Calendar Title: Literary Text Mining.  
Description:  
Digital texts are composed of discrete units of information that have the virtue of being infinitely malleable and reconfigurable, allowing new practices for searching, filtering, comparing, annotating, measuring, representing and understanding texts. From single works to virtual libraries, from canonical classics to contemporary social media, digital texts can provide rich fodder for interpretive practices in the digital humanities. This course will provide students with theoretical and practical foundations for working with a variety of digital texts.

MATH 249
Credit Weight: 3
Transcript Title: Honours Complex Variables
Calendar Title: Honours Complex Variables.
Description:
Functions of a complex variable; Cauchy-Riemann equations; Cauchy's theorem and consequences. Taylor and Laurent expansions. Residue calculus; evaluation of real integrals; integral representation of special functions; the complex inversion integral. Conformal mapping; Schwarz-Christoffel transformation; Poisson's integral formulas; applications.
Notes:
Winter
Prerequisite(s): MATH 248 or MATH 358 or equivalent.
Restriction: Intended for Honours Physics and Engineering students.
Restriction: Not open to students who have taken or are taking MATH 316

Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics

Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 323
Credit Weight: 3
Transcript Title: Probability
Calendar Title: Probability.
Description:
Sample space, events, conditional probability, independence of events, Bayes' Theorem. Basic combinatorial probability, random variables, discrete and continuous univariate and multivariate distributions. Independence of random variables. Inequalities, weak law of large numbers, central limit theorem.
Notes:
Prerequisites: MATH 141 or equivalent.
Restriction: Intended for students in Science, Engineering and related disciplines, who have had differential and integral calculus
Restriction: Not open to students who have taken or are taking MATH 356
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 324
Credit Weight: 3
Transcript Title: Statistics
Calendar Title: Statistics.
Description:
Sampling distributions, point and interval estimation, hypothesis testing, analysis of variance, contingency tables, nonparametric inference, regression, Bayesian inference.
Notes:
Fall and Winter
Prerequisite: MATH 323 or equivalent
Restriction: Not open to students who have taken or are taking MATH 357
You may not be able to receive credit for this course and other statistic courses. Be sure to check the Course Overlap section under Faculty Degree Requirements in the Arts or Science section of the Calendar.

MATH 325
Credit Weight: 3
Transcript Title: Honours ODE's
Calendar Title: Honours Ordinary Differential Equations.
Description:
First and second order equations, linear equations, series solutions, Frobenius method, introduction to numerical methods and to linear systems, Laplace transforms, applications.
Notes:
Fall and Winter
(3-0-6)
Prerequisite: MATH 222.
Restriction: Intended for Honours Mathematics, Physics and Engineering programs.
Restriction: Not open to students who have taken MATH 263 (formerly MATH 261), MATH 315
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
MATH 326
Credit Weight: 3
Transcript Title: Nonlinear Dynamics and Chaos
Calendar Title: Nonlinear Dynamics and Chaos.
Description:
Linear systems of differential equations, linear stability theory. Nonlinear systems: existence and uniqueness, numerical methods, one and two dimensional flows, phase space, limit cycles, Poincare-Bendixson theorem, bifurcations, Hopf bifurcation, the Lorenz equations and chaos.
Notes:
Fall
Prerequisites: MATH 222, MATH 223
Restriction: Not open to students who have taken or are taking MATH 376
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 327
Credit Weight: 3
Transcript Title: Matrix Numerical Analysis
Calendar Title: Matrix Numerical Analysis.
Description:
An overview of numerical methods for linear algebra applications and their analysis. Problem classes include linear systems, least squares problems and eigenvalue problems.
Symbols: ALTY - Taught in alternate years
Notes:
Winter
Prerequisites: MATH 223 or MATH 236 or MATH 247 or MATH 251, COMP 202 or consent of instructor.

Status (catalog level): Active

MATH 335
Credit Weight: 3
Transcript Title: Computational Algebra
Calendar Title: Computational Algebra.
Description:
Computational aspects of modern algebra. Computing in groups: algorithms,
algorithmic problems in groups, finitely generated abelian groups, free groups and automata, finitely presented groups. Computing in rings: elementary notions of ring theory, ideals of polynomial rings in several variables, Groebner bases, elements of field theory.

Symbols: ALTY - Taught in alternate years

Notes:
Prerequisites: MATH 235 and MATH 236.
Note: This course is intended primarily for students in the Major Program in Mathematics and the Joint Major Program in Mathematics and Computer Science.

Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 338
Credit Weight: 3
Transcript Title: History & Philosophy of Math
Calendar Title: History and Philosophy of Mathematics.
Description:
Egyptian, Babylonian, Greek, Indian and Arab contributions to mathematics are studied together with some modern developments they give rise to, for example, the problem of trisecting the angle. European mathematics from the Renaissance to the 18th century is discussed, culminating in the discovery of the infinitesimal and integral calculus by Newton and Leibnitz. Demonstration of how mathematics was done in past centuries, and involves the practice of mathematics, including detailed calculations, arguments based on geometric reasoning, and proofs.

Notes:
Fall
Prerequisites: MATH 133, MATH 141.

Administering Faculty: Faculty of Science

Calendar Title: Honours Research Project.
Description: See MATH 470D1 for course description.
Notes: Prerequisite: MATH 470D1
No credit will be given for this course unless both MATH 470D1 and MATH 470D2 are successfully completed in consecutive terms. MATH 470D1 and MATH 470D2 together are equivalent to MATH 470.

Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 475
Credit Weight: 3
Transcript Title: Honours PDE's
Calendar Title: Honours Partial Differential Equations.
Description: First order partial differential equations, geometric theory, classification of second order linear equations, Sturm-Liouville problems, orthogonal functions and Fourier series, eigenfunction expansions, separation of variables for heat, wave and Laplace equations, Green's function methods, uniqueness theorems.
Notes: Prerequisites: MATH 247 or MATH 251 or equivalent, and MATH 248 or MATH 358 or equivalent, MATH 325. Restriction: Not open to students who have taken or are taking MATH 319.

Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 478
Credit Weight: 3
Transcript Title: Comput. Meth. in Applied Math
Calendar Title: Computational Methods in Applied Mathematics.
Notes: Prerequisites: MATH 315 or MATH 325 or MATH 263; MATH 317 or MATH 387 or COMP 350 or MECH 309; or permission of the instructor.
This course will be taught in the winter semester.

**Status (catalog level):** Active

**MATH 488**  
**Credit Weight:** 3  
**Transcript Title:** Honours Set Theory  
**Calendar Title:** Honours Set Theory.  
**Description:**  
Axioms of set theory, ordinal and cardinal arithmetic, consequences of the axiom of choice, models of set theory, constructible sets and the continuum hypothesis, introduction to independence proofs.  
**Symbols:** ALTY – Taught in alternate years  
**Notes:**  
Fall  
Prerequisites: MATH 251 or MATH 255 or permission of instructor  
Restrictions : Not open to students who have taken or are taking MATH 590.

**Administering Faculty:** Faculty of Science  
**Teaching Department:** Mathematics and Statistics  
**Status (catalog level):** Active

**MATH 517**  
**Credit Weight:** 4  
**Transcript Title:** Honours Linear Optimization  
**Calendar Title:** Honours Linear Optimization.  
**Description:**  
Honours level introduction to linear optimization and its applications: duality theory, fundamental theorem, sensitivity analysis, convexity, simplex algorithm, interiorpoint methods, quadratic optimization, applications in game theory.  
**Notes:**  
Prerequisites: COMP 202, and MATH 223 or MATH 236 and MATH 314 or equivalent.  
Restrictions: Not open to students who have taken or are taking MATH 417 or MATH 487.

**Administering Faculty:** Faculty of Science  
**Teaching Department:** Mathematics and Statistics  
**Status (catalog level):** Active

**MATH 518**
Credit Weight: 4
Transcript Title: Intro to Algebraic Geometry
Calendar Title: Introduction to Algebraic Geometry.
Description:
Notes:
Prerequisites: MATH 456 or permission of the instructor.
1. Some familiarity with rings, ideals, and multivariable calculus is expected.

Status (catalog level): Active

MATH 527D1
Credit Weight: 3
Transcript Title: Stat. Data Science Practicum
Calendar Title: Statistical Data Science Practicum.
Description:
The holistic skills required for doing statistical data science in practice. Data science life cycle from a statistics-centric perspective and from the perspective of a statistician working in the larger data science environment. Group-based projects with industry, government, or university partners. Statistical collaboration and consulting conducted in coordination with the Data Science Solutions Hub (DaS^2H) of the Computational and Data Systems Initiative (CDSI).

Notes:
Prerequisites: MATH 324; MATH 223 ; MATH 208
Corequisites: MATH 423
No credit will be given for this course unless both MATH 527D1 and MATH527D2 are successfully completed in consecutive terms.

MATH 533
Credit Weight: 4
Transcript Title: Regression and ANOVA
Calendar Title: Regression and Analysis of Variance.
Description:
Multivariate normal and chi-squared distributions; quadratic forms. Multiple linear regression estimators and their properties. General linear hypothesis tests. Prediction and confidence intervals. Asymptotic properties of least squares estimators. Weighted least squares. Variable selection and regularization. Selected advanced topics in regression. Applications to experimental and
observational data.

Notes:
Prerequisitses: MATH 357, MATH 247 or MATH 251.

Administering Faculty: Faculty of Science

Teaching Department: Mathematics and Statistics

Status (catalog level): Active

MATH 537
Credit Weight: 4

Transcript Title: Honours Math Models in Biology

Calendar Title: Honours Mathematical Models in Biology.

Description:
The formulation and treatment of realistic mathematical models describing biological phenomena through such qualitative and quantitative mathematical techniques as local and global stability theory, bifurcation analysis, phase plane analysis, and numerical simulation. Concrete and detailed examples will be drawn from molecular, cellular and population biology and mammalian physiology.

Notes:
Prerequisite(s): MATH 325, MATH 376, and COMP 202 or COMP 204 or COMP 208 or equivalent.

Restriction(s): Not open to students who have taken MATH 437.

This course is offered in the winter semester.

Administering Faculty: Faculty of Science

Teaching Department: Mathematics and Statistics

Status (catalog level): Active

MATH 540
Credit Weight: 4

Transcript Title: Life Actuarial Mathematics

Calendar Title: Life Actuarial Mathematics.

Description:
Life tables and distributions; force of mortality; premium, net premium, and reserve valuation for life insurance and annuity contracts (discrete and continuous case); cash flow analysis for portfolios of life insurance and annuities; asset liability management; numerical techniques for multiple decrement and state models; portfolio valuation of aggregate risks.

Notes:
Prerequisites: MATH 323 or equivalent and MATH 329

Administering Faculty: Faculty of Science

Teaching Department: Mathematics and Statistics

Status (catalog level): Inactive

MATH 541
Credit Weight: 4

Transcript Title: Nonlife Actuarial Models

Calendar Title: Nonlife Actuarial Models.

Description:
Stochastic models and inference for loss severity and claim frequency distributions; computational techniques for the aggregation of independent risks (Panjer's algorithm, FFT, etc.); risk measures and quantitative risk management applications; models and inference for multivariate data, heavy-tail distributions, and extremes; dynamic risk models based on stochastic processes and ruin theory.

Notes:
Prerequisites: MATH 323 and MATH 324 or equivalent

Administering Faculty: Faculty of Science

Teaching Department: Mathematics and Statistics
Status (catalog level): Inactive

MATH 545
Credit Weight: 4
Transcript Title: Intro to Time Series Analysis
Calendar Title: Introduction to Time Series Analysis.
Description: Stationary processes; estimation and forecasting of ARMA models; non-stationary and seasonal models; state-space models; financial time series models; multivariate time series models; introduction to spectral analysis; long memory models.
Notes: Prerequisite: MATH 324 or MATH 357 or equivalent
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 547
Credit Weight: 4
Transcript Title: Stochastic Processes
Calendar Title: Stochastic Processes.
Notes: Prerequisites: MATH 356 and either MATH 247 or MATH 251. Restriction: Not open to students who have taken or are taking MATH 447.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 550
Credit Weight: 4
Transcript Title: Combinatorics
Calendar Title: Combinatorics.
Symbols: ALTY - Taught in alternate years
Notes: Intended primarily for honours and graduate students in mathematics. Restriction: Permission of instructor.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 552
Credit Weight: 4
Transcript Title: Combinatorial Optimization
Calendar Title: Combinatorial Optimization.
Description: Algorithmic and structural approaches in combinatorial optimization with a focus
upon theory and applications. Topics include: polyhedral methods, network optimization, the ellipsoid method, graph algorithms, matroid theory and submodular functions.

Notes:
Prerequisite: MATH 350 or COMP 362 (or equivalent).
Restriction: Not open to students who have taken or are taking COMP 552.

Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 557
Credit Weight: 4
Transcript Title: Mathematical Statistics 2
Calendar Title: Mathematical Statistics 2.
Description: Sampling theory (including large-sample theory). Likelihood functions and
information matrices. Hypothesis testing, estimation theory. Regression and
correlation theory.
Notes: Winter
Prerequisite: MATH 556
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 558
Credit Weight: 4
Transcript Title: Design of Experiments
Calendar Title: Design of Experiments.
Description: Introduction to concepts in statistically designed experiments. Randomization and
replication. Completely randomized designs. Simple linear model and analysis
of variance. Introduction to blocking. Orthogonal block designs. Models and
analysis for block designs. Factorial designs and their analysis. Row-column
designs. Latin squares. Model and analysis for fixed row and column effects.
Split-plot designs, model and analysis. Relations and operations on factors.
Orthogonal factors. Orthogonal decomposition. Orthogonal plot structures. Hasse
diagrams. Applications to real data and ethical issues.
Notes: Prerequisites: MATH 223, MATH 236, MATH 247, MATH 251, or equivalent. MATH 208 or
equivalent. MATH 324, MATH 357, or equivalent.
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 559
Credit Weight: 4
Transcript Title: Bayesian Theory and Methods
Calendar Title: Bayesian Theory and Methods.
Description: Subjective probability, Bayesian statistical inference and decision making, de
Finetti’s representation. Bayesian parametric methods, optimal decisions,
conjugate models, methods of prior specification and elicitation, approximation
methods. Hierarchical models. Computational approaches to inference, Markov
Notes: Prerequisite: MATH 324, MATH 357, MATH 557, or equivalent, and MATH 208 or
equivalent.
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 562
Credit Weight: 4
Transcript Title: Theory of Machine Learning
Calendar Title: Theory of Machine Learning
Description:
Concentration inequalities, PAC model, VC dimension, Rademacher complexity, convex optimization, gradient descent, boosting, kernels, support vector machines, regression and learning bounds. Further topics selected from: Gaussian processes, online learning, regret bounds, basic neural network theory.
Notes:
Prerequisites: MATH 462 or COMP 451 or (COMP 551, MATH 222, MATH 223 and MATH 324) or ECSE 551.
Restrictions: Not open to students who have taken or are taking COMP 562. Not open to students who have taken COMP 599 when the topic was "Statistical Learning Theory" or "Mathematical Topics for Machine Learning". Not open to students who have taken COMP 598 when the topic was "Mathematical Foundations of Machine Learning".
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 563
Credit Weight: 4
Transcript Title: Honours Convex Optimization
Calendar Title: Honours Convex Optimization
Description:
Notes:
Prerequisites: MATH 223 or MATH 247 or MATH 236 or MATH 251. MATH 248 or MATH 314 or MATH 358. MATH 243 or MATH 255. COMP 202 or COMP 204 or COMP 208 or equivalent.
Restriction: Not open to students who have taken or are taking MATH 463.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 564
Credit Weight: 4
Transcript Title: Advanced Real Analysis 1
Calendar Title: Advanced Real Analysis 1
Description:
Review of theory of measure and integration; product measures, Fubini's theorem; Lp spaces; basic principles of Banach spaces; Riesz representation theorem for C(X); Hilbert spaces; part of the material of MATH 565 may be covered as well.
Notes:
Fall
Prerequisites: MATH 454, MATH 455 or equivalents
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 565
Credit Weight: 4
Transcript Title: Advanced Real Analysis 2
Calendar Title: Advanced Real Analysis 2.
Description:
Continuation of topics from MATH 564. Signed measures, Hahn and Jordan
decompositions. Radon-Nikodym theorems, complex measures, differentiation in R^n,
Fourier series and integrals, additional topics.
Notes:
Winter
Prerequisite: MATH 564
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 566
Credit Weight: 4
Transcript Title: Advanced Complex Analysis
Calendar Title: Advanced Complex Analysis.
Description:
Simple connectivity, use of logarithms; argument, conservation of domain and
maximum principles; analytic continuation, monodromy theorem; conformal mapping;
normal families, Riemann mapping theorem; harmonic functions, Dirichlet problem;
introduction to functions of several complex variables.
Notes:
Fall
Prerequisites: MATH 366 (or MATH 466), MATH 564.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 567
Credit Weight: 4
Transcript Title: Intro to Functional Analysis
Calendar Title: Introduction to Functional Analysis.
Description:
Banach and Hilbert spaces, theorems of Hahn-Banach and Banach-Steinhaus, open
mapping theorem, closed graph theorem, Fredholm theory, spectral theorem for
compact self-adjoint operators, spectral theorem for bounded self-adjoint
operators.
Notes:
Prerequisite: MATH 455 or equivalent.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 570
Credit Weight: 4
Transcript Title: Higher Algebra 1
Calendar Title: Higher Algebra 1.
Description:
Review of group theory; free groups and free products of groups. Sylow theorems.
The category of R-modules; chain conditions, tensor products, flat, projective and
injective modules. Basic commutative algebra; prime ideals and localization,
Hilbert Nullstellensatz, integral extensions. Dedekind domains. Part of the
material of MATH 571 may be covered as well.
Notes:
Fall
Prerequisite: MATH 457 or equivalent
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 571
Credit Weight: 4
Transcript Title: Higher Algebra 2
Calendar Title: Higher Algebra 2.
Description:
Completion of the topics of MATH 570. Rudiments of algebraic number theory. A deeper study of field extensions; Galois theory, separable and regular extensions. Semi-simple rings and modules. Representations of finite groups.
Notes:
Winter
Prerequisites: MATH 570 or consent of instructor
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 574
Credit Weight: 4
Transcript Title: Dynamical Systems
Calendar Title: Dynamical Systems.
Description:
Symbols: ALTY - Taught in alternate years
Notes:
Winter
Prerequisites: MATH 325 and MATH 454 or permission of the instructor.
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 576
Credit Weight: 4
Transcript Title: Geometry & Topology 1
Calendar Title: Geometry and Topology 1.
Description:
Basic point-set topology, including connectedness, compactness, product spaces, separation axioms, metric spaces. The fundamental group and covering spaces. Simplicial complexes. Singular and simplicial homology. Part of the material of MATH 577 may be covered as well.
Notes:
Fall
Prerequisite: MATH 454
Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 577
Credit Weight: 4
Transcript Title: Geometry & Topology 2
Calendar Title: Geometry and Topology 2.
Description:
Basic properties of differentiable manifolds, tangent and cotangent bundles, differential forms, de Rham cohomology, integration of forms, Riemannian metrics, geodesics, Riemann curvature.
Notes:
Winter
Prerequisite: MATH 576
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 578
Credit Weight: 4
Transcript Title: Numerical Analysis 1
Calendar Title: Numerical Analysis 1.
Description:
Development, analysis and effective use of numerical methods to solve problems arising in applications. Topics include direct and iterative methods for the solution of linear equations (including preconditioning), eigenvalue problems, interpolation, approximation, quadrature, solution of nonlinear systems.
Notes:
Fall
Prerequisites: MATH 247 or MATH 251; and MATH 387; or permission of the instructor.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 579
Credit Weight: 4
Transcript Title: Numerical Differential Eqns
Calendar Title: Numerical Differential Equations.
Description:
Numerical solution of initial and boundary value problems in science and engineering: ordinary differential equations; partial differential equations of elliptic, parabolic and hyperbolic type. Topics include Runge Kutta and linear multistep methods, adaptivity, finite elements, finite differences, finite volumes, spectral methods.
Notes:
Winter
Prerequisites: MATH 475 and MATH 387 or permission of the instructor.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 580
Credit Weight: 4
Transcript Title: Advanced PDEs 1
Calendar Title: Advanced Partial Differential Equations 1.
Description:
Classification and wellposedness of linear and nonlinear partial differential equations; energy methods; Dirichlet principle. Brief introduction to distributions; weak derivatives. Fundamental solutions and Green's functions for Poisson equation, regularity, harmonic functions, maximum principle.

Notes:

Fall
Prerequisites: MATH 475 or equivalent
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

Status (catalog level): Active

MATH 589
Credit Weight: 4
Transcript Title: Advanced Probability Theory 2
Calendar Title: Advanced Probability Theory 2.
Description:
Characteristic functions: elementary properties, inversion formula, uniqueness, convolution and continuity theorems. Weak convergence. Central limit theorem. Additional topic(s) chosen (at discretion of instructor) from: Martingale Theory; Brownian motion, stochastic calculus.
Notes:
Winter
Prerequisites: MATH 587 or equivalent
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 590
Credit Weight: 4
Transcript Title: Advanced Set Theory
Calendar Title: Advanced Set Theory.
Description:
Students will attend the lectures and fulfill all the requirements of MATH 488. In addition, they will complete a project on an advanced topic agreed on with the instructor. Topics may be chosen from combinatorial set theory, Goedel's constructible sets, forcing, large cardinals and descriptive set theory.
Symbols: ALTY - Taught in alternate years
Notes:
Prerequisite(s): MATH 251 or MATH 255 or permission of instructor.
Restriction: Not open to students who have taken or are taking MATH 488.
Administering Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 591
Credit Weight: 4
Transcript Title: Mathematical Logic 1
Calendar Title: Mathematical Logic 1.
Description:
Propositional logic and first order logic, completeness, compactness and Löwenheim-Skolem theorems. Introduction to axiomatic set theory. Some of the following topics: introduction to model theory, Herbrand's and Gentzen's theories, Lindström's characterization of first order logic.
Symbols: ALTY - Taught in alternate years

Notes:
- Winter

Prerequisites: MATH 488 or equivalent or consent of instructor

Administrating Faculty: Faculty of Science
Teaching Department: Mathematics and Statistics
Status (catalog level): Active

MATH 592
Credit Weight: 4
Transcript Title: Mathematical Logic 2
Calendar Title: Mathematical Logic 2.
Description: Introduction to recursion theory; recursively enumerable sets, relative recursiveness. Incompleteness, undecidability and undefinability theorems of Gödel, Church, Rosser and Tarski. Some of the following topics: Turing degrees, Friedberg-Muchnik theorem, decidable and undecidable theories.
Symbols: ALTY - Taught in alternate years
Notes:
- Winter

Transcript Title: Applied Stochastic Processes
Calendar Title: Applied Stochastic Processes.
Description:
Discrete parameter Markov chains, including branching processes and random walks.
Limit theorems and ergodic properties of Markov chains. Continuous parameter
Markov chains, including birth and death process. Topics selected from the
following areas: renewal processes, Brownian motion, statistical inference for
stochastic processes.

**Administering Faculty**: Graduate Studies

**MATH 680**  
**Credit Weight**: 4  
**Transcript Title**: Computation Intensive Stats  
**Calendar Title**: Computation Intensive Statistics.  
**Description**: General introduction to computational methods in statistics; optimization methods; EM algorithm; random number generation and simulations; bootstrap, jackknife, cross-validation, resampling and permutation; Monte Carlo methods: Markov chain Monte Carlo and sequential Monte Carlo; computation in the R language.  
**Notes**: Prerequisites: MATH 556, MATH 557 or permission of instructor

**MATH 681**  
**Credit Weight**: 4  
**Transcript Title**: Time Series Analysis  
**Calendar Title**: Time Series Analysis.  
**Description**: Linear Processes and the Wold Decomposition; positive definite operators; Autocovariance and autocovariance generating functions; model estimation and inference; estimation for mixed processes using moments and the likelihood; diagnostic checking; tests with residuals; spectral analysis; estimation of spectral density the peridogram; spectral window and tapers; asymptotic moments of spectral estimates; fractional noise and long range dependence; continuous time models.  
**Notes**: Prerequisite: MATH 545 or equivalent

**MATH 682**  
**Credit Weight**: 4  
**Transcript Title**: Statistical Inference  
**Calendar Title**: Statistical Inference.  
**Notes**: Prerequisite: MATH 141 or equivalent  
**Restrictions**: Not open to students who have taken MATH 324, MATH 357, MATH 557. Intended for graduate students working on quantitative research questions related to life sciences who have had differential and integral calculus.

**MECH 309**  
**Credit Weight:** 3  
**Transcript Title:** Numerical Methods in Mech Eng  
**Calendar Title:** Numerical Methods in Mechanical Engineering.  
**Description:**
Numerical techniques for problems commonly encountered in Mechanical Engineering are presented. Chebyshev interpolation, quadrature, roots of equations in one or more variables, matrices, curve fitting, splines and ordinary differential equations. The emphasis is on the analysis and understanding of the problem rather than the details of the actual numerical program.

**Notes:**
(3-1-5)  
Prerequisites: MATH 263, MATH 271, COMP 208.

**Administering Faculty:** Faculty of Engineering  
**Teaching Department:** Mechanical Engineering  
**Status (catalog level):** Active

---

**MECH 314**  
**Credit Weight:** 3  
**Transcript Title:** Dynamics of Mechanisms  
**Calendar Title:** Dynamics of Mechanisms.  
**Description:**
First principles of analysis; motion; position; displacement; velocity; acceleration; force; inertia and its effects. Kinematic and dynamic analysis of rigid bodies in pure rotation and in pin-connected systems; dynamic balance. Rigid bodies in rolling contact; planetary gear-trains. Bodies in sliding contact; lower

Credit Weight: 2
Transcript Title: Marketing
Calendar Title: Marketing.
Description:
The course concentrates on what may be the most scarce resource for most corporations today - the customer. The course examines how organizations research what the customer wants and needs. The course also looks at the social and psychological backgrounds of consumer choice and looks at the methods for grouping consumers into segments according to the heterogeneity of their desires. The firm's response to consumers is then considered. First, the need satisfying item is considered - the product. Following this, the elements of the marketing mix, distribution, pricing and promotion, are considered.

Transcript Title: Analysis: Production Operations
Calendar Title: Analysis: Production Operations.
Description:
This course presents a framework for design and control of modern production and inventory systems, and bridges the gap between theory and practice of production
and inventory management. The course develops analytical concepts in the area and highlights their applications in manufacturing industry. The course is divided into three segments. The first segment looks at the production planning process and discusses in detail the resource allocation issues. The second segment deals with analysis and operation of inventory systems. The third segment integrates production planning and inventory control and looks at various integrated models for determining replenishment quantities and production lots.

Teaching Department: Management
Status (catalog level): Active

MGSC 660
Credit Weight: 3
Transcript Title: Math&Stat Fndtns for Analytics
Calendar Title: Mathematical and Statistical Foundations for Analytics.
Description:
This course consists of two parts: (i) The first half of the course focuses on probabilistic and statistical foundations of data analytics. At the end of this part, students will have the mathematical knowledge in following topics: probabilities, random variables, the Central Limit Theorem; prior and posterior distributions, and Bayes’ rule; correlation, and Sampling. (ii) The second half of the course focuses on mathematical foundations of decision analytics. At the end of this part, students will have the mathematical knowledge in following topics: linear algebra; calculus of several variables; convexity; separating hyperplanes; unconstrained and constrained optimization; lagrange multipliers.
Notes:
**Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Course Add is the fourth lecture day.
**No web drop allowed.
**Web withdrawal not applicable.
**Web ADD only

MGSC 661
Credit Weight: 3
Transcript Title: Multivariate Statcl Analysis
Calendar Title: Multivariate Statistical Analysis.
Description:
The course will begin with the standard linear regressions, and extend to multivariable regression models, factor analysis, principal components, selection models, and dynamic and nonlinear multivariate data methods. Students will be exposed to a broad range of techniques and applications in business analytics through conducting their own statistical analyses.

**Administering Faculty:** Graduate Studies

**MGSC 662**  
**Credit Weight:** 3  
**Transcript Title:** Decision Analytics  
**Calendar Title:** Decision Analytics.  
**Description:** This course teaches quantitative methods used in business decision making. Topics include: optimization models, optimization under uncertainty, and simulation. Business applications of these techniques are emphasized. Students in this course will acquire expertise in quantitative methods for decision making, through computer analysis of real-life problems.

**Administering Faculty:** Graduate Studies  
**Teaching Department:** Management  
**Status (catalog level):** Active

**MGSC 670**  
**Credit Weight:** 1.5  
**Transcript Title:** Revenue Management  
**Calendar Title:** Revenue Management.  
**Description:** This course will introduce students to revenue management (RM) practices in air transportation, hospitality (hotels, cruises, theme parks, casinos), car rental, media, broadcasting, natural-gas storage and transmission, electricity generation and transmission, and show business (concerts, theaters, sport events). Most applications are recent and made possible by the advances in technology, data and decision analytics. However, there are issues of legality and customer backlash for charging different prices for virtually the same product. The course will touch upon these issues as well. Topics covered include capacity allocation, network management, overbooking, markdown pricing, and customized pricing.

**Notes:**  
Prerequisites: (INSY 660 OR INSY 662 OR Instructor's approval) AND (MGSC 660 OR MGSC 661 OR Instructor's approval)

Transcript Title: Strat Mine Plan W/Uncertainty
Calendar Title: Strategic Mine Planning With Uncertainty.
Description: Strategic decision-making for mine planning given uncertain metal supply from
orebodies and commodity demand. Stochastic optimization techniques in mine design and production scheduling. Uncertainty quantification and orebody representation. Stochastic mine optimization in applications from open pit and underground metal mines. Introduction to sustainable development and utilization of mineral resources.

Notes:
3-3-3
Prerequisites: MIME 325, MIME 419, MPMC 326, and MPMC 329.
Restriction(s): Not open to students who have taken MIME 513.

Transcript Title: Intro to Comp Matls Design
Calendar Title: Introduction to Computational Materials Design.
Description: Introduction to modelling and simulation techniques in materials engineering: quantum mechanics and atomistic simulation (i.e. Monte-Carlo and Molecular Dynamics). These modelling and simulations methods provide new and efficient tools to examine and predict various physical and mechanical properties of materials, enabling bottom-up design of materials and structures starting from quantum and atomistic level. These computational tools play an increasingly important role in modern materials engineering. Fundamental theories behind materials modelling and hands-on training on various modelling software.

