Elective Description			
<p>The purpose of this elective is to familiarize the medical students with all aspects of neurological disorders and their surgical management. Students will be participating in clinical and teaching activities as well as attending Grand Rounds and special lectures.</p> <p>Electives can be done in 5 adult services at the MNI and 1 pediatric service at the MCH.</p>			
Elective Duration			
2, 4 weeks			
Educational Objectives			
List, interpret and understand the clinical risk factors and diagnoses of intracranial disease (traumatic and non-traumatic disease), intraspinal disease and peripheral nerve disease. History and neurological physical examination.			
Prerequisites			
Medical students of recognized universities.			
Scope of Work			
The students are not expected to take any calls unless they are interested in doing so along with a neurosurgical resident. They are aware that they are free to leave if they are to surpass their permitted workload as per the faculty's policy (10 hours).			

Attendance to clinic (not shadowing but independent patient assessment).

Operating room exposure.

Peri-operative in-patient management (wards).

Recommended Reading/Preparation
