

TB RESEARCH METHODS

DAY 1

8:30AM - 5:00PM

Mon • June 11

Introductions and overview

DAY 2

Tues • June 12

9:00AM - 5:00PM

Randomized trials

DAY 3

Wed • June 13

9:00AM - 5:00PM

Modeling and economic analysis DAY 4

Thurs • June 14

9:00AM - 5:00PM

Operational research

Day 5

Fri • June 15

9:00AM - 4:30PM

Molecular epidemiology, systematic reviews

GLOBAL HEALTH

PROGRAMMES DE SANTÉ PROGRAMS MONDIALE

McGill International

Interdisciplinary Initiative in Infection and Immunity

Course Location: Centre Mont Royal, 2200 rue Mansfield, 3rd Floor

Faculty and speaker information is available in the Whova event app

OVERVIEW OF SMALL GROUPS

Randomized trials

Bill Burman & Greg Fox Assisted by Andrea Benedetti (bio-statistician) as needed Interpreting RCT results - critical analysis and an applied / translational approach. This group will focus on the application of specific clinical trial results into TB program activities This will include a careful comparison of the study population to the program population, review of the feasibility of the study intervention to the program, how to prioritize evidence-based interventions when several have been tested in RCTs, estimating relative magnitude of the effect of different interventions on program outcomes, distinguishing statistical significance from programmatic significance. The group will choose the program area of interest to which we evaluate the applicability of RCTs. Participants are asked to indicate ahead of time about areas of particular interest, and reasons for that choice.

Systematic reviews

Faiz Ahmad Khan & James Johnston. Assisted by Andrea Benedetti A choice of two approaches is offered:

- 1. Practical aspects. Searches, file management, data entry, quality assessment, and meta-analysis. This group will have hands on experience with searches matching search strategies to the PICO, performing searches in different data bases. Saving searches and using different software to manage title selection. Data entry and meta-analysis using R.
- 2. Protocol development. If there is interest a subgroup will work on developing a systematic review protocol from PICO to registration.

Economic analysis

Olivia Oxlade, Alice Zwerling, Jonathon Campbell & Kevin Schwartzman This group will learn how to design an economic analysis, using a research question selected by the group. In preparing its research protocol, the group will discuss specific types of costs to consider, practical approaches to data gathering, key considerations such as economic perspective and target audience. The focus of the small group will be costing for economic analyses, and will not explicitly include modelling exercises.

Operational Research

Tony Harries, Dick Menzies & Gonzalo Alvarez. Assisted by Andrea Benedetti as needed This group will meet together on Day 1, and split into sub-groups for the rest of the week. Groups will develop protocols for operational research. Questions will be proposed by participants and shaped into feasible operational research projects by all members of each sub-group, with the help of the facilitators, who will each work with all groups – providing different perspectives and experiences.

DAY 1 AGENDA MONDAY, JUNE 11

Time

8:30AM

9:00-9:15AM

9:15-9:30AM

9:30-10:00AM

10:00-10:30AM

10:30-11:00AM

11:00-11:30AM

11:30-12:00PM

12:00-1:00PM

1:00-1:15PM

1:15-1:30PM

1:30-2:00PM 2:10-2:30PM

2:30-5:00PM (Includes Coffee

Break) 5:15PM

6:00-7:30PM

Registration

Welcome and Introductions

M. Behr

Course objectives and overview

D. Menzies

How will research End TB? The Global Action Framework for TB Research

D. Menzies

How will research End TB? What are the 'big' questions in global TB research?

B. Burman

Coffee Break

Quantitative methods – overview of study designs

D. Menzies

Qualitative methods - a complementary approach with a case study of understanding TB

stigma A. Daftary

Lunch

Late Breaker 1: "Fake basic science news"

M. Divangahi

Late Breaker 2: "A tale of two drugs: Capreomycin vs Linezolid for MDR-TB – results from the

latest analyses"

D. Menzies

DPSICO-TB - Developing study objectives - from a problem to precise questions

D. Menzies

Small groups: Organization – who, where, what?