MIME 650N1
Credit Weight: 3
Transcript Title: Adv Extractive Metallurgy 1
Calendar Title: Advanced Extractive Metallurgy 1.
Description:
Metallurgical applications of heat, mass and momentum transfer theories. Particular emphasis is placed on the applications of computational fluid dynamics and development of appropriate software programs. These are based on the integral control volume, finite difference approach, employing body-fitted co-ordinate schemes to handle arbitrarily shaped flow domains. Turbulence models such as K-E and large eddy simulation are presented.

Notes:
Students must also register for MIME 650N2.
No credit will be given for this course unless both MIME 650N1 and MIME 650N2 are successfully completed in a twelve month period.

Transcript Title: Aqueous Processing
Calendar Title: Aqueous Processing.
Description: Advanced treatment of the chemical and engineering principles governing aqueous dissolution, purification and deposition operations. Topics include: ionic activities of dilute and concentrated solutions; solution and solid-liquid equilibria; analysis of complexation and redox reactions; high temperature solution thermodynamic kinetics; solvent extraction, equilibria and mass transfer kinetics; nucleation, growth and agglomeration phenomena in aqueous precipitation systems.
Administrating Faculty: Graduate Studies
Teaching Department: Mining & Materials Engineering
Status (catalog level): Active

MIME 653
Credit Weight: 3
Transcript Title: Transport Phenom-Process Metal
Calendar Title: Transport Phenomena - Process Metallurgy.
Description: Process metallurgical applications of heat, mass and momentum transport theories. Methods of numerical solution in the analysis of: continuous casting, ingot solidification, soaking pits, hot mill operations, alloy addition methods in steel-making, etc. Students are assigned individual computer projects and present a report plus a seminar on their findings.

MIMM 211
Credit Weight: 3
Transcript Title: Introductory Microbiology
Calendar Title: Introductory Microbiology.
Description:
A general treatment of microbiology bearing specifically on the biological properties of microorganisms. Emphasis will be on procaryotic cells. Basic principles of microbial genetics are also introduced.
Notes:
Fall
3 hours of lecture
Corequisite: BIOL 200
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 212
Credit 213 Weight: 3
Transcript Title: Laboratory in Microbiology
Calendar Title: Laboratory in Microbiology.
Description:
This laboratory course is designed to complement MIMM 211. Sessions introduce general techniques peculiar to the handling of microorganisms.
Notes:
Fall
3 hours laboratory, 1 hour lecture, 1 hour follow-up
Corequisite: MIMM 211
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 214
Credit Weight: 3
Transcript Title: Intro Immun: Elem of Immunity
Calendar Title: Introductory Immunology: Elements of Immunity.
Description:
Basic immunology, organs and cells, elements of innate immunity, phagocytes, complement, elements of adaptive immunity, B-cells, T-cells, antigen presenting cells, MHC genes and molecules, antigen processing and presentation, cytokines and chemokines. Emphasis on anatomy and the molecular and cellular players working together as a physiological system to maintain human health.
Notes:
Prerequisite: BIOL 200
Corequisite: BIOL 201 or ANAT 212/BIOC 212
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

Transcript Title: Scientific Writing Skills-MIMM
Calendar Title: Scientific Writing Skills in MIMM.
Description:
Scientific and communication skills, including searching the literature, reading primary papers, managing citations and using them appropriately, as well as interpreting scientific data, synthesizing findings from the scientific literature, and writing a scientific paper. This course will allow students to
practice scientific writing skills through various steps intended to provide feedback.

Notes:
Corequisites: MIMM314, MIMM385
Prerequisites: MIMM323, MIMM324, MIMM384
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 314
Credit Weight: 3
Transcript Title: Intermediate Immunology
Calendar Title: Intermediate Immunology.
Description:
An intermediate-level immunology course covering the cellular and molecular basis of lymphocyte development and activation in immune responses in health and disease.
Notes:
Winter
3 hours of lecture
Prerequisite: MIMM 214
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 323
Credit Weight: 3
Transcript Title: Microbial Physiology
Calendar Title: Microbial Physiology.
Description:
An introduction to the composition and structure of microbial cells, the biochemical activities associated with cellular metabolism and how these activities are regulated and coordinated. The course will have a molecular and genetic approach to the study of microbial physiology.
Notes:
Fall
3 hours of lecture
Prerequisite: MIMM 211
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 324
Credit Weight: 3
Transcript Title: Fundamental Virology
Calendar Title: Fundamental Virology.
Description:
A study of the fundamental properties of viruses and their interactions with host cells. Bacteriophages, DNA- and RNA-containing animal viruses, and retroviruses are covered. Emphasis will be on phenomena occurring at the molecular level and on the regulated control of gene expression in virus-infected cells.
Notes:
Fall
3 hours of lecture
Prerequisites: MIMM 211, BIOL 200, BIOL 201 or BIOC 212
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 384
Credit Weight: 3
Transcript Title: Molecular Microbiology Lab
Calendar Title: Molecular Microbiology Laboratory.
Description:
A series of laboratory exercises in molecular biology and microbial genetics
during the Fall term. As part of a term paper writing project, students will
explore contemporary research subjects that represent the wide interests of the
Microbiology and Immunology department’s faculty. The general objective is to
provide practical and theoretical introduction to the technology and methodology
used in contemporary microbiology research.
Notes:
Prerequisite(s): MIMM 211 and MIMM 212
Corequisite(s): MIMM 323 and MIMM 324
Restriction(s): Not open to students who are taking or have taken MIMM 386D1/D2.
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 385
Credit Weight: 3
Transcript Title: Laboratory in Immunology
Calendar Title: Laboratory in Immunology.
Description:
This laboratory course allows students to gain expertise in following protocols
and performing key techniques in immunology. Students also develop basic
experimental design and scientific thinking skills by designing their own
experiments based on available reagents to solve a problem. Students learn to keep
a lab book and communicate scientific findings in written and oral form.
Notes:
Prerequisite(s): MIMM 211, MIMM 212, MIMM 214 (MIMM 384 highly recommended).
Corequisite(s): MIMM 314
Not open to students who are taking or have taken MIMM 386D1/D2.
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 387
Credit Weight: 3
Transcript Title: The Business of Science
Calendar Title: The Business of Science.
Description:
The ability to select and manipulate genetic material has led to unprecedented
interest in the industrial applications of procaryotic and eucaryotic cells.
Beginning in the 1970s the introduction of and subsequent refinements to
recombinant DNA technology and hybridoma technology transformed the horizons of
the biopharmaceutical world. This course will highlight the important events that
link basic research to clinical/commercial application of new drugs and chemicals.
Notes:
Winter
Prerequisite: At least one 200-level course in a biological or biomedical
discipline or permission of instructor
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

Credit Weight: 3
Transcript Title: Ugrad Research Proj-Microbiol
Calendar Title: Undergraduate Research Project in Microbiology.
Description: Independent research project with a final written report.
Notes:
Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.
Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures.

Calendar Title: Bacterial Pathogenesis.
Description:
Familiarizes students with key principles and recent advances in our understanding of the strategies that bacteria use to infect and cause disease, as well as the approaches used in the prevention and treatment of bacterial infections.
Notes:
Fall
3 hours of lecture
Prerequisites: MIMM 211, MIMM 314, MIMM 323, or the permission of the instructor
Administering Faculty: Faculty of Science
Teaching Department: Microbiology & Immunology
Status (catalog level): Active

MIMM 466
Credit Weight: 3
Transcript Title: Viral Pathogenesis
Calendar Title: Viral Pathogenesis.
Description:
A study of the biological and molecular aspects of viral pathogenesis with emphasis on the human pathogenic viruses including the retroviruses HIV and HTLV-1; herpes viruses; papilloma viruses; hepatitis viruses; and new emerging human viral diseases. These viruses will be discussed in terms of virus multiplication, gene expression virus-induced cytopathic effects and host immune response to infection.
Notes:

Calendar Title: Applied Projects for Musicians.
Description: Project-based course aimed at providing students with the skills required in the evolving music business, through analysis of case studies and developing projects focused around music entrepreneurship. Teams of three or four students will plan and implement a creative, collaborative project, synthesizing and putting into practice business and entrepreneurial skills. They will develop a pitch for their project, present their project, and write it up in a final paper. Students will also be required to write a reflection paper on process, teamwork, skill development, and outcomes.
Notes: Prerequisite(s): MGPO 362
Restriction(s): Priority given to students in the Minor in Music Entrepreneurship; open to other students with permission of the instructor.

Calendar Title: Research Methods in Music.
Description:
This interdisciplinary lecture offers an overview of the fundamental principles of research in music. Emphasis is placed on acquainting students with the methods and techniques most commonly used to study music and musical processes. Topics include approaches and theories, artistic research, research project design, procedures for carrying out research, as well as both qualitatively- and quantitatively-oriented methods of data collection, processing and analysis.

Transcript Title: Rehearsal Tech for Conductors
Calendar Title: Rehearsal Techniques for Conductors.
Description:
Exploration of rehearsal techniques used by conductors and coaches in a variety of
different settings (at McGill and in the larger Montreal community) including
orchestra, orchestra sectionals, contemporary music ensembles, wind ensembles,
early music ensembles, choral ensembles, jazz ensembles, chamber music ensembles,
and opera through observation and discussion.

Notes:
Restriction: Open to graduate students in choral, wind, and orchestra conducting
or with the permission of instructor

Credit Weight: 3
Transcript Title: Vocal Styles and Conventions
Calendar Title: Vocal Styles and Conventions.
Description:
Emphasis on vocal performance practices through practical application: text,
language, inflection, pronunciation and interpretation considered with
individuality of each student's voice and technical development. After examining
historical treatises, students will discuss and present musical selections
utilizing modern performance standards yet remaining true to stylistic demands of
each period.

Notes:
3 hours
Restriction: Not open to students who have taken MUPG 690.

Credit Weight: 4.5
Transcript Title: Perf in Recording Media
Calendar Title: Performance in Recording Media.
Description:
Candidates must submit a professional quality audio and/or video document of their performances, with liner notes. The performances must be 60-70 minutes on the candidate's primary instrument.
Notes:
Students must register for both MUPG 659D1 and MUPG 659D2
No credit will be given for this course unless both MUPG 659D1 and MUPG 659D2 are successfully completed in consecutive terms
MUPG 659D1 and MUPG 659D2 together are equivalent to MUPG 659
Course requirements will vary depending on the program stream (Jazz Performance, Jazz Composition and Arranging and Jazz Orchestra) the candidate is completing. See the Music Graduate website for more details.

Description: Harmonic, melodic and rhythmic analysis at the keyboard through the study of rudiments, repertoire, chorale/score reading, transposition and harmonization.
Notes: 1 hour
Prerequisite: Matriculation Music or McGill Conservatory Theory Secondary V or its equivalent.
Corequisites: MUTH 150 and MUSP 140.
Course contents parallel with those of MUTH 150 and MUSP 140.
Administering Faculty: Schulich School of Music
Teaching Department: Music Research
Status (catalog level): Active

MUSP 171
Credit Weight: 1
Transcript Title: Musicianship (Keyboard) 2
Calendar Title: Musicianship (Keyboard) 2.
Description: Building chordal fluency. Harmonic vocabulary including sequences, chromaticism and modulation. Chorale and score reading with transposing instruments and alto/tenor clefs.
Notes: 1 hour
Prerequisite: MUSP 170
Corequisites: MUTH 111 and MUSP 131; or MUTH 151 and MUSP 141
Restriction: All students admitted to B.Mus. and L.Mus. programs, including those with keyboard or guitar as their principal instrument, are required to take MUSP 171 Keyboard Lab, unless exempt on the basis of a placement test. Students who are exempt from MUTH 111 through placement tests must still take MUSP 171 (unless exempt) since this course forms the foundation of keyboard-based musicianship tasks at upper levels. (All Majors in Jazz Performance substitute MUJZ 171 for MUSP 171. Students in Jazz Performance who have completed MUJZ 170 and MUJZ 171, and who transfer to a Department of Theory program, will be required to complete MUSP 171.) Students who do not achieve a continuation pass in MUSP 171 must reregister for the course in the semester immediately following. Students who do not achieve a continuation pass after repeating the course will not be allowed to proceed with further Musicianship or Theory studies until a continuation pass is achieved. Tests for MUSP 171 are held in August-September, December-January, and April-May [as well as during the Summer Session when course(s) offered], the exact dates determined by the Department of Music Research.
Course contents parallel with those of MUTH 151 and MUSP 141.

Transcript Title: TCP Neurology
Calendar Title: TCP Neurology.
Description:
During this two-week course, students will develop the knowledge, skills, and attitudes required to diagnose and treat patients with common neurological problems. Students will also gain an understanding of the roles and responsibilities of the various health professionals involved in the treatment of neurological patients, and an appreciation for how these individuals work together as a team to provide effective and efficient care. In addition, students will have opportunities to discuss the various integral roles of a physician, as defined by the Royal College of Physicians and Surgeons of Canada’s CanMEDS framework.
Notes:
Restriction(s): Open only to students in the M.D., C.M. program.

Transcript Title: Illness Mgmt Clin Skills Lab 2
Calendar Title: Illness Management Clinical Skills Laboratory 2.

Description:
This laboratory course addresses illness management clinical technical skills and is the companion course to Nursing in Illness 2. Students develop the following areas with respect to a range of clinical technical skills: a) knowledge of the technical skill itself; b) an understanding of the risks and patient safety issues associated with the procedure; c) knowledge of the infection prevention and control guidelines required to perform the skill; d) fine and gross psychomotor skills relative to performing the procedure; e) sensitivity to the patient experience related to the procedure.

Notes:
Prerequisite(s): NUR1 335
Corequisite(s): NUR1 323, NUR1 336

nominal fee of $110.44 is charged to all nursing students who register in courses where clinical skills are taught to students in the Nursing Learning Laboratory. The fee is for clinical skills kits that students will use during their training in the Nursing Learning Laboratory. The kits also contain additional materials for students to take with them after the training to allow them to practice the skills they learn on their own.

Description:
This integrated health sciences course will focus on the study of the pathophysiologic alterations in health across the lifespan, looking at selected diseases and pharmacotherapy that are most prevalent in North America. It will explore concepts of disease causation: acquired, immune, infectious, carcinogenic, genetic, and biochemical alterations in health in selected body systems with an emphasis on etiology, cellular and systemic pathophysiologic responses, clinical manifestations, diagnostic, and pharmacological treatment modalities. A focus on drug mechanisms of action, pharmacodynamics, pharmacokinetics, pharmacotherapeutics, patient safety and professional nursing responsibilities in drug administration will also be covered. Hematologic, musculoskeletal, cardiac, neurological integumentary and multiple interacting systems with an emphasis on etiology, cellular and systemic pathophysiologic responses, clinical
manifestations, diagnostic, and treatment modalities will be reviewed.

