Site
Montreal Children's Hospital
Elective Description
An opportunity is given to study the clinical aspects of general pediatric nephrology, hypertension, electrolyte disorders and end-stage renal disease including dialysis and transplantation. An emphasis is made on a pathophysiological approach to disease states.
Elective Duration
2, 4 weeks
Scope of Work
Seminars, biopsy conferences, case discussions and journal clubs are held, in addition to daily ward rounds and renal clinics (4 per week), including special clinics for hypertension, hereditary renal diseases; end-stage kidney disease and collagen vascular diseases.
