notes:
Winter
Prerequisite: CHEM 302
Restriction: Not open to students who have taken CHEM 402.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 503
Credit Weight: 3
Transcript Title: Drug Discovery
Calendar Title: Drug Discovery.
Description:
The aim of this course is to provide an introduction to the overall drug discovery process. The main focus of the course will be on medicinal chemistry, synthesis and catalysis, as they relate to large-scale production of pharmaceutical agents. However, other aspects of drug discovery, including structural research (e.g. NMR, X-ray), biochemistry, drug metabolism and bioavailability will also be included.

Notes:
Fall
Prerequisite(s): CHEM 302 and one of BIOL 200 or CHEM 332, or permission of instructor.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 505
Credit Weight: 3
Transcript Title: Comp Model of Molecules & Mtls
Calendar Title: Computer Modeling of Molecules and Materials.
Description:
A comprehensive introduction to computational methods and software for graduate students and advanced undergraduates. The main focus of the course is on important practical aspects of chemistry-related computer modeling: how to perform simulations reliably and efficiently, and how to interpret simulation results. Two main classes of computer simulations--electronic structure methods and statistical mechanics methods--will be discussed in detail together with a wide range of chemical examples.

Notes:
Prerequisite(s): CHEM 345 or equivalent and CHEM 365 or PHYS 329 or equivalent, and COMP 202 or COMP 208 or equivalent.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 512
Credit Weight: 3
Transcript Title: Catalysis, Concepts and App
Calendar Title: Catalysis, Concepts and Applications.
Description:
General concepts governing catalysis and practical aspects of its implementation including its most important applications. A global perspective on industrial catalysis. A general introduction about catalysis including homogeneous catalysis,
heterogeneous catalysis, organocatalysis, and biocatalysis. A select number of reactions will be studied in detail, based on the most recent research efforts made in the field of catalysis.

Notes:
Prerequisites: CHEM 381, CHEM 302, CHEM 243
Restriction: Course open to U3 undergraduate students and graduate students
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 514
Credit Weight: 3
Transcript Title: Biophysical Chemistry
Calendar Title: Biophysical Chemistry.
Description:
Physical chemistry concepts needed to understand the function of biological systems at the molecular level, including the structure, stability, transport, and interactions of biological macromolecules.
Notes:
Winter
Prerequisite: CHEM 203 or CHEM 204 or CHEM 223 and CHEM 243, or permission of instructor.
Restriction: Not open to students who have taken CHEM 404.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 516
Credit Weight: 3
Transcript Title: Nuclear and Radiochemistry
Calendar Title: Nuclear and Radiochemistry.
Description:
Basic properties of the atomic nucleus, nuclear reactions as well as nuclear fission. Kinetics of the radioactive decay, the interaction of radiation with matter and the different kinds of radiation. Hot atom chemistry, modern aspects of medicinal radiochemistry such as Positron Emission Tomography.
Notes:
Prerequisite(s): CHEM 302 and (CHEM 214 or higher, or CHEM 281), or permission of instructor.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 519
Credit Weight: 3
Transcript Title: Advances in Chem of Atmosphere
Calendar Title: Advances in Chemistry of Atmosphere.
Description:
Exploration of the field of atmospheric chemistry that is identified as the significant driver of climate change and the cause of millions of premature death every year. Discussion of cutting-edge novel technologies for observing and quantifying pollutants (from ground to satellite) using artificial intelligence, the fate of emerging contaminants (e.g., nano/microplastics, trace metals, persistent organic), and modelling of atmospheric and interfacial processes. Examination of topics like atmospheric gaseous and multiphase components like bioaerosols. Study of photochemical, photophysical, and aerosol nucleation processes that affect air quality, climate change, and ecosystem health.
Notes:
Prerequisites: CHEM 213, CHEM 273, MATH 222, MATH 315 or equivalents, or permission of the instructor.
Restriction(s): Not open to students who have taken or are taking ATOC 519.
3 lectures
Cross Linked courses: ATOC 519
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 520
Credit Weight: 3
Transcript Title: Methods in Chemical Biology
Calendar Title: Methods in Chemical Biology.
Description:
An overview of advanced techniques at the leading edge of Chemical Biology, including some or all of: biological imaging, kinetics of enzyme inhibition, combinatorial synthesis, atomic force microscopy of biological molecules, self assembling biomimetic structures, oligonucleotide therapeutics, biomolecular X-ray crystallography, computational methods, and nuclear magnetic resonance applied to protein interactions.
Notes:
Fall
Prerequisites: BIOL 200 and CHEM 345 and CHEM 302, or permission of instructor
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 522
Credit Weight: 3
Transcript Title: Stereochemistry
Calendar Title: Stereochemistry.
Description:
Stereoisomers, their nomenclature and configuration. Conformational analysis, separation of stereoisomers, and stereocontrol in organic synthesis.
Notes:
Winter
Prerequisite: CHEM 302
Restriction: Not open to students who have taken CHEM 623
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 531
Credit Weight: 3
Transcript Title: Chem of Inorganic Materials
Calendar Title: Chemistry of Inorganic Materials.
Description:
Structure, bonding, synthesis, properties and applications of covalent, ionic, metallic crystals, and amorphous solids. Defect structures and their use in synthesis of specialty materials such as electronic conductors, semiconductors, and superconductors, and solid electrolytes. Basic principles of composite materials and applications of chemistry to materials processing.
Notes:
Winter
Prerequisite: CHEM 381
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 532
Credit Weight: 3
Transcript Title: Structural Organic Chemistry
Calendar Title: Structural Organic Chemistry.
Description: A practical course on the application of modern spectroscopic methods for the determination of structures of complex organic and organometallic compounds.
Notes: Winter
Prerequisite: CHEM 302
Restriction: Not open to students who have taken CHEM 352
3 hours lecture
1 hour Drop-in lab
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 533
Credit Weight: 3
Transcript Title: Small Molecule Crystallography
Calendar Title: Small Molecule Crystallography.
Description: Fundamentals of x-ray diffraction related to small molecule structure resolution, space groups, diffraction theory, strategies for structure solution, and refinement will be covered.
Notes: Winter
Prerequisite: CHEM 355 or permission of instructor.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 534
Credit Weight: 3
Transcript Title: Nanoscience and Nanotechnology
Calendar Title: Nanoscience and Nanotechnology.
Description: Topics discussed include scanning probe microscopy, chemical self-assembly, computer modelling, and microfabrication/micromachining.
Notes: Fall
Prerequisites: CHEM 434 or PHYS 334 or permission of instructor
Corequisites: one of CHEM 345, PHYS 357, or PHYS 346 or permission of instructor
Restriction: Not open to students who have taken or are taking PHYS 534
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 540
Credit Weight: 3
Transcript Title: Advances in Ind Biotech
Calendar Title: Advances in Industrial Biotechnology.
Description:
Introduction to emerging technologies and research advances in biotechnologies. Topics include semisynthetic production of drugs and drug candidates through large-scale fermentation, next generation synthesis of DNA and whole genes, green toxicology, single-molecule diagnostics, orphan-drug re-purposing, and next-generation genomic analyses in drug development. Translational research, issues of entrepreneurship, sustainability, and ethics are also covered.

