Elective Description
This elective is available to one student per period, either at the Clerkship level. It will expose the student to an overview of general Plastic Surgery with an emphasis on microsurgery, head and neck reconstruction and breast reconstruction. There is a busy consult service in which the student is expected to actively participate.
Scope of Work
There are at least three clinic periods per week that will expose the student to a broad cross section of pre-op evaluation and post-op care. Because there are usually no residents on the service, the student will be able to participate more directly and will have more responsibilities in accordance with their level of ability. This includes an intense operative experience. There are weekly service rounds where he/she will be expected to prepare a formal presentation as well as at least 4 other informal presentations on topics designed to address areas of interest or deficiencies. McGill University Inter-hospital Plastic Rounds are held every Wednesday and students are encouraged to attend and participate.

Coordinator	Kristy Moraitis	Telephone	(514) 934-1934, x 48047
		E-mail	plasticresidency.med@mcgill.ca

Elective Description

Available to one student. The course is designed to offer the student a broad all-encompassing overview of the various fields with which reparative surgery is involved. During the study period, the exposure may reasonably be expected to familiarize the trainee with the basic approaches to fundamental techniques of hand surgery, maxillofacial surgery, soft tissue procedures of the trunk and lower extremities with exposure to myocutaneous flaps, care of burns and microsurgical procedures.

The student will participate in daily ward rounds, weekly rounds and seminars in order to witness decision making processes, pre- and post-surgical care, etc. Follow-up clinics in plastic surgery and hand surgery are held three times weekly at the Montreal General Hospital and active participation is expected. McGill University Inter-hospital Plastic Surgery Rounds and Seminars are held every Wednesday afternoon during the academic year and students on electives are encouraged to attend and participate. A limited situation exists for the exposure of students to laboratory techniques of wound suturing and microsurgical techniques. In summary, participation will be as a full member of the Plastic Surgery team and the opportunity for exposure to both elective and acute surgical situations is more than ample.

Important Note: Please note that we won't be able to accept any more students during [Block 7](#) at the Montreal General Hospital.

Undergraduate Medical Education Elective

Royal Victoria Hospital			
Contact Information			
Supervisor	Dr. Omar Fouda Neel	Telephone	(514) 934-1934, x 48047
Coordinator	Kristy Moraitis	Telephone	(514) 934-1934, x 48047
		E-mail	plasticresidency.med@mcgill.ca

Elective Description

Available to 1 Clerkship student. The student will assist in the care of in-patients and will have an opportunity to attend two out-patient clinics a week. Basic plastic surgery techniques (skin grafts, hand fractures, repair of lacerations, burn care, facial trauma, and hand fractures) will be mastered and fundamental suturing skills improved. The student takes an active role on the service.

Important Note: Please note that we won't be able to accept any more students during [Block 7](#) at the Royal Victoria Hospital.
