Cultural Psychiatry Day 2016

Physician Assisted Death

Learning Objectives

By the end of the event, participants will be able to:

1. Describe the impact of current developments, including the 2015 Supreme Court Decision *Carter vs. Canada*, on psychiatric practice
2. Identify the role of a psychiatrist in the assessment and management of physician-assisted death, from a cultural perspective
3. Discuss ethical, social, cultural, medico-legal, clinical, and systemic considerations related to physician-assisted death
4. Develop an approach when consulted on physician-assisted death, including issues around assessing capacity
