**Transcript Title:** Critical Race Studies & Educ  
**Calendar Title:** Critical Race Studies and Education  
**Description:**  
Investigates the relationships among race, racialization, and education. Defines education as the processes through which we claim identities, make knowledge claims, and how we learn to take action in the world. Concerned with 1) how we come to know and produce knowledge through race, 2) the pedagogical processes that normalize racial inequity; and 3) the impact of racializing knowledge and structures for variously racialized persons in educational settings. Surveys a range of intersectional critical race theoretical frameworks particularly in Canada. Relevant for developing a critically-engaged educational practice, for whom race, racialization, and social justice are central concerns.

Transcript Title: 21st Century Learning
Calendar Title: 21st Century Learning.
Description:
21st Century Learning that shifts education away from learning as a
cognitive/rational endeavour focused on reproduction of content knowledge, and
toward learning as a life-long process. Contemporary learning in seven areas: 1) make
learning and learner engagement central; 2) learning is social and often
collaborative; 3) be attuned to learners¿ motivations and emotions; 4) be
sensitive to individual differences including prior knowledge; 5) be demanding for
each learner but without excessive overload; 6) recognize assessment as critical,
but with strong emphasis on formative feedback; 7) promote horizontal
connectedness across activities and subjects, in and out of school.

**Calendar Title:** Current Topics in Kinesiology Research.

**Description:**
Lecture and seminar-based discussions of current research across sub-disciplines and areas relevant to kinesiology. Students will situate their specific areas of doctoral research within the broader multidisciplinary field of kinesiology and other health-related research disciplines. Taught by experts in sub-disciplines of kinesiology research (e.g., exercise physiology, biomechanics, motor control, physical and health education pedagogy, sport and exercise psychology) and in interdisciplinary health research. Through individual and group work, students will be expected to develop a breadth and foundation of knowledge in kinesiology, its evolution and future directions of the field.

**Notes:**
Prerequisites: EDKP 605 AND EDPE 676 or equivalent.

**Administering Faculty:** Graduate Studies

**Teaching Department:** Kinesiology and Physical Ed

**Status (catalog level):** Active

Transcript Title: Ph.D. Comprehensive Exam
Calendar Title: Ph.D. Comprehensive Examination.
Description:
The Ph.D. Candidate must demonstrate a general knowledge within their discipline of study, an understanding of the proposed field of research and the ability to present and defend material orally. The examination includes both 1) a written component as specified by the student's advisory committee and in agreement with the thesis supervisor and the student, and 2) an oral examination (3 hours) consisting of questions related to the written component and its relationship with the more general knowledge of the discipline. The oral examination will take place within two weeks following submission of the written component.

Transcript Title: Lead for Success in Ed Inst

Calendar Title: Leading for Success in Educational Institutions.

Description:
This course focuses on key issues related to leadership in human resource management. It begins with an introduction of the concepts of leadership and the role of leadership in educational settings. Subsequently, it focuses on addressing strategic planning, and the design, execution, and assessment of recruitment programs, including mechanisms that support performance within the workplace (evaluation, mentoring, professional development). The course will examine the foundations of effective learning for individuals and organisations, and the relationship between the two.

**Transcript Title:** Etude de la lan fr pour les en

**Calendar Title:** Étude de la langue française pour enseignants.

**Description:**
Notions pour l'enseignement du français langue seconde. Composantes linguistique (lexique, morphologie, syntaxe et semantique) et discursive (de la phrase aux types de textes et de discours); apprentissage de la grammaire nouvelle; composante langue des programmes d'études. Les demandes de deuxième langue d'enseignement et d'apprentissage axées sur l'intégration de la structure du langage dans les approches communicatives langagières.

**Notes:**
Prerequisite: EDSL 505, EDSL 500

**Administering Faculty:** Faculty of Education

**Teaching Department:** Integrated Studies in Ed

**Status (catalog level):** Active

### EDSL 541

**Credit Weight:** 3

**Transcript Title:** Lit&littre de jeun en cont imm

**Calendar Title:** Littératie et littérature de jeunesse en contexte immersif.

**Description:**
Ce cours vise à conscientiser l'étudiant aux stratégies d'enseignement et d'apprentissage de la lecture et de l'écriture propices au développement de la bilittératie en classes d'immersion. Il explore de façon approfondie, le rôle de la littérature enfantine et de jeunesse dans l'apprentissage du français langue seconde en contexte scolaire.

EDSP 715D1
Credit Weight: 3
Transcript Title: Theory & Pract of Supervision
Calendar Title: Theory and Practice of Supervision.

Description:
An introduction to the theory and practice of clinical supervision. Objectives include providing trainees the opportunity to assimilate theoretical and empirical literature related to clinical supervision, obtain experience in individual supervision with trainees, develop observational and conceptualization skills needed to assess supervisee competence and fostering skills writing supervisory case meetings.

Notes:
Students must register for both EDSP 715D1 and EDSP 715D2.
No credit will be given for this course unless both EDSP 715D1 and EDSP 715D2 are successfully completed in consecutive terms.

Transcript Title: GPH Pre-Clerkship Elective
Calendar Title: Global and Public Health Pre-Clerkship Elective.
Description:
The global and public health pre-clerkship elective course offers pre-clerkship medical students the opportunity to gain experience in Global and Public Health. Students will learn about Global Health and/or Public Health through structured community-based projects and activities locally, provincially, nationally or abroad. This includes, but is not limited to, IFMSA-Quebec exchanges, CFMS exchanges, and INcommunity experiences.
Notes:
Prerequisite(s): Students participating in international placements are required to complete the online Global Health Programs pre-departure workshop.
Restriction(s): All requests will require approval by the department.
Med-P students do not qualify for enrolment in the 0-credit course. The course is open to MDCM medical students prior to clerkship and until the end of FMD (Dentistry students are not eligible).

Credit Weight: 3
Transcript Title: Insect Biology and Control
Calendar Title: Insect Biology and Control.
Description:
Introduction to insect structure, physiology, biochemistry, development, systematics, evolution, ecology and control. Stress on interrelationships and integrated pest control.

Notes:
Winter
3 hours lecture
Prerequisite: BIOL 205 or permission of instructor
Restriction: Not open to students who have taken or are taking ENTO 330 or BIOL 350
Note: Offered on the downtown campus. This course is also offered as BIOL 350 in the Fall term.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Natural Resource Sciences
Status (catalog level): Active

ENTO 352
Credit Weight: 3
Transcript Title: Biocontrol of Pest Insects
Calendar Title: Biocontrol of Pest Insects.
Description:
Modern concepts of integrated control techniques and principles of insect pest management, with emphasis on biological control (use of predators, parasites and pathogens against pest insects), population monitoring, and manipulation of environmental, behavioral and physiological factors in the pest's way of life. Physical, cultural, and genetic controls and an introduction to the use of non-toxic biochemical controls (attractants, repellents, pheromones,
antimetabolites).

Notes:
Winter
Restriction: Not open to students who have previously taken ENTO 452
3 lectures

Description:
Preparation of an honours thesis.

Notes:
Prerequisites: ENVR 301. Acceptance to Honours Program in Environment.
Students must register for both ENVR 495D1 and ENVR 495D2. No credit will be given for this course unless both ENVR 495D1 and ENVR 495D2 are successfully completed in consecutive terms.

*This is an honours project course, and the standard add/drop and withdrawal deadlines do not apply. Therefore, it has unique add/drop and withdrawal deadlines.

**Administering Faculty:** Faculty of Science

ENVR 519
Credit Weight: 3
Transcript Title: Global Environmental Politics
Calendar Title: Global Environmental Politics.
Description:
How the problem of environmental degradation is dealt with at the international level. The scope and nature of global environmental protection issues that cross boundaries, both physical and conceptual. Actors, structures and processes of international society. Consideration of global commons and transnational resources and of environmental externalities.
Notes:
Prerequisite: ENVR 201 or ENVR 203 or permission of instructor
Restrictions: Open to students in the Environment Graduate Option (available to other students with permission of instructor). (Not open to students who have taken ENVR 580 -- section 001 -- in Winter 2002, Fall 2003, or Fall 2004
Note: This course has been offered three times as a Topics in Environment Course

ENVR 540
Credit Weight: 3
Transcript Title: Ecology of Species Invasions
Calendar Title: Ecology of Species Invasions.
Description:
Causes and consequences of biological invasion, as well as risk assessment methods and management strategies for dealing with invasive species.
Notes:
3 hours lecture
Prerequisite: BIOL 215 (or ENVR 200 plus ENVR 202), and at least one 300- or 400-level course in ecology, evolution, or conservation biology.
Restrictions: Not open to U1 or U2 students. Not open to students who are taking or have taken BIOL 540.

ENVR 544
Credit Weight: 3
Transcript Title: Env. Measurement & Modelling
Calendar Title: Environmental Measurement and Modelling.
Description:
Utility of geographic information systems, remote sensing and spatially-explicit modelling for environmental planning in conjunction with analytical frameworks used in the decision-making process (e.g., cost-benefit analysis, life-cycle analysis and multi-criteria decision making).
Notes:
Prerequisites: NRSC 430 or GEOG201 or URBP 505 or permission of instructor
Restriction: Students registered in Environment Graduate Option (or permission of instructor)

EPIB 507
Credit Weight: 3
Transcript Title: Biostats for Health Sciences
Calendar Title: Biostats for Health Sciences.
Description:
Basic principles of statistical inference applicable to clinical, epidemiologic, and other health research. Topics include: methods of describing data, statistical inference for means, statistical inference for proportions, non-parametric statistics, correlation and introduction to linear regression.
Notes:
Prerequisite: Permission of instructor
Restriction: Restricted to students registered in the Faculty of Medicine, Dentistry, Human Nutrition, Medical Residents, and Clinical Fellows.
Course not open to students registered in the Epidemiology and Biostatistics programs.
Due to the intensive nature of this course during the summer session, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the third lecture day and withdrawal is the sixth lecture day. The standard add/drop and withdrawal deadlines apply for sections of this course offered during the Fall or Winter semesters.

Credit Weight: 3
Transcript Title: Regression Anal for Health Sc.
Calendar Title: Regression Analysis for Health Sciences.
Description:
The aim of this course is to provide students with basic principles of regression analyses applicable to the health sciences so that they can understand and use appropriate statistical regression techniques for continuous and discrete data. The course will cover: Linear regression: Regression for two or more explanatory variables, Polynomial regression, Dummy variables, Inference for regression parameters, Confounding and collinearity, Effect modification, Model-checking, Model selection, Prediction. Logistic and Poisson regression: Logistic regression for one or more variables, Interpreting odds ratios, Inference for logistic and Poisson regression parameters, Confounding and interactions in logistic regression, Model selection, Prediction. A very brief overview of survival analysis.
Notes:
Prerequisite(s): EPIB 507 or permission of the instructor.
Restriction(s): Course not open to students registered in the Epidemiology, Biostatistics or Public Health programs. Not open to students who have taken EPIB 591 when topic was ¡Regression Analysis for Health Sciences".
Administering Faculty: Faculty of Medicine & Hlth Sci
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 526
Credit Weight: 3
Transcript Title: Society, Human Biology&Health
Calendar Title: Society, Human Biology and Health.
Description:
Social determinants of health (such as educational attainment, childhood socioeconomic circumstances, social integration, discrimination, and job strain) with particular emphasis on the biological mechanisms (e.g. components of the
cardiovascular system, endocrine system, immune system, nervous system, and genetics) by which social circumstances influence health.

