

## **Lahey/McGill Simulation Fellowship and Master's of Surgical Education.**

Lahey Hospital & Medical Center in Burlington Massachusetts and McGill University in Montreal have established a two-year combined Simulation Fellowship in Health Professions Education with a Master's Degree in Education. The goal of this fellowship is to create leaders in medical and surgical education who are particularly interested in the use of simulation training to maximize student learning and help achieve institutional educational, patient safety and quality goals. Graduates of the Fellowship Program will obtain the skills necessary to lead graduate and postgraduate medical, nursing and allied health programs as well as conduct research to advance the field of medical education through simulation. The two-year fellowship will include a Master's of Experimental Surgery, Surgical Education Concentration at McGill University in Montreal and a 1 year experiential learning program at Lahey Hospital Medical Center in Burlington, Massachusetts. Ideal candidates will be Canadian surgery or anesthesia residents interested in an academic medical career with emphasis on educational program development and research. Applicants should have completed at least two years of a MD or DO residency program.

Applications are due May 1, 2017 for a fellowship beginning September, 2017 where the fellow will obtain the Master's degree at McGill. The experiential learning portion of the fellowship will start in June 2018 at Lahey.

Applicants must provide a personal statement no longer than one page outlining their interest in the program. They must also furnish their curriculum vitae and supporting letters from their program director. The fellowship stipend will include a 1 year salary commensurate with PGY level to be used during the year working at Lahey. The stipend will also include tuition for the master's degree at McGill.

Lahey Hospital & Medical Center is a physician-led, nonprofit group practice. More than 500 physicians and 5,000 nurses, therapists and staff work collegially to provide compassionate care and superior outcomes for more than 3,000 patients a day. Our simulation center is an Accredited Level 1 Education Institute of the American College of Surgeons where we train thousands of learners each year. Our training incorporates the latest modalities delivered by experienced faculty. Lahey is a major teaching affiliate of Tufts University School of Medicine in Boston. In addition to medical and nursing students, the hospital trains more than 130 residents and fellows every year. Lahey is located in the greater Boston area with easy access to top cultural and recreational activities.