Notes:
Prerequisite: CHEM 222 (or equivalent) and BIOL 200 or CHEM 332
Restriction: U3 Students or higher. Not open to students who have taken or are taking PHAR 540.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 542
Credit Weight: 3
Transcript Title: Advanced Nucleic Acid Chemistry
Calendar Title: Advanced Nucleic Acid Chemistry.
Description:

Notes:
Prerequisites: CHEM 302 CHEM 332 or BIOL 200 BIOL 201 or permission of the instructor.

 Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 552
Credit Weight: 3
Transcript Title: Physical Organic Chemistry
Calendar Title: Physical Organic Chemistry.
Description:
The correlation of theory with physical measurements on organic systems; an introduction to photochemistry; solvent and substituent effects on organic reaction rates, etc.; reaction mechanisms.

Notes:
Winter
Prerequisite: CHEM 302

 Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 555
Credit Weight: 3
Transcript Title: Magnetic Resonance Spectroscopy
Calendar Title: Magnetic Resonance Spectroscopy.
Description:
The fundamental principles underlying Nuclear magnetic resonance (NMR), Electron Paramagnetic resonance (EPR) and Magnetic Resonance Imaging (MRI) will be covered
and applied to biomolecules and materials chemistry. Topics include multidimensional spectra, molecular dynamics, the density matrix, and the product operator formalism.

Notes:
Winter
Prerequisite: CHEM 355 or equivalent

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 556
Credit Weight: 3
Transcript Title: Advanced Quantum Mechanics
Calendar Title: Advanced Quantum Mechanics.
Description: Quantum mechanical treatment of species of chemical interest. Introduction to perturbation theory, both time-dependent and time-independent. Treatment of the variational principle. Introduction to atomic spectra. Chemical bonding in terms of both the valence bond and molecular orbital theory. Elementary collision theory. Interaction of radiation with molecules.

Notes:
Fall
Prerequisites: CHEM 345 and PHYS 242

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 571
Credit Weight: 3
Transcript Title: Polymer Synthesis
Calendar Title: Polymer Synthesis.
Description: A survey of polymer preparation and characterization; mechanisms of chain growth, including free radical, cationic, anionic, condensation and transition metal-mediated polymerization, and the effects of these mechanisms on polymer architecture; preparation of alternating, block, graft and stereoblock copolymers; novel macromolecular structures including dendrimers and other nanostructures.

Notes:
Fall
Prerequisite: CHEM 302 or equivalent, or permission of instructor.

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 572
Credit Weight: 3
Transcript Title: Synthetic Organic Chem
Calendar Title: Synthetic Organic Chemistry.
Description: Synthetic methods in organic chemistry and their application to the synthesis of complex molecules.

Notes:
Winter
Prerequisite: CHEM 382

Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active
CHEM 574
Credit Weight: 3
Transcript Title: Intro Polymer Chemistry
Calendar Title: Introductory Polymer Chemistry.
Description:
A survey course on the structure of polymers, kinetics and mechanisms of polymer and copolymer synthesis; characterization and molecular weight distributions; polymer microstructure, the thermodynamics of polymer solutions; the crystalline and amorphous states, rubber elasticity and structure-property relationships.
Notes:
Fall
Prerequisite(s): Prerequisites: CHEM 223 and CHEM 243 or CHEM 213 and CHEM 273, or CHEM 233 (for engineering students only), or permission of the instructor.
Restriction(s): Not open to students who have taken CHEM 455 or CHEM 674.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 575
Credit Weight: 3
Transcript Title: Chemical Kinetics
Calendar Title: Chemical Kinetics.
Description:
Kinetic laws, measurement of reaction rates, transition state and collision theory, experimental techniques in reaction kinetics, reaction mechanisms, RRKM theory, Marcus theory of electron transfer, photochemistry and catalysis. Recent developments and their application to chemical and biological problems. Elementary reactions in gas, solution and solid phases and on surfaces.
Notes:
Winter
Prerequisites: CHEM 273 and CHEM 223/CHEM 243 (formerly CHEM 213).
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 577
Credit Weight: 3
Transcript Title: Electrochemistry
Calendar Title: Electrochemistry.
Description:
Fundamentals of electrochemistry and the application of electrochemical methods to chemical and biochemical problems. Emphasis is given to the study of electrode reaction mechanisms and the interpretation of electrochemical results for organic and inorganic systems. Voltammetric and coulometric methods are rigorously discussed. Several topics of interest in electrochemistry will be covered as time permits.
Notes:
Prerequisite(s): CHEM 243 or CHEM 203/CHEM 204, CHEM 367 and CHEM 377
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 582
Credit Weight: 3
Transcript Title: Supramolecular Chemistry
Calendar Title: Supramolecular Chemistry.
Description:
Introduction to supramolecular organization will be followed by discussions on the nature of interactions and methodologies to create ordered aggregates of high complexity. Potential of supramolecular chemistry in fabricating smart materials will be explored using specific topics including inclusion chemistry, dendrimers, molecular self-assembly and crystal engineering.
Notes:
Winter
Prerequisites: CHEM 222, CHEM 381
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 585
Credit Weight: 3
Transcript Title: Colloid Chemistry
Calendar Title: Colloid Chemistry.
Description:
Principles of the physical chemistry of phase boundaries. Electrical double layer theory; van der Waals forces; Brownian motion; kinetics of coagulation; electrokinetics; light scattering; solid/liquid interactions; adsorption; surfactants; hydrodynamic interactions; rheology of dispersions.
Notes:
Winter
Prerequisites: CHEM 345, MATH 233 and MATH 315, PHYS 241 and PHYS 242. Students who haven't taken CHEM 223 and CHEM 243 must have taken CHEM 273 or permission of instructor.
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 591
Credit Weight: 3
Transcript Title: Bioinorganic Chemistry
Calendar Title: Bioinorganic Chemistry.
Description:
The roles of transition and main group elements in biology and medicine will be examined with an emphasis on using tools for structure and genome searching as well as becoming acquainted with experimental spectroscopic methods useful for bioinorganic chemistry such as macromolecular X-ray diffraction, EPR and EXAFS.
Notes:
Winter
Prerequisite: CHEM 381
Restriction: For Honours and Major Chemistry students or with permission
Administering Faculty: Faculty of Science
Teaching Department: Chemistry
Status (catalog level): Active

CHEM 593
Credit Weight: 3
Transcript Title: Statistical Mechanics
Calendar Title: Statistical Mechanics.
Description:
Intermediate topics in statistical mechanics, including: modern and classical theories of real gases and liquids, critical phenomena and the renormalization
group, time-dependent phenomena, linear response and fluctuations, inelastic scattering, Monte Carlo and molecular dynamics methods.