**NUR3 668**
**Credit Weight:** 12
**Transcript Title:** Internship in Neonatal Prac 1
**Calendar Title:** Internship in Neonatal Practice 1.
**Description:**
Internship in caring for healthy newborns as well as complex neonatal patients in a hospital setting, and follow-up of at risk infants following hospitalization in the Neonatal Intensive care unit in the Neonatal follow-up clinic. Exposure to normal, healthy babies, or healthy babies with problems not requiring intermediate or intensive care, intermediate care patients initially before progressing to cases that are more complex. Application of theoretical knowledge to the care of the neonate in multiple settings, with focus on practice in Level III neonatal unit. Emphasis will be on the transfer of theoretical knowledge and the individualization of patient care. Family dynamics are assessed and considered integral to the management plan.

**Notes:**
Prerequisites: NUR2 663, NUR3 665

Transcript Title: Global Food Security
Calendar Title: Global Food Security.
Description:
Food insecurity is one of the most critical issues humanity has faced in history. The magnitude of this phenomenon, reflected in its worldwide presence and in the number of individuals affected, makes it an imperative component of all nations' and of all international agencies' agendas. Its complexity of determinants and
its numerous consequences require the involvement of multiple disciplines and sectors. McGill undergraduate students as future professionals tackling global issues require an integrated and multidisciplinary training on food security.

**Transcript Title:** Advanced Global Food Security

**Calendar Title:** Advanced Global Food Security

**Description:**
Food security is a major concern on the international development agenda: hundreds of millions, and perhaps even billions of individuals still face food insecurity and hunger, even years after the Millennium Summit. This course is designed to provide graduate students with multidisciplinary tools in research and education required by practitioners and researchers to better assess, understand, and positively impact global food security. Students will attend the Annual McGill Global Food Security Conference, and will actively review presentations and interact with world experts from various sectors and disciplines presenting on cutting edge research and the state of Global Food Security.

**Notes:**
Prerequisite(s): Permission from Instructor.
Restriction(s): Not open to students who have taken NUTR 608 when topic was "Advanced Global Food Security".

Transcript Title: Obstetrics & Gynecology Clerkship
Calendar Title: Obstetrics and Gynecology Clerkship.
Description:
During the obstetrics and gynecology course, students will participate in a variety of experiences to learn the knowledge, skills and attitudes relevant to health care for women. The major goals of the clerkship are to introduce students to the broad range of skills and knowledge encompassed in the specialty of obstetrics and gynecology; to demonstrate the interrelationship of specialty and primary care in the care of women across the life span; to provide students with the ability to address common inpatient and outpatient health problems of women; and to demonstrate the obstetrician-gynecologist's interactions with other providers of medical care to achieve optimal benefit in the care of women.
Notes:
Restriction(s): Open only to students enrolled in the M.D., C.M. program.

ONCO 610D1
Credit Weight: 3
Transcript Title: Fundamentals of Oncology and Cancer Research.
Calendar Title: Fundamentals of Oncology and Cancer Research.
Description:
A multidisciplinary approach to the entire spectrum of principles and practice in all fields of oncology, as well as to its research domains, from basic science to clinical and population health sciences. Content areas will include mechanisms of carcinogenesis, tumour pathology, cancer epidemiology, prevention, screening, diagnosis, treatment, psychosocial support, palliative care, global cancer control, and quality of cancer care services. The multidisciplinary nature of cancer research and clinical care and how research findings inform clinical practice and policymaking in cancer control will be illustrated.
Notes:
Restriction: Open to all graduate students in the Faculty of Medicine and Health Sciences, however priority will be given to those enrolled in the Graduate Diploma in Oncology program.
English is the language of instruction but students may present in either of the official languages.
Students must register for both ONCO 610D1 and ONCO 610D2

**Transcript Title:** Managerial Negotiations  
**Calendar Title:** Managerial Negotiations.  

**Description:**  
Negotiating is a critical managerial skill. The purpose of this course is to allow students to learn to be more effective negotiators. The class environment used to accomplish this goal includes many exercises, personality inventories, and cases. The focus of the course will be on the processes of bargaining and the emphasis is "hands on" learning, although theories of negotiation and research examining negotiation will also be covered. Each student will have a great deal of control over how much he or she will develop into a better negotiator as a result of participating in this course.  

**Notes:**  
**Although this course follows a Tuesday/Thursday lecture pattern, there will be one class held on Wednesday, June 14, 2017.**

**Transcript Title:** Career Development  
**Calendar Title:** Career Development.  

**Description:**  
The broad objective of this course is to increase students' understanding of the phenomenon of careers, in the business world as well as other spheres. Students will be exposed to "state of the art" theory and research on careers, and will then be expected to examine the usefulness and relevance of current theory by analyzing the careers of "real life" individuals, from novels, films, biographies, and case histories. The course will focus on the evolution of careers over time, and will consider in-depth the many factors which influence (and are influenced by) career development, including such things as individual characteristics and background: age and family, status; occupational, job, and organizational characteristics etc. Career development will be considered both from the perspective of the individual and the organization.

PAED 301  
**Credit Weight:** 2  
**Transcript Title:** TCP Pediatrics  
**Calendar Title:** TCP Pediatrics.  
**Description:**  
This two-week course provides the student with basic principles of pediatric care including pediatric-specific history-taking and physical exam skills as well as approach to common pediatric problems. Through structured learning activities, clinical encounters and self-directed learning, students will develop knowledge and skills that will prepare them for Clerkship.  
**Notes:**  
Note: One half-day per week for a duration of seven weeks  
Restriction(s): Open only to students enrolled in the M.D., C.M. program.  
**Administering Faculty:** Faculty of Medicine & Hlth Sci  
**Teaching Department:** Pediatrics  
**Status (catalog level):** Active

PAED 401  
**Credit Weight:** 6  
**Transcript Title:** Pediatrics Clerkship  
**Calendar Title:** Pediatrics Clerkship.  
**Description:**  
The course will cover aspects of growth, perinatology, morbidity-mortality in pediatrics, infections in children, and neurologic, physical and psychological development. The course will include participation in the medical assessment and management of children, supplemented by didactic teaching and self-directed learning.  
**Notes:**  
Restriction(s): Open only to students enrolled in the M.D., C.M. program.  
**Administering Faculty:** Faculty of Medicine & Hlth Sci  
**Teaching Department:** Pediatrics

PHAR 540
Credit Weight: 3
Transcript Title: Advances in Ind Biotech
Calendar Title: Advances in Industrial Biotechnology.
Description:
Introduction to emerging technologies and research advances in biotechnologies. Topics include semisynthetic production of drugs and drug candidates through large-scale fermentation, next generation synthesis of DNA and whole genes, green toxicology, single-molecule diagnostics, orphan-drug re-purposing, and next-generation genomic analyses in drug development. Translational research, issues of entrepreneurship, sustainability, and ethics are also covered.

Notes:
Prerequisite: CHEM 222 (or equivalent) and BIOL 200 or CHEM 332
Restriction: U3 Students or higher. Not open to students who have taken or are taking CHEM 540.

Administering Faculty: Faculty of Science
Teaching Department: Pharmacology and Therapeutics

PHAR 565
Credit Weight: 3
Transcript Title: Epigenetic Drugs and Targets
Calendar Title: Epigenetic Drugs and Targets.
Description:
This course covers therapeutics targeting epigenetic mechanisms. Although only a handful of epigenetic drugs are in widespread use, further development of such agents is a very active area of research as it has the potential to directly target aberrant gene expression. This course will examine both the current use and
potential of epigenetic drugs in treatment of cancer, neurological diseases, immune disorders, and cardiovascular disease. The concept of epigenetics as mediating gene-environment interaction will also be discussed.

Notes:
Prerequisite(s): PHAR 301.
Restrictions: Not open to students who have taken or are taking HGEN 673.

Administering Faculty: Faculty of Science

Status (catalog level): Active  

PHGY 461D1
Credit Weight: 4.5
Transcript Title: Experimental Physiology
Calendar Title: Experimental Physiology.
Description: Individual project work under the supervision of Departmental Staff members.
Notes: Fall
Restrictions: Departmental approval required. This course is a requirement for U3 students in the Honours Physiology program, the Major Program in Physiology and Mathematics, and the Major program in Physiology and Physics, and is open to a limited number of other U3 Physiology students.
Students must register for both PHGY 461D1 and PHGY 461D2.
No credit will be given for this course unless both PHGY 461D1 and PHGY 461D2 are successfully completed in consecutive terms.

PHGY 488
Credit Weight: 3
Transcript Title: Stem Cell Biology
Calendar Title: Stem Cell Biology.
Description: The main concepts in stem cell biology: embryonic stem cells, induced pluripotent stem cells, cancer stem cells, stem cells populations of many adult tissues, applications of stem cell biology and ethical issues surrounding stem cell use in research and medicine. The major experimental methods and laboratory techniques in stem cell biology.
Notes: Prerequisite(s): PHGY 313 or by permission of instructor.
Restriction(s): Registration is on a first-come, first-served basis.
Restriction(s): Not open to students who are taking or have taken ANAT 416.
Critical reading of peer-reviewed journal papers, practice in oral presentations of scientific material and participation in group discussions.

Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 499
Credit Weight: 1
Transcript Title: Independent Study in Physiol
Calendar Title: Independent Study in Physiology.
Description: Supervised research project in physiology.
Notes: Prerequisites: PHGY 311, PHGY 312, PHGY 313, PHGY 314. Note: A form from the Student Affairs Officer, Room 1022, McIntyre Medical Bldg., must be completed prior to registration. Restriction: Open only to final year Physiology students
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 502
Credit Weight: 3
Transcript Title: Exercise Physiology
Calendar Title: Exercise Physiology.
Description: Behaviour of physiological processes in response to physical effort, in areas such as structural basis of muscle contraction, thermoregulation during exercise, mechanics and energetics of muscle contraction, fuel utilization, fatigue, physiological adjustments during exercise and influence of training.
Notes: Winter
Prerequisites: PHGY 311, PHGY 312, and PHGY 313
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 508
Credit Weight: 3
Transcript Title: Advanced Renal Physiology
Calendar Title: Advanced Renal Physiology.
Description: Advanced concepts in selected areas of kidney physiology, including the glomerulus, renal cell biology, kidney development, membrane and epithelial transport, hormones and autacoids, kidney transplantation, bioengineering and regenerative medicine.
Notes: Fall. Offered in conjunction with the Department of Medicine.
Prerequisite (Undergraduate): PHGY 312 or the equivalent
Restriction: Open to advanced undergraduate and graduate students
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 513
Credit Weight: 3
Transcript Title: Translational Immunology
Calendar Title: Translational Immunology.
Description: Advanced key concepts in immunology as they relate to health and disease, including infectious diseases, non-infectious diseases and autoimmunity, and cancer immunology.
Notes: Winter
3 hours lectures
PHGY 515
Credit Weight: 3
Transcript Title: Blood-Brain Barrier: Health & Disease.
Calendar Title: Blood-Brain Barrier in Health and Disease.
Description: Molecular and cellular mechanisms underlying the organization and regulation of the blood-brain barrier, highlighting neurological diseases associated with the blood-brain barrier breakdown and give an overview of experimental approaches to study blood-brain barrier.
Notes:
Fall
1.5 hours Lecture and 1.5 hours Seminar weekly
Prerequisite: PHGY 313 or PHGY 314 and permission of the instructor

PHGY 516
Credit Weight: 3
Transcript Title: Physiology of Blood
Calendar Title: Physiology of Blood.
Description: Bone marrow hematopoiesis, with emphasis on regulation of stem cell proliferation and differentiation along hematopoietic pathways. Formation and differentiation of red and white blood cells and some of the diseases associated with hematopoiesis will be covered. Emphasis will be given to the molecular mechanisms involved in the normal and pathological conditions.
Notes:
Winter
2 hours lecture plus 1 hour seminar weekly

PHGY 518
Credit Weight: 3
Transcript Title: Artificial Cells
Calendar Title: Artificial Cells.
Description: Physiology, biotechnology, chemistry and biomedical application of artificial cells, blood substitutes, immobilized enzymes, microorganisms and cells, hemoperfusion, artificial kidneys, and drug delivery systems. PHGY 517 and PHGY 518 when taken together, will give a complete picture of this field. However, the student can select one of these.
Notes:
Fall
Prerequisite (Undergraduate): permission of instructors.
PHGY 520
Credit Weight: 3
Transcript Title: Ion Channels
Calendar Title: Ion Channels.
Description:
A discussion of the principal theories and interesting new developments in the study of ion channels. Based on a textbook, computer exercises and critical reading and presentation of research papers. Topics include: Properties of voltage-and ligand-gated channels, single channel analysis, structure and function of ion channels.
Notes:
Winter
Offered in even numbered years
1 1/2 hour lecture, 1 1/2 hour seminar
Prerequisite: PHGY 311
Priority to Graduate and Honours students; others by permission of instructors.
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 524
Credit Weight: 3
Transcript Title: Chronobiology
Calendar Title: Chronobiology.
Description:
An introduction to the field of chronobiology. The aim is to provide basic instruction on different types of biological rhythms, with particular focus on circadian rhythms.
Notes:
Prerequisites: PHGY 209 and PHGY 210 (or NSCI 200 and NSCI 201), and a relevant 300-level course (PHGY 311, or PHGY 314, or PSYC 318, or BIOC 311, or other, with permission of course coordinator).
Restriction: Course for senior undergraduate (U3) and graduate students
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 525
Credit Weight: 3
Transcript Title: Cortical Plasticity
Calendar Title: Cortical Plasticity.
Description:
An examination of cortical plasticity following peripheral and central nervous damage from a systems/cognitive neuroscience perspective. Focus is on sensory systems and animal models, including the following topics: ocular dominance columns, retinal lesions, blindness, deafness, cochlear implants, barrel fields, amputation, stroke, and hemispherectomy. Experimental approaches to be considered include: electrophysiological recording, psychophysics, behaviour, and functional imaging.
Notes:
Prerequisites: NSCI 200 or PHGY 314 or permission of the instructor
Administering Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active
PHGY 531
Credit Weight: 3
Transcript Title: Topics in Applied Immunology
Calendar Title: Topics in Applied Immunology.
Description:
Seminar format course in which experts in immunologic mechanisms of resistance against a variety of infectious diseases, including AIDS, malaria, and tuberculosis oversee student moderators in their presentation of recent scientific literature in the field.
Notes:
Winter
Restriction: Permission of the instructor. U3 InterDept. Honours Immunology students and graduate students with strong immunology background i.e. PHGY 513 and BIOC 503
Administrating Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 550
Credit Weight: 3
Transcript Title: Molecular Physiology of Bone
Calendar Title: Molecular Physiology of Bone.
Description:
Students will develop a working knowledge of cartilage and bone. Discussion topics will include: molecular and cellular environment of bone; heritable and acquired skeletal defects; research models used to study metabolic bone disease.
Notes:
Fall
1 hour of lecture, 2 hours of seminar per week
Prerequisites: PHGY 311, and BIOL 202 or equivalent
Restriction: U3 Physiology students, and graduate students in biomedical departments; others by permission of the instructor
Administrating Faculty: Faculty of Science
Teaching Department: Physiology
Status (catalog level): Active

PHGY 552
Credit Weight: 3
Transcript Title: Cellular & Molecular Physiology
Calendar Title: Cellular and Molecular Physiology.
Description:
Discussions of recent significant advances in our understanding of the gene products involved in diverse cellular signalling pathways. Topics will include cell-surface hormone receptors, nuclear steroid hormone receptors, and ion channels and transporters. Students will present and critically evaluate experimental approaches, results and interpretations of selected research publications.
Notes:
Winter
1 hour lecture, 2 hours seminar weekly
Prerequisite: PHGY 311
Preference will be given to Physiology Honours and Graduate students
Administrating Faculty: Faculty of Science

Teaching Department: Philosophy
Status (catalog level): Active

PHIL 201
Credit Weight: 3
Transcript Title: Intro to Philosophy 2
Calendar Title: Introduction to Philosophy 2.
Description:
An introduction to some of the major problems of philosophy. This course does not duplicate PHIL 200.

