Site

MUHC: Montreal Children’s Hospital

Elective Description

Can accept up to two students at a time. Inpatient experience will consist of pre- and post-op care on ward and ICU patients, clinics and OR experience under the supervision of the Chief Resident and Staff Pediatric Surgeon. In both areas, the Emergency and Surgery Clinic, and indoor wards, students will have ample opportunity to participate in all phases of clinical care. Opportunities may be offered for in-depth studies of either a clinical or research nature as suitable problems present. Students in both areas will be expected to attend all resident teaching sessions.

Elective Duration

2-4 weeks depending on current roster of residents and students (preferably 4 weeks).

Educational Objectives

Exposure to pediatric general surgical diseases, able to interact successfully with pediatric patients, their families, Team staff and other pediatric services.

Scope of Work

Participation on Ward AM rounds and perform “template” daytime duties (OR, clinic, assist resident in daytime call, participation in academic rounds).
