

Hi everyone,

The next TB journal club will be held this **Friday, November 30th** from **2-3pm** in conference room **3D.01*** at 5252 de Maisonneuve. Drs. Behr and Fregonese will be presenting the paper published in NEJM in September by Van Meeran on the *Phase 2b trial of the vaccine to prevent TB (M72/AS01)*.

As always, coffee and light snacks will be provided.

Looking forward to an interesting (and lively) discussion about this paper!

*Please note that the TB Centre Joint Seminar will follow the TB journal club, with ***presentations by Jeff Takle and Dr. Schwartzman***, from **3-4:30pm** in the kitchen.