Notes:
Philosophy students may use either PHIL 200 or PHIL 201 towards their program requirements, but not both. Students may, however, take both for credit (using the second as an elective), as the content in PHIL 201 does not overlap with PHIL 200.

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 202
Credit Weight: 3
Transcript Title: The Good Life
Calendar Title: The Good Life.
Description:
Examines how ancient philosophers grapple with the question of how we should live, especially Socrates, Plato, Aristotle, Stoics, Epicureans and Skeptics, who advertise their philosophies as gateways to happiness, virtue and peace of mind. Also covers select modern views, from Kierkegaard to Sartre, and asks how these differ from the views of the ancients. Analyzes the debate of fundamental questions: What things really matter? Does it pay to be good? What is the best society? Can we escape the roller-coaster of our emotions? Looks at how answers tie in with assumptions about god, nature, knowledge, the soul and politics.

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 210
Credit Weight: 3
Transcript Title: Intro to Deductive Logic 1
Calendar Title: Introduction to Deductive Logic 1.
Description:
An introduction to propositional and predicate logic; formalization of arguments, truth tables, systems of deduction, elementary metaresults, and related topics.

Notes:
Restriction: Not open to students who are taking or have taken MATH 318.

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 230
Credit Weight: 3
Transcript Title: Intro to Moral Philosophy 1
Calendar Title: Introduction to Moral Philosophy 1.
Description:
A survey of a number of historically important and influential theories. Philosophers to be discussed may include Aristotle, Hume, Kant, Bentham, Mill, and Moore.
Notes:
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 237
Credit Weight: 3
Transcript Title: Contemporary Moral Issues
Calendar Title: Contemporary Moral Issues.
Description:
An introductory discussion of central ethical questions (the value of persons, or the relationship of rights and utilities, for example) through the investigation of currently disputed social and political issues. Specific issues to be discussed may include pornography and censorship, affirmative action, civil disobedience, punishment, abortion, and euthanasia.
Notes:
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 240
Credit Weight: 3
Transcript Title: Political Philosophy 1
Calendar Title: Political Philosophy 1.
Description:
An introduction to contemporary philosophy of politics by concentrating on a number of contested concepts, such as freedom, justice and equality, in contemporary political philosophy and practice.
Notes:
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 242
Credit Weight: 3
Transcript Title: Intro to Feminist Theory
Calendar Title: Introduction to Feminist Theory.
Description:
An introduction to feminist theory as political theory. Emphasis is placed on the plurality of analyses and proposals that constitute contemporary feminist thought. Some of the following are considered: liberal feminism, marxist and socialist feminism, radical feminism, postmodern feminism, francophone feminism, and the contributions to feminist theory by women of colour and lesbians.

Notes:
Note: Since this course is being taught abroad, the Victoria Day statutory holiday will not be taken into consideration. Therefore, students are expected to attend their lecture on Monday, May 19, 2014.

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 301
Credit Weight: 3
Transcript Title: Philosophical Fundamentals
Calendar Title: Philosophical Fundamentals.
Description:
An intensive study of basic philosophical skills; reading, writing, analysis, and argumentation.
Notes:
Prerequisites: two previous courses in philosophy, one of which must be PHIL 210 or written consent of the Department
Restriction: Open only to and required of Philosophy Honours and Joint Honours students
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 306
Credit Weight: 3
Transcript Title: Philosophy of Mind
Calendar Title: Philosophy of Mind.
Description:
A survey of major positions of the mind-body problem, focusing on such questions as: Do we have minds and bodies? Can minds affect bodies? Is mind identical to body? If so, in what sense "identical"? Can physical bodies be conscious.
Notes:
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 310
Credit Weight: 3
Transcript Title: Intermediate Logic
Calendar Title: Intermediate Logic.
Description:
A second course in Logic. NB. The course will be technical in nature, and some mathematical aptitude is essential. The emphasis is on the expressive properties of standard logical systems, including implications for the philosophy of mathematics. We will study the Completeness of First-Order Logic, then the 'limitative' theorems of Tarski and Gödel.
Notes:
Prerequisite: PHIL 210 or equivalent
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 311
Credit Weight: 3
Transcript Title: Philosophy of Mathematics
Calendar Title: Philosophy of Mathematics.
Description: This course provides an historically informed introduction to philosophy of mathematics. It gives the student an overview of prominent issues and arguments, to enable her to follow and discuss contemporary research in philosophy of mathematics.
Notes: Prerequisite: PHIL 210
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 327
Credit Weight: 3
Transcript Title: Philosophy of Race
Calendar Title: Philosophy of Race.
Description: An introduction to issues in the philosophy of race, for example: the metaphysical status of race; the biology of racial categories; the social construction of race; the relationship between race and racism; the phenomenology of racialized subjectivity; or, intersections of race, gender, and other identity categories.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 334
Credit Weight: 3
Transcript Title: Ethical Theory
Calendar Title: Ethical Theory.
Description: A course focusing on central questions in ethical theory such as the nature of the good and the right and the factors which determine moral rightness and wrongness.
Notes: Prerequisite: one of PHIL 230, PHIL 237, PHIL 242, PHIL 343, or written permission of the instructor
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 336
Credit Weight: 3
Transcript Title: Aesthetics
Calendar Title: Aesthetics.
Description: An introduction to issues central to aesthetic theory; the nature of aesthetic judgment, perception of the aesthetic object, the nature of the art object.
Notes: Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active
PHIL 341
Credit Weight: 3
Transcript Title: Philosophy of Science 1
Calendar Title: Philosophy of Science 1.
Description: A discussion of philosophical problems as they arise in the context of scientific practice and enquiry. Such issues as the philosophical presuppositions of the physical and social sciences, the nature of scientific method and its epistemological implications will be addressed.
Administrating Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 343
Credit Weight: 3
Transcript Title: Biomedical Ethics
Calendar Title: Biomedical Ethics.
Description: An investigation of ethical issues as they arise in the practice of medicine (informed consent, e.g.) or in the application of medical technology (in vitro fertilization, euthanasia, e.g.)
Administrating Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 349
Credit Weight: 3
Transcript Title: Environmental Philosophy
Calendar Title: Environmental Philosophy.
Description:
An introduction to environmental ethics; potentially also such related fields as philosophy of ecology, environmental aesthetics, and/or other philosophical topics demonstrably relevant to environmental issues.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 350
Credit Weight: 3
Transcript Title: Hist & Phil of Ancient Sci
Calendar Title: History and Philosophy of Ancient Science.
Description:
Topics in ancient pure mathematics (geometry and number theory), "mixed mathematics" (astronomy, music theory, optics, mechanics), and/or natural science (including medicine), studied with a view to philosophical issues raised by the content of ancient science and/or by the logic of scientific argument.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 353
Credit Weight: 3
Transcript Title: The Presocratic Philosophers
Calendar Title: The Presocratic Philosophers.
Description:
An examination of the surviving fragments of the presocratic philosophers and schools of philosophy, as well as later reports of their views.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 354
Credit Weight: 3
Transcript Title: Plato
Calendar Title: Plato.
Description:
An examination of some of the philosophical problems (those in logic, epistemology, metaphysics, and ethics, e.g.) found in a selection of Plato's dialogues.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 355
Credit Weight: 3
Transcript Title: Aristotle
Calendar Title: Aristotle.
Description:
An examination of selected works by Aristotle. The course considers issues in moral philosophy as well as those found in the logical treatises, the Physics and Metaphysics, and in the philosophy of mind.
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active
Prerequisite: PHIL 360 or PHIL 361 is recommended

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 367
Credit Weight: 3
Transcript Title: 19th Century Philosophy
Calendar Title: 19th Century Philosophy.
Description:
An examination of the works of such 19th century philosophers as Mach, Helmholtz, Dedekind, Frege, Marx, Kierkegaard, Schopenhauer, Nietzsche, Mill and Bradley.
Notes:
Prerequisite: A previous course in philosophy is recommended

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 375
Credit Weight: 3
Transcript Title: Existentialism
Calendar Title: Existentialism.
Description:
This course will examine the nature of existentialist thought as represented in various philosophical and literary texts. Particular themes to be examined include freedom, alienation, responsibility and choice, and the nature of self.
Notes:
Prerequisite: one course in philosophy

Administering Faculty: Faculty of Arts
Teaching Department: Philosophy

PHIL 411
Credit Weight: 3
Transcript Title: Topics in Phil of Logic & Math
Calendar Title: Topics in Philosophy of Logic and Mathematics.
Description:
A course focusing on some philosophical issue (e.g., the nature of numbers or the
relation of truth to provability) as it arises in the study of mathematics and
logic.
Notes:
Prerequisites: PHIL 210 or the equivalent, and one intermediate course in
philosophy
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 415
Credit Weight: 3
Transcript Title: Philosophy of Language
Calendar Title: Philosophy of Language.
Description:
An examination of central notions in the philosophy of language (reference,
meaning, and truth, e.g.), the puzzles these notions give rise to, and the
relevance of these notions to such questions as: What is language? How is
communication possible? What is understanding? Is language rule-governed.
Notes:
Prerequisites: PHIL 210 or equivalent and one intermediate course in philosophy
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 419
Credit Weight: 3
Transcript Title: Epistemology
Calendar Title: Epistemology.
Description:
A discussion of central topics in the theory of knowledge. The questions addressed
in the course may include: What is knowledge? Do we have any knowledge? What is
the relation between knowledge and belief? When is belief justified? Is all
knowledge conscious knowledge.
Notes:
Prerequisite: PHIL 210 or equivalent and one intermediate course in philosophy
Administering Faculty: Faculty of Arts
Teaching Department: Philosophy
Status (catalog level): Active

PHIL 421
Credit Weight: 3
Transcript Title: Metaphysics
Calendar Title: Metaphysics.
Description:
An examination of central questions in metaphysics in their historical and
contemporary forms. Topics may be chosen from such issues as: personal identity,
the nature of space and time, the nature of events and properties, possible
worlds, and the problem of realism.
PHIL 427
Credit Weight: 3
Transcript Title: Topics: Critical Phil of Race
Calendar Title: Topics in Critical Philosophy of Race.
Description:
An advanced discussion of topics in the critical philosophy of race.
Notes:
PHIL 327 or permission of the instructor.
Topics vary from year to year.

PHIL 434
Credit Weight: 3
Transcript Title: Metaethics
Calendar Title: Metaethics.
Description:
A study of the status of sentences containing moral terms, judgements about moral claims, and the nature of moral facts.
Notes:
Prerequisite: PHIL 334 or written permission of the instructor

PHIL 436
Credit Weight: 3
Transcript Title: Aesthetics 2

Transcript Title: Sports Medicine Practicum 1
Calendar Title: Sports Medicine Practicum 1.
Description:
This course is the first in a series of three courses intended to provide students with a directed, practical experience in pre-event, on-field and post-event sports therapy interventions. Students will be introduced to current concepts in sports medicine. Students will work closely with one of the McGill varsity teams, as well as intra- and interprofessionally with the staff of the McGill Sport Medicine Clinic (including physiotherapists, athletic therapists, physicians, and other allied health-care professionals).
Notes:
Prerequisite(s): PHTH 245; ANAT 315; PHGY 209; ANAT 316; PHGY 210; POTH 225; POTH 250. Valid CPR-AED level HCP certificate (before the practical work starts). Interviews and selection from the McGill Sport Medicine Clinic staff is required for this course (team allocation will be determined after the interview according to interview performance, availability and student interests).
Restriction(s): This course is only open to second year students in the B.Sc.(Rehabilitation Science); Major in Physical Therapy.
Administrating Faculty: School of Phys & Occ Therapy
Teaching Department: Phys and Occ Therapy
Status (catalog level): Active

PHYS 118
Credit Weight: 1
Transcript Title: E&M Laboratory
Calendar Title: E & M Laboratory.
Description:
The laboratory component of PHYS 142.

Notes:
Winter
Prerequisite: Lecture component of PHYS 142 or equivalent
Restriction: Not open to students who have taken or are taking PHYS 142

Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 131
Credit Weight: 4
Transcript Title: Mechanics and Waves
Calendar Title: Mechanics and Waves.
Description:
The basic laws and principles of Newtonian mechanics; oscillations, waves, and wave optics.

Notes:
Fall
3 hours lectures; 1 hour tutorial, 3 hours laboratory in alternate weeks; tutorial sessions
Corequisite: MATH 139 or higher level calculus course.
Restriction(s): Not open to students who have taken or are taking PHYS 101, or who have taken CEGEP objective 00UR or equivalent.
Laboratory sections have limited enrolment

Transcript Title: Electromagnetism & Optics
Calendar Title: Electromagnetism and Optics.
Description:
The basic laws of electricity and magnetism; geometrical optics.
Notes:
Winter
3 hours lectures, 3 hours laboratory in alternate weeks; tutorial sessions
Prerequisite: PHYS 131.
Corequisite: MATH 141 or higher level calculus course.
Restriction: Not open to students who have taken or are taking PHYS 102, or who have taken CEGEP objective 00US or equivalent.
Laboratory sections have limited enrolment
Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 180
Credit Weight: 3
Transcript Title: Space, Time & Matter
Calendar Title: Space, Time and Matter.
Description:
A nonmathematical, conceptual look at physics, beginning with the idea of space and time, continuing with the historical development of Newtonian mechanics of celestial motion, electricity and magnetism, ether and light, Einstein's special and general theories of relativity, quantum mechanics, matter and antimatter, cosmology and the big bang.
Notes:
Fall
3 hours lectures
Restrictions: Not open to students in a Physics program. Not open to students who have taken PHYS 200.
Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 181
Credit Weight: 3
Transcript Title: Everyday Physics
Calendar Title: Everyday Physics.
Description:
The day-to-day physics behind the materials and phenomena around us. Demonstrations of the intriguing properties of materials and the simple physical theories explaining them.
Notes:
Winter
Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 182
Credit Weight: 3
Transcript Title: Our Evolving Universe
Calendar Title: Our Evolving Universe.
Description:
An elementary course on astronomy and astrophysics. Positional astronomy and
finding your way about the sky. Our evolving picture of the universe. Properties and origins of the solar system. The Big Bang and modern cosmology.

Notes:
Fall
Restriction: Not open to students in a Physics program. Not open to students who have taken PHYS 204 or PHYS 205.

Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 183
Credit Weight: 3
Transcript Title: The Milky Way Inside and Out
Calendar Title: The Milky Way Inside and Out.
Description:
An elementary course on astronomy. Star origins and star formation, supernovae, white dwarfs, neutron stars, and black holes. Galaxies, their structure and their interactions. Stellar clusters, the interstellar medium. Galactic classification and galaxy evolution.

Notes:
Winter
Restriction: Not open to students in a Physics program. Not open to students who have taken PHYS 204 or PHYS 206.

Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 184
Credit Weight: 3
Transcript Title: Energy and the Environment
Calendar Title: Energy and the Environment.
Description:
Energy fundamentals, generation of electricity, heat engines, fossil fuel production and consumption, local and global effects, economic impact, transportation, and pollution and environmental impact of energy use. Non-renewable energy sources (fossil fuels, nuclear) and renewable sources (solar, wind, hydro, geothermal).

Notes:
Restriction: Not open to students who have taken PHYS 228.

Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 186
Credit Weight: 3
Transcript Title: Astrobiology
Calendar Title: Astrobiology.
Description:
Astrobiology is the study of life throughout the universe. The course will cover the search for, and characterization of, habitable worlds. We will explore the formation and evolution of stars and planets, the astronomical and geological factors that impact a planet's habitability, the evolution of life on Earth, and the potential for biological evolution beyond an organism's planet of origin.

Notes:
Restriction(s): Not open to students who have taken or are taking EPSC 182, ANAT 182, or EPSC 186.

Winter
This is a double-prefix course and is identical in content with EPSC 186.

Status (catalog level): Active

PHYS 319
Credit Weight: 3
Transcript Title: Introduction to Biophysics
Calendar Title: Introduction to Biophysics.
Description:
Emerging physical approaches and quantitative measurement techniques are providing new insights into longstanding biological questions. This course will present underlying physical theory, quantitative measurement techniques, and significant findings in molecular and cellular biophysics. Principles covered include Brownian motion, low Reynolds-number environments, forces relevant to cells and molecules, chemical potentials, and free energies. These principles are applied to enzymes as molecular machines, membranes, DNA, and RNA.

Notes:
Winter. Students with training in physics and biology will be well-suited to the course.
Prerequisites: BIOL 200 or BIOL 219; MATH 222; PHYS 230 and (PHYS 232 or PHYS 253), or permission of the instructor.
Restriction: Not open to students who have taken or are taking BIOL 319

Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 320
Credit Weight: 3
Transcript Title: Introductory Astrophysics
Calendar Title: Introductory Astrophysics.
Description:
A survey of astrophysics ranging from stars and planets, to compact objects, galaxies, and the large-scale evolution of the Universe. A calculus-based course, with a focus on simple mathematical derivations that capture the essential physics.
Notes:
Prerequisites: MATH 222; PHYS 230 or PHYS 260 or permission of the instructor.
Not open to students who have taken PHYS 214.
Fall
Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 321
Credit Weight: 3
Transcript Title: Data Sci & Obs Astrophysics
Calendar Title: Data Science and Observational Astrophysics.
Description:
Data analysis methods as applied in experimental physics, with an emphasis on applications in observational astrophysics. An introduction to Bayesian inference, model selection, Markov Chain Monte Carlo, common probability distributions, jackknives and null tests, as they are used in the analysis of observational data from across the electromagnetic spectrum.
Notes:
Corequisite(s): PHYS 241; PHYS 258
Prerequisite(s): COMP 208; PHYS 257
Students with sufficient knowledge of computer programming do not need to have taken COMP 208
Administering Faculty: Faculty of Science
Teaching Department: Physics
Status (catalog level): Active

PHYS 328
Credit Weight: 3
**Transcript Title:** Electronics  
**Calendar Title:** Electronics.  
**Description:** Semiconductor devices, basic transistor circuits, operational amplifiers, combinatorial and sequential logic, integrated circuits, analogue to digital converters. The laboratory component covers design, construction and testing of basic electronic circuits.  
**Notes:**  
Fall  
2 hours lectures; 3 hours laboratory  
Prerequisite: PHYS 241 or permission of instructor

**Credit Weight:** 3  
**Transcript Title:** Undergraduate Research Project  
**Calendar Title:** Undergraduate Research Project.  
**Description:** Independent research project with a final written report.  
**Notes:** Restrictions: This course cannot be taken under the S/U option. Departmental permission required. Students cannot be supervised by the same instructor for two 396 Science courses. Open to students in programs offered by the Faculty of Science only.  
Note: Enrolment may be limited. Students are advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project is available. Individual projects may be suggested each term which may have project-specific prerequisites. Students may also approach professors to devise their own projects. Some projects may be accessible to students in other disciplines. See ?https://www.mcgill.ca/science/research/undergraduate-research/science-research-courses for more information about available projects and application forms and procedures.

**PHYS 404**  
**Credit Weight:** 3  
**Transcript Title:** Climate Physics  
**Calendar Title:** Climate Physics.  
**Description:** This course covers the essentials of climate physics through the lens of one-dimensional, vertical atmospheric models. This includes shortwave and longwave radiative transfer, convection, phase changes, clouds, greenhouse gases, and atmospheric escape. This is an adequate level of detail for understanding Earth's climate, paleoclimate, anthropogenic climate change, or pursing studies of Solar System planets and extrasolar planets.
Notes:
Prerequisite(s): PHYS 230 or PHYS 251, PHYS 232 or PHYS 253, MATH 315 or MATH 325, and MATH 222
Restriction(s): Not open to students who have taken ATOC 404

PLNT 203
Credit Weight: 3
Transcript Title: Economic Botany
Calendar Title: Economic Botany.
Description:
Study of plants which are useful or harmful to humans, their origins and history, botanical relationships, chemical constituents which make them economically important; their roles in prehistoric and modern cultures and civilization and possible impact in the future.

Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Plant Science
Status (catalog level): Active

PLNT 221
Credit Weight: 1
Transcript Title: Introduction to Fungi
Calendar Title: Introduction to Fungi.
Description:
Field and laboratory survey of local representatives of the major groups of fungi, including edible and poisonous mushrooms. The role of each group in terrestrial and aquatic ecological niches will be studied with respect to saprophytism, parasitism and symbiosis. Economic importance of fungi in medicine and biotechnology will be introduced.

Notes:
Four 4-hour field labs, given during the second 4 weeks of semester
Second 4 weeks of term only
This course carries an additional charge of $31.15 to cover the cost of transportation (bus rental) for local field trips. The fee is refundable only during the withdrawal with full refund period.

Calendar Title: Special Topics: Plant Science 1.
Description:
Special topics in plant science. A course of independent study by the student under the guidance of a professor of recognized competence in the area of the chosen topic.
Notes:
Restriction(s): Not open to students who have taken PLNT 450.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Plant Science
Status (catalog level): Inactive
PLNT 353
Credit Weight: 3
Transcript Title: Plant Structure and Function
Calendar Title: Plant Structure and Function
Description: The general anatomy and physiology of vascular plants with emphasis on how physiological processes influence function.
Notes:
Winter
2 lectures and one 3-hour lab
Prerequisites: AEBI 210 and LSCI 204 and LSCI 211 or permission of instructor.
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Plant Science
Status (catalog level): Active

PLNT 358
Credit Weight: 3
Transcript Title: Flowering Plant Diversity
Calendar Title: Flowering Plant Diversity
Description: Principles of classification and identification of flowering plants and ferns, with emphasis on 35 major families of flowering plants and the habitats in which they grow.
Notes:
A 4-day field week is held the week preceding the start of classes
Prerequisite: AEBI 210 or ENVR 202 or permission of instructor
A $92.68 fee is charged to all students registered in this course, which has a fieldwork component prior to the beginning of classes in August. This fee is used to support the cost of excursions, a hand lens, instructional handouts and identification aids. Students who have already received a hand lens may request a reimbursement of a portion of this charge through their department.

Credit Weight: 3
Transcript Title: Plant Breeding
Calendar Title: Plant Breeding.
Description:
Principles and practices of plant breeding, including reproduction of crop plants; plant hybridization; sources of genetic variation; selection methods used for self- and cross-pollinated crops and for clonally reproduced crops; breeding for diseases and pest resistance; applications of biotechnology in plant breeding.

Notes:
Prerequisites: AEBI 210 and LSCI 204
Administering Faculty: Faculty of Agric Environ Sci
Teaching Department: Plant Science
Status (catalog level): Active

PLNT 460
Credit Weight: 3
Transcript Title: Plant Ecology
Calendar Title: Plant Ecology.
Description:
Theory and practice of plant ecology with an emphasis on the interaction between patterns and ecological processes and the dynamics, conservation and management of plant populations and communities over a range of temporal and spatial scales.

Notes:
3 lectures and one 3-hour lab
Prerequisite: AEMA 310 or permission of instructor.
This course carries an additional charge of $170.00 to cover the cost of
transportation (bus rental) for local field trips. The fee is refundable only during the withdrawal with full refund period.

Transcript Title: Intro to Political Science
Calendar Title: Introduction to Political Science.
Description:
This course presents an introduction to political science, including the basic theories, concepts, approaches, and to the enduring questions that motivate political research. It prepares students for further coursework in political science. Students will leave this course with an empirical grasp of current political debates, as well as an overall understanding of the approaches to the fundamental issues that arise in the subfields of the department: political theory, comparative politics, international relations, and Canadian politics.

Credit Weight: 3
Transcript Title: Memory, Place, and Power
Calendar Title: Memory, Place, and Power.
Description:
This interdisciplinary class explores the relationships among memory, place, and political power. The course begins with an introduction to key classical, Enlightenment, and contemporary texts on memory and place-making. It then uses this foundation to examine the symbolic transformation of public space, in particular the construction, alteration, and destruction of monuments, memorials, and museums in post-communist states and in North America. This approach emphasizes the social quality of memory, exploring the ways in which political interests, economic resources, and social practices can shape something as ostensibly personal and individual as memory.
Notes:
Prerequisite(s): One of the following: GEOG 316, GEOG 325, or GEOG 331; or one 200- or 300-level course in Comparative Politics required; or permission of instructor.
Restriction(s): Not open to students who have taken or are taking GEOG 420, or who have taken POLI 432 when the topic was "Memory, Place, and Power".

**Transcript Title:** Aboriginal Rights in the Canadian Constitution

**Calendar Title:** Aboriginal Rights in the Canadian Constitution.

**Description:**
This course explores the inclusion, impact, and interpretation of s.35 of the Constitution Act, 1982. In s.35, "the existing aboriginal and treaty rights of the aboriginal peoples of Canada are hereby recognized and affirmed". What does it mean for Canada to recognize, affirm, define, justify, and implement such rights? The course sets out how one might think about the constitutional promise of s.35, and challenges us to address whether this promise has been realized. It sets out how s.35 has structured Indigenous-settler politics since 1982.

Transcript Title: Intervention in World Politics
Calendar Title: Intervention in World Politics.
Description:
Examination of the history, theory and politics of intervention, focusing on the 19th century onward. It examines interventions for humanitarian purposes and interventions in civil wars in the 19th century, critical cases of non-intervention from the first half of the 20th century, intervention and resistance in the Cold War and decolonization periods, and interventions since the end of the Cold War. Legal, ethical and political frameworks for assessing the legitimacy and effects of intervention as a contemporary practice, the ways in which it has been contested, and its relationship to core principles, such as state sovereignty.
Notes:

Transcript Title: Hist Analysis in Pol Science
Calendar Title: Historical Analysis in Political Science.
Description:
This seminar examines how political scientists engage with historical research. The course will interweave two broad themes: (1) methodological and ontological issues in historical social science, including the nature of historicist explanations, the comparative-historical method, path dependence and critical junctures, rational choice explanations, and evolutionary theory; and (2) substantive macro theoretical questions that are central to the genre of historical social science, including questions of modernization, democratization, revolutions, state formation, colonialism, political parties, and historical analogies in foreign policy-making. In interweaving these two themes, we are interested in the broad macro ontological frameworks, the merits of the substantive arguments, and the interaction between the two.

Transcript Title: Fieldwork: Challenges & Strats
Calendar Title: Fieldwork: Challenges and Strategies.

Description:
This course provides an examination of the theoretical questions regarding the
epistemology and ontology in fieldwork-based research, debates about research
ethics, and discussions about what constitutes “the field.” The aim is to give
students the critical tools that are necessary to prepare them to conduct
different types of field research, which can include participant-observation,
interviewing, and archival research. The course will also engage with critical
perspectives on issues such as positionality, reflexivity, transparency,
representation, and embodiment.

Transcript Title: Applied Evaluation Practice
Calendar Title: Applied Evaluation Practice.
Description:
The professional practice of evaluation and its application in field settings. Specific evaluation techniques will be examined, including logic modelling, designing evaluation questions, selecting a study design, establishing criteria of merit, and planning for the communication of results. Emphasis is on designing evaluations that are more likely to produce actionable findings and have the potential to promote a more equitable and just society.
Notes:
Prerequisites: A course on social science research methodology and a course in quantitative or qualitative analytic methods. Permission of the instructor.
Restrictions: Not open to students in the Master of Public Policy; Non-Thesis program.

PPOL 602
Credit Weight: 3
Transcript Title: Microeconomics for Pub Policy
Calendar Title: Microeconomics for Public Policy.
Description:
Examines the essential microeconomic principles for analyzing market behaviour and the consequences of government policies. Emphasis is placed on contrasting competitive markets with oligopolistic and monopolistic ones. Examines the case for relatively free markets and the many situations that suggest a case for government intervention.
Notes:
Restriction: Only open to students in the Master of Public Policy; Non-Thesis program.
Students must be registered in the MPP program or have the permission of the program director and course instructor. Since incoming students are required to have a macroeconomics course, this course concentrates on microeconomic methods.

PPOL 604
Credit Weight: 3
Transcript Title: Law, Human Rights & Pub Policy
Calendar Title: Law, Human Rights and Public Policy.
Description:
Explores law as the normative framework for public policy. Law is examined as both a policy driver and a policy outcome for resolving conflict and determining the institutional and policy legitimacy. A critical perspective on the impacts of major Western legal systems on other systems and cultures, and explores how international law and transnational law address some of these challenges. Provides basic legal literacy tools, focusing on human rights and human rights-based approaches.
Notes:
Restriction: Only open to students in the Master of Public Policy; Non-Thesis program.

Transcript Title: Adv Common Law Obligations
Calendar Title: Advanced Common Law Obligations.
Description:
Relationship between tort, contract, and restitution in theory and practice
(including consideration of negligent misrepresentation, economic loss, exclusion
clauses, and means of overcoming problems of privity); relationship between Common
law and no-fault regimes; special problems in civil liability, such as
non-feasance and the liability of public authorities. The study of unjust
enrichment as a basis for remedies at common law, in equity and under statute and
of its role as an integral part of the common law alongside contract and tort.
This course provides an opportunity for immersion in the culture, epistemology and
practices of the Common Law Tradition.