D. Menzies

Small groups:

Overview of each topic by group leaders

Forming sub-groups and selecting objectives

Group Picture

Welcome Reception

Venue: Notman House / Osmo Cafe (51 Sherbrooke St W, Montreal QC H2X 1X2)

10 min walk on Sherbrooke—Food and non-alcoholic drinks free. Alcoholic drinks for purchase.

DAY 2 AGENDA TUESDAY, JUNE 12

Time

9:00-9:45AM

G. FOX

9:45-10:30AM

Clustered trial designs

G. Fox

10:30-10:45AM

Coffee Break

10:45-11:15AM

End-points, planned and unplanned secondary analyses, interim analyses, stopping rules

Trial design and selecting study populations-minimizing bias, maximizing generalizability

D. Menzies

11:15-12:00PM

Applying RCT results to practice – clinical and public health

B. Burman

12:00-12:45PM

Data analysis 101

A. Benedetti

12:45-1:45PM

Lunch

1:45-2:15PM

Debate "Basic science research in TB should not be publicly funded"

Pro: G. Fox Con: M. Behr

2:15-2:30PM

Late Breaker 3: "Fake news from molecular epidemiology: Linking genetic variants with drug-

resistance" M. Behr

2:30-5:00PM (*Includes Coffee Break*)

Small groups:

Finalizing the study question

Picking the design, study populations, and data sources

DAY 3 AGENDA WEDNESDAY, JUNE 13

Time

9:00-9:30AM Introduction to modeling— what it can do, what it can't

A. Zwerling

9:30-10:15AM Introduction to decision analysis

O. Oxlade

10:15-10:30AM Coffee Break

10:30-11:15AM Economic analyses – Not just Dollars and Cents

K. Schwartzman

11:15-11:45AM Key studies in economic analysis – questions, design & methods. Getting the most bang for

your buck!

A. Zwerling

11:45-12:00PM Discussion and questions

12:00-12:45PM *Lunch*

12:45-1:30PM

A. Benedetti

Data Analysis 101

1:30-2:15PM Beat the clock – Two teams will compete to develop study objectives in 5 minutes or less.

Questions selected from suggestions from participants

Team 1: J. Johnston, B. Burman Team 2: G. Alvarez. F. Khan

Judging – Is the question clear? (using DPSICO criteria)

T. Harries

2:15-5:00PM (Includes Coffee

Break)

Small groups:

Refining data gathering

Data analysis and sample size

DAY 4 AGENDA THURSDAY, JUNE 14

Time

9:00-9:45AM

Operational research - what, why, and how

T. Harries

9:45-10:30AM

Capacity building for operational research in low- and middle-income countries- the SORT IT Model

T. Harries

10:30-10:45AM

Coffee Break

10:45-11:30AM

Principles and structure of a research protocol

T. Harries

11:30-12:00PM

Examples of operations research changing policy and practice

T. Harries

12:00-12:30PM

TAIMA TB – the project, the successes and the lessons

G. Alvarez

12:30-1:00PM

TBD - Indigenous health research - what, who, and how

R. Long

1:00-2:00PM

Lunch

2:00-2:30PM

Late Breaker 1: "Fake Epidemiological News"

R. Long

Late Breaker 2: "Estimated impact of the World Health Organization latent tuberculosis screening guidelines in a low TB incidence region"

J. Johnston

2:30-5:00PM (Includes Coffee Break)

Small groups:

Finalizing protocols

Preparing presentations

DAY 5 AGENDA FRIDAY, JUNE 15

Time

9:00-9:45AM

9:45-10:30AM

10:30-11:00AM

11:00-11:45AM

11:45-12:30PM

12:30-1:30PM

1:30-4:00PM (Includes Coffee Break)

4:00-4:30PM

Molecular methods for typing and branding the tubercle bacillus

M. Behr

Molecular Typing for patient, outbreak and population-level studies of TB epidemiology

M. Behr

Coffee Break

Systematic reviews, and meta-analyses

J. Johnston

Individual patient data meta-analyses (IPD)

F. Khan

Lunch

Small groups:

Presentation of study protocols by small groups

Comments on study protocols

Moderated by: D. Menzies & F. Khan

Course evaluations and closure

D. Menzies
