Elective Description			
<p>***This elective is not available for the 2021-2022 academic year***</p> <p>Open to all Clerkship (after TCP or Pediatrics) where space permits. Patients with tropical disease are seen in the daily tropical disease outpatient clinic and the elective student is one of the team of 1 or 2 students and/or residents and 7 staff who see those patients.</p> <p>The elective consists of 50% clinical work and 50% parasitology/laboratory work. Attendance at inter-hospital infectious disease conferences weekly, and regular tropical disease conferences is required. Students will work closely with the attending staff and laboratory technical staff, working up, presenting and investigating patients.</p> <p>For more information, click here.</p>			
Elective Duration			
Minimum 3 weeks