Notes:
Prerequisite: Permission of the instructor
This course is open to graduate students and advanced undergraduates from all departments, with the permission of the instructor. Basic knowledge in epidemiology or physiology is useful, though not required.

Status (catalog level): Active

EPIB 603
Credit Weight: 4
Transcript Title: Intermediate Epidemiology
Calendar Title: Intermediate Epidemiology.
Description:
Concepts and methods for epidemiology at the intermediate level, including causation, measures of disease occurrence and effect, study designs, biases in epidemiologic research, interaction, and data analysis for categorical and survival data using statistical software.

Notes:
Prerequisite(s): EPIB 601, EPIB 607, and PPHS 602.
Administrating Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 605
Credit Weight: 1
Transcript Title: Critical Appraisal in Epid
Calendar Title: Critical Appraisal in Epidemiology.
Description:
This course provides the opportunity to develop skills to critically evaluate evidence presented in the biomedical and health sciences literature, based on the concepts acquired in the epidemiology introductory courses.

Notes:
Prerequisites: EPIB 601 and EPIB 607.
Administrating Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 607
Credit Weight: 4
Transcript Title: Inferential Statistics
Calendar Title: Inferential Statistics.
Description:
Introduction to the basic principles of statistical inference used in clinical and epidemiologic research. Topics include variability; methods of processing and describing data; sampling and sampling distributions; inferences regarding means and proportions, non-parametric methods, regression and correlation.

Notes:
Prerequisite (Undergraduate): A first year course in undergraduate differential and integral calculus.
Administrating Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 613
Credit Weight: 1
Transcript Title: Intro to Statistical Software
Calendar Title: Introduction to Statistical Software.
Description:
Introduction to statistical software and data management; including basics of
entering, manipulating data and elementary statistical analysis, SAS software, with reference to other packages of potential interest to students (R, Stata, SPSS).

Notes:
Prerequisite: Enrolment in Epidemiology stream program or permission of instructor.

Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 619
Credit Weight: 2
Transcript Title: Syst. Reviews & Meta-Analysis
Calendar Title: Systematic Reviews and Meta-Analysis.
Description: An overview of principles, methods and practice of systematic reviews and meta-analysis in the field of medicine and public health.
Notes: Prerequisites: EPIB 601 and EPIB 607, or equivalent, or permission of the instructor
Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the second lecture day and withdrawal is the fifth lecture day.

Status (catalog level): Active

EPIB 621
Credit Weight: 4
Transcript Title: Data Analysis in Health Sci
Calendar Title: Data Analysis in Health Sciences.
Description: Univariate and multivariate statistical techniques for continuous categorical and survival data. Topics include generalized linear models, multiple linear and logistic regression, introductory survival analysis, model selection. Maximum likelihood and Bayesian approaches will be presented.
Notes: Prerequisite(s): EPIB 601 and EPIB 607 of permission of instructor.

Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 625
Credit Weight: 3
Transcript Title: Ethics of Human Research
Calendar Title: Ethics of Human Research.
Description: Introduction to the ethics of conducting research involving human beings, with focus on clinical trials and surveys of ethical issues in public health research, experimental psychology, and animal experimentation. Areas covered include: scandals involving research with humans; ethical and regulatory guidelines and structures; ethical theory and principles of human research ethics; empirical findings on ethical practice in research.

Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active
EPIB 627
Credit Weight: 3
Transcript Title: Analysis of Correlated Data
Calendar Title: Analysis of Correlated Data.
Description:
This course will provide a basic introduction to methods for analysis of correlated, or dependent, data. These data arise when observations are not gathered independently; examples are longitudinal data, household data, cluster samples, etc. Basic descriptive methods and introduction to regression methods for both continuous and discrete outcomes.
Notes:
Prerequisites: EPIB 603, EPIB 621, EPIB 634 or permission of instructor.
Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 628
Credit Weight: 3
Transcript Title: Measurement in Epidemiology
Calendar Title: Measurement in Epidemiology.
Description:
This course will focus on methodological issues related to measures of health status, determinants of health status, and other relevant covariates encountered in clinical and epidemiologic research. Topics to be covered include instrument development, assessment of reliability and validity, item response theory, and latent variable-based measurement models.
Notes:
Prerequisites: EPIB 603 and EPIB 621 or Permission of Instructor.
Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 629
Credit Weight: 3
Transcript Title: Knowledge Synthesis
Calendar Title: Knowledge Synthesis.
Description:
This course will provide a detailed description of the systematic review process, discuss the strengths and limitations of the method, and provide step-by-step guidance on how to perform a systematic review, and how to critically appraise systematic reviews. Specific topics to be covered include: formulation of the review question, searching of literature, quality assessment of studies, data extraction, meta-analytic methods, and report writing. The course will also cover statistical issues of meta-analysis.
Notes:
Prerequisite(s): EPIB 601 and EPIB 607, or equivalent, or permission of the instructor.
Restriction(s): Not open to students who have taken EPIB 619. Not open to students who have taken EPIB 675 when topic was 'Knowledge Synthesis'.
Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

Credit Weight: 2
Transcript Title: Pharmacoepidemiology 2
Calendar Title: Pharmacoepidemiology 2.
Description: An advanced course on the methodology to be used when confronted with an alleged adverse or beneficial event related to a drug, a vaccine or a biological product. It includes four parts: i) designs for etiological research; ii) surveillance (modelling, statistical appraisal); iii) hazard functions in pharmacoepidemiology; iv) exposure assessment.
Notes: Offered only in Summer term.
Prerequisites: EPIB 633, or instructor's permission, and basic knowledge of epidemiology and biostatistics
Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the first lecture day and withdrawal is the second lecture day.
Administrating Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 632
Credit Weight: 3
Transcript Title: Mental Dis:Pop Perspec&Methods
Calendar Title: Mental Disorders: Population Perspectives and Methods.
Description: Semester-long seminar on key issues and concepts integral to the epidemiological study of mental disorders, through the lens of a population perspective. Review of the origins of the field, classical studies, and recent major studies. Survey of where the field is now. Discussion of national and global burden of mental disorders. Defining and diagnosing mental disorders. Methods to identify psychopathology in community versus clinical settings. Reliability and validity of psychiatric diagnoses and measurement tools. Research designs including approaches to study etiology, health services delivery, prevention, role functioning, and policy.
Notes: Prerequisite(s): EPIB 603 or equivalent, or permission of instructor
Restrictions: Not open to students who have taken or are taking PSYT 713.
Administrating Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 633
Credit Weight: 2
Transcript Title: Pharmacoepidemiology 1
Calendar Title: Pharmacoepidemiology 1.
Description: This course is an introduction to epidemiological thinking as it applies to the evaluation of the effects of drugs on the health of populations. It is composed of four parts: i) assessment of adverse event reports; ii) basic designs for pharmacoepidemiologic investigations; iii) data gathering in pharmacoepidemiology; iv) introduction to the use of epidemiologic methods for the assessment of benefits and economic impacts of drug.
Notes: Offered only in Summer Term
Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the first lecture day and withdrawal is the second lecture day.

Status (catalog level): Active

**EPIB 634**
Credit Weight: 3
Transcript Title: Fundamentals of Pharmacoepidem
Calendar Title: Fundamentals of Pharmacoepidemiology.
Description:
The objective of this course is for students to develop an understanding of the design and analysis of pharmacoepidemiologic studies. It includes didactic lectures, group discussions, and the examination of examples from the medical literature. Topics covered including an overview of commonly used study designs, exposure and outcome assessment, new-user designs, healthy-user effects, non-traditional study designs, and the role of confounding and methods used to minimize it. Biases particularly relevant to pharmacoepidemiology are also discussed.
Notes:
Prerequisite(s): EPIB 601 and EPIB 607, or permission of instructor
Corequisite(s): EPIB 603 and EPIB 621, or permission of instructor

Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 637
Credit Weight: 3
Transcript Title: AdvModel:Surv&OtherMultivData
Calendar Title: Advanced Modeling: Survival and Other Multivariable Data.
Description: Advanced applied biostatistics course dealing with flexible modeling of non-linear effects of continuous covariates in multivariable analyses, and survival data, including e.g. time-varying covariates and time-dependent or cumulative effects. Focus on the concepts, limitations and advantages of specific methods, and interpretation of their results. Students will get hands-on experience in the implementation of selected methods by applying them to their own multivariable data, in individual survival analysis projects.
Notes: Prerequisite(s): EPIB 621, or equivalent, or permission of the instructor.
Administering Faculty: Graduate Studies
Teaching Department: Epidemiology and Biostatistics
Status (catalog level): Active

EPIB 638
Credit Weight: 3
Transcript Title: Mathematical Modeling of ID
Calendar Title: Mathematical Modeling of Infectious Diseases.
Description: Mathematical models of infectious diseases ¿computer simulations of epidemics¿ enable detailed analyses and understanding of factors affecting the distribution of infections/diseases in populations and now play a key role in policy making. Covered topics include: short-term dynamics of infections (R0), compartmental models, stochastic models (including agent-based), contact patterns and heterogeneity, and Bayesian model calibration. The learning objectives are: 1) recognize research questions that can be addressed using modeling; 2) develop, parameterize, calibrate, and analyze simple infectious disease models in R; and 3) critically appraise scientific modeling papers.
Notes: Prerequisite(s): EPIB 621 or permission of the instructor
Restrictions: Not open to students who have taken EPIB 676 when topic was "Mathematical Models of Infectious Diseases". This is an intermediate-level quantitative course. Previous courses in calculus and biostatistics are recommended (in doubt, contact the instructor prior to registration). A working knowledge of the R statistical software (or equivalent) is mandatory (data structures, function, loop, etc.).

Credit Weight: 4
Transcript Title: Pharmacoepidemiologic Methods
Calendar Title: Pharmacoepidemiologic Methods.
Description: The objective of this course is to provide students with an in-depth review of the methods and principles of pharmacoepidemiology. Topics covered include themes related to the potential data sources, appropriate exposure definitions, the use of active drug comparators, latency and the application of lag periods, reverse causality, detection bias, methodological considerations in the assessment of
acute versus chronic outcomes, new-user designs, healthy-user effects, and non-traditional study designs (e.g., within-user designs). In addition, the role of confounding and methods used to minimize its effects, such as the use of propensity scores, instrumental variables, and marginal structural models will be discussed.

Notes:
Prerequisite(s): EPIB-603, EPIB-621, or equivalent, or permission of instructor.

EPIB 647
Credit Weight: 3
Transcript Title: Analysis Temporal & Spatial Data
Calendar Title: Analysis Temporal and Spatial Data.
Description:
This course focuses on the computational management and analysis of large data sets in epidemiology. We will consider data storage and retrieval, prospective temporal and spatial analysis, and the evaluation of pattern detection.
Notes:
Prerequisites: EPIB 603 and EPIB 621 or permission of instructor.