Notes:
Winter
Term paper
Prerequisite: CHEM 345. Recommended: CHEM 365

Transcript Title: Design Project
Calendar Title: Design Project.
Description:
A team-based capstone design project carried out under the supervision of an experienced engineer. Involves a design project in one or more of the subdisciplines; environmental engineering, water resources engineering, transportation engineering, geotechnical engineering or structural engineering. Includes the definition of the problem, contains an iterative solution-finding process, and results in a final design. Addresses professionalism, as well as, economic, environmental, societal, safety and regulatory aspects of design. Contains the writing of a technical report and oral presentations. Emphasis is placed on the completion of a project of professional quality replicating the design process commonly implemented by practicing engineers.
Notes:
(1-2-6)
Prerequisite: Completion of an approved set of required and complementary courses; normally restricted to final semester.

Calendar Title: Design of Steel Structures.

Description:
Design of structural steel members: plate girders, members under combined loadings, eccentrically loaded connections, composite floor systems. Design of single-storey concentrically braced frame buildings subjected to gravity, wind and seismic loading. Introduction to design software.

Notes:
(3-3-3)
Prerequisite: CIVE 318

Administering Faculty: Faculty of Engineering
Teaching Department: Civil Engineering
Status (catalog level): Active

CIVE 463
Credit Weight: 3  
Transcript Title: Design of Concrete Structures  
Calendar Title: Design of Concrete Structures.  
Description: 
Design of reinforced concrete members: beams, one-way slabs, columns, disturbed regions, two-way slabs, shear walls, footings, retaining walls. Aspects of seismic design of columns and shear walls. Introduction to design software and the design of prestressed concrete members.  
Notes:  
(3-3-3)  
Prerequisite: CIVE 318

Transcript Title: Microbio for Environmental Eng
Calendar Title: Microbiology for Environmental Engineering.
Description:
Microbiological concepts applied to the practice of environmental engineering and biotechnologies including the following topics: cellular and pathway organizations, evolution, growth, gene expression, horizontal gene transfer, metabolic microbial diversity, ecosystem structures, and quantitative mathematical modelling.

**Notes:**
Prerequisite: CIVE 225 or permission of the instructor
(3–1–5)

**Administering Faculty:** Faculty of Engineering

**Teaching Department:** Civil Engineering

**Status (catalog level):** Active

---

**CIVE 560**

**Credit Weight:** 3

**Transcript Title:** Transportation Safety & Design

**Calendar Title:** Transportation Safety and Design.

**Description:**
Fundamental concepts on transportation safety, traffic data collection techniques, crash database management, statistical methods for safety analysis, network screening methods, evaluation and design of treatments, railway safety analysis, surrogate safety methods, intersection safety and engineering countermeasures, non-motorized safety and facilities designs and accident severity analysis.

**Notes:**
(3–1–5)

Prerequisite: CIVE 319

**Administering Faculty:** Faculty of Engineering

**Teaching Department:** Civil Engineering

**Status (catalog level):** Active

---

**CIVE 561**

**Credit Weight:** 3

**Transcript Title:** Greenhouse Gas Emissions

**Calendar Title:** Greenhouse Gas Emissions.

**Description:**
Greenhouse gas inventories at various scales from national to institutional. Emission estimation methods including field measurements and engineering calculations for anthropogenic sources including fossil fuel combustion from transportation and energy production, cement production, hydroelectric reservoirs, oil and gas systems, landfills, wastewater treatment and sewer systems, and agriculture. Technical and policy options for reducing greenhouse gas emissions. Group project.

**Notes:**
(3–0–6)

Students are expected to have a background in data mining, statistical analysis, e.g. spatiotemporal analysis, and chemistry. WHMIS and other lab training is recommended.

**Administering Faculty:** Faculty of Engineering

**Teaching Department:** Civil Engineering

**Status (catalog level):** Active

---

**CIVE 572**

**Credit Weight:** 3

**Transcript Title:** Computational Hydraulics

**Calendar Title:** Computational Hydraulics.

**Description:**
Computation of unsteady flows in open channels; abrupt waves, flood waves, tidal
propagations; method of characteristics; mathematical modelling of river and coastal currents.

Notes:
(3-0-6)
Prerequisite: CIVE 327 or equivalent

Administrating Faculty: Faculty of Engineering

Calendar Title: Mathematical Tools for Management Professionals.
Description:
Exponential and logarithmic functions and equations, mathematics of finance, permutations and combinations, introduction to probability, limits and derivatives with applications, matrices and systems of linear equations.
Notes:
Prerequisite: CMSC 000 Foundations of Mathematics or Diagnostic Test
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active
CMSC 105
Credit Weight: 3
Transcript Title: Topics in Foundns of Mathematics
Calendar Title: Topics in Foundations of Mathematics.
Description: A selection of introductory topics in the foundations of mathematics.
Notes: Prerequisite(s): CMSC 000 or Departmental Approval.
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 110
Credit Weight: 3
Transcript Title: Topics in Applied Mathematics
Calendar Title: Topics in Applied Mathematics.
Description: A selection of intermediate-level topics in applied mathematics.
Notes: Prerequisite: CMSC 000 or Departmental Approval.
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 203
Credit Weight: 3
Transcript Title: Survey of Basic Mathematics 1
Calendar Title: Survey of Basic Mathematics 1.
Description: Review of analytic geometry, limits, continuity, the derivative, differentiation rules, curve sketching, application to economics, elasticity, problems in optimization, related rates, the differential, log and exponential, continuous compounding, partial differentiation, method of Lagrange multipliers, method of least squares.
Notes: Prerequisite: CMSC 101
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 204
Credit Weight: 3
Transcript Title: Survey of Basic Mathematics 2
Calendar Title: Survey of Basic Mathematics 2.
Description: Integration, separable differential equations, definite integrals, improper integrals, applications to probability density functions; double integrals, infinite series and Taylor approximations; the algebra of matrices and determinants, systems of linear equations, Gaussian reduction, linear dependence and independence of vectors.
Notes: Prerequisite: CMSC 203
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active
CMSC 221
Credit Weight: 3
Transcript Title: Applied Quantitative Methods
Calendar Title: Applied Quantitative Methods.
Description:
This course will cover the fundamentals of mathematics and algebra, and introduce statistical and quantitative techniques with a focus on applications related to the field of finance, such as simple and multiple linear regressions, financial forecasting method and generation of Pro-Forma Financial statements.
Notes:
Prerequisite: CMSC 000 (or the Exemption by Examination test)
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 300
Credit Weight: 3
Transcript Title: Concepts in Mathematics
Calendar Title: Concepts in Mathematics.
Description:
Course intended for engineering and pure science students covering introductory level selected concepts in mathematics.
Notes:
Prerequisite: CMSC 000 or departmental approval.
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 310
Credit Weight: 3
Transcript Title: Managerial Econ & Analysis
Calendar Title: Managerial Economics and Analysis.
Description:
An overview of the economic theories as well as the internal and external economic factors that influence business so as to apply and understand managerial decision-making tools. Consideration will be paid to foundational topics such as theories of supply and demand; consumer behaviour; production, cost and pricing strategies; market structures; and optimization techniques.
Notes:
Prerequisite: CMSC 000
Restriction: Not open to students who have taken or are taking MGCR 293
Administering Faculty: School of Continuing Studies
Teaching Department: Management & Entrepreneurship
Status (catalog level): Active

