Jewish General Hospital

Elective Description

An elective, with a duration of 4 to 8 weeks, in Anesthesia Research is offered at the Jewish General Hospital under the direct supervision of Dr. Matthew Cameron. The elective will consist of carrying out a research project. Research can be retrospective or prospective in nature, although students with a 4-week elective will be limited to retrospective research so that they can ensure the project is completed during their elective time.

Elective Duration

4 to 8 weeks

Educational Objectives

- Expose the medical student to clinical research in Anesthesia
- Understand how to conduct a proper literature review
- Understand the advantages and drawbacks of retrospective and/or prospective research
- Submit an abstract to a clinical meeting
- Optional: submit a manuscript to a peer-reviewed journal

Scope of Work

Work hours 7:30-4:00, on-call schedule 1 call in two weeks (4 pm to 10 pm) operating room, and preoperative assessments in operating room.

Recommended Reading/Preparation

Anesthesia Primer Book - D2L