**Administering Faculty**: Graduate Studies

**Teaching Department**: Epidemiology and Biostatistics

**Status (catalog level)**: Active

**EPIB 648**

**Credit Weight**: 3

**Transcript Title**: Methods in Social Epidemiology

**Calendar Title**: Methods in Social Epidemiology.

**Description**:
Methods for conducting studies in social epidemiology and population health will be covered. Topics will include causal inference; measurement and concepts of social exposures; methods for study design and analysis. Techniques for descriptive and etiologic investigations of socioeconomic position, gender, race and ethnicity, geography, and social policies will be discussed.

**Notes**:
Prerequisites: EPIB 603 and EPIB 621, or permission of the instructors

**Teaching Department**: Epidemiology and Biostatistics

**Status (catalog level)**: Active

**EPIB 651**

**Credit Weight**: 1

**Transcript Title**: Selected Topics in Biostats 1

**Calendar Title**: Selected Topics in Biostatistics 1.

**Description**:
The purpose of this 1-credit courses is to cover specific methodologic topics in more detail than is given in the main courses on statistical methods. The topics to be offered may vary from year to year. Topics currently offered include "Biometric Methods in Occupational Epidemiology" and "Practical Considerations of Statistical Power".

**Administering Faculty**: Graduate Studies

**Teaching Department**: Epidemiology and Biostatistics

**Status (catalog level)**: Active

**EPIB 654**

**Credit Weight**: 2

**Transcript Title**: Pharmacoepidemiology 4

**Calendar Title**: Pharmacoepidemiology 4.

**Description**:
The utility of epidemiological techniques for the assessment of drug benefits after their marketing is presented. The course is composed of four parts: (i) methodology of Phase IV studies (efficacy and effectiveness studies); (ii) measurement of quality of life; (iii) evaluation of the economic impact of drugs; (iv) assessment of the effects of drugs and vaccines on the public health system.

**Notes**:
Offered only in Summer term.
Prerequisite(s): EPIB 601 and EPIB 607 or permission of instructor.
Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the first lecture day and withdrawal is the second lecture day.

Causal inference using potential outcomes has become a standard part of the toolkit for epidemiologic researchers. In this course students will review foundational material on potential outcomes, and then understand and implement advanced methods. The class will emphasize both conceptual understanding and implementation, including analyses of complex datasets. Time-fixed and time-varying exposures will be considered. Methods studied will vary but will include marginal structural models, structural nested models, and targeted maximum likelihood.

Notes:
Prerequisite(s): EPIB 705 or equivalent, or permission of instructor.
Restriction(s): Restricted to Ph.D. students in the Department of Epidemiology, Biostatistics, and Occupational Health.

Calendar Title: Properties of Minerals.
Description:
Survey of the physical and chemical properties of the main mineral groups. Discussion of their relationships to the chemical composition and structure of minerals. The practical exercises emphasize the physical and chemical properties that relate to industrial uses and environmental issues, and the identification of hand specimens.

Notes:
Winter
1 hour lecture, 1 hour laboratory
Restriction: Open to Engineering students only
Restriction: Not open to students who have taken EPSC 210

EPSC 231
Credit Weight: 3
Transcript Title: Field School 1
Calendar Title: Field School 1.
Description:
Geological mapping of selected areas, preparation of maps, reports from field notes, aerial photographs, etc.

Notes:
Prerequisite: EPSC 240, or permission of the instructor.
This field course, given in the U.S., has an additional fee projected to be $609.78 to cover the costs of transportation, some meals and accommodation as well as other field expenses. The fee is only refundable prior to the deadline to withdraw with full refund. The Department of Earth and Planetary Sciences subsidizes a portion of the cost for this activity.

EPSC 240
Credit Weight: 3
Transcript Title: Geology in the Field
Calendar Title: Geology in the Field.
Description:
Lectures and field-based exercises, held locally on campus and in the Montreal area, introduce students to the reading and interpretation of a topographic map, the basic description of a stratigraphic section and the inference of its depositional environment, the nature of intrusive contacts, and the field measurement of some structural features and geophysical properties. Students plot geological information on a map, identify landforms in aerial views and learn the tectonic features diagnostic of plate margins. By the end of the course, the students relate a geological map to the geological history of Quebec.
Notes:
Restriction: Priority is given to students in programs for which this course is required.
Open to U0 students with permission of the instructor.
Administering Faculty: Faculty of Science
Teaching Department: Earth & Planetary Sciences

Calendar Title: Field School 2.
Description: Two week field studies in selected branches of the geosciences.
Notes: Two-week intensive field school to a range of national and international locations.
Prerequisites: EPSC 240, enrolment in U2 or U3 EPS program, and permission of the instructor.
Alternates years with EPSC 341.
The field school will be based around the Bay of Fundy, and central Nova Scotia and has an additional fee of $594.10 to cover the costs of transportation and accommodation as well as other field expenses. Six days will be spent around the Chignecto peninsula, including visits to Parrsboro, Joggins, and Cape Chignecto park. The remaining time will be spent between Pictou, Wolfville and the Annapolis valley, and the coast south of Halifax.

Transcript Title: Arctic Geology
Calendar Title: Arctic Geology.
Description:
This course introduces students to the principles of the geology of the Canadian Arctic. The primary objectives of the course are to train students in theory and practice of geology in the Canadian Arctic. Practical training includes drill core logging, surveying, mapping, sample collecting, and geological interpretations.

Notes:
Prerequisite(s): Two courses from the following list: GEOG 203, GEOG 205, GEOG 272, GEOG 372, ENV 200, ENV 202, EPSC 203, EPSC 210, EPSC 212, EPSC 220, EPSC 233, ATOC 214, ATOC 215, ATOC 219, SOIL 300.
Corequisite(s): ATOC 373, GEOG 373, [ATOC 473 or EPSC 473 or GEOG 473].
Note(s): 1. This course is one of a set of four field courses (ATOC 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473) designed to be taken concurrently. It complements programs in natural science disciplines by providing students with specialized field training and research experience focusing on the unique environmental conditions of cold polar systems. 2. Cost includes transportation, room and board, field expenses. Students are charged $12,000 for the four courses combined: ATOC 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473. 3. Arctic localities: Iqaluit, Resolute Bay, and Central Axel Heiberg Island in the Canadian High Arctic.

Calendar Title: Arctic Field Research.
Description:
This course is the independent research component of the McGill Arctic Field Study Semester. It has four distinct parts, a) problem identification and background preparation, b) research design and field data collection, c) lab and data analysis, and d) report preparation and presentation. The research design and field data collection will be part of an extended period of fieldwork based in the Canadian Arctic. The Lab and data analysis will begin in the field and finish on campus. Each student will prepare a manuscript style report and make a conference presentation based on their research.

Transcript Title: Advanced Structural Geology
**Calendar Title:** Advanced Structural Geology.

**Description:**
The fundamental concepts of stress, strain and deformation mechanisms in rocks are explored. Topics include, but are not restricted to, theory of continuum mechanics, brittle deformation, intracrystalline deformation, and frictional sliding. Deformation structures are studied in the field and/or using petrographic and micro-analytical methods to link the theory to natural systems. Problem solving through effective use of field and laboratory data and observations is integrated throughout, with emphasis on basic numerical methods developed in Matlab.

**Transcript Title:** Climate and the Carbon Cycle

**Calendar Title:** Climate and the Carbon Cycle.

**Description:**
What does the rapid increase in CO2, currently driven by human activities, mean for future climate? Where will the carbon released by humans go, and how long will it take? An overview of the mechanisms governing global climate, the carbon cycle, and geological evidence for past changes in climate and the carbon cycle. Through assignments, students build their own simple Earth System models in order to explore basic principles of the coupling between climate and the carbon cycle. Output from General Circulation Models is analysed and recent peer-reviewed scientific literature is discussed.

Calendar Title: Earthquake Physics and Geology.
Description: What are earthquakes and how do we study them? Fundamental mechanics of faulting and earthquake source processes are explored from theoretical and observational perspectives. The lectures cover concepts of earthquake source mechanism, including seismic waves, earthquake energy budget, fracture and friction mechanics, earthquake cycle deformation, earthquake triggering and prediction, and seismic hazards. This is complemented by in-class discussion on recent major discoveries and challenges in the field. Students learn to investigate earthquake source process by using seismic, geodetic and geological data in computer labs and course projects supervised by the instructor(s).
Notes: Prerequisite(s): EPSC 320 and MATH 222
Administrating Faculty: Faculty of Science
Teaching Department: Earth & Planetary Sciences
Status (catalog level): Active

EPSC 525
Credit Weight: 3
Transcript Title: Microbio of the Earth System
Calendar Title: Microbiology of the Earth System.
Description: Examination of microbes that have influenced the earth's elemental cycles that sustain life on the planet, their interactions with the goal of understanding the diversity, dynamics and function of microbes in shaping our environment. Topics include global biogeochemical cycling, marine microbiology, microbe-metal interactions, bioremediation, astrobiology and the impact of climate change on microbial processes.
Notes: Prerequisite: One of BIOL 200, MIMM 211 is recommended, but familiarity with cell biology from BIOL 112, AEBI 122, CEGEP objective 00XU or equivalent is required at a minimum.
Restriction: Open to U2 or higher in a B.Sc. or B.A. & Sc. program.
Not open to students who have taken EPSC 550 when the topic was "Geomicrobiology" or "Microbiology of the Earth System".

Credit Weight: 3
Transcript Title: Gastro Phys & Pathophysiology
Calendar Title: Gastrointestinal Physiology and Pathology.
Description:
Course deals with various aspects of gastrointestinal and hepatic function in health and altered physiological states. The principal focus is on the recent literature pertaining to cell and molecular mechanisms underlying the motility secretory process, absorption and secretion. The molecular biology of the hepatic viruses and various aspects of colonic neoplasia will also be considered.

Notes:
Fall and Winter
Prerequisite: Graduate students, U3 undergraduates

Administering Faculty: Faculty of Science
Teaching Department: Medicine
Status (catalog level): Active

EXMD 510
Credit Weight: 3
Transcript Title: Bioanalytical Separation Meth
Calendar Title: Bioanalytical Separation Methods.
Description:
The student will be taught the capabilities and limitations of modern separation methods (gas and high-performance liquid chromatography, capillary electrophoresis, hyphenated techniques). Application of these techniques to solve analytical problems relevant to biomedical research will be emphasized, with special attention being paid to the processing of biological samples.

EXMD 633
Credit Weight: 3
Transcript Title: Clin Aspects Res Resp Diseases
Calendar Title: Clinical Aspects of Research in Respiratory Diseases.
**Description:**
Clinical aspects, epidemiology and burden of major respiratory conditions; key concepts of clinical and epidemiologic research in respiratory diseases. Specific conditions addressed include asthma, chronic obstructive pulmonary disease, cystic fibrosis, tuberculosis, pneumonia, adult respiratory distress syndrome, interstitial and pulmonary vascular diseases.

**Notes:**
Restriction: Must be registered for graduate or postdoctoral studies in the Faculty of Medicine or the Faculty of Science.