CMSC 320
Credit Weight: 3
Transcript Title: Business Statistics
Calendar Title: Business Statistics.
Description:
An overview of descriptive statistics, probability, random variables, binomial, Poisson, normal distributions, sampling distribution of the mean, estimation, hypothesis testing, analysis of variance, tests of goodness of fit, linear and multiple regression, non-parametric statistics. Business and management case studies will be used.
Notes:
Prerequisite: CMSC 101
Restriction: Not open to students who have taken or are taking MGCR 273
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

CMSC 395
Credit Weight: 3
Transcript Title: Special Topics in Mathematics
Calendar Title: Special Topics in Mathematics.
Description:
Course intended for computer science students covering more advanced level selected topics in mathematics.
Notes:
Prerequisite: CMSC 000 or departmental approval.
Administering Faculty: School of Continuing Studies
Teaching Department: Adaptive & Integrated Learning
Status (catalog level): Active

COMP 102
Credit Weight: 3
Transcript Title: Computers & Computing
Calendar Title: Computers and Computing.
Description:
A course for students with no previous knowledge of computer science. The impact of computers on society. Web design and dynamic content. The inner workings of computers (hardware). Networking principles. Algorithm design and programming. A look at how computers store data (image, sound, and video). Software distribution policies and mechanisms.

Notes:
3 hours
Prerequisite: high school level mathematics course on functions.
Restrictions: Credit will not be given for COMP 102 if it is taken concurrently with, or after, any of: COMP 202, COMP 203, COMP 208, COMP 250. Management students cannot receive credit for COMP 102.
Administrating Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 189
Credit Weight: 3
Transcript Title: Computers and Society
Calendar Title: Computers and Society.
Description:
How computer technologies shape social notions such as ownership, safety, and privacy. Emphasis is on computer science powering both day-to-day technologies (e.g., online social media) and those in the news (e.g., cyberwar). Discussions will investigate technology and social issues in order to understand both.

Administrating Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 202
Credit Weight: 3
Transcript Title: Foundations of Programming
Calendar Title: Foundations of Programming.
Description:
Introduction to computer programming in a high level language: variables, expressions, primitive types, methods, conditionals, loops. Introduction to algorithms, data structures (arrays, strings), modular software design, libraries, file input/output, debugging, exception handling. Selected topics.

Notes:
3 hours
Prerequisite: a CEGEP level mathematics course
Restrictions: COMP 202 and COMP 208 cannot both be taken for credit. COMP 202 is intended as a general introductory course, while COMP 208 is intended for students interested in scientific computation. COMP 202 cannot be taken for credit with or after COMP 250
Administrating Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 204
Credit Weight: 3
Transcript Title: Comp. Programming for Life Sci
Calendar Title: Computer Programming for Life Sciences.
Description:

Notes:
Prerequisite(s): CEGEP level mathematics course.
Co-requisite: BIOL 112
Restrictions: Not open to students who have taken or are taking COMP 202, COMP 208, or GEOG 333; not open to students who have taken or are taking COMP 206 or COMP 250.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 206
Credit Weight: 3
Transcript Title: Intro to Software Systems
Calendar Title: Introduction to Software Systems.
Description:
Comprehensive overview of programming in C, use of system calls and libraries, debugging and testing of code; use of developmental tools like make, version control systems.

Notes:
3 hours
Prerequisite: COMP 202 or COMP 250

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 208
Credit Weight: 3
Transcript Title: Computer Programming for PS&E
Calendar Title: Computer Programming for Physical Sciences and Engineering.
Description:
Programming and problem solving in a high level computer language: variables, expressions, types, functions, conditionals, loops, objects and classes. Introduction to algorithms such as searching and sorting. Modular software design, libraries, file input and output, debugging. Emphasis on applications in Physical Sciences and Engineering, such as root finding, numerical integration, diffusion, Monte Carlo methods.

Notes:
3 hours
Corequisite: MATH 133 and MATH 141, or equivalents.
Restrictions: Not open to students who have taken or are taking COMP 202, COMP 204, or GEOG 333; not open to students who have taken or are taking COMP 206 or COMP 250.

COMP 202 is intended as a general introductory course, while COMP 208 is intended for students with sufficient math background and in (non-life) science or engineering fields.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 230
Credit Weight: 3
Transcript Title: Logic and Computability
Calendar Title: Logic and Computability.
Description:
Propositional Logic, predicate calculus, proof systems, computability Turing machines, Church-Turing thesis, unsolvable problems, completeness, incompleteness, Tarski semantics, uses and misuses of Gödel's theorem.
Notes:
3 hours
Prerequisite: CEGEP level mathematics.
Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 250
Credit Weight: 3
Transcript Title: Intro to Computer Science
Calendar Title: Introduction to Computer Science.
Description:
Mathematical tools (binary numbers, induction, recurrence relations, asymptotic complexity, establishing correctness of programs), Data structures (arrays, stacks, queues, linked lists, trees, binary trees, binary search trees, heaps, hash tables), Recursive and non-recursive algorithms (searching and sorting, tree and graph traversal). Abstract data types, inheritance. Selected topics.
Notes:
3 hours
Prerequisites: Familiarity with a high level programming language and CEGEP level Math.
Students with limited programming experience should take COMP 202 or equivalent before COMP 250. See COMP 202 Course Description for a list of topics.
Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 251
Credit Weight: 3
Transcript Title: Algorithms and Data Structures
Calendar Title: Algorithms and Data Structures.
Description:
Introduction to algorithm design and analysis. Graph algorithms, greedy algorithms, data structures, dynamic programming, maximum flows.
Notes:
3 hours
Prerequisites: COMP 250; MATH 235 or MATH 240
COMP 251 uses mathematical proof techniques that are taught in the corequisite course(s). If possible, students should take the corequisite course prior to COMP 251.
COMP 251 uses basic counting techniques (permutations and combinations) that are covered in MATH 240 but not in MATH 235. These techniques will be reviewed for the benefit of MATH 235 students.
Restrictions: Not open to students who have taken or are taking COMP 252.
Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 252
Credit Weight: 3
Transcript Title: Honours Algorithms & Data Struct
Calendar Title: Honours Algorithms and Data Structures.

Description:
The design and analysis of data structures and algorithms. The description of various computational problems and the algorithms that can be used to solve them, along with their associated data structures. Proving the correctness of algorithms and determining their computational complexity.

