For Web projects, Roboto, Roboto Condensed and Lora, which are free Google Fonts, can be used as stand-ins for PF Din, PF Din Compressed and Sentinel respectively, if budget does not allow for the use of the latter. They exist in different weights and styles.

This substitution is approved for Web only.

When sharing Word, Outlook or PowerPoint files with a large number of people, it is best to use a system font for the body text so that installation of a new typeface is not necessary. In these instances, we recommend using Calibri.