Transcript Title: Child Dev.: Psychopathol.
Calendar Title: Child Development: Psychopathology.
Description:
Introduction to the field of behavior disorders of childhood and adolescence, including core issues, theoretical and methodological underpinnings, descriptions and discussions of many disorders, clinical and research data, and treatment approaches. Three major assumptions will be woven through the course.
Notes:
Winter
Two lectures and one conference weekly.
Corequisite: PSYC 304 or PSYC 337 or permission of instructor

Administering Faculty: Faculty of Science

Teaching Department: Psychology

Status (catalog level): Active

PSYC 413
Credit Weight: 3
Transcript Title: Cognitive Development
Calendar Title: Cognitive Development.
Description:
In-depth exploration of cognitive development in infants and children including knowledge representation and processing, conceptual development, language development, and theories and principles of cognitive development.
Notes:
Fall
3 hours
Prerequisite: PSYC 304 or PSYC 213 or equivalent

Administering Faculty: Faculty of Science

Transcript Title: Social Development
Calendar Title: Social Development.
Description: Advanced study of the development of social behaviour and social cognition in children. Topics include: socialization, attachment, aggression, exploration, role taking, communication, family and peer relations, self and person perception. The development of these social processes within the framework of three general theories of development: behaviour genetics, learning, and cognitive-developmental.
Notes: Fall
Prerequisites: PSYC 304 and PSYC 305
Administering Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

PSYC 415
Credit Weight: 3
Transcript Title: EEG Laboratory in Psychology
Calendar Title: Electroencephalography (EEG) Laboratory in Psychology.
Description: Introduction to the use of electroencephalography (EEG) for measuring brain function in behavioural neuroscience experiments. Recording and analyzing EEG data, as well as in designing experiments and interpreting findings using this method. Topics include the neural basis of EEG, recording principles and techniques, EEG data analysis (frequency bands, averaging, sources of noise, filtering, signal to noise), event-related potential analysis (ERP), spectral analysis and time-frequency analysis, data visualization, topographical maps.
Notes: Prerequisites: PSYC 211 (or NCSI 201), PSYC 212, and PSYC 213
Administering Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

Transcript Title: Research Project & Seminar
Calendar Title: Research Project and Seminar.
Description:
Under supervision of an adviser approved by the Department, students design and carry out a research project. Students report their research in seminars throughout the year, in a final written report that takes the form of a data-based APA style manuscript, and in a poster presentation at the departmental poster session.
Notes:
Prerequisites: PSYC 204, PSYC 305.
Restriction: Requires departmental approval.
Restriction: Only for Major or special students in U3 who intend to proceed to graduate school
Students will be admitted on the basis of a written application on forms available from the Department (Room N7/9). Applications must be submitted by August 1st.
Students must register for both PSYC 450D1 and PSYC 450D2.
No credit will be given for this course unless both PSYC 450D1 and PSYC 450D2 are successfully completed in consecutive terms

Transcript Title: Neuroscience of Social Psych
Calendar Title: Neuroscience of Social Psychology.
Description:
The biological underpinnings of human social cognition and behavior, including neural, hormonal, and genetic mechanisms. By integrating multiple levels of analysis (biological, psychological), as well as different perspectives (basic, clinical, applied), the aim is to gain a deeper understanding of classic social psychological processes. Topics will include social cognition/theory of mind, empathy and understanding others, cooperation and prosocial behavior, interpersonal relationships, the self/agency, morality and anti-social behavior as well as basic methodological approaches to the study of social neuroscience and emerging issues in the field.
Notes:
Prerequisites: PSYC 215 and (NSCI 201 or PSYC 211) and one of (PSYC 311 or PSYC 318 or PSYC 331 or PSYC 332 or PSYC 333), or permission of instructor.

Transcript Title: Psychoneuroendocrinology
Calendar Title: Psychoneuroendocrinology.
Description: This advanced seminar course offers an in-depth introduction to current topics in psychoneuroendocrinology. Students will read and discuss original scientific literature from human and animal research interrogating the mechanisms by which hormones act in the brain to influence behaviour in health and disease. Students will gain a refined understanding of key concepts in psychoneuroendocrinology, such as negative feedback control and the key neuroendocrine axes and their role in behavioural control. They will apply this knowledge to critically evaluate original scientific literature and generate hypothesis-driven research questions from the scientific literature.
Notes: Fall Please note that a B- in the prerequisite course(s) is recommended.
Prerequisite: One of PSYC 311, PSYC 318, PSYC 342, NSCI 201, or permission of the instructor.
Restriction: Open only to Psychology, Cognitive Science and Neuroscience students. Not open to students who have taken PSYC 365.

Status (catalog level): Active

PSYC 522
Credit Weight: 3
Transcript Title: Neurochemistry and Behaviour
Calendar Title: Neurochemistry and Behaviour.
Description:
Anatomical, biochemical and physiological aspects of neurotransmitter systems in the brain, current theories of the function of these systems in normal and abnormal behaviour, and the actions of psychotropic drugs.
Notes:
Winter
2 lectures
Prerequisites: any two of the following NSCI 201, PSYC 311, PSYC 318, ANAT 321, PHGY 314, BIOL 306
Restrictions: Not open to students who have taken or are taking PHAR 562
Administrating Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

PSYC 526
Credit Weight: 3
Transcript Title: Advances in Visual Perception
Calendar Title: Advances in Visual Perception.
Description:
We examine in detail the structure of the visual system, and its function as reflected in the perceptual abilities and behaviour of the organism. Parallels are also drawn with other sensory systems to demonstrate general principles of sensory coding.
Notes:

PSYC 528
Credit Weight: 3
Transcript Title: Vulnerability to Dep. and Anx.
Calendar Title: Vulnerability to Depression and Anxiety.
Description:
This course will examine in depth cognitive, behavioral, biological, and developmental psychopathology models of the etiology of depression and anxiety. Within each theoretical perspective, core issues, theoretical and methodological underpinnings, and research data will be examined.
Notes:
Prerequisite: PSYC 337 or PSYC 412 or permission of instructor. Requires departmental approval.
Administering Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

PSYC 529
Credit Weight: 3
Transcript Title: Music Cognition
Calendar Title: Music Cognition.
Description:
Interdisciplinary study of music cognition, with an emphasis on psychological, computational, and neuroscientific approaches. Focuses on listeners' response to sound, including perception, attention, memory, motor control, skilled performance, and emotional response.
Notes:
Fall
Prerequisites: PSYC 212, PSYC 213, PSYC 204 (or equivalent)
Administering Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

PSYC 530
Credit Weight: 3
Transcript Title: Applied Topics in Deafness
Calendar Title: Applied Topics in Deafness.
Description:
Covers fundamental topics in deafness (sensory, perceptual, cognitive, social, linguistic, education and health issues) from an applied psychological perspective. Lectures and seminar presentations plus field work involving ASL/LSQ.
Notes:
Fall
Prerequisite: PSYC 340 or PSYC 316 or equivalent. Permission of instructor
Administering Faculty: Faculty of Science
Teaching Department: Psychology
Status (catalog level): Active

PSYC 531
Credit Weight: 3
Transcript Title: Structural Equation Models
Calendar Title: Structural Equation Models.
Description:
The course introduces basic concepts underlying structural equation models (SEM). SEM, which combine regression analysis and factor analysis, are quite useful and are currently very popular in analyzing data that arise in social, developmental and clinical psychology. The students are expected to get first-hand experiences in fitting SEM, and learn how to interpret and report the results from SEM.
Notes:
Fall
one 2-hour lecture plus one lab
Prerequisite: PSYC 305 and (PSYC 439 or PSYC 536) or permission of the instructor

PSYC 535
Credit Weight: 3
Transcript Title: Adv Topics in Social Psych
Calendar Title: Advanced Topics in Social Psychology.
Description:
Classic and contemporary readings in a specific content area within social psychology will be assigned in order to examine the sub-area in depth. The focus will vary depending upon the specialty area of the instructor. These areas include interpersonal relationships, intergroup relations, the self, and social cognition.
Notes:
Winter
Prerequisites: PSYC 215; and PSYC 333 or PSYC 351 or PSYC 380.
Restriction: Departmental permission required.
Restriction: Graduate Students, enrolment limited

PSYC 537
Credit Weight: 3
Transcript Title: Adv Seminar in Psych of Lang
Calendar Title: Advanced Seminar in Psychology of Language.
Description:
Topics may include: the neural basis of language, evolutionary approaches to language, pragmatics and figurative language processing, disordered language processing, models of spoken word recognition.
Notes:
Fall
Prerequisites: PSYC 213 and one of: PSYC 340, LING 200, or LING 201.
Note: Prior background in the psychology of language, cognitive psychology, or linguistics is essential.

PSYC 560
Credit Weight: 3
Transcript Title: Machine Lrng Tools: Psychology
Calendar Title: Machine Learning Tools in Psychology
Description:
An overview of various methods for understanding and predicting complex and often large datasets, which have been developed in machine learning and statistics. It focuses on the conceptual underpinnings of popular supervised and unsupervised learning methods and the applications of the methods to various datasets from psychology and closely related disciplines (e.g. neuroscience, consumer behaviour, psychiatry) using existing software packages for the methods.

Notes:
1. Students who have taken COMP 202 or COMP 204 and who have taken freshman linear algebra and calculus might instead consider taking COMP 551
2. Students in both psychology and computer science are strongly encouraged to take COMP 551 over PSYC 560.
Open to U2 students or above. Not open to students who have taken or are taking COMP 551.
Prerequisites: PSYC 305

PSYC 562
Credit Weight: 3
Transcript Title: Measurement of Psych Processes
Calendar Title: Measurement of Psychological Processes
Description:
Intermediate level theory and methods for the measurement of latent variables in psychology and related fields. In-depth coverage of theories of validity and psychometrics as applied in psychology. Introduction to quantitative methods for scale development, use, and evaluation. Discussion of current topics and challenges in psychological measurement and psychometrics.

Notes:

Transcript Title: Research Project in Psychiatry
Calendar Title: Research Project in Psychiatry.
Description: Individually supervised research projects in either fundamental or clinical psychiatry, with a final written report.
Notes: Prerequisites: A course in biostatistics (eg. PSYC 305 or equivalent), approval of course instructor(s) and agreement of a research supervisor with appointment in Psychiatry.
Restrictions: Open to U2 and U3 undergraduates. Departmental permission required. This course cannot be taken concurrently by students enrolling for undergraduate honours thesis projects, or for the following research courses: PSYC 395, PSYC 450D1/D2, PSYC 494D1/D2, PSYC 494N1/N2, PSYC 495, except with special permission. Students must have a GPA of 3.0 to enroll.
Work done in this course cannot be used for any other course. Note: Students are
advised to start the application process well before the start of the term and to plan for an alternative course in the case that no suitable project/supervisor is available. Individual projects will be suggested by researchers within the psychiatry department and available through the course coordinator or alternatively students may approach professors to devise their own potential projects for approval. Students must register for both PSYT 400D1 and PSYT 400D2. No credit will be given for this course unless both PSYT 400D1 and PSYT 400D2 are successfully completed in consecutive terms.

### PSYT 401
**Credit Weight:** 8  
**Transcript Title:** Psychiatry Clerkship  
**Calendar Title:** Psychiatry Clerkship.  
**Description:**  
The psychiatry clerkship is designed to provide students with the core knowledge and skills required to understand and assist patients and families with either psychiatric illness, or overwhelming emotional distress. It also provides students with an understanding of the complex interplay between psychiatric and non-psychiatric illness, and the need to be aware of medical illness in patients presenting with psychiatric symptoms, and vice versa. Students at all training sites will receive the equivalent of 8-weeks of training in psychiatry, where they will be exposed to the principles and practice of child and adult psychiatry through their work in a variety of clinical settings, in addition to participating in core learning sessions and independent learning activities. The complementary roles of the family physician and the psychiatrist in the care of patients with mental illness will be highlighted.

PSYT 455
Credit Weight: 3
Transcript Title: Neurochemistry
Calendar Title: Neurochemistry.
Description:
Covers biochemical mechanisms underlying central nervous system function. Introduces basic neuroanatomy, CNS cell types and morphology, neuronal excitability, chemically mediated transmission, glial function. Biochemistry of specific neurotransmitters, endocrine effects on brain, brain energy metabolism and cerebral ischemia (stroke). With examples, where relevant, of biochemical processes disrupted in human CNS disease.
Notes:
Winter
Prerequisite(s): BIOC 311, BIOC 312
Restriction: Not open to students who have taken BIOC 455

Transcript Title: Adv: Neur of Mtl Disorders
Calendar Title: Advances: Neurobiology of Mental Disorders.
Description: Current theories on the neurobiological basis of most well known mental disorders (e.g. schizophrenia, depression, anxiety, dementia). Methods and strategies in research on genetic, physiological and biochemical factors in mental illness will be discussed. Discussion will also focus on the rationale for present treatment approaches and on promising new approaches.
Notes:
Winter
3 hours
Prerequisite (Undergraduate): BIOC 212 and BIOC 311, or BIOC 312, or BIOL 200 and BIOL 201, or PHGY 311, or PSYC 308 and an upper-level biological science course with permission of the instructors, or equivalent. Basic knowledge of cellular and molecular biology is required.
Restriction: Open to U3 and graduate students only.
Restriction: Graduate Studies: strongly recommended for M.Sc. students in Psychiatry.

Transcript Title: Early Adversity,Dvlpmnt&Health  
Calendar Title: Early Adversity, Development and Health .
Description:
The concept of adversity during critical developmental periods from gestation to adolescence. Examination of neurodevelopmental mechanisms, neural pathways and plasticity leading to vulnerability and resilience. How single cell expression patterns, neuronal networks and gene association studies can inform about the biological underpinnings of adversity, the individual differences in susceptibility and how these biological mechanisms link psychopathologies to other comorbidities.

Notes:
Prerequisites: BIOL 201, BIOC 212, ANAT 212, BIOL 202, BIOL 306, BIOL 370, ANAT 322 or equivalent; permission of the instructor if prerequisites are not met.
Supplementary Calendar Info: Open to U3 undergraduate students and graduate students (MSc and PhD level). Limit of 25 students. A knowledge of basic mechanisms of biology, physiology and anatomy as covered by respective undergraduate courses is expected and required to succeed in this course. Permission from the responsible instructor is required to register if course pre-requisites are not met. Priority will be given to students having the course pre-requisites and grades higher than C in these courses (B). Course is not recorded.

Transcript Title: Soc. & Cult. Research Methods
Calendar Title: Social and Cultural Research Methods.
Description:
Introduction to the various research methods commonly used in social and cultural psychiatry, including qualitative, quantitative and mixed-methods approaches, with special attention to the unique challenges of working with people with mental illness. Emphasis is placed on the following: study design, cross-cultural measurement, sampling, recruitment, execution, bias, analysis and dissemination. Classic studies in social and cultural psychiatry will be used as examples to illuminate points made. This course will be held every May as part of the Summer Program in Social and Cultural Psychiatry.

Notes:
This course will be useful for graduate students in psychiatry, social work, nursing, occupational therapy and related disciplines with an interest in mental health research from a social and cultural perspective.
**Due to the intensive nature of this course, the standard add/drop and withdrawal deadlines do not apply. Add/drop is the third lecture day and withdrawal is the sixth lecture day.**

QCST 200
Credit Weight: 3
Transcript Title: Intro to the Study of Quebec
Calendar Title: Introduction to the Study of Quebec.
Description:
Introduction to the ideas and approaches that scholars have used and developed to study Quebec, including some of the foremost issues that have shaped Quebec historically and continue to influence contemporary life. The changing notions about territory, identity, language, citizenship and belonging, the complexity and diversity of Quebec (11 Aboriginal nations, multilingual, multiethnic and religious communities, minority status within Canada) will also be explored from a comparative perspective to identify characteristics that Quebec shares with other nations and those that are different.
Notes:
This course offers students the possibility of doing a community engagement internship (or ExCELR option).