Notes:
3 hours
Prerequisite: COMP 250 and either MATH 235 or MATH 240
Restrictions: (1) Open only to students in Honours programs. (2) Students cannot receive credit for both COMP 251 and COMP 252.
COMP 252 uses basic combinatorial counting methods that are covered in MATH 240 but not in MATH 235. Students who are unfamiliar with these methods should speak with the instructor for guidance.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 273
Credit Weight: 3

Transcript Title: Intro to Computer Systems
Calendar Title: Introduction to Computer Systems.

Description:
Number representations, combinational and sequential digital circuits, MIPS instructions and architecture datapath and control, caches, virtual memory, interrupts and exceptions, pipelining.

Notes:
3 hours
Corequisite: COMP 206.

COMP 308
Credit Weight: 1
Transcript Title: Computer Systems Lab
Calendar Title: Computer Systems Lab.
Description:
Digital circuitry and programming interface of peripheral circuit boards (cards), e.g., graphics cards; introduction to tools and libraries that interact with the card; performance issues.
Notes:
1 hour
Prerequisite: COMP 273.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 310
Credit Weight: 3
Transcript Title: Operating Systems
Calendar Title: Operating Systems.
Description:
Control and scheduling of large information processing systems. Operating system software - resource allocation, dispatching, processors, access methods, job control languages, main storage management. Batch processing, multiprogramming, multiprocessing, time sharing.

Notes:
3 hours
Prerequisite: COMP 273

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 321
Credit Weight: 3
Transcript Title: Programming Challenges
Calendar Title: Programming Challenges.
Description:
Development of programming skills on tricky challenges, games and puzzles by means of programming competitions.

Notes:
1 hour
Prerequisites: COMP 206
Note: At the end of the class, interested students are encouraged to join the McGill team to participate in the annual ACM International Collegiate Programming Competition.
Corequisites: COMP 251 or COMP 252

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 322
Credit Weight: 1
Transcript Title: Introduction to C++
Calendar Title: Introduction to C++.
Description:
Basics and advanced features of the C++ language. Syntax, memory management, class structure, method and operator overloading, multiple inheritance, access control, stream I/O, templates, exception handling.

Notes:
1 hour
Prerequisite(s): COMP 250 and (COMP 206 or COMP 208)

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 330
Credit Weight: 3
Transcript Title: Theory of Computation
Calendar Title: Theory of Computation.
Description:
Finite automata, regular languages, context-free languages, push-down automata, models of computation, computability theory, undecidability, reduction techniques.

Notes:
3 hours
Prerequisite: COMP 251.

Transcript Title: Project in Biol. & Comp. Sci.
Calendar Title: Project in Biology and Computer Science.
Description:
A research project applying computational approaches to a biological problem. The project is (co)-supervised by a professor in Computer Science and/or Biology. A program advisor from each department has to approve the project.
Notes:
3 hours
Prerequisites: COMP 251 and 9 credits of BIOL courses, BIOL 301 recommended.
Restriction: Registration in the Biology and Computer Science joint major.
Note: having taken BIOL 301 before COMP 401 is beneficial for finding a project within a Biology lab.
Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 402
Credit Weight: 6
Transcript Title: Honours Project CS and Biology
Calendar Title: Honours Project in Computer Science and Biology.
Description:
One-semester research project applying computational approaches to a biological problem. The project is (co)-supervised by a professor in Computer Science and/or Biology or related fields.
Notes:
Prerequisite(s): 9 credits of COMP courses and 9 credits of BIOL courses.
Restriction(s): Only for students in the Joint Honours in Computer Science and Biology.
Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 402D1
Credit Weight: 3
Transcript Title: Honours Project CS and Biology
Calendar Title: Honours Project in Computer Science and Biology.
Description:
A two-semester research project applying computational approaches to a biological problem. The project is (co)-supervised by a professor in Computer Science and/or
Biology or related fields.

Notes:
- Prerequisite(s): 9 credits of COMP courses and 9 credits of BIOL courses.
- Restriction(s): Only for students in the Joint Honours in Computer Science and Biology.
  - Students must register for both COMP 402D1 and COMP 402D2
  - No credit will be given for this course unless both COMP 402D1 and COMP 402D2 are successfully completed in consecutive terms
  - COMP 402D1 and COMP 402D2 are equivalent to COMP 402

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 402D2
Credit Weight: 3
Transcript Title: Honours Project CS and Biology

COMP 409
Credit Weight: 3
Transcript Title: Concurrent Programming
Calendar Title: Concurrent Programming.
Description:
Characteristics and utility of concurrent programs; formal methods for specification, verification and development of concurrent programs; communications, synchronization, resource allocation and management, coherency and integrity.

Notes:
- 3 hours
- Prerequisites: COMP 251, COMP 302, and COMP 310 or ECSE 427

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 417
Credit Weight: 3
Transcript Title: Intro Robots&Intelligent Sys
Calendar Title: Introduction Robotics and Intelligent Systems.
Description:
This course considers issues relevant to the design of robotic and of intelligent systems. How can robots move and interact. Robotic hardware systems. Kinematics

Notes:
3 hours

Prerequisites: COMP 251, MATH 223 and (ECSE 321 or COMP 206).

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 421
Credit Weight: 3
Transcript Title: Database Systems
Calendar Title: Database Systems.

Description:
Database Design: conceptual design of databases (e.g., entity-relationship model), relational data model, functional dependencies. Database Manipulation: relational algebra, SQL, database application programming, triggers, access control. Database Implementation: transactions, concurrency control, recovery, query execution and query optimization.

Notes:
3 hours

Prerequisites: COMP 206, COMP 251, COMP 302

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 424
Credit Weight: 3
Transcript Title: Artificial Intelligence
Calendar Title: Artificial Intelligence.

Description:
Introduction to search methods. Knowledge representation using logic and probability. Planning and decision making under uncertainty. Introduction to machine learning.

Notes:
3 hours

Prerequisites: (COMP 206 or ECSE 321), MATH 323 or equivalent and COMP 251.
Restriction: Not open to students who have taken or are taking ECSE 526.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 445
Credit Weight: 3
Transcript Title: Computational Linguistics
Calendar Title: Computational Linguistics.

Description:
Introduction to foundational ideas in computational linguistics and natural language processing. Topics include formal language theory, probability theory, estimation and inference, and recursively defined models of language structure. Emphasis on both the mathematical foundations of the field as well as how to use these tools to understand human language.