The course uses primarily a Web-based learning format. There are eight two-week modules, each devoted to a specific respiratory topic or condition, with slides, readings, and a brief written assignment. Each module is taught by a faculty member with specific expertise in that topic, with one face-to-face meeting per module (~2 hours) to review key concepts, answer questions, and foster critical discussion around the topic of interest. There is a final essay, requiring a more in-depth approach to one of the major subjects covered during the course.

Clinical background is not required.

### EXSU 602

**Credit Weight:** 3  
**Transcript Title:** Knowledge Management 2  
**Calendar Title:** Knowledge Management 2.  
**Description:** Critical elements required for the creation and delivery of digital slide presentations.  
**Notes:** 3 hours/week  Compulsory for students in the Department of Surgery and available to others by permission of the coordinators Restriction: Not open to students who have taken EXSU 601, 601D1/D2, 601N1/N2 prior to Fall 2019.
ExSU 603
Credit Weight: 3
Transcript Title: Surgical Education Foundations
Calendar Title: Surgical Education Foundations.
Description:
Critical overview of key educational and educational psychology theories and assessment principles to guide surgical education. Different surgical education environments analyzed and evaluated using theory, empirical evidence, and assessment practices.
Notes:
Since course is interactive, enrollment is capped at 12.

ExSU 605
Credit Weight: 3
Transcript Title: Biomedical Research Innovation
Calendar Title: Biomedical Research Innovation.
Description:
Introduction to the novel and/or emerging technologies in the field of biomedical research.
Notes:
2 hours/week
Compulsory for students in the Department of Surgery and available to others by permission of the coordinators

ExSU 606
Credit Weight: 3
Transcript Title: Stats for Surgical Research
Calendar Title: Statistics for Surgical Research.
Description:
Review of statistics for surgical research.
Notes:
2 hours/week
Compulsory for students in the Department of Surgery and available to others by permission of the coordinators

ExSU 610
Credit Weight: 3
Transcript Title: Surgical Outcomes Res Fndns
Calendar Title: Surgical Outcomes Research Foundations.
Description:
Comprehensive overview of strategies to measure and improve outcomes after surgery. Traditional and modern approaches to measure surgical outcomes, including clinician-reported, patient-reported and performance-based outcome measures.
Contemporary strategies to improve postoperative recovery; topics include minimally invasive surgery (laparoscopic, robotic), enhanced recovery pathways and prehabilitation.

Notes:
3 hours/week.
Students will be required to attend mandatory visits to surgical outcomes research labs at McGill.
Language of instruction: English
Restrictions: Open to students enrolled in the M.Sc. in Experimental Surgery; Surgical Outcomes Research program. Other students require permission of the instructors.
Administering Faculty: Graduate Studies
Teaching Department: Surgery
Status (catalog level): Active

EXSU 619
Credit Weight: 3
Transcript Title: The Hospital Environment
Calendar Title: The Hospital Environment.
Description:
The process of surgical innovation and hands-on skills necessary to work within a multi-disciplinary team in the creation of a novel, need driven, and marketable prototype used in the care of the surgical patient. This is second of a 3 part course introducing concepts and performing needs analyses focusing on the hospital environment and the close contact with its structure and patients.
Notes:
Corequisite: EXSU 620
Prerequisite(s): Permission of instructor.
Restriction: Course requires entry to surgical theatre; this is subject to hospital approval.
1) Students may be subject to interview.
2) Language of instruction: English, French available.
3) Minimum number 6, maximum 30
4) Subject to completion of medical/immunization record.
5) Professional conduct and dress required at all times in hospital visits when in potential contact with patients.
Administering Faculty: Graduate Studies
Teaching Department: Surgery
Status (catalog level): Active

**Transcript Title:** Surgical Innovation 2

**Calendar Title:** Surgical Innovation 2.

**Description:**
This course builds on key concepts and needs screening delivered and generated in EXSU 620 to develop hands-on skills necessary to work within a multi-disciplinary team in the creation of a novel, need driven, and marketable prototype used in the care of the surgical patient.

**Notes:**
Prerequisite(s): EXSU 620
Restriction(s): Course requires entry to surgical theatre, this is subject to hospital approval.
Students may be subject to interview.
Contact hours 47 consisting of 23 hours lectures, 24 hours hospital visits and presentation.
Language of instruction: English, French available.
Minimum number 6, maximum 20.
Subject to completion of medical requirements/immunization record.
Professional conduct and dress required at all times in hospital visits when in potential contact with patients.

Transcript Title: Resp. of the Prof. Engineer
Calendar Title: Responsibilities of the Professional Engineer.
Description:
A course designed to provide all Engineering students with further training regarding their responsibilities as future Professional Engineers. Particular focus will be placed on three professional characteristics that future engineers must demonstrate: i) professionalism, ii) ethical and equitable behaviour, and iii) consideration of the impact of engineering on society and the environment.
Notes:
Prerequisite(s): FACC 100 or BREE 205
Restriction(s): Open to undergraduate students registered in the Bioengineering, Bioresource Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Materials Engineering, Mechanical Engineering, Mining Engineering, and Software Engineering (Faculty of Engineering) programs. Not open to U0 (Year 0) students.

Calendar Title: Organic Chemistry.  
Description:  
Atomic and molecular structure, modern concepts of bonding, overview of functional groups, conformational analysis, stereochemistry, mechanisms and reactions of aliphatic compounds.  
Notes:  
Fall or Winter  
3 lectures and one 3-hour lab  
Prerequisite(s): AECH 110 or CHEM 110 or equivalent of CHEM NYA in CEGEP.  
Administering Faculty: Faculty of Agric Environ Sci  
Teaching Department: Food Science&Agr.Chemistry  
Status (catalog level): Active

FDSC 231  
Credit Weight: 3  
Transcript Title: Organic Chemistry Lecture  
Calendar Title: Organic Chemistry Lecture.  
Description:  
Atomic and molecular structure, modern concepts of bonding, overview of functional groups, conformational analysis, stereochemistry, mechanisms and reactions of aliphatic and aromatic compounds.  
Notes:  
Prerequisite: AECH 110 or CHEM 110 or equivalent of CHEM NYA in CEGEP  
Restriction: Not open to students who have taken or are taking FDSC 230 or
equivalent
In order to complete the Organic Chemistry 4 credit requirement, the lab
component (FDSC 232) must also be completed.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr. Chemistry
Status (catalog level): Active

FDSC 232
Credit Weight: 1
Transcript Title: Organic Chemistry Laboratory
Calendar Title: Organic Chemistry Laboratory.
Description: Techniques and experiments in organic chemistry.
Notes: Prerequisite: AEC 110 or CHEM 110 or equivalent of CHE NYA in CEGEP FDSC 231 or equivalent
Restriction: Not open to students who have taken or are taking FDSC 230 or equivalent
Laboratory section associated with FDSC 231.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr. Chemistry
Status (catalog level): Active

FDSC 233
Credit Weight: 3
Transcript Title: Physical Chemistry
Calendar Title: Physical Chemistry.
Description: Introduction to kinetic theory, thermodynamics, properties of liquids and solids, chemical equilibrium and the law of mass action, phase rule, properties of solutions, chemical kinetics.
Notes: Winter
3 lectures
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr. Chemistry
Status (catalog level): Active

FDSC 251
Credit Weight: 3
Transcript Title: Food Chemistry 1
Calendar Title: Food Chemistry 1.
Description: A study of the chemistry and functionality of the major components comprising food systems, such as water, proteins, carbohydrates and lipids. The relationship of these components to food stability will be studied in terms of degradative reactions and processing.
Notes: Winter
3 lectures and one 3-hour lab
Prerequisite: FDSC 211 or LSCI 211
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr. Chemistry
Status (catalog level): Active

FDSC 300
Credit Weight: 3
Transcript Title: Principles of Food Analysis 1  
Calendar Title: Principles of Food Analysis 1.  
Description:  
The fundamentals of food analysis are presented with the emphasis on the major components of foods. Topics include: food components, sampling, method selection, official methods, proximate analysis, moisture, protein, fat, ash, fiber, carbohydrates, vitamins and nutraceutical compounds.  
Notes:  
Fall  
3 lectures and one 3-hour lab  
Prerequisite: FDSC 251 or permission of instructor.  
Corequisite: FDSC 251 or permission of instructor.  
Administering Faculty: Faculty of Agric Environ Sci  
Teaching Department: Food Science&Agr.Chemistry  
Status (catalog level): Active  

FDSC 305  
Credit Weight: 3  
Transcript Title: Food Chemistry 2  
Calendar Title: Food Chemistry 2.  
Description:  
A study of the chemistry and functionality of the minor components comprising food systems, such as enzymes, anthocyanins, carotenoids, additives, vitamins and essential oils. The relationship of these components to food stability in terms of degradative reactions and processing.  
Notes:  
Fall  
3 lectures and one 3-hour lab  
Prerequisite: FDSC 251  
Administering Faculty: Faculty of Agric Environ Sci  
Teaching Department: Food Science&Agr.Chemistry  
Status (catalog level): Active  

FDSC 310  
Credit Weight: 3  
Transcript Title: Post Harvest Fruit&Veg Technol  
Calendar Title: Post Harvest Fruit and Vegetable Technology.  
Description:  
The post harvest chemistry and physiology of horticultural crops as they affect quality and marketability, handling methods pre and post harvest, principles and practices in cooling, storage, transportation and packaging.  
Notes:  
Fall  
3 lectures and one 3-hour lab  
This course carries an additional charge of $48.67 to cover the cost of transportation with respect to field trips. The fee is refundable only during the withdrawal with full refund period.  
Administering Faculty: Faculty of Agric Environ Sci

Status (catalog level): Active  

FDSC 315  
Credit Weight: 3  
Transcript Title: Separation Tech in Food Anal 1  
Calendar Title: Separation Techniques in Food Analysis 1.  
Description:
A detailed treatment on the principal chromatographic and electrophoretic techniques that are associated with the analysis of carbohydrate, lipid, protein constituents of food.

Notes:
Winter
3 lectures and one 3-hour lab
Prerequisite: FDSC 300 or permission of instructor.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr.Chemistry
Status (catalog level): Active

FDSC 319
Credit Weight: 3
Transcript Title: Food Commodities
Calendar Title: Food Commodities.
Description:
The relationship between the chemistry of food constituents present in common commodities, such as milk, meat, eggs, cereals, oilseeds etc. and the common processing technologies associated with their transformation into stable food products.

Notes:
Winter
3 lectures and one 3-hour lab
Prerequisite: FDSC 251 or permission of instructor

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr.Chemistry
Status (catalog level): Active

FDSC 330
Credit Weight: 3
Transcript Title: Food Processing
Calendar Title: Food Processing.
Description:
The principles and practices of food processing with an emphasis on canning, freezing, and dehydration. A survey of the newer methods of food preservation such as irradiation, reverse osmosis etc.

Notes:
Winter
3 lectures and one 3-hour lab
Prerequisite: FDSC 251

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Food Science&Agr.Chemistry
Status (catalog level): Active

FDSC 334
Credit Weight: 3
Transcript Title: Anal of Food Toxins&Toxicants
Calendar Title: Analysis of Food Toxins and Toxicants.
Description:
Toxins and toxicant residues in food including heavy metals, persistent organic pollutants (POPS) and microbial toxins are explored from an analytical perspective; new methods and strategies of analysis are emphasized.