Transcript Title: Quebec Studies Summer Seminar
Calendar Title: Quebec Studies Summer Seminar.
Description:
Intensive course, mainly in French, that introduces non-Quebec students to Quebec and Montreal's history and culture. Special emphasis on French-language skills.
Notes:
Prerequisite: Intermediate level placement test required or permission of the instructor.
Restrictions: Designed for non-Quebec and non-francophone students. Intermediate proficiency in French is required. Placement test is required. Enrolment is limited to 25 students. Not open to students who have taken FRSL 326 or QCST 300. This course carries an additional charge of $51.87 to cover the cost of guided visits to the following five Montreal Museums: Pointe-à-Callière, Musée d'archéologie et d'histoire de Montréal; Centre d'histoire de Montréal; Musée d'Art contemporain de Montréal; Musée des Beaux-Arts de Montréal; Musée McCord; Musée d'histoire de Montréal. The fee is refundable only during the withdrawal with full refund period.
Weekend cultural activities will reinforce course themes. This course offers students the possibility of doing a community engagement internship (or ExCELR option).

QLSC 600D1

Transcript Title: Foundations of Quant Life Sci
Calendar Title: Foundations of Quantitative Life Sciences.
Description:
Provides an overview of important problems in the life sciences and introduces students to the latest computational, mathematical, and statistical approaches involved in their solution. Includes a survey of modern technologies for biological data acquisition and promotes a common language to communicate across the biological, physical, mathematical, and computational sciences. Topics will include bioinformatics and computational genomics, nonlinear dynamics in biological systems, linear and nonlinear models of biological signals, biophysical imaging technology, emergent behaviour in biophysical networks, and ecosystem dynamics and modeling.
Notes:
Prerequisite(s): BIOL 200 or BIOL 201; COMP 206, COMP 250, MATH 314; MATH 223 or MATH 236; MATH 323 or MATH 324
Restriction(s): Priority given to students enrolled in the ad hoc Quantitative Life Sciences Ph.D. program.
No credit will be given for this course unless both QLSC 600D1 and QLSC 600D2 are successfully completed in consecutive terms.
Students must register for both QLSC 600D1 and QLSC 600D2

RELG 207
Credit Weight: 3
Transcript Title: Intro to Study of Religions
Calendar Title: Introduction to the Study of Religions.
Description:
This course is an introduction to classic and contemporary approaches to the academic study of religions. This includes perspectives from philosophy, theology, anthropology, sociology, psychology, phenomenology, and feminism. Students are also exposed to applications of these perspectives from visiting scholars who treat some aspect of a religious tradition in light of current-day interests and events. The primary objective is to introduce students to the principal theories and methods that have shaped our understanding of religion, its various meanings as well as its roles and functions in society.

Notes:
Restriction(s): Not open to students who have taken RELG 255.

Credit Weight: 3
Transcript Title: Theology through Fiction
Calendar Title: Theology through Fiction.
Description:
Fiction of Christian provenance, in a variety of subgenres, including famous works
by the likes of Dostoevsky, Undset, Chesterton, Mauriac, Lewis, Tolkien, Waugh, Greene, Percy, and O'Connor, is both theologically informed and theologically informative. Works selected from such literature will be read and discussed with a view to probing the notions of redemption in play.

Transcript Title: Rivers, Religion, & Enviro S-Asia
Calendar Title: Rivers, Religion, and Environment in South Asia.
Description:
This class explores the significance of major South Asian river systems, including Ganges, Indus, Brahmaputra, and Yamuna, in classical and contemporary terms. In Hindu scriptures, rivers may be incarnate, emplaced goddesses; in contemporary South Asia, rivers are central to Hindu pilgrimage while facing environmental pressures from pollution, overuse, flooding, and drought. Finally, rivers of the Indian subcontinent cross and delineate international boundaries, creating friction between India, Pakistan, and Bangladesh. As key lifelines shared in multi-religious South Asia, are rivers vulnerable wards of the state or valuable `citizens¿ who must be recruited to do their part?
Notes:

**Transcript Title:** Christian Ethics of Love

**Calendar Title:** Christian Ethics of Love.

**Description:**
This course will focus on the philosophical sources of love and on their uses by
Christian authors. By comparing both their premises and methods, we will see how
different authors in a particular tradition (Christianity) offer various answers
to the themes of love, friendship and charity.

Transcript Title: Religious Ethics
Calendar Title: Religious Ethics.
Description:
A discussion of ethical theory will provide the background for an analysis of the relationship between religious world views and moral reason. Attention will be given to the way in which the dominant religious traditions view the exemplars of religious virtue, and to how the virtues exemplified are related to and justified by the faith tradition in which they operate.

Transcript Title: Religion, Philosophy, Modernity
Calendar Title: Religion, Philosophy, Modernity.
Description:
Through primary source readings, this class will examine the intellectual history of this change, will identify the agents of this change, both philosophical and theological, and will consider the significance and implications of inhabiting a
'modernity' that is, and understands itself as, 'secular.' Charles Taylor's recent book, *A Secular Age*, narrates a historical development, from a 'pre-modern' condition, in which it was 'virtually impossible not to believe in and encounter God,' to a modern and contemporary situation in which 'faith is an embattled option.' Within the 'context of our self-understanding,' 'secularism' has become a 'default option.'

Transcript Title: Global Islam
Calendar Title: Global Islam.
Description:
Western scholarship has oscillated between orientalizing Islam and co-opting it into the Western (Abrahamic) fold of religious traditions. The course will challenge both perspectives by exploring Islam’s dynamic unfolding across a variety of civilizational regions and during subsequent epochs. Its patterns of premodern globalization are nowadays retrieved, sometimes by fitting Islamic cultures into neoliberal patterns of globalization, more often by sidelining or overlaying the Westphalian system of sovereign nation-states. The course will show how Islamic traditions have, both in history and in the present, developed unique intellectual tools and practical resources to interface both with ‘radical’ (Abrahamic) and ‘dialogic’ (non-Abrahamic) religious traditions: from the West (also via labor-based migration), through Central and South Asia, to East and Southeast Asia.

**Status (catalog level):** Active

**RELG 573**  
**Credit Weight:** 3  
**Transcript Title:** Religions in Global Society  
**Calendar Title:** Religions in Global Society.  
**Description:**  
This seminar is devoted to the study of a plurality of often intersecting religious traditions in a globalizing world, based on interdisciplinary scholarship drawing from history, sociology, anthropology and archaeology. It starts from locating religious phenomena within intersecting social, cultural and political fabrics around the world. It articulates the relation between a multi-faith appreciation of the role of religions in a variety of societies and the emergence of diverse patterns of secularity in them. It facilitates a rich understanding of a complex past to shed light on the new challenges of globalization, including the opening of horizons of postsecular understandings and arrangements.

Credit Weight: 3
Transcript Title: Retail Management Project
Calendar Title: Retail Management Project.
Description: A team-based, experiential project that involves defining actual problems and recommending solutions in the realm of an organization, or at the interface of different organizations (e.g. supply chains), including strategic and operational issues in retail management. Each project is multidisciplinary or multi-functional in nature and will have significant impact on one or more operational/competitive capabilities of the organization.
Notes: Prerequisite(s): MGCR 271 or equivalent or MGCR 352
Restricted to U2 & U3 students.
The instructors will make sure that the workload of the project is commensurate with the course credit and team size.
The instructors will also be involved during the course as advisers, progress reviewers, logistics coordinators, evaluators, and will serve as liaison between the companies and the teams

Transcript Title: Capitalism, Socialism & Democracy
Calendar Title: Capitalism, Socialism, and Democracy.
Description:
This course traces the historical development of the conflict between labor, capital, and the state over the meaning and content of democracy, and how that conflict has shaped politics, economics, and ideology over time. Through a
combination of theoretical analysis of core concepts and empirical case studies, students will gain a sociological understanding of the complex forces that have shaped our modern world. Includes analysis of nation-state formation, class formation and class conflict, welfare state emergence and development, and labour unions and labour policy.

Notes:
Prerequisite(s): SOCI 210 and SOCI 211, or permission of the instructor.

**Description:** Tools needed to work with complex Canadian surveys in order to address social issues. Theoretical sessions given by experts from the academic community and statistical agencies are combined with laboratory workshops where students apply advanced statistical methods to survey data and complete their own research projects.

**Notes:**
Prerequisites: Advanced undergraduate course in statistics (SOCI 461 or equivalent); passive bilinguism (French and English); and permission of the instructor.

Passive bilingualism (English and French) required, as training will be given in both languages. Maximum enrollment: 12. With permission of the instructor. The course is offered over 2 semesters, and meets 6 hours every 2 weeks. Students must register for both SOCI 631D1 and SOCI 631D2.
No credit will be given for this course unless both SOCI 631D1 and SOCI 631D2 are successfully completed in consecutive terms

Transcript Title: Integrative Seminar 1
Calendar Title: Integrative Seminar 1.
Description: Building on SWRK 222 Introduction to Practicum, the purpose of this integrative seminar is to facilitate links between theories, concepts and empirical findings introduced in coursework to observations and knowledge students garner from the field. This process will help students integrate their knowledge from the classroom and their experiences from the field into a useful and meaningful whole. In order to support the integration of theory, research and practice this seminar will also introduce students to principles and practices in field education that support student learning. In this way, students learn how they can maximize their field learning experiences.
Notes: Prerequisite: SWRK 322 Corequisite: SWRK 323, or with permission of the instructor.

Transcript Title: Addictions
Calendar Title: Addictions.

Description:
An introduction into the broad field of addictions with a focus on drug dependence. Students will have an opportunity to critically reflect and analyse the multiple approaches and models to treating addictions. Students will be provided with concepts and practical applications to screen, assess, evaluate, and intervene with multiple populations over the life span. Students will be exposed to different service providers in the area of addictions. Focus on a practical approach will highlight throughout the course with the intention of providing students with the necessary insight to respond within multiple settings. Perspectives on specific populations will be elaborated and key concepts and approaches to understanding the complexity of each. Students will have the opportunity to further their understanding of the factors and consequences of addiction over a life span as well as the impact on society.

Calendar Title: Thought and Theory Development in Social Work.
Description:
The purpose of this seminar is to explore the origins and historical development of social work theory. Included in the analysis of this development will be the impact of material, cultural and ideological shifts within society in general and social welfare in particular. Attention will also be given to the effect of changes within relevant social science disciplines on the process of social work theory development and its relation to intervention.
Notes:

Transcript Title: Urban Design and Planning
Calendar Title: Urban Design and Planning.
Description:
Fundamentals of city-building in Canada relative to municipal, regional, and provincial actions used to guide urban growth and development. Contemporary urban design in major metropolitan centres as shaped by legal, political, and cultural realities. Current preoccupations in city-building: reurbanisation and adaptive reuse of infrastructure, collaborative multi-stakeholder projects, strategic initiatives, changing relationships between professional experts and grassroots actors. Introduction to specific aspects of practice: public participation and community engagement; land development and real estate; project feasibility and implementation; policy monitoring and evaluation; emergent city-building regimes.
Notes:

Transcript Title: Real Estate and Planning
Calendar Title: Real Estate and Planning.
Description:
Basic concepts of real estate and property rights and how these are valued. The specificities of property markets and their segmentation. The paradox of real estate uniqueness. Actors and processes of real estate development and investment in practical terms (proforma analysis, investment analysis, leases and property management) and broader terms (institutional investors, financialization). Segmentation of development processes among local, supralocal and international actors, including consultants. Roles of the planner and planning regulations; how these affect property values and property development with specific reference to Québec planning legislation and powers. Market evaluation and analysis of the development potential of specific sites.

Notes:

Transcript Title: Urban Innovation & Creativity
Calendar Title: Urban Innovation and Creativity.
Description: Exploration of contemporary debates on creativity and innovation as inherently urban phenomena linked to interactions and 'buzz' that occur in urban contexts; discussion of policy impacts including how urban and metropolitan growth is premised upon the capacity to enhance creativity and innovation. Examination of what is meant by creativity and innovation, how they can be connected, and why they are seen as vital to economic development. Arguments for and critiques of 'creative cities' and 'innovative urban areas'. Creative class, geography of innovation, culture and urban development, metropolitan creative-city policies, geographic paradoxes that arise.
Notes: Restriction(s): Not open to students who have taken URBP 618 in Winter 2014 (when topic was "Creative Cities: Creativity, Innovation and Urban Agglomerations".

Calendar Title: Fisheries and Wildlife Management.
Description:
Principles of fisheries and wildlife management are considered and current practices of research and management are discussed.
Notes:
Prerequisite: WILD 307 or permission of instructor
A fee is charged to all students registered in WILD 401, Fisheries and Wildlife Management, a course that has a required field trip. This fee is used to support the cost of excursions, accommodations, food and fees associated with visiting research facilities where final projects are devised, and data are collected in the field (e.g., at the SUNY-ESF Adirondaks Ecological Center in Newcomb, New York). The Department of Natural Resource Sciences subsidizes a portion of the cost of this compulsory activity.

WILD 475
Credit Weight: 3
Transcript Title: Desert Ecology
Calendar Title: Desert Ecology.
Description: A three week field course exploring relationships between climate, geology, landforms, biodiversity, biotic adaptations and ecosystem conditions in the arid regions of Arizona and southern California. Focus is on the Sonoran and Mojave deserts but includes the transitions to adjacent grassland and forest biomes of the Sky Islands and Colorado Plateau. Exploration of issues arising from human use of land and water, and conservation in arid environments. Experiential learning involving team and individual projects and assignments before and during the field trip.
Symbols: ALTY - Taught in alternate years
Notes: Odd-numbered Winter terms; enrollment limited to 20.
The course begins and ends in Phoenix AZ. Students are responsible for their transportation to/from Phoenix.
The course requires camping and living under desert conditions.
Restriction(s): Restricted to U2 and U3 students.
Prerequisite(s): Permission of the instructors is required to register. To be eligible students are required to have at least one systems-focused course, one ecology course and two organismal courses. Students should consult the instructors for list of appropriate courses.
A course fee of $1,596.23 covers the cost of transportation, camping, admissions and most meals during the field trip.

Calendar Title: Intercultural Communication and Globalization.
Description:
Intended for non-native speakers of English who want to develop intercultural communication competency for travel, work, or living in a different culture. Explores intercultural communication and its importance for successful cross-cultural experiences. Identifies frameworks for analyzing different dimensions of cultural values, creating an awareness of the aspects of intercultural communication competency and its necessity for successful intercultural communication in the context of our rapidly changing, increasingly globalized world.
Notes:
Prerequisite(s): Entrance Placement Test or permission of the Director
This course is open to undergraduate/graduate students from accredited universities who are non-native speakers of English. A minimum high-intermediate/low-advanced level of English (TOEFL equivalent of 550) is required.

Transcript Title: Women and Constitutions
Calendar Title: Women and Constitutions.
Description: Examination of how constitutions shape women's rights. Taking a comparative
constitutional law approach, exploration of constitutional strategies for promoting gender equality, focusing on selected constitutional contexts including Canada, Asia, Africa and the Middle East. Analyzing the debates that shape constitutional jurisprudence. Topics include constitutional rights in the areas of social diversity, equality, the family and participatory constitution-making. Exploring significant developments in the field of feminist constitutionalism, how constitutional law is both a powerful force in the construction of women's subordination and a site of feminist struggle.

Notes:
Restriction: Not open to students who have taken LAWG 516 or LAWG 518 when the topic was "Women and Constitutions".