Notes:
Prerequisite(s): COMP 250 and MATH 240, or permission of instructor.
Restriction: Not open to students who have taken or are taking LING 445.
Students who are taking or have taken both COMP 330 and COMP 424 are advised to
take COMP 550 in place of COMP 445/LING 445.
This is a double-prefix course and is identical in content with LING 445.
Some background in linguistics at the level of LING 201 is desirable, though not critical.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science

Transcript Title: Fundls of Machine Learning
Calendar Title: Fundamentals of Machine Learning.
Description:
Notes:
Prerequisite: COMP 251, MATH 222, MATH 223, and MATH 323.
Restriction: Not open to students who are taking or have taken COMP 551.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 462
Credit Weight: 3
Transcript Title: Computational Biology Methods
Calendar Title: Computational Biology Methods.
Description:
Application of computer science techniques to problems arising in biology and medicine, techniques for modeling evolution, aligning molecular sequences, predicting structure of a molecule and other problems from computational biology.
Notes:
3 hours
Prerequisites: COMP 251, and MATH 323 or MATH 203 or BIOL 309
Restriction: Not open to students who have taken or are taking COMP 561.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 480
Credit Weight: 3
Transcript Title: Indep Studies in Comp Sci
Calendar Title: Independent Studies in Computer Science.
Description:
Reading course permitting independent study under the supervision of a faculty member who specializes in a subject where no course is available.
Notes:
Restrictions: Approval must be obtained from the Course Coordinator before registration.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 511
Credit Weight: 4
Transcript Title: Network Science
Calendar Title: Network Science.
Description:
Selected topics in Network Science, Graph Mining and Graph Learning, including patterns in real world networks, ranking and similarity measures for graphs, graph clustering and community mining techniques, and node classification and link prediction methods.

Notes:
Prerequisites: COMP 251 or equivalent, MATH 223
Restrictions: Not open to students who took COMP 596 in Fall 2019, Fall 2020 or COMP 599 in Fall 2021, Fall 2022.
1. Students are recommended to have taken MATH 222, COMP 451 or COMP 551.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 512
Credit Weight: 4
Transcript Title: Distributed Systems
Calendar Title: Distributed Systems.

Description:
Models and Architectures. Application-oriented communication paradigms (e.g. remote method invocation, group communication). Naming services. Synchronization (e.g. mutual exclusion, concurrency control). Fault-tolerance (e.g. process and replication, agreement protocols). Distributed file systems. Security. Examples of distributed systems (e.g. Web, CORBA). Advanced Topics.

Notes:
4 hours
Prerequisites: COMP 310, COMP 251 or equivalent.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 513
Credit Weight: 4
Transcript Title: Advanced Computer Systems
Calendar Title: Advanced Computer Systems.

Description:
Selected topics in computer systems, including modularity and abstraction, layering, advanced operating systems design, performance measurements, fault tolerance, energy efficiency, and data center systems. Methods include class discussions, critique of classic and state-of-the-art papers, oral presentations and a group project. Emphasis on methods and practices for design of real systems.

Notes:
Prerequisites: COMP 310 or ECSE 427
Restrictions: Not open to students who have taken COMP 596 in Fall 2021.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 514
Credit Weight: 4
Transcript Title: Applied Robotics
Calendar Title: Applied Robotics.

Description:
The approach and the challenges in the key components of manipulators and locomotors: representations, kinematics, dynamics, rigid-body chains, redundant systems, under-actuated systems, control, planning, and perception. Practical
aspects of robotics: collisions, integrating sensory feedback, and real-time software development.

Notes:
Prerequisites: MATH 223, MATH 323, COMP 206, and COMP 250, or equivalents.
Restrictions: Not open to students who have taken COMP 597 when the topic was "Applied Robotics".
Students should be comfortable with C++ (such as from COMP 322) and a Unix-like programming environment.

COMP 532
Credit Weight: 4
Transcript Title: Propositional Proof Complexity
Calendar Title: Propositional Proof Complexity.
Description:
Propositional proof systems and the complexity of NP. Introduction to various Boolean, Algebraic, and Semi-Algebraic proof systems and the complexity of their proofs. Techniques for upper and lower bounding complexity measures of proofs such as length and depth. Relationships between proof systems and algorithms in SAT solving and optimization. Connections between proof systems and other areas of complexity theory and theoretical computer science.

Notes:
Prerequisites: MATH 240, COMP 330 or COMP 360

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 533
Credit Weight: 3
Transcript Title: Model-Driven Software Develop.
Calendar Title: Model-Driven Software Development.
Description:
Model-driven software development; requirements engineering based on use cases and scenarios; object-oriented modelling using UML and OCL to establish complete and precise analysis and design documents; mapping to Java. Introduction to meta-modelling and model transformations, use of modelling tools.

Notes:
3 hours

Prerequisite: ECSE 321 or COMP 303 or COMP 361

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 535
Credit Weight: 4
Transcript Title: Computer Networks
Calendar Title: Computer Networks 1.
Description:
Fundamental design principles, elements, and protocols of computer networks, focusing on the current Internet. Topics include: layered architecture, direct link networks, switching and forwarding, bridge routing, congestion control, end-to-end protocols application of DNS, HTTP, P2P, fair queuing, performance modeling and analysis.

Notes:
3 hours

Prerequisite: COMP 310 or ECSE 427

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 540
Credit Weight: 4
Transcript Title: Matrix Computations
Calendar Title: Matrix Computations.
Description: Designing and programming reliable numerical algorithms. Stability of algorithms and condition of problems. Reliable and efficient algorithms for solution of equations, linear least squares problems, the singular value decomposition, the eigenproblem and related problems. Perturbation analysis of problems. Algorithms for structured matrices.
Notes:
3 hours
Prerequisite: MATH 327 or COMP 350

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 545
Credit Weight: 4
Transcript Title: NatrlLang Undrst with DeepLrng
Calendar Title: Natural Language Understanding with Deep Learning.
Description: Neural network-based methods for natural language understanding (NLU) and computational semantics. Continuous representations for words, phrases, sentences, and discourse, and their connection to formal semantics. Practical and ethical considerations in applications such as text classification, question answering, and conversational assistants.
Notes:
Prerequisites (COMP 345 or LING 345) and (COMP 445 or LING 445) or COMP 550 or COMP 551 (or equivalent).

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 546
Credit Weight: 4
Transcript Title: Computational Perception
Calendar Title: Computational Perception.
Description: Computational models of visual perception and audition. Vision problems include stereopsis, motion, focus, perspective, color. Audition problems include source localization and recognition. Emphasis on physics of image formation, sensory signal processing, neural pathways and computation, psychophysical methods.
Notes:
3 hours
Restrictions: Not open to students who have taken COMP 646.

Administering Faculty: Faculty of Science

Status (catalog level): Active

COMP 550
Credit Weight: 3
Transcript Title: Natural Language Processing
Calendar Title: Natural Language Processing.
Description:
An introduction to the computational modelling of natural language, including algorithms, formalisms, and applications. Computational morphology, language modelling, syntactic parsing, lexical and compositional semantics, and discourse analysis. Selected applications such as automatic summarization, machine translation, and speech processing. Machine learning techniques for natural language processing.

Notes:
Prerequisite(s): MATH 323 or ECSE 305, COMP 251 or COMP 252
Restriction(s): Not open to students who have taken COMP 599 in 201509 or 201609.

