Elective Description			
<p>This elective is a clinical introduction to the whole range of malignant diseases and to the management of cancer patients. There will be opportunity to examine patients from the entire spectrum of malignant diseases. Time is spent mainly with the out-patient department. The clinical assessment of patients and the process of determining the appropriate management of cancer patients are strongly emphasized. There will be ample opportunity to attend rounds and conferences pertaining to oncology.</p> <p>Interested students may also participate in clinical research projects or in laboratory research in the area of radiation physics or radiobiology. This elective is offered during Clerkship periods and may be of 2 to 4 weeks duration. A maximum of 2 students may participate at any given time. We will not be accepting students during period 1 and 7.</p>			
Elective Duration			
2, 3 or 4 weeks