Notes:
Winter
3 lectures and one 3-hour lab
Prerequisite: FDSC 213 or permission of instructor.
Administering Faculty: Faculty of Agric Environ Sci  
Teaching Department: Food Science&Agr.Chemistry  
Status (catalog level): Active

FDSC 400  
Credit Weight: 3  
Transcript Title: Food Packaging  
Calendar Title: Food Packaging.  
Description: An integrated approach to the materials used for the packaging of food products, considering the physical, chemical and functional characteristics of such materials and their utility, relative to the chemistry of the food system they are designed to enclose and preserve.  
Notes:  
Winter  
3 lectures and one 3-hour lab  
Prerequisite: FDSC 305  
This course carries an additional charge of $52.69 to cover the cost of transportation with respect to field trips. The fee is refundable only during the withdrawal with full refund period.

Calendar Title: Entrepreneurship Science-based.
Description:
This graduate interest group will offer the opportunity to learn about ENTREPRENEURSHIP and the process behind turning science-based ideas into successful products. It takes more than an excellent technology to successfully commercialize a product. Other factors such as freedom to operate, patent protection, market access and requisite infrastructure are equally essential. Meet and discuss what it takes with experienced achievers in that domain.

Calendar Title: Field Crop Management 1 (152-VM-MC).
Description:
During this course, students will learn and execute the tasks required in the production of field crops. Students will develop an understanding of the techniques involved as well as the impact of these techniques on crop-environment relationships and on environmental protection. This involves the planning and execution of the tasks to be done, an evaluation of the quality of the work and
the preparation of an adequate crop production database. This course will use lectures and practical work with as much outside work as weather conditions will permit.

**Credit Weight:** 2.67  
**Transcript Title:** Field Crop Management 2  
**Calendar Title:** Field Crop Management 2 (152-VTN-MC).  
**Description:**  
During this course, students will be preparing an environmentally-friendly cropping plan on a mixed crop and animal production farm. Students will develop an understanding of crop biology, crop production systems, crop-environment relationships, environmental protection; crop budgeting, on-farm research and marketing. Students will therefore integrate all aspects of field crop production into a coherent cropping plan. This includes the use of a decision-making process, planning of work to be done, a method for evaluating the results and the use of an efficient record-keeping system. Labs and interactive lectures will be used to achieve the goals of the course.

Calendar Title: Farm Practice 1 (152-001-MC).
Description:
This course combines classroom activities and a one-week internship on a farm to allow students to understand the workplace functions of a farm manager as well as the conditions under which they are exercised. Students are introduced to the available sources of information on the workplace functions of the farm manager. Additionally, they collect pertinent information in the workplace during their internship. Students outline the workplace characteristics of the farm manager while recognizing the potential for entrepreneurial initiatives in this sector of activity.

Transcript Title: Introduction to Economics
Calendar Title: Introduction to Economics (152-002-MC).
Description:
At the end of this course, students will understand and be able to apply basic microeconomic and macroeconomic concepts along with understanding the general area of farm management. Microeconomics topics will include the decision making process of the firm, the introduction of economic theory, specifically the development of demand and supply theories and how price determination is establish under different market structures. The concept of marginal economics, profit maximization, elasticity and the marginal rate of substitution will be covered. Finally students will be exposed to macroeconomic topics which will encompass unemployment, changes in bank rates, exchange rates, gross domestic product, consumer price index and the balance of trade. Special emphasis will be given to agricultural commodities and how economic theory applies to them.

Calendar Title: Introduction to Animal Science (152-008-MC).
Description:
Students will learn the basic principles of animal nutrition as well as the basic genetic and breeding principles. These notions can be applied to the following productions: dairy, beef, poultry, and swine. We will cover the physiological basis of heredity as well as the transmission laws of genetic characters, the genetic value of breeding males and females as well as the genetic relationship among individual and the elements of genetic progress. Students will also be introduced to the various essential nutrients, their function in the well being of the animal as well as in livestock production. Students will also compare the nutrient value of various diets through a poultry feeding project.

Calendar Title: Farm Practice 2 (152-011-MC).

Description:
This course is the first part of a process by which students analyze the tasks and operations that are related to the workplace functions of the farm manager and establish the relationships with the critical skills and knowledge required for their successful completion. Classroom activities and a one-week internship on a farm other than the home farm give the students the opportunity to examine and observe the operations that are normally undertaken by farm managers during the winter months. Students identify and report on the conditions under which the operations are executed and determine the performance criteria used for each task associated with the workplace functions. They evaluate the relative importance of each task in the work process.

Description:
At the end of this course, students will be able to produce, interpret and understand all of the budgets necessary for the operation of an agricultural business. These budgets include: whole farm budgets, partial budgets, enterprise budgets, investment budgets and cash flow budgets. Students will explore credit cost estimation, taking into consideration the determinant factors of influence. Students will establish a financing program for an agricultural enterprise. This will include producing an investment plan for the development of the agricultural business. Students will investigate the concepts of the time value of money. Collateral value will be assessed in relation to loan requirements. The principal conditions and steps of the loan negotiation process will be described. Students will also examine risk management tool available to agricultural enterprise, both internal and external. Finally, students will begin to gather the information process in preparation of their farm project.

Transcript Title: Feed Crops
Calendar Title: Feed Crops (152-034-MC).
Description:
At the end of this course, the students will be able to demonstrate an ability to produce an environmentally-friendly cropping plan on a mixed crop and animal production farm and execute the tasks that it requires. The students will develop an interest in and an understanding of crop biology, crop production techniques, crop-environment relationships, environment protection and marketing. The students will be able to integrate all aspects of cereal and forage crop production into a coherent cropping plan. This involves planning and execution of the work to be done, an evaluation of the quality of the work and of the cropping plan and the preparation of an adequate crop production database. This course will involve class and laboratory work with as much outside work as weather will permit.

Transcript Title: Enterprise Internship
Calendar Title: Enterprise Internship (152-036-MC).
Description:
Students undertake a 13-week summer internship on the agricultural enterprise selected in Farm Practice 2. During the stage students analyze the tasks and management operations that are a function of the agricultural enterprise manager. Students, by working, completing the tasks and asking questions, establish the relationships between the critical skills and knowledge required for successful execution of the various tasks and the position of each task within the overall management of the enterprise. They will identify the conditions under which the operations are executed and determine the performance criteria used for each operation. Students report on their experience in writing during the summer and during a formal presentation to the class upon their return.

**Calendar Title:** Entrepreneurship 1 (152-037-MC).  
**Description:** This course is the second summer internship of the three-year program. Students, with the skills and knowledge they have obtained in two-years of study, analyze the management practices, human resources, business operations and future potential or expansion of the home agricultural enterprise or another agricultural enterprise. The 13-week summer internship allows the student to further develop analytical and managerial skills and recognize the potential of the enterprise for entrepreneurial initiatives. Students report on their experience in writing during the summer.

Transcript Title: Stage en milieu de travail
Calendar Title: Stage en milieu de travail.
Description: Stage en milieu de travail dans une institution ou organisation approuvée.
Symbols: PRMT - Requires departmental approval
Notes:
Ouvert aux étudiants de U3 avec une moyenne de 3,3 pour l'ensemble du programme, dans un programme de Spécialisation ou de Concentration majeure du Département; les trois crédits comptent parmi les crédits libres ("electives"); permission du comité des études requise. Pour les étudiants de M.A. ou de Ph.D., permission du comité des études de 2e et 3e cycles; à noter que ces crédits ne peuvent pas compter comme crédits de programme de M.A. ou de Ph.D. Une description complète des exigences et des modalités du stage est affichée sur le site web du Département. Ces exigences sont les suivantes : présentation par l'étudiant d'un projet de stage précisant quelle sera l'institution hôte et en quoi consistera le stage; présentation par l'étudiant d'un compte rendu de son stage approuvé par un superviseur de l'institution hôte; et rédaction d'un travail universitaire sur un sujet relié au stage.

Description:
This one-term course uses a task-based approach to provide students with authentic materials related to Canadian culture and prepares them for real life communication. Therefore, class time will be mostly dedicated to the completion of communicative tasks which often rely on the use of technology (mobile apps, blogs and other online tools). This course tackles different topics that students can relate to in their personal, social and academic life, and provides a review and further training in elementary language structures to develop their communication skills and digital literacy in French.
Notes:

Description:
This two-term course uses a task-based approach to provide students with authentic materials related to Canadian culture and prepares them for real life communication. Therefore, class time will be mostly dedicated to the completion of communicative tasks which often rely on the use of technology (mobile apps, blogs and other online tools). This course tackles different topics that students can relate to in their personal, social and academic life, and provides a review and further training in elementary language structures to develop their communication skills and digital literacy in French.

Notes:
3 hours, plus language laboratory
Prerequisite(s): FRSL 101 and FRSL 102, or FRSL 103, or FRSL 104, or FRSL 105, or Placement test required.
Restriction: Not open to students who have taken Grade 12 or 13 French in Canada, or equivalent
Students must register for both FRSL 207D1 and FRSL 207D2.
No credit will be given for this course unless both FRSL 207D1 and FRSL 207D2 are successfully completed in consecutive terms.
FRSL 207D1 and FRSL 207D2 together are equivalent to FRSL 207

Transcript Title: Français interm 1: diétét&nutr
Calendar Title: Français intermédiaire 1 : diététique et nutrition.
Description:
This course is designed for future diieticians and nutritionists at an intermediate level, but not French speaking, who would like to improve their French oral and written skills while studying specialized vocabulary related to dietetics and
nutrition. This course will help prepare them for practicums or work placements (stages) in French speaking environments as well as for their professional exams. Topics of discussion, grammar points, exercises and activities focus on developing the necessary French skills for these future professionals to carry out their tasks as dieticians and nutritionists.

**Notes:**
Prerequisites: French Placement Test or Instructor's recommendation or FRSL 209, FRSL 210 or FRSL 211.
Restrictions: Not open to students who have taken FRSL 332-003 prior to fall 2018.

Transcript Title: Franç écrit en contexte 1: SSS
Calendar Title: Français écrit en contexte 1 : santé et services sociaux.
Description: Pour pouvoir exercer au Québec, les professionnels de la santé et des services sociaux doivent satisfaire aux exigencies de l'Office québécois de la langue française et à celles de leur ordre professionnel. L'écrit professionnel dans le domaine de la santé doit être précis et communiquer sans ambiguïté une formation qui sera lue à un autre moment par un autre professionnel. Adoptant une approche dynamique et interactive, ce cours de français part de modèles de textes présentant différents types de discours (informatifs, narratifs, prescriptifs, d'opinion, mixtes) livrés dans différents formats-types.
Notes: Prerequisites: French placement test or instructor's recommendation or FRSL 210, FRSL 219, FRSL 321, FRSL 325.
Restrictions: Not open to students who have taken FRSL 332-02 prior to fall 2018.