Administering Faculty: Faculty of Science
Teaching Department: Computer Science
Status (catalog level): Active

COMP 551
Credit Weight: 4
Transcript Title: Applied Machine Learning
Calendar Title: Applied Machine Learning.
Description:
Selected topics in machine learning and data mining, including clustering, neural
networks, support vector machines, decision trees. Methods include feature selection and dimensionality reduction, error estimation and empirical validation, algorithm design and parallelization, and handling of large data sets. Emphasis on good methods and practices for deployment of real systems.

Notes:
Prerequisite(s): MATH 323 or ECSE 205, COMP 202, MATH 133, MATH 222 (or their equivalents).
Restriction(s): Not open to students who have taken or are taking COMP 451, ECSE 551, or PSYC 560.
Some background in Artificial Intelligence is recommended, e.g. COMP-424 or ECSE-526, but not required.

COMP 611
Credit Weight: 4
Transcript Title: Mathematical Tools for CompSci
Calendar Title: Mathematical Tools for Computer Science.
Description:
Introduction to mathematical concepts important across computer science, how to think mathematically, and how to write proofs. Proof techniques such as induction, contradiction, and monovariants; topics in combinatorics, graph theory, algebra, analysis, and probability; mathematical analysis of algorithms, data structures, and computational complexity. Emphasis on the mathematical explanations for useful concepts.
Notes:
Restrictions: Not open to students who have majored in Mathematics or an equivalent subject, or have taken a proof-based math or computer science course within the previous two years.
Not open to students who have taken COMP 761 when the topic was "Mathematical Tools for Computer Science".

Credit Weight: 4
Transcript Title: Mchn Lrng Appl to Climate Chng
Calendar Title: Machine Learning Applied to Climate Change.
Description: Applications of machine learning in fighting climate change, including use cases in electricity systems, buildings, transportation, agriculture and other land use, disaster response, and other areas. Review of recent research literature, with emphasis on when machine learning is relevant and helpful, and how to go about scoping, developing, and deploying a project so that it has the intended impact.
Notes: 1. This course is aimed at graduate students with at least some prior experience in machine learning and ability to read and assimilate research literature across many areas of machine learning. Prior experience with climate change-related topics is not required, but willingness to learn about these topics is.

CTPT 200
Credit Weight: 3
Transcript Title: Intro. to Supply Chain Mgmt
Calendar Title: Introduction to Supply Chain Management.
Description:
This course provides an overall perspective of various functions that exist within supply chains; macro processes and drivers as well as performance indicators along a supply chain are emphasized. Coordination issues are dealt with using a simulation game involving various supply chain stakeholders.
Administering Faculty: School of Continuing Studies
Teaching Department: Management & Entrepreneurship
Status (catalog level): Active

CTPT 201
Credit Weight: 3
Transcript Title: Sourcing
Calendar Title: Sourcing.
Description:
This course is a comprehensive review of sourcing, an important area of supply chain management. It covers four major components of sourcing: the in-house or outsource decisions, the supplier selection and evaluation processes, contract management and procurement processes. Case studies are used to illustrate implementation issues in sourcing.
Administering Faculty: School of Continuing Studies
Teaching Department: Management & Entrepreneurship
Status (catalog level): Active

CTPT 202
Credit Weight: 3
Transcript Title: Prod & Inv Planning&Control 1
Calendar Title: Production and Inventory Planning and Control 1.
Description:
This course emphasizes contemporary operational issues and techniques in manufacturing and service sectors. Topics include: production and service processes, lean manufacturing methods, total quality management, project management, supply and demand planning. Real-life examples and case studies are an integral part of the course.
Notes:
Corequisite: CMSC 000

Transcript Title: Knowledge Mobilization in Dent
Calendar Title: Knowledge Mobilization in Dentistry.
Description:
The principles of implementation science (IS), knowledge mobilization [KM], and theoretical and practical foundations of KM to support the uptake of research utilization to inform evidence-based dental practice and related policy decision-making. Defining IS and KM, the similarities and differences with other related approaches, the relationship between KM and evidence-based practice, the dominant theories, KM models, frameworks, tools and resources. Examination of various patient groups and clinical settings and contexts (e.g., private, public, hospital, community, schools, home) from the perspective of how research evidence can be implemented into daily dental practice using effective KM interventions.

Notes:
Restrictions: Open to students in the Faculty of Dental Medicine and Oral Health Sciences; others with permission of the instructor.

Credit Weight: 3
Transcript Title: Game Theory
**Calendar Title:** Game Theory.

**Description:**
This course introduces students to game theory, the branch of the social sciences that focuses on the formal modelling and analysis of human interactions and strategic behaviour. Basic concepts in cooperative and non-cooperative games are applied to economic models.

**Notes:**
- Prerequisite: ECON 230 or ECON 250
- Restriction: Not open to students who have taken ECON 446. Open to advanced undergraduate students

**Transcript Title:** Microeconomic Theory 1

**Calendar Title:** Microeconomic Theory 1.

**Description:**
This is the first in a two-course sequence in microeconomics. The core microeconomics sequence (ECON 610, ECON 611) provides a rigorous coverage of the economic foundation upon which economic fields are built. Most of the sequence is devoted to building up this foundation of consumer and firm optimisation (including choice under uncertainty), partial and general equilibrium, and welfare economics. The remainder of ECON 611 covers special topics that vary from year to year. These are likely to be drawn from the following: social choice; externalities and public goods; models of asymmetric information; the principal-agent framework; search; basic game theory.

Transcript Title: Applied Cross-Sectional Mthds
Calendar Title: Applied Cross-Sectional Methods.

Description:
With limited public resources, determining which programs, reforms, policies are beneficial, and at what cost, is crucial, and allows public policy to be driven by evidence. However, evaluating programs is made difficult by the "counterfactual problem": one cannot observe the outcomes or behavior of a participant, had (s)he not participated. This course will describe the standard OLS model, its limitations, and an improvement (panel data models). This course will then present the state-of-the-art empirical techniques used by economists to address the counterfactual issue (randomized experiments, instrumental variables, difference-in-differences, regression discontinuity design; and time permitting selection models and matching). For each of these approaches, we will give the basic intuition, discuss the necessary assumptions, present the strengths and weaknesses, and analyze applications drawn from the literature. Moreover, each technique will be implemented by the students in hands-on Stata sessions.

ECSE 205
Credit Weight: 3
Transcript Title: Prob and Stats for Engineers
Calendar Title: Probability and Statistics for Engineers
Description:
Probability: basic probability model, conditional probability, Bayes rule, random variables and vectors, distribution and density functions, common distributions in engineering, expectation, moments, independence, laws of large numbers, central limit theorem. Statistics: descriptive measures of engineering data, sampling distributions, estimation of mean and variance, confidence intervals, hypothesis testing, linear regression.
**Notes:**
Not open to students who have taken ECSE 305.

