

**McGILL UNIVERSITY
DIVISION OF UROLOGY
VISITING PROFESSOR**

Dr. Lunelli specializes in urological oncology with a focus on prostate and bladder cancer. Since September 2019, he has been a senior consultant at Chartres Hospital. There, he developed focal treatment for localized prostate cancer by establishing an integrated pathway of mpMRI, targeted biopsies, and targeted, computed, MRI-US elastic fusion treatment by Irreversible Electroporation (IRE). He has performed IRE at Tenon since 2015, participating in the CROES International IRE Registry. He also performs targeted MRI-US elastic fusion biopsies with the Koelis Trinity station and has cooperated with radiotherapists on prostate brachytherapy since 2015. He worked as a full-time consultant at Tenon Hospital (AP-HP), Paris, from 2014 to 2019, where he trained in endoscopy and stone management. His activities include laparoscopic surgery, mainly partial nephrectomy, and kidney transplant.

Dr. Lunelli received his education in Italy and France. In 2017, he completed a Ph.D. thesis titled “Molecular profiles predictive of metastatic potential of infiltrating bladder urothelial carcinoma” through Pierre et Marie Curie University–Sorbonne Universités and the University of Milan, supervised by Professor Olivier Cussenot. In 2012, he completed a life-changing internship at Montsouris Hospital, Paris, with a focus on robotic and laparoscopic urological surgery, writing a thesis “Indocyanine Green under Near Infrared Light for Laparoscopic partial Nephrectomy,” supervised by Mr. Eric Barret (Institut Mutualiste Montsouris). He also studied medicine and completed part of his residency program in Milan.

Dr. Lunelli is registered with the British Medical Council and the French medical regulatory authority. He has organized international IRE workshops in Paris for urologists and radiologists. The father of two boys, he is passionate about “no dig” vegetable gardening and permaculture. He speaks Italian, French, and English.

**LUCA LUNELLI, MD, PhD
Urologist, France**

ROYAL VICTORIA HOSPITAL

Wednesday, November 30th, 2022

5:00 - 6:30 pm

McGill Urology Grand Rounds Lecture

“Focal Irreversible Electroporation (IRE) For Prostate Cancer”

Room DS1.1427

JEWISH GENERAL HOSPITAL

Thursday, December 1st, 2022

7:30 - 8:30 am

Division of Urology Service Rounds

“Focal therapy of prostate cancer”

Room E-944

(off-site: see Microsoft Teams link in email)