**FSCI 396**  
**Credit Weight**: 3  
**Transcript Title**: Res Proj: Sci Teach&Learning 1  
**Calendar Title**: Research Project in Science Teaching and Learning 1.  
**Description**: Introduces undergraduate Science students to pedagogical research, educational assessment, and resource design in university-level science education. Examples of research topics include assessment of course activity effectiveness, research into topic-related misconceptions, research into and application of innovative teaching and learning strategies. This course contains a significant research and/or design component that requires substantial supervised work by the student. The course workload is expected to be 9 hours of research activities per week for a 13 week period. Students will be co-supervised by the Coordinator, who will provide advice and access to pedagogical resources, and a Professor teaching in a Faculty of Science course (Supervisor), who will participate in formulating the research proposal, provide context and background information.  
**Notes**: Prerequisite: Successful completion of at least one term of undergraduate studies and a CGPA of at least 3.0, or permission of instructor.  
Restriction: Open to students in programs offered by the Faculty of Science or the Bachelor of Arts and Science, with permission of the Course Coordinator. By Faculty of Science regulation, students cannot be supervised by the same instructor for two `396-series¿ research project courses. In the case of students and supervisors wishing to do a Science Teaching and Learning research project after completing any `396-series¿ research project together, there is the option to apply for an FSCI 397 project.  
Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project or supervisor is available. Individual projects may be suggested each term that may have project specific prerequisites (e.g. having successfully completed the course in question if the proposed project involves investigation of or resource development for a particular course). Students may also approach professors or the Office of Science Education to devise their own projects. See https://mcgill.ca/ose/fsci-396 science/ours for more information.

No credit will be given for this course unless both FSCI 398D1 and FSCI 398D2 are successfully completed in consecutive terms
Prerequisite: Successful completion of U1 and a CGPA of at least 3.0, or permission of the instructor
Restrictions: Open to students in programs offered by the Faculty of Science or the Bachelor of Arts and Science, with permission of the Course Coordinator. This course cannot be taken under the S/U option.
Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project or supervisor is available. Individual projects may be suggested each term that may have project-specific prerequisites (e.g. having successfully completed the course in question if the proposed project involves investigation of or resource development for a particular course). Students may also approach professors or the Office of Science Education to devise their own projects. See http://www.mcgill.ca/science/ours for more information about available projects and application forms and procedures.

Transcript Title: New Master-Planned Cities
Calendar Title: New Master-Planned Cities.
Description:
This course examines the origins, designs, motivations and cultural politics of planned cities, focusing primarily on those currently under construction in Africa, the Middle East and Asia. A variety of themes will be explored including design responses to urban pollution and over-crowding, 'new' cities from earlier decades, totalitarianism and the city, utopianism, 'green' cities, and 'creative' cities. The course examines the various motivations underlying the design and construction of planned cities and how they are shaped by power, religion, and political ideologies. There will be a focus on evolving concepts used in city design as well as the continuities and cultural revivalism expressed through urban design and architecture. Students interested in urban and cultural geography, cities, architecture and planning in different cultural contexts will enjoy this course.
Notes:
Prerequisite(s): GEOG 217, or permission of the instructor.
Restrictions: Open to U2 and above students.

Credit Weight: 3
Transcript Title: Memory, Place, and Power
Calendar Title: Memory, Place, and Power.
Description: This interdisciplinary class explores the relationships among memory, place, and political power. The course begins with an introduction to key classical, Enlightenment, and contemporary texts on memory and place-making. It then uses this foundation to examine the symbolic transformation of public space, in particular the construction, alteration, and destruction of monuments, memorials, and museums in postcommunist states and in North America. This approach emphasizes the social quality of memory, exploring the ways in which political interests, economic resources, and social practices can shape something as ostensibly personal and individual as memory.
Notes: Prerequisite(s): One of the following: GEOG 316, GEOG 325, or GEOG 331; or one 200- or 300-level course in Comparative Politics required; or permission of instructor.
Restriction(s): Not open to students who have taken or are taking POLI 420, or who have taken POLI 432 when topic was "Memory, Place, and Power".

Transcript Title: Arctic Field Research

Calendar Title: Arctic Field Research.

Description:
This course is the independent research component of the McGill Arctic Field Study Semester. It has four distinct parts, a) problem identification and background preparation, b) research design and field data collection, c) lab and data analysis, and d) report preparation and presentation. The research design and field data collection will be part of an extended period of fieldwork based in the Canadian Arctic. The Lab and data analysis will begin in the field and finish on campus. Each student will prepare a manuscript style report and make a conference presentation based on their research.

Notes:
Corequisite(s): GEOG 373, EPSC 373 and ATOC 373.
Restriction(s): Permission of the instructor. Not open to students who have taken or are taking ATOC 473 or EPSC 473.
Note(s): 1. This course is one of a set of four field courses (ATOC 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473) designed to be taken concurrently. It complements programs in natural science disciplines by providing students with specialized field training and research experience focusing on the unique environmental conditions of cold polar systems. 2. Cost includes transportation, room and board, field expenses. Students are charged $12,000 for the four courses combined: ATOC, 373, EPSC 373, GEOG 373, and ATOC/EPSC/GEOG 473. 3. Arctic localities: Iqaluit, Resolute Bay, and Central Axel Heiberg Island in the Canadian High Arctic.

**Transcript Title**: Adv Quant Meth in Soc Fld Rsch  
**Calendar Title**: Advanced Quantitative Methods in Social Field Research.  
**Description**: How does one collect data to quantitatively assess research questions in human geography or other social sciences, and what methods are available to analyze those data? This course introduces students to advanced statistical techniques commonly confronted in field-based social science studies. The course is divided into four major topics: research design, evaluating impacts of policies or programs, time-series data, and spatial interactions. For the techniques investigated, the course will highlight major technical assumptions, field considerations for data collection, and how each does or does not account for geographic factors that may influence outcomes of interest.  
**Notes**: Prerequisite(s): GEOG 351 or SOCI 504 or SOCI 505 or ECON 337, or equivalent experience in applied multivariate regression with permission of instructor.  

**Administering Faculty**: Faculty of Science  
**Teaching Department**: Geography

Transcript Title: Agric., Envir., & Food Security
Calendar Title: Agriculture, Environment, and Food Security.
Description:
This course will consider multiple dimensions of the food security-environment challenge, including the biophysical, economic, nutritional, socio-political, and policy/institutional. It will use a global perspective, drawing upon both global-scale research as well as case studies from different regions of the world to understand the geography of agricultural production, its environmental footprint, and of malnutrition.
Notes:
Prerequisite(s): ENVR 201, and NUTR 341 or any 300 or 400-level course in agricultural science, ecology, environment, economics, geography, or nutrition, or with permission of instructor.
Restriction(s): Open to U2 and U3 undergraduate students with permission of instructor.
Restriction(s): Open to graduate students.
Restriction(s): Restricted to U2 and U3 students.

Transcript Title: Asian Cities in the 21st C
Calendar Title: Asian Cities in the 21st Century.
Description:
This course examines current themes relating to mass urbanization in Asia in a range of contexts and the forces that shape the built environment of Asian cities. Various approaches to understanding Asian cities and current theoretical debates will be investigated, including recent critiques of western-centric theorizations of urban change in the region. The course examines a variety of themes through which students will gain familiarity with some of the major strands relating to urban change in Asia: national identity, neoliberalism, social exclusions, migration, religion, ethnicity and sustainability.
Notes:
Prerequisite(s): GEOG 325, or 9 credits of Geography courses in Urban Geography, or permission of the instructor.
Open to graduate students and final year undergraduates.

GSFS 303
Credit Weight: 3
Transcript Title: Gender and Disability
Calendar Title: Gender and Disability.
Description:
Focus on critical theories of impairment and visions of social justice from gender and disability studies perspectives.
Notes:
Prerequisite(s): GSFS 200 OR GSFS 250
Restriction(s): Not open to students who have taken WMST 302 when topic was “Gender and Disability.”

GSFS 304
Credit Weight: 3
Transcript Title: Postcolonial Feminist Theories
Calendar Title: Postcolonial Feminist Theories.
Description:
Critically examines bodies of postcolonial feminist theories from a variety of cross-disciplinary and transnational perspectives.
Notes:
Prerequisite(s): GSFS 200 OR GSFS 250
Restriction(s): Not open to students who have taken WMST 401 when topic was “Women and the State in India: Colonial and Postcolonial Perspectives.”

GSFS 305
Credit Weight: 3
Transcript Title: Crit’l Race&Soc Just Theories
Calendar Title: Critical Race and Social Justice Theories.
Description:
An examination of critical race feminisms and social justice theories in historical and contemporary perspectives, exploring how critical race,
transnational, and indigenous feminist theorizing inform social justice, liberation struggles, and other activism.

Notes:
Prerequisite(s): GSFS 200 OR GSFS 250
Restriction(s): Not open to students who have taken WMST 402 when topic was ¿Anti-Racism and Activism in Canada¿, or WMST 301 when topic was ¿Women of Colour in Canada¿.

Transcript Title: Lab Course in Genomics  
Calendar Title: Lab Course in Genomics.  
Description: Introduction to Next Generation Sequencing (NGS) Based Genomics in the form of seminars and laboratory work. Lectures in state of the art sequencing technologies and their applications. Laboratory work in the preparation of high quality libraries for analyzing DNA and large/small RNAs. Hands on experience in setting up next Generation Sequencing using specialized equipment. Tutorials in use of Bio-informatics Analysis tools in experimental design, quality control, and in
depth analysis of data. Practicum in using computational tools for personalized data analyses. Technology paper presentation, as well as production of a report on course data generation and analysis.

Notes:

Transcript Title: Stats Conc in Genet&Genom Anal
Calendar Title: Statistical Concepts in Genetic and Genomic Analysis.
Description:
This course will introduce key statistical concepts that motivate and underlie the many statistical analysis methods currently used in analysis of genetic and genomic data. Emphasis will be placed on understanding how these concepts can influence study designs and analysis choices, and when substantial unanticipated biases can occur. Concepts include an understanding of variability and error, bias and its sources, independence, how distributions of variables impact analysis, outliers, covariates, missing data, the goals of data cleaning, multiple testing, and some consideration of clustering and prediction models.

Notes:
Prerequisite(s): A course introducing basic statistics or equivalent knowledge. Registration is by permission of the course coordinator.

Administering Faculty: Graduate Studies
Teaching Department: Human Genetics
Status (catalog level): Active

Calendar Title: Contemporary Brazilian Literature and Film.
Description:
This course introduces students to Brazilian literature and film from the early 20th century to the present day. Students will examine literary works and films from a historical perspective, studying the social, political and regional processes in which they are embedded. From the barren Northeast, to an analysis of gender and race, to urban violence and its manifestations to the contemporary cityscape, this course covers a range of visual and textual material. Students will engage works from major Brazilian authors and filmmakers in conjunction with theoretical texts to better understand some of the main developments in contemporary cultural production.

### HIST 468
**Credit Weight:** 3

**Transcript Title:** Europe Since 1989

**Calendar Title:** Europe Since 1989.

**Description:**
Though the European continent has changed beyond recognition since 1989, historians are only just beginning to turn their attention to this most contemporary of European epochs. This course therefore provides students an opportunity to conduct ground-breaking research, informed by readings and seminar discussions on such topics as Thatcherism, the round tables and revolutions of 1989, war and genocide in Yugoslavia, European integration, the fall and rise of Russia, technological change, and related transformations of society and culture. The course provides training in methods appropriate for research on contemporary history, and though it does not neglect great powers, it is well suited to students interested in Europe’s small countries.

