Elective Description
<b>The Sport Medicine Elective June 2022-May 2023 is now <u>full</u>.</b>
<p>This clinical elective will expose the student to the field of Sports Medicine. The student shall become familiar with the presentation, preliminary investigations, conservative and surgical management of common acute and overuse sports-related injuries. The student will also become familiar with the diagnosis and treatment of medical conditions most commonly encountered by athletes of all ages. The student shall reach these objectives by attending clinics at the McGill Sport Medicine Clinic and the Montreal General Hospital, and helping to cover local university teams.</p>