**ECSE 209**

**Credit Weight:** 3

**Transcript Title:** Electrotechnology

**Calendar Title:** Electrotechnology.

**Description:**
DC and AC circuit analysis with application to electrical instrumentation, motors, and other common devices. Equations describing exponential and oscillatory behaviour of basic circuits and automatic control loops, with application in diverse engineering contexts (transportation, processing plants, environmental surveying). Overview of common devices including sensors (pH meters, photoresistor, photodiode, thermocouple, strain gauge, gas detection), actuators, and motors (single- and three-phase). In-class demonstrations involving programmed microcontrollers to activate LEDs and stepper-motor based actuators. Introduction to hierarchical control, linking low-level sensor-driven adjustments to higher-level control.

**Notes:**
Prerequisites: PHYS 142 or equivalent

Restriction: Not open to students who have taken or are taking ECSE 200.

ECSE 439
Credit Weight: 3
Transcript Title: Software Language Engineering
Calendar Title: Software Language Engineering.
Description:
Practical and theoretical knowledge for developing software languages and models; foundations for model-based software development; topics include principles of model-driven engineering; concern-driven development; intentional, structural, and behavioral models as well as configuration models; constraints; language engineering; domain-specific languages; metamodeling; model transformations; models of computation; model analyses; and modeling tools.

Notes:
(3-2-4)
Prerequisites: ECSE 321 or COMP 303.
Restricted to Software Engineering students.

Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 444
Credit Weight: 4
Transcript Title: Microprocessors
Calendar Title: Microprocessors.
Description:
Design techniques for developing modern microprocessor-based systems, multiple state-of-art instructions set architectures (ISAs) and associated assembly languages, use of tools for compiling, linking, memory overlay; debug techniques for start-stop and real-time debugging, together with debug infrastructure and interfaces: flash patching, variable watching and instruction stream tracing. Use of coprocessors and computer peripherals, such as SPI, I2C, I2S, SAI, USB, wireless standards, timers, DMA units and FLASH accelerators. Interfacing and processing sensor data including multi-sensor integration. Design techniques that promote structured approaches for separation of concerns in computing and communication. Real-time systems and software engineering for tightly integrated hardware.

Notes:
Prerequisite(s): ECSE 324
Restriction(s): Not open to students who have taken ECSE 426.
(3-4-5)

Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 446
Credit Weight: 3
Transcript Title: Realistic Image Synthesis
Calendar Title: Realistic Image Synthesis.
Description: Introduction to mathematical models of light transport and the numerical techniques used to generate realistic images in computer graphics. Offline (i.e., raytracing) and interactive (i.e., shader-based) techniques.
Notes:
(3-2-4)
Prerequisites: (ECSE 205 and ECSE 250) or (ECSE 202, ECSE 205, and COMP 250)
Restrictions: Not open to students who have taken or are taking ECSE 546.
Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 451
Credit Weight: 3
Transcript Title: EM Transmission & Radiation
Calendar Title: EM Transmission and Radiation.
Description: Microwave transmission through waveguides: impedance matching, microwave devices, filters and resonators; microwave transmission though free space; near and far field behaviour of electromagnetic radiators, simple antennas, antenna arrays, practical antenna parameters; the physics of the radio communication channel: reflection, diffraction and scattering and their macroscopic impact (multipath, fading).
Notes:
(3-0-6)
Prerequisite: ECSE 352 or ECSE 354
Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 456
Credit Weight: 3
Transcript Title: ECSE Design Project 1
Calendar Title: ECSE Design Project 1.
Description: A design project undertaken with close mentorship by a staff member and under the supervision of the course instructor. The project consists of defining an engineering problem, reviewing relevant background, acquiring/analyzing data, and seeking solutions using appropriate simulation/analysis tools and experimental investigations. Professional engineering practices will be followed.
Notes:
Prerequisites: ECSE 211, ECSE 322, (ECSE 323, ECSE 330) OR (CCOM 206 or WCOM 206, COMP 302, ECSE 306, ECSE 321)
Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 457
Credit Weight: 3
Transcript Title: ECSE Design Project 2
Calendar Title: ECSE Design Project 2.
Description: A design project undertaken with close mentorship by a staff member and under the supervision of the course instructor. The course is a continuation of ECSE 456.
Notes:
Prerequisite: ECSE 456

Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr

ECSE 532
Credit Weight: 4
Transcript Title: Computer Graphics
Calendar Title: Computer Graphics.
Description:
Fundamental mathematical, algorithmic and representational issues in computer graphics: overview of graphics pipeline, homogeneous coordinates, projective transformations, line-drawing and rasterization, hidden surface removal, surface modelling (quadrics, bicubics, meshes), rendering (lighting, reflectance models, ray tracing, texture mapping), compositing colour perception, and other selected topics.
Notes:
(3-0-9)
Prerequisite: ECSE 324
Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 533
Credit Weight: 3
Transcript Title: Phys Basis of Semicon Devices
Calendar Title: Physical Basis of Semiconductor Devices.
Description:
Quantitative analysis of diodes and transistors. Semiconductor fundamentals, equilibrium and non-equilibrium carrier transport, and Fermi levels. PN junction diodes, the ideal diode, and diode switching. Bipolar Junction Transistors (BJT), physics of the ideal BJT, the Ebers-Moll model. Field effect transistors, metal-oxide semiconductor structures, static and dynamic behaviour, small-signal models.
Notes:
(3-0-6)
Prerequisites: PHYS 271 and (ECSE 330 or ECSE 331) and (ECSE 251 or ECSE 351)
Administering Faculty: Faculty of Engineering
Teaching Department: Electrical & Computer Engr
Status (catalog level): Active

ECSE 534
Credit Weight: 3
Transcript Title: Analog Microelectronics
Calendar Title: Analog Microelectronics.
Description:
Design of analog ICs using specialized analog CAD tools such as SPICE. Voltage and current amplifier design which encompasses the study of biasing circuits, current sources and mirrors, input and output stages, and frequency compensation; precision reference sources; analog multipliers; oscillators; waveform generators and shaping circuits, and analog switches.
Notes:
(3-0-6)
Prerequisite: ECSE 335

Calendar Title: Recent Advances in Electrical Engineering 1.
Description:
Course content suited to the area of specialization of the lecturer.
Notes:
(3-0-9)
This course is basically following a MTWR schedule pattern. However, during the second week, there won’t be any class on Thursday, May 15. During the third week, there won’t be any class on Monday, May 19 due to a statutory holiday, but there will be a class on Friday, May 23 to replace the Monday class. During the fourth week, there won’t be any class on Monday, May 26. During the fifth and sixth (last) week, there will be again classes from Monday through Thursday.

**Transcript Title:** English Exam for Teacher Cert.  
**Calendar Title:** English Exam for Teacher Certification.  
**Description:** The English Exam for Teacher Certification (EETC) is a Quebec Ministry of Education-required component of the B.Ed. degree. The exam is coordinated by an independent organization, the Centre for the English Exam for Teacher Certification (CEETC). Consists of a 2-hour exam designed to assess teacher candidates' competency in the language of instruction. Must be completed before the 3rd Field Experience. Students must register for EDEC 215 and register for the EETC on the CEETC website. Students who do not pass after four attempts require permission from the Internships & Student Affairs Office to re-take the
exam.