**Notes:**
Prerequisite(s): A 300-level course in European history or permission of instructor.

Restriction(s): Not open to students who have taken HIST 436 in Winter 2012 or Winter 2014.

**Administering Faculty:** Faculty of Arts
Teaching Department: History and Classical Studies

Transcript Title: Indigenous Field Studies
Calendar Title: Indigenous Field Studies.
Description: Intensive field course that focuses on First Nations, Métis and Inuit cultures and worldviews, with particular emphasis on linkages to practice areas and integration across disciplinary silos. Attention is given to the effects of Canadian legal, health and social welfare policies on contemporary First Nations, Métis and Inuit societies.
Notes: Restrictions: The course is only open to students in Social Work, Anthropology, Law and Medicine or by permission of the instructor. Not open to students who have taken IDFC 380.
This intensive course includes 1 week where students live in the field. The field portion of the course may involve rugged field conditions and varying weather for which students must be prepared and equipped.
A fee of $421.56 is charged to all students registered in IDFC 500 delivered in Montreal. The fee covers food, activities, land use, and other site expenses.
**This course will be held on May 1, 2, 4, 5, 8, 9, 10, 12, 15, 16, 17, 18, 19, 23, 24, 25 & 29.

Transcript Title: Adv. Issues on Dev. Food&Agric

Calendar Title: Advanced Issues on Development, Food and Agriculture.

Description:
A comprehensive view and understanding of world issues (agronomic, environmental and socio-economic) affecting development, poverty, hunger and food security. Topics cover rural development; soil and water management; climate change; demographic issues; gender equality; fair-trade food; plant and animal resources conservation; bio-products and biofuels; and economic and environmental issues – especially in tropical and sub-tropical regions. Globalization, sustainable development in agriculture, technology transfer and human-resources needs for rural development. Students attend guest lectures, interact with domain experts, and participate in round-table discussions. Students prepare a development project in the form of a funding application, following the norms of an established agency.

Notes:
Restriction: Not open to students who have taken or are taking AGRI 411

Credit Weight: 7
Transcript Title: TCP Internal Medicine
Calendar Title: TCP Internal Medicine.
Description:
In this seven-week course, students build on communication and physical examination skills introduced in previous courses, develop diagnostic reasoning skills (including problem formulation and differential diagnosis) and expand their knowledge of clinical problems common to Internal Medicine. Students participate in bedside and seminar small group sessions with tutors, casebased discussions, and group teaching sessions. Students also perform history and physical examinations on patients, submit case reports with discussions of relevant pathophysiology and present patient cases orally to their tutors. Students use their own patient cases and those of their peers to generate and act on personal learning opportunities.
Notes:
Restriction(s): Open only to students in the M.D., C.M. program.

### INDS 225
**Credit Weight:** 0
**Transcript Title:** FMD Integrated Assessment 2
**Calendar Title:** FMD Integrated Assessment 2
**Description:** Lifelong learning skills; promotion through self-reflection and understanding of the clinical correlation of the factual biological and social sciences.

**Notes:**
Only open to students in the M.D., C.M. program.

**Administering Faculty:** Faculty of Medicine & Hlth Sci
**Teaching Department:** Medicine and Health Sciences
**Status (catalog level):** Active

### INDS 300
**Credit Weight:** 1.5
**Transcript Title:** Mindful Medical Practice - TCP
**Calendar Title:** Mindful Medical Practice - Transition to Clinical Practice
**Description:** Knowledge, attitudes, and skills of professionalism, whole person care, and Physicianship as expressed in the particular behaviours of a mindful practitioner. An emphasis will be placed on the emergent developmental process of seeing "self as a physician".

**Notes:**
Restriction(s): Only open to students enrolled in the M.D., C.M. program.

**Administering Faculty:** Faculty of Medicine & Hlth Sci
**Teaching Department:** Medicine and Health Sciences
**Status (catalog level):** Active

### INDS 302
**Credit Weight:** 1.5
**Transcript Title:** Medical Ethics and Health Law
**Calendar Title:** Medical Ethics and Health Law.
**Description:** The objectives of this course are to familiarize students with the basic ethical and legal issues and problems arising in clinical medicine and to develop the skills needed to identify and resolve ethical dilemmas. Emphasis is placed on the following subjects: informed consent, risk disclosure, patient competence, confidentiality, research ethics, discontinuing life support, physician impairment, and ethics in the team context.

**Notes:**
Restriction(s): Open only to students enrolled in the M.D., C.M. program.

**Administering Faculty:** Faculty of Medicine & Hlth Sci
**Teaching Department:** Medicine and Health Sciences
**Status (catalog level):** Active

### INDS 305
**Credit Weight:** 1
**Transcript Title:** Transition to Clerkship
**Calendar Title:** Transition to Clerkship
**Description:** This one-week course is designed to prepare students for the start of Clerkship by helping them navigate the challenges associated with this transition. Students will engage in plenary sessions, selective small group session, and online modules in which they will reflect on their professional identity formation, practice essential clinical skills, and develop an awareness of the vital role of the
clinical clerk within the healthcare team. By the end of the course students should feel more confident in taking on the role of a clinical clerk.

**Notes:**
Restriction: Open only to students enrolled in the M.D., C.M. program.

Transcript Title: TCP Integrated Assessment
Calendar Title: TCP Integrated Assessment.
Description:
This course includes integrated assessments, designed to assess the student's integration of content learned in the context of different clinical disciplines and in the longitudinal curricular themes. Assessments include End-of-Block written examinations, an Integrative TCP OSCE and a Progress Test. These assessments are clinically grounded, and together assess the student's ability to integrate the knowledge, communication skills, physical examination skills, professionalism, and collaboration learned and consolidated throughout the various TCP courses.

Transcript Title: Emergency Medicine Clerkship
Calendar Title: Emergency Medicine Clerkship.
Description:
During this Senior Clerkship course, students are expected to apply and build on skills that they have learned during Core Clerkship courses. In the Emergency Medicine Clerkship, students have the opportunity to evaluate a large variety of undifferentiated patients presenting with a wide spectrum of complaints. They function as fully integrated members of the healthcare team, responsible for direct patient care with direct supervision by attending physicians and/or senior emergency medicine residents. Students are also encouraged to take part in all academic activities of the department, such as morbidity and mortality rounds and journal clubs.

Transcript Title: Clerk. Integrated Assessment 1
Calendar Title: Clerkship Integrated Assessment 1.

Description:
This course includes integrated assessments that will occur longitudinally throughout the rotations in core clerkship and at the end of each of the 3 core clerkship blocks. During each rotation student;’s performance in the clinical setting will be assessed using a work-based assessment tool that will focus on all of the competencies in a stage-appropriate way. At the end of each block, students will sit a written test, i.e. the progress test. A progress test is a test that is representative of all the knowledge domain of a curriculum and is sat by classes at different stages of the curriculum. Each test will have the same blueprint which will represent a broad sample of the knowledge base of the curriculum as a whole. The tests will aim to assess knowledge application rather than solely recall.

Transcript Title: Clerk. Integrated Assessment 1
Calendar Title: Clerkship Integrated Assessment 1.
Description:
This course includes integrated assessments that will occur longitudinally throughout the rotations in core clerkship and at the end of each of the 3 core clerkship blocks. During each rotation student's performance in the clinical setting will be assessed using a work-based assessment tool that will focus on all of the competencies in a stage-appropriate way. At the end of each block, students will sit a written test, i.e. the progress test. A progress test is a test that is representative of all the knowledge domain of a curriculum and is sat by classes at different stages of the curriculum. Each test will have the same blueprint which will represent a broad sample of the knowledge base of the curriculum as a whole. The tests will aim to assess knowledge application rather than solely recall.

Notes:
Open only to students enrolled in the M.D., C.M. program.
Students must register for both INDS 423N1 and INDS 423N2.
No credit will be given for this course unless both INDS 423N1 and INDS 423N2 are successfully completed in a twelve month period.
INDS 423N1 and INDS 423N2 together are equivalent to INDS 423.
INDS 423N1 and INDS 423N2 together are equivalent to INDS 423J1+INDS 423J2+ INDS 423J3 together.

Transcript Title: Clerk. Integrated Assessment 2
Calendar Title: Clerkship Integrated Assessment 2.
Description:
This course includes integrated assessments that will occur during the senior clerkship. The students will sit two progress tests of which one will be formative and one summative. A progress test is a test that is representative of all the knowledge domain of a curriculum and is sat by classes at different stages of the curriculum. Each test will have the same blueprint which will represent a broad sample of the knowledge base of the curriculum as a whole. The tests will aim to assess knowledge application rather than solely recall. The Objective Structured Clinical Examination (OSCE) will consist of simulated situations to assess competencies (integration of knowledge, skills and attitudes). They will also complete an integrated OSCE.
Notes:
Restriction(s): Open only to students enrolled in the M.D., C.M. program.

Transcript Title: PIAT:BasicSci,Medicine&Society
Calendar Title: Putting It All Together: Basic Science, Medicine and Society.
Description:
The course will start with a week of core Basic Science Consolidation teaching followed by 3 weeks of Science and Social Studies of Medicine Selective Seminars. This course is a made-at-McGill solution to a societal problem of training all physicians, including those who do not intend to have university-based careers, to have a clear grasp of evidence based medicine, modern biomedical sciences and transitional medicine before the start of residency. As students will have completed their clinical clerkship courses prior to attending this course, this is an excellent opportunity to remind them of basic science principles and concepts and relate these to the clinical setting. In this course, students will also be focus on more complex clinical judgment which is centered on the particular encounter of doctor and patient, medical judgment broadens the context to include other kinds of ¿particulars¿ and other individuals ¿ families, cultures, political actors, the law, institutions and their leaders, researchers, and even journalists.

**Transcript Title:** PHPM Clerkship  
**Calendar Title:** Public Health and Preventive Medicine Clerkship  
**Description:**  
The Public Health and Preventive Medicine (PHPM) Clerkship Course in 4th year of clerkship is an innovative opportunity for students to learn from physician role models who are dedicated to improving the health of vulnerable and marginalized patients and populations. During the 1-week PHPM Clerkship Course, students will reflect on how the principles of public health and preventive medicine were manifest in their preceding clinical elective. Reflection will be supplemented by formal teaching sessions, self-directed readings and collaborating with peers.  
**Notes:**  
Open only to students enrolled in the M.D., C.M. program.

Transcript Title: Data Mining and Visualization
Calendar Title: Data Mining and Visualization.
Description:
The course will teach practical analytics methods and use R (a tool widely used by data analysts) to provide hands on experience on the data mining techniques covered in the class. The focus of the course is on the application of the tools and techniques rather than learning the theory and math behind the models. This course builds upon concepts of data manipulation and coding seen in INSY 660 and covers these tools and techniques in much more depth. Students will be exposed to real world datasets and examples to get hands-experience with making business decisions using dating mining and predictive analytics, and provide R code to apply the predictive models learned in class. At end of this course students will be comfortable using different data mining techniques to solve business problems on their own using R.

Transcript Title: Women in Islam
Calendar Title: Women in Islam.
Description:
The socio-legal status, conditions, and experiences of various groups of women in Middle Eastern societies. These features are explored within the framework of Islamic feminism and Western feminist discourses, and the tensions and conflicts between them. The dynamics of seclusion, veiling, and polygamy are explored in connection to Medieval Arab ruling elites as a background to some of the discussions and debates over the status of women in modern postcolonial Arab society. Socio-economic divisions, state policies, patriarchy, and colonialism are investigated as key factors in understanding the modern historical transformation of gendered relations and women's roles.

Transcript Title: Art in the Age of Empires
Calendar Title: Art in the Age of Empires.
Description:
This course offers a wide-ranging survey of visual culture under the three Muslim superpowers of the early modern period: the Mediterranean-based Ottomans, the Safavids of Iran, and the Mughals of India. The course will examine the nature of these states and their distinctive and vibrant artistic idiom on a comparative basis. Topics include the formation of imperial ideology and its visual articulation; palaces and court culture; artistic organization, authorship, and agency; patronage, gender, piety, as well as cross-cultural interaction.

Transcript Title: The Medieval School in Islam
Calendar Title: The Medieval School in Islam.
Description:
Schooling in medieval Islamic society particularly in Iraq, Greater Syria, Persia, and Egypt. Sheds light on the structure of learning, aims of education, the life of students including women, and their relationship to their teachers. Illuminates forms of academic evaluation, and looks closely at the "scholarly license" as an accrediting tool delineating its function and scope. Through a set of representative studies on the medieval school, it brings attention to the heated debates surrounding the academic rigor of this form of learning, and the place of scientific learning in it, as well as the historical connection between it and the early European college.

Notes:
Prerequisite(s): Either ISLA 200 or ISLA 350 or permission of instructor.

Transcript Title: FYS: Italy's Lit in Context
Calendar Title: FYS: Italy's Literature in Context.
Description:
The purpose of this seminar is to re-visit, problematically, the commonsense notion that literature "reflects" reality (or society). Classics of twentieth-century Italian writing shall be analyzed as the response of that nation's literary imagination to the contradictions of its turbulent political and social history.
Notes:
Winter
Given in English
Restriction: Open only to newly admitted students in U0 or U1, who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.

Transcript Title: Intro to Yiddish Literature
Calendar Title: Introduction to Yiddish Literature.
Description:
A survey of Yiddish literature with a particular focus on the modern period (the 1860s to the present). As we read major works of Yiddish literature, we will discuss the main factors in its development, including its position as a minority literature, Ashkenazi civilization's religious foundations and multilingualism, the rise of political movements, and the trauma of the Holocaust. In his Nobel lecture, Yiddish writer Isaac Bashevis Singer described Yiddish as "the idiom of the frightened and hopeful humanity." We will explore both the reasons behind and the effects of such universalization of Yiddish language, literature, and culture.

Notes:
Readings are in English

Transcript Title: Jewish Life - Islamic World
Calendar Title: Jewish Life in the Islamic World.
Description: Until the early modern period, most of the world’s Jews spoke Arabic and called the Islamic world home. This course explores the Jewish experience among Muslims from the seventh century until the present. Through close readings of primary sources and historical scholarship, students will learn how Jews under Islam shaped modern Judaism, how engagement with Arabic in Islamic Spain led to the revival of Hebrew, and how the Jewish-Muslim relationship fared in the twentieth century. The course also probes themes of history and memory in light of the departure of Jews from the Islamic world in the 1950s and 1960s.

Description:
This course examines the modern history of Jewish-Muslim relations beyond just conflict. We will look at the experience of Jews and Muslims -- as individuals and communities -- who charted new cultural territory while navigating colonialism, nationalism, war, and decolonization, through close readings of a wide variety of primary sources (including letters, memoirs, fiction, music, film, and photography) and historical scholarship.

Credit Weight: 3
Transcript Title: Meaning in Language
Calendar Title: Meaning in Language.
Description:
A hands-on introduction to the strategies that natural languages use to convey meaning. Requiring no previous background in linguistics, the course surveys fundamental properties of word and sentence meaning and their interdependence with context. It provides an overview of the grammatical mechanisms that languages employ to construct the literal meanings of sentences from word meanings, explores how meanings are anchored to real life situations, and analyzes how meanings are routinely enriched in context by language users to convey more than what is literally expressed.

Status (catalog level): Active
LING 345
Credit Weight: 3
Transcript Title: From Natural Lang to Data Sci
Calendar Title: From Natural Language to Data Science.
Description:
Introduction to language data science, including theoretical approaches and practical skills. Processing, searching, and querying text data; making sense of large corpora; modelling and interpreting psycholinguistic and historical language data; building models of sequences of words; computing similarity between languages; information retrieval and extraction; question answering; and ethics.
Notes:
Prerequisites: COMP 250, and MATH 240; or permission of the instructor.
Restriction: Not open to students who have taken or are taking COMP 345.
Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 350
Credit Weight: 3
Transcript Title: Ling Aspects of Bilingualism
Calendar Title: Linguistic Aspects of Bilingualism.
Description:
Linguistic competence and performance in bilinguals: the organization of the bilingual's grammar. Syntactic constraints on code mixing: How many grammars are involved? Unidirectional and bidirectional grammatical interference. Structural distance between genetically related and unrelated languages and its effect on the organization of the bilingual's grammar.
Notes:
Winter
Prerequisite: LING 200 or LING 201
Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 351
Credit Weight: 3
Transcript Title: Psycholinguistics
Calendar Title: Psycholinguistics.
Description:
Introduction to experimental methods in linguistics, focusing on how linguistic hypotheses can be tested experimentally, and how evidence from speech and language processing can inform linguistic theory.
Notes:
Prerequisites: LING 201
Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 355
Credit Weight: 3
Transcript Title: Language Acquisition 1
Calendar Title: Language Acquisition 1.
Description:
A critical study of the application of linguistic theory and description to first and second language learning. Topics include: the acquisition of sounds, syntax
and word meanings; acquisition strategies; properties of the input; theories of first and second language acquisition.

Notes:

Fall

Prerequisite: LING 201.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 360
Credit Weight: 3
Transcript Title: Introduction to Semantics
Calendar Title: Introduction to Semantics.
Description:
Introduction to the rudiments of semantics, focusing on those aspects of meaning that are invariant across contexts and the ways in which the meaning of a complex expression is determined by the meanings of its constituents.

Notes:

Fall

Prerequisites: LING 201 and PHIL 210
Restriction: Not open to students who have taken LING 370.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 371
Credit Weight: 3
Transcript Title: Syntax 1
Calendar Title: Syntax 1.
Description:
Introduction to the study of generative syntax of natural languages, emphasizing basic concepts and formalism: phrase structure rules, transformations, and conditions on rules.

Notes:

Winter

Prerequisite: LING 201.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 410
Credit Weight: 3
Transcript Title: Structure of a Specific Lang 1
Calendar Title: Structure of a Specific Language 1.
Description:
Application and refinement of analytical methods in phonology, morphology, and syntax to phenomena from a specific language. One focus will be the identification of empirical generalizations which form the basis for the development of the theory. The language of study will vary from year to year.

Notes:

Fall

Prerequisites: LING 330 and LING 331 and LING 371, or permission of instructor.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 411
Credit Weight: 3
Transcript Title: Structure of an Indigenous Language
Calendar Title: Structure of an Indigenous Language.
Description: Investigates linguistic and grammatical properties in an Indigenous language or language family of North America. Topics covered include: phonetics, phonology, morphology, syntax, and semantics; historical and comparative research; as well as topics at the intersection of language and culture. The course engages with primary literature on the language of study.
Notes: Prerequisites: LING 331 and LING 371 or permission of instructor. The language or language family of study will vary from year to year.
Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

Credit Weight: 3
Transcript Title: Ling Theory & its Foundations
Calendar Title: Linguistic Theory and its Foundations.
Description:
Change linguistics underwent at the end of the 1950's both in how it conceived of itself and in the methods it used, including the philosophical change and the formal and mathematical innovations in syntax and morphology.
Notes:
Winter
Prerequisites: Two of LING 331, LING 360, LING 371, LING 440.

LING 425
Credit Weight: 3
Transcript Title: Historical Linguistics
Calendar Title: Historical Linguistics.
Description:
An examination of how languages change over time and the methods that allow us to study linguistic history. Topics include: types of language change (sound change, analogy, etc.) linguistic reconstruction, the origins of modern languages.
Notes:
Fall
Prerequisites: LING 330 and LING 320 or permission of instructor.

LING 440
Credit Weight: 3
Transcript Title: Morphology
Calendar Title: Morphology.
Description:
An introduction to the study of the internal structure of words. Topics will include the different ways words are formed in languages, how sound changes take place within words, how words are used in sentences.
Notes:
Fall
Prerequisite: LING 330 and LING 371, or permission of the instructor

LING 445
Credit Weight: 3
Transcript Title: Computational Linguistics
Calendar Title: Computational Linguistics.
Description:
Introduction to foundational ideas in computational linguistics and natural language processing. Topics include formal language theory, probability theory,
estimation and inference, and recursively defined models of language structure. Emphasis on both the mathematical foundations of the field as well as how to use these tools to understand human language.

Notes:
Prerequisite(s): COMP 250 and MATH 240 or permission of instructor.
Restriction(s): Not open to students who have taken or are taking COMP 445.
Students who are taking or have taken both COMP 330 and COMP 424 are advised to take COMP 550 in place of COMP 445/LING 445.
This is a double-prefix course and is identical in content with COMP 445. Some background in linguistics at the level of LING 201 is desirable, though not critical.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 450
Credit Weight: 3
Transcript Title: Laboratory Linguistics
Calendar Title: Laboratory Linguistics.
Description:
Students with a background in some core area(s) of linguistics will learn how to test linguistic theories in the lab. The focus is on learning by doing: Students will design and carry out their own experiments, and will learn some basic statistics to evaluate them.

Notes:
Winter
Prerequisites: LING 201 and either LING 330 or LING 331, or permission of instructor.

Administering Faculty: Faculty of Arts
Teaching Department: Linguistics
Status (catalog level): Active

LING 451
Credit Weight: 3
Transcript Title: Acquisition of Phonology
Calendar Title: Acquisition of Phonology.
Description:
Exploration of the development of prosodic and segmental structure in children, with an emphasis on current theoretically-informed work in this area.
Symbols: ALTY - Taught in alternate years

Notes:
Winter
Prerequisite: LING 331; a course in language acquisition highly recommended.

Administering Faculty: Faculty of Arts

Transcript Title: FYS: Literary Animals
Calendar Title: FYS: Literary Animals.
Description:
Study of the representation of animals in different European literary texts from both a thematic and a theoretical perspective. Questions about narrative voice, alternate worlds, and the human/animal binary will be raised within the larger political context of animals as Other in today's contemporary society.
Notes:
Restriction: Open only to newly admitted students in U0 or U1 who may take only one FYS. Students who register for more than one will be obliged to withdraw from all but one of them.
